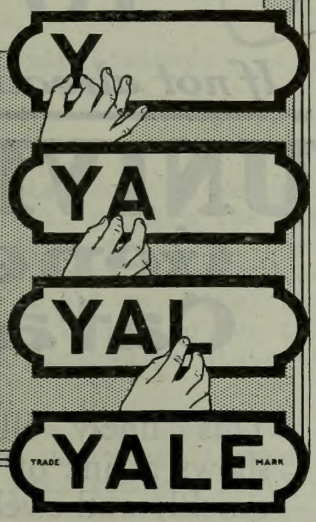
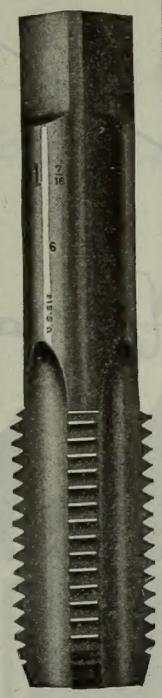
## The Popular ALUMINUM

HARDWARE AND METAL, September 27, 1919. Volume XXXI., No. 39. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

BUILT upon the quality of the goods themselves, Yale Padlocks, Night Latches, Door Closers and Builders' Hardware, Yale prestige exerts a powerful consumer demand that is capitalized by the Yale dealer.



It is profitable to stock a line so well known, so extensively advertised throughout the Dominion, and so certain to give satisfaction.



You are invited to inspect our plant at St. Catharines, Ontario.

# Take your pen in hand and tell us about Toncan Metal

## Here's what a Hamilton man tells us.

April 5, 1919.

The Pedlar People Limited,
Toronto, Ont.

Gentlemen:—

In reply to yours of March 19th, state that I will let you know when I shall require the #16 ga. Toncan Metal which you have in stock. This firm, the W. H. Freeman Company, will have no other metal. In past years in different parts of their plant I erected pipes made from #16 ga. steel which would last only two years, and eight years ago I erected for the same purpose #16 ga. Toncan Metal pipes, and am pleased to state the same pipes are only now showing rust spots.

I feel sure that Toncan Metal is given the severest test at this factory. Nine years ago I erected a 30" evaporating pipe from Brew Kettle, made from #18 ga. steel at the Hamilton Brewing Association, 50' long. It lasted only 18 months. I then erected a #18 ga. Toncan Metal pipe in its place, and to-day it is still in good condition.

Other firms, such as the B. Greening Wire Co., the H.O.C., the Pure Milk Co., and other customers of mine claim that Toncan Metal has proven to easily stand in use three or four times as long as the same gauge steel, and wherever a customer requires a durable metal, I recommend Toncan Metal.

Yours truly,

(Sgd) G. W. SMITH.

For every severe sheet metal service from roofing to culverts, from tanks to conductor pipe, Toncan Metal offers greater economy and greater satisfaction for your customer. Write to-day for our "Corrosion Book."

## THE PEDLAR PEOPLE, LTD., OSHAWA, ONT.

# If you've never used Toncan Metal, let us tell you how it Resists Corrosion.

# Display Sells Razors

The cutlery counter in most hardware stores stands near the door, where the customer lingers, looks around, and wonders what he forgot to buy.

Men are always on the lookout for good razors. The GENCO Display Case, sent you with your first order of GENCO Razors, gets their attention.

The handsome case will make them look more closely. Your salesman then simply reaches under its glass top and says: "Just examine the edge on this razor."

In a few minutes your cash register will ring. And your customer will be a satisfied customer. For the GENCO Razor has an edge that we guarantee: "GENCO Razors must make good or we will."

# Garage Sets

Swinging door construction has many advantages for garage use. They are close fitting and weather proof. The cost is less than for hanger and rail outfits.

This set is provided with a loose-pin, reversible "T" hinge. This may be used as a full surface hinge, or the "T" part can be reversed and mortised in the jamb. If desired the hinge pin may be rivetted slightly after installing, preventing removal.

One set consists of the following, packed in a neat, strong carton, with screws:

3 pair 8-inch Reversible "T" Hinges.
1 only No. 820 Chain Bolt.
1 only No. 830 Foot Bolt.
1 only No. 5 Door Pull.
1 only No. 29 All-Steel Latch.

Set No. 801, same as above, except a No. 27 Latch instead of No. 29 All-Steel Latch.

The following finishes are carried regularly in stock—Japan, Dead Black Japan, Sherardized, Sherardized and Dead Black Japan.

Weight, per set, 12½ pounds.

## 800-801 Garage Sets

These neat, good-looking and serviceable garage sets are worth immediate attention. Automobile factories cannot keep pace with the remarkable growth of the sales. These sales mean new garages, and garages require suitable hardware. Are you prepared for the inevitable result of this cause and effect?

Are you ready to offer National Hardware to the purchaser that wants to buy **now?**

## National Manufacturing Company

STERLING, ILLINOIS

# ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

**OUTFIT INCLUDES**

- 3 Special Swivel Door Rollers

# Williams' "Vulcan" Chain Pipe Vise

THIS Vise is one of the most remarkable of our products. It is the result of many years of careful study and comparison of many pipe vises—their advantages and weaknesses.

Williams' "Vulcan" Chain Pipe Vise is the *only* pipe vise made wholly of wrought steel and is stronger, lighter and more compact than the old style, conventional cast tool it is rapidly superseding. It embodies all the desirable qualities of a really superior pipe vise for it is unbreakable and combines positive grip, powerful action and rapid adjustment with ease of attachment anywhere.

Three sizes—1/8 to 8-inch pipe. Descriptive booklet free.

# "I used to use Gargoyle Mobiloils"

## A remark which dealers almost never hear

THE reason is not hard to find. Users of Gargoyle Mobiloils *always* come back for more.

Hardware dealers have found that their business grows fast when they stock the complete line of Gargoyle Mobiloils and keep their stock complete.

Read what four dealers have said from their own experience:

**Dealer No. 1**—"When we sell a Ford owner Gargoyle Mobiloil 'E' he always calls for it."

**Dealer No. 2**—"I have sold nothing but Gargoyle Mobiloils in my garage for three years. It is a comfortable feeling, when a transient comes in for oil and asks what you have and you tell him Gargoyle Mobiloils, that he invariably says: 'Fill her up. I know that oil is all right.'"

**Dealer No. 3**—"In overhauling cars I have found that in motors which have used Gargoyle Mobiloils the gears are in much better shape, there is less dirt and carbon in the cylinders and the whole motor is in better shape."

**Dealer No. 4**—"We have been selling to our trade and using Gargoyle Mobiloils exclusively for the past four years and have found it to be the best. We are now buying Gargoyle Mobiloils and Greases in carload lots."

ARE you building a secure trade for your store by selling Correct Lubrication?

The Chart of Recommendations and the complete line of Gargoyle Mobiloils are all that you need to get and hold this profitable trade.

BRANCHES IN ALL CITIES

# BETTER THAN OTHER OILS ~YET SELLS FOR LESS

THERE'S no better, stronger selling combination in an oil than this! **Better quality—lowest retail price.** What more could the consumer want or ask for? Certainly every customer who buys coal oil for heat, light or power wants the best—and at least cost.

Imperial Royalite Coal Oil combines both features. It meets every test that can be applied to oil. It costs the consumer less per gallon. It is pure, high-grade coal oil, highly refined, exactly right for the oil heater, cookstove, lamp and for the farm tractor or stationary engine.

You pay less for Royalite than for other brands. Your profits are greater, because you will sell more individual gallons of Royalite than the higher-priced oils.

When you consider that Royalite surpasses any coal oil marketed in Canada, and would be cheap if sold at the higher price, you get an idea of its great selling qualities.

Imperial Royalite Coal Oil is always available. You can get it any time on short notice. It is advertised throughout Canada. It is the product of Canada's largest, best-known oil company, whose name stands for everything that is best in producing, refining and marketing.

Royalite is worthy of your constant recommendation.

*"Made in Canada"*

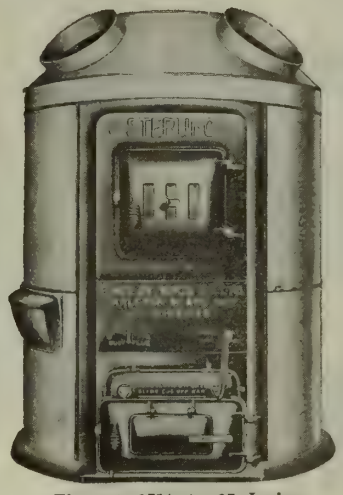
## Quality

Quality is defined in the dictionary as, "that which makes a thing what it is."

That — quality — which has made C. G. E. Wiring Devices what they are — is perfection.

Moreover, the quality is consistent to-day — to-morrow — or next year.

Let quality be your standard and specify C. G. E. Wiring Devices.



Our nearest Sales Branch will be pleased to give full particulars.

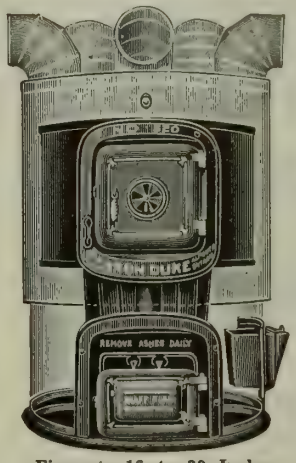
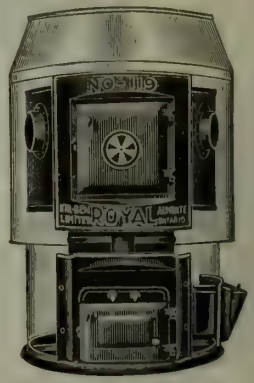
# A Furnace For Every Need and When You Need It.



Fire-pots 17½ to 27 Inches

**"The STERLING"**—For the unusual heating proposition that requires a furnace with a large amount of heating surface and one that will deliver large volumes of fresh warm air, the Sterling has no equal. In fact, the Sterling is so unlike other heaters in the results produced that there is no logical basis on which others can compete with it. "It is a fuel saver; nothing better in the field"—writes a customer. You don't have to make promises with the Sterling, but make substantial claims.



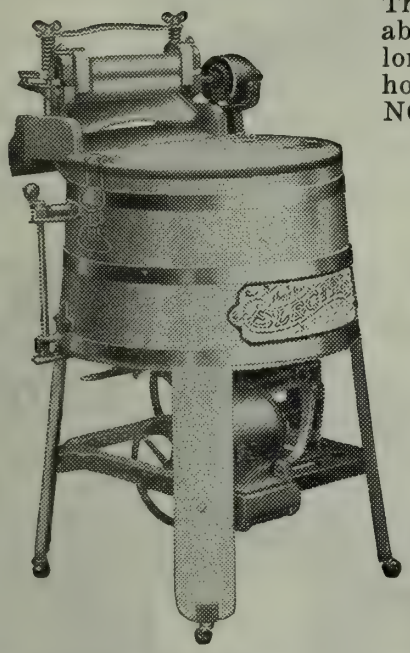
Fire-pots 17 to 29 Inches

**"The KIR-BEN"**—Needs no introduction to most of the trade. It is now a tried and tested product and is known to be a strictly high-grade heater. Dealers in every section of the country are developing a big business with the Kir-Ben. It is easy to sell because one sale invariably leads to another. Satisfied users are your best sale promoters.

Fire-pots 16 to 20 Inches

**"The IRON DUKE"**—A furnace of low construction particularly adapted to houses with low cellars, but equally as effective when installed in houses with high cellars. By installing a furnace of this construction the proper pitch to the hot air pipes may be obtained. The Iron Duke is a medium-priced furnace with all the best features of the better grade of heaters.

Fire-pots 16 to 20 Inches



**"The ROYAL"**—After all arguments have failed to talk quality and price, don't "give up." We build this furnace especially to meet competition. And in spite of its low price, it is a far better furnace than most furnaces which sell for more money.

# Is the Alien a Menace?

IN the October issue of MACLEAN'S MAGAZINE a strong presentation is made of the reason why the people of the West are against further foreign immigration.

"The Menace of the Alien" depicts the foreign problem in the Canadian West as it exists to-day, and shows every one of us why we must Canadianize our Ruthenians, Austrians, Slovaks, and our fifty-seven other varieties before we allow any further "unrestricted" immigration.

This article is written by a member of MACLEAN'S MAGAZINE staff who has just returned from a careful, personal investigation of the situation. Shall we have a "White West?" Many Westerners are demanding it. Are the aliens to swing labor into the bosom of the O.B.U.? It is being done—and what must we do to stop it?

The "inside" story of the routing of the Drumheller miner aliens by returned Canadian war veterans is here told by MACLEAN'S for the first time. What leadership must be substituted for the O.B.U. leadership of these foreigners?

*The October issue of MACLEAN'S is a Western number in the sense that it contains many articles and stories of distinctly Western interest. For instance:*

### X "Those Pesky Farmers Out West"

*By Hopkins Moorhouse, Author of "Deep Furrows"*

They have completely upset the old order of things. No longer will politics consist of the comfortable fight between the Ins and Outs with the old party lines maintained. The grain growers on the Prairies have upset the calculations of the professional politicians and completely changed the face of Dominion politics.

### X "Fifty Years in the West"

*By Professor W. T. Allison*

A breezy and readable sketch of the business career of Winnipeg's veteran business man, James H. Ashdown.

### "Further Discoveries of New Land"

*By Vilhjalmur Stefansson*

The final and most interesting instalment of Mr. Stefansson's story of his wonderful trip of five years' duration in the Canadian north in which he tells for the first time of finding new continents in the Arctic and hoisting there the Canadian flag.

### X "The Banshee Bell"

*By Edith G. Bayne*

A bright love story laid in the mountains of British Columbia.

## *Other Splendid Features of October MacLean's*

### X "The Turmoil at Ottawa"

*By J. K. Munro*

A comprehensive survey of Dominion politics, written with complete impartiality and absolute candor. It is bright and breezy, with a knock in every line for the politicial opportunists. It plucks many tail feathers from our party leaders.

### "Spanish Doubloons"

*By Camilla Kenyon*

The start of a bright and fascinating serial story by a brilliant young writer. It is the Spanish Main brought up-to-date, treasure hunting with a background of fun and romance.

### "The Airy Prince"

*By Arthur Beverley Baxter*

A complete novelette in which is presented a bird's-eye view of England in time of war. It is one of the most brilliant stories that has been written of recent years.

### "His Majesty's Well-Beloved"

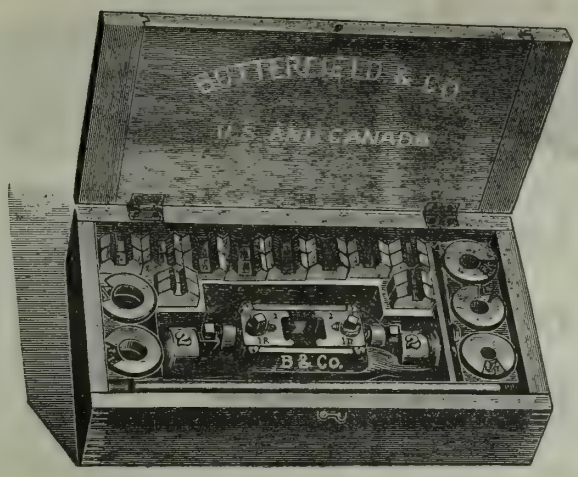
*By Baroness Orczy*

The latest novel by this popular authoress appearing exclusively in MACLEAN'S.

### "Ebb and Flow"

*By C. W. Stephens*

A strong business story laid in the province of Quebec.



*Over 70,000 Canadian Families Buy*

# How Long Will the Strike Last?

## Views of Men in the Trade as to Effects on Canada—Is Bolshevism Behind the Walk-out?—The Points Demanded by the Men Who Are Out

"HOW long is the steel strike likely to last and what will be the effects on business in Canada?" This is the paramount question in the trade to-day and it is apparent everywhere one goes that hardware merchants and men in the iron and steel trade have it uppermost in their minds.

The first effect of the big walkout has been to stiffen the market and a distinctly upward tendency is expected. Already there has been a rush for sheets and bars that has left many of the jobbers with stocks badly broken up. To replace these, if replacement is possible, they expect to have to pay more money, and this increase will have to be met by the subsequent buyers.

### How They View It

"It is going to be a serious matter if the strike continues for any length of time," said T. B. Williamson, of H. S. Howland Sons & Co., Ltd., Toronto, to HARDWARE AND METAL. "Shipments that are badly needed will be held up and stocks will be depleted without any chance of replacing them. It is impossible to tell anything about how long the tie-up will continue. A great many of the employees of the Steel Corporation are stockholders in the firm and will not go out. The corporation may be able to keep enough men at work to take care of a fair amount of business. If this is the case it will help matters considerably. If the railwaymen and others are called out there is no telling what will happen."

### Rush For Sheets

"The first effects of the strike were to cause a rush of business," said Geo. T. Pepall, manager of M. & L. Samuel Benjamin Co., Toronto. "Some dealers discovered that they were out of certain sizes and at once got busy trying to fill up their stock. The ones who came early got the goods, the others will have to wait, as stocks are nowhere heavy. Business has been excellent and unless it is checked by the strike I think we were entering the greatest period of prosperity Canada has ever known."

### May Help Canada

"The strike may help Canada in the long run," said another man in the trade. "Canadian steel men will perhaps have a real chance to show what they can do. I would not be surprised to see the Steel Corporation proceed more rapidly now with its big new plant at Ojibway. Work has been going along on it steadily for some time and the strike may mean that it will be accelerated."

### Sees Higher Prices

T. P. Howard, president of the Phoenix Bridge and Iron Works, and president of the Canadian Manufacturers' Association, believes that the tendency of prices on steel, particularly structural steel, of which his company uses large quantities, will be upward, and the extent of these advances will depend upon the duration and seriousness of the strike. Mr. Howard stated that, at the present time, it was quite impossible to forecast the probable trend of events.

Asked as to the probable length of time supplies available in Canada would last, should it be impossible to secure uninterrupted deliveries from the American mills, Mr. Howard was of the opinion that these would not last long. Raw material has been pretty well absorbed as received from the big producers across the line.

At the present time, conditions in Canada are fairly satisfactory, Mr. Howard said.

### Plenty of Work

T. H. Diplock, of the Steel Company of Canada, Ltd., is of the opinion that the steel workers will not be encouraged to leave their work in Canada in view of the fact that there is plenty of work available here. The Government action in the States, he hopes, may be of value at this time, and it may succeed in bringing about amicable settlement.

As far as supplies of material go, Mr. Diplock stated that these were fair. Finished products have been moving well, nails have been a big seller and the outlook at this time is quite satisfactory. Much depends, of course, on whether the Government enquiry and action will bring about an early settlement.

### Is Optimistic

W. Beverley Robinson, president B. & S. H. Thompson and Co., Ltd., representing large United States Steel interests in Canada, is hopeful that various lines of steel handled by them, and which form the basis of quite a number of steel products sold through the Canadian hardware trade, will still be available, even though the strike continues for some time. Mr. Robinson pointed out that workmen in some of the mills had not gone out and that unless these mills found it difficult to procure certain raw materials they required from other producers, there would not be any real difficulties at present. Such lines as plates, sheets and some sheet material used in the manufacture of stoves would continue to be available for the time being, at least.

Mr. Robinson is of the opinion that there is not a great deal of material on hand in excess of immediate requirements. Mills are behind on production. The steel men are, of course, hoping for a favorable outcome.

Continued on page 55

### *WHAT THE MEN DEMAND*

*The twelve demands of the steel workers are:*

*Right of collective bargaining.*

*Reinstatement of men discharged for union activities.*

*An eight-hour day.*

*One day's rest in seven.*

*Abolition of the 24-hour shift.*

*Increase in wages sufficient to guarantee American standard of living.*

*Standard scales of wages in all trades and classifications of workers.*

*Double rate of pay for all overtime, holiday and Sunday work.*

*Check-off system of collecting unions dues and assessments.*

*Principles of seniority to apply in maintenance, reduction and increase of working forces.*

*Abolition of company unions.*

*Abolition of physical examination of applicants for employment.*

# Get After Electrical Trade

## Splendid Opportunities in the Fall For Sale of Labor-Saving Appliances — Don't Forget the Presents For Brides—Big Sales of Electric Heaters Are Being Made

THE fall season offers splendid opportunities for business in electrical goods. Electrical utilities such as vacuum cleaners, chafing dishes, percolators, irons, toasters and similar lines make ideal presents for the numerous brides who are starting housekeeping this fall. Besides the Canadian girls who are getting married this fall there are many thousands of soldiers' brides, who are just getting settled in new homes and every one of them is a prospect for the hardware merchant who has electric irons, heaters, and other electrical goods to offer.

Don't wait for these people to come in and ask about the goods. You will sell many times as much merchandise if you let the people know that you have the stock and that they can get it at your store.

### Boosting Business

Take the question of heaters, for instance. There have been some chilly nights recently, and right after the first of them a dealer in a Western Ontario city put in a whole window full of electric heaters. In figures eighteen inches high in red paint, he put "10" on his window and show cards in the window, directed the attention of prospective buyers to the price, to the heaters, to the cool evenings, and to the comfort a heater would bring to any home.

He backed his window display by the following advertisement:

**NOT MANY PEOPLE HAVE MONEY TO BURN NOWADAYS**

and that's exactly what you are doing—BURNING MONEY—when you start a coal fire this early in the season (with coal at $13 a ton and likely to go higher).

**GET A —— ELECTRIC HEATER AND SAVE YOUR COAL FOR THE WINTER**

You will be surprised how quickly one of these little ELECTRIC HEATERS will chase the chills from the room. And they are so handy, too. Can be used in any room in the house that's wired.

**AND THE COST OF OPERATION IS ONLY ONE CENT PER HOUR OR**

**About One-Quarter the Cost of a Coal Fire**

Our —— No. 5 is a dandy heater for this kind of weather and the price is only $10.00.

**LET US SEND YOU ONE TO-DAY**

### Got the Results

Did he get results? He surely did, and is still getting them. He not only sold heaters to a number of people in the city, but to people in outside points, and besides selling the heaters he says that two washing machine sales are to be traced to his advertising, as out-of-town people, who came in for heaters, ordered washers. One of the buyers came from a town thirty miles away.

*Here's a simple little ad. that should bring big results. Its seasonable and convincing.*

With such a tremendous building boom as there is at present there is a splendid chance for the hardware merchant to sell fixtures and lights, as well as the specialties and many merchants are doing this and making some excellent profits.

### Get After Electrical Trade

What the public wants now more than ever before is equipment that will save time, save labor and save money. The answer is found in things electrical and this is the real reason why phenomenal sales of electrical devices of all kinds are being made and why any number of hardware merchants will tell you that handling electrical specialties, supplies and fixtures is not only a profitable business, but comparatively easily handled. A great many of the lines now being offered are so widely advertised, so attractively made and so obviously efficient in operation that they are more than half sold.

### Knows About Them

In nine cases out of ten the prospective buyer knows all about, or at least a good deal about what the goods he wants will do before he or she comes into the store. More women in Canada to-day know that washing machines will help take the drudgery out of washing than ever before. They know because they have read about washers and because they have seen them working, and because they have heard their friends sing the praises of machines they purchased. The washing machine has made good and that is why the manufacturers of washers are finding it very difficult to make enough machines to fill their orders.

This is merely an example of what is happening generally in the electrical field. More vacuum cleaners have been sold so far this year than ever before, and, it is stated, that 1919 will be the record year generally for sales of all kinds of electrical goods. This is because the people know that electricity is quick, it is dependable, it is economical and it is efficient. There is another reason also: The people have the money to buy, and they are going to buy anything that does the things they want done easier and better than they were done by the old methods.

*Here is a simple direct appeal that will be read with real interest by home-makers all over the country. Note the wording, just as if the salesman was talking to the customer, and the prominence given the price.*

# Seasonable Window Suggestions

*It would be hard to find a combination window display that carries more that is of interest to mere man than the displays shown above. Many hardware merchants work on the principle that it is not good policy to mix displays. The two shown above are not mixed. Each is complete in itself. Don't forget price cards when arranging displays of this kind.*

*"Do It Electrically" is a slogan that has taken hold of public fancy and is resulting in enormous sales of electrical utilities of all kinds. With thousands of new homes being erected this fall and thousands of people getting back to housekeeping, there will be a big call for electrical equipment. A window display such as is shown above carries a broad appeal to homemakers.*

# Some Dainty Show Cards

## Many Firms Use the Small Neatly-Lettered Show Cards for Both Store and Window Displays—They May Be Easily Kept Seasonable and Changed Quickly.

By R. T. D. EDWARDS

THE show card writer, whether he is a window trimmer or not, can do a great deal in encouraging the trimming of better merchandise displays by making show cards of such a dainty nature as to compel the trimmer to make better displays in order to be in keeping with the cards. In fact, better card writing in the interior, as well as the windows, encourages the better displaying of the merchandise on the counters.

It works vice versa also. If the cards are inclined to be poorly made the window trimmer can make his displays show up the poor show card so that it is absolutely necessary for better show cards to be made.

### Use Small Cards

The modern method of display demands small cards. Hardware can be displayed in a very neat and attractive manner in windows with small suitably worded cards such as are illustrated. The small cards may be used in a prominent position in the display so that they may be easily read by the customer.

When you look at it in a commonsense way it stands to reason that the small card is better than a larger one. The smaller card takes up less room in the display, therefore, you have more room to show the merchandise.

### Is Easily Read

The smaller card, when lettered neatly, can be as easily read when close up as the large card. Clerks never shout at the customer, so why should a heavily printed large card be used in a good display?

The small show card was first introduced by the department stores on this continent, and have become quite the rule. In fact, large cards for good displays are uncommon and are often looked upon as more or less cheap.

*SEASONABLE SHOW CARDS*

*Are You Going Hunting This Fall? We Have Everything You Will Need. Come In and Let us Supply You From Our Big Stock.*

*One of These Electric Heaters Will Chase the Chills and Keep You Comfortable These Cool Evenings.*

*Let us Show You How Our Washing Machines Will Save Half Your Time and All the Hard, Heavy Work.*

*Now is the Time to Finish Up Your Painting. We Carry a Complete Stock, and Will be Glad to Give You Expert Advice.*

*One of These Stoves Will Give You Years of Real Service and All-round Satisfaction. Come In and Let Us Tell You About Them.*

*For a Real Bargain in Enamelware You Can't Beat This.*

*Our Stock of Auto Accessories is Complete and Our Experience is at Your Service.*

*Your Wife Would Enjoy Using One of These Electric Irons.*

*Our New Steel Ranges Are Beauties. Let us Demonstrate How They Will Save You Money.*

*Seeing is Believing. Can You Beat This Aluminum Ware For Price or Quality?*

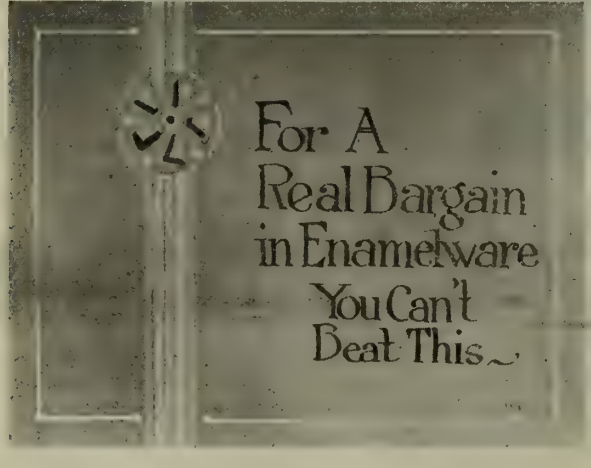
The large stores select a rather small card with a design suitable for the season of the year it is to be used, and carry that card all through their windows. Then when a change to another variety is made, it is all done in a day. Uniformity is the idea and so it can be done in either hardware, grocery, dry goods or men's wear stores just the same. The small card has a great advantage over the larger one because it can be carried out in the windows and interior of the store very quickly on account of so few cards being required.

### Are Very Attractive

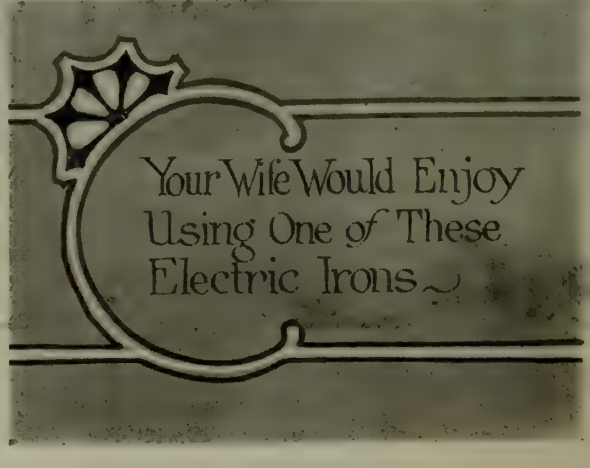
The examples of small cards illustrated on this page are exceptionally good ones. They are very attractive in design and the colorings are of fall hues.

Both designs are of a conventional order and are illustrative of Fall flowers. The shades used are red, orange, light brown, blue and white, all in opaque colors. These are only a few of the combinations that may be used to produce effective results.

The colors may be changed around so that you get a variety of effects, but still have the same design.



If many cards of one design are desired, make an outline drawing in pencil on a piece of tough paper first. This may be used with the aid of tracing paper to draw as many as desired very quickly.



The placing of the opaque colors is a simple matter after the layout is marked out.

Try these designs for your Fall store and show cards.

---

The ratepayers of New Westminster, B.C., carried a by-law bonusing the Canada Western Cordage Co. The firm is capitalized at $300,000, and work will be commenced very shortly on a new plant to cost $80,000.

# Hot Shot for the Advertising Slacker

## An Important Summary of the Situation as It Exists in Many Places To-day With Suggestions as to What Can be Done to Overcome the Troubles Many Merchants Bring on Themselves

AS a representative of the MacLean Publishing Company the writer has just completed a tour of Western Canada, which has taken him to upwards of 100 towns in Manitoba, Saskatchewan and Alberta. He has called on most of the business houses in these towns, and in every case the publisher of the local newspaper. The question of advertising has been discussed with both merchants and publishers from every angle. A critical survey has been made of the display announcements in the various weekly publications.

The outcome of this investigation is the firm conviction that either through negligence or absolute ignorance of modern advertising methods, the merchants of Western Canada are ignoring one of the most powerful weapons they have for combatting the mail-order business.

> "The merchant in the small town is competing against the best brains in the advertising world, employed in getting out great catalogues that are a delight to the eye, with their attractive cover design, their wealth of illustrations, and the cleverly worded and set up announcements that appear on every page. Every page is like a circus bill, to excite the imagination and stimulate a buying impulse that is irresist ible.
>
> "Does the advertising of the home merchant stimulate the imagination? Well not that you could notice, in the average case."

It is almost pitiable to pick up many of the country weeklies and find throughout the stereotyped forms of advertising that have been doing service since the day of the Pharoahs, when they were first chiseled in stone. No punch, no originality, no cuts, nothing spectacular, attractive or compelling. It was in these towns that the merchants said they had little faith in advertising in the home paper, and it was in these towns that they wailed over the disloyalty of the citizens in sending their orders to the mail order houses. With one accord they announced that it was useless to put on a bargain sale in that town.

### Editor's Outlook Limited

Incidentally, the publisher of the newspaper was almost as sound asleep as the merchants. Week after week he allow-

*Thousands of men are already busy with their plans for their annual fall hunting trip. These men will be keenly interested in a display like this and it will bring them into your store for the supplies they need. In the above display note the knives, lanterns, flash-lights and other things useful in a camp as well as the rifles and ammunition.*

ed their advertising to run without change. If they were not enough interested to boost their own business, he should worry. Week after week he accepted their copy wihtout remonstrating with them on the futility of putting in such announcements, or endeavoring—if indeed they knew how, to educate them to more modern methods. Many publishers appear unable to grasp the fact that a merchant who receives returns from his advertising invariably increases his space, becomes an enthusiastic booster for the paper and a permanent fixture in its columns.

> "It is the comment of newspaper publishers in most small towns, that if city stores were to use the advertising methods of the country they would go under in quick order."

The merchants in a town of this kind are competing against the best brains of the advertising world employed in getting out great catalogues that are a delight to the eye with their attractive cover design, their wealth of illustrations, and the cleverly worded and set-up announcements that appear on every page. Every sheet is like a circus bill, to excite the imagination, and stimulate a buying impulse that is irresistible. Does the advertisement of the home merchant excite the imagination? Well, not what you could notice in the average case. Take for instance the big display announcement of a men's wear shop in a Western town. It appears on the front page of the local weekly, and reads like this:

Men's Furnishings
Men's Footwear

Men's Hats and Caps
Men's Clothing

The firm's name

At your service at all hours.

This advertisement had been running for four successive issues. It was practically so much waste space, practically money thrown away. Everybody in the surrounding town and country knew that this store carried these articles. The announcement was run during the month of June when the store was full of seasonable summer goods, but never a suggestion or hint was given of cool garments, of new stock, or of values that made purchasing worth while.

Above this advertisement in the premier position in the paper, top of column, left hand side of front page, was another inserted by the leading firm in town. It bore the caption in heavy type: "Our Ladies' Footwear," followed by the words in 18 point light-face type: "in white canvas or leather will be found comfortable and classy." There followed a straight announcement of various kinds of shoes with their prices. No cut was used in either ad.

**City Stores Would Perish Under Similar Treatment**

One could go on indefinitely. These are typical of announcements that appear in most country weeklies. Scarcely ever is there anything that will make a farmer's wife jump into her car and come into town, even as city housewives flock down to the big stores every day to be present when some article is to be cleared out at a stipulated hour. As a matter of fact the advertising value of an occasional flyer in genuine bargains is very much overlooked in the country, where special offerings of this kind would undoubtedly lead to large sales of general stock. IT IS THE COMMENT OF NEWSPAPER PUBLISHERS IN MOST SMALL TOWNS THAT IF CITY STORES WERE TO USE THE ADVERTISING METHODS OF THE COUNTRY THEY WOULD GO UNDER IN VERY QUICK ORDER.

In the town of Cabri, Saskatchewan, situated on the Empress branch of the C.P.R., two instances are afforded of effective advertising, in which the Clarion, published by Ross & Penny, was used as the medium. In the case of one of these concerns a special sale was put on by a professional sales company, the other is the story of how one merchant has tripled his business in three years by snappy advertising methods.

**$3,000 the First Day's Sale**

In the case of the special selling out sale a page announcement was used in the regular Thursday edition, but it was the most "spectacular" advertising page ever used in Cabri. It was patterned after the page ads used almost daily in big city journals, and a copy of it is reproduced on this page. Its most striking feature was the ten-inch cut of a vigorous man, who with clenched fist, appeared in the act of driving home his arguments. Enclosed in a heavy bordered box to the right was the personal statement of the proprietor setting forth his reasons for selling out, and there was the usual announcement of store closing for two days to arrange and mark stock, also the familiar advertisement, "Salespeople Wanted." The advertisement opened with the convincing statement that "This sale will, without doubt, create the greatest selling activity ever seen in this section. Without a question the finest and most complete stock of merchandise in this part of Saskatchewan, and the people here have never seen such bona-fide reductions on everything to wear, eat and use as will be given here when the sale opens."

In the body of the ad. there appeared seven little boxes across the page, reading as follows:

Every trade report brings notice of higher prices of wool and cotton goods, Think!

Nearly every letter we open tells about the advance in prices. Save while you can.

Our advice is to stock up now for next winter's needs. We'll help you save.

Shoe leather is scarce and going up

This hardware firm is successfully meeting the competition of a hydro shop, and other stores handling electrical goods by aggressive business methods and advertising. Its sales in electrical goods are showing a steady increase. Note the prominence given to prices. The original ad. measured 8½ x 11 inches.

rapidly. Take advantages of these prices.

Women who are handy with the needle should be on hand early.

The high cost of living gets a jolt during this sale. Here are many useful things for the home all at bargain prices.

The lower half of the page contained a tabulated list of goods offered for sale with their regular price and their sale price.

The sale opened on Saturday, June 2, with a rush, and A TOTAL OF $3,000 WAS TAKEN IN THE FIRST DAY. It was necessary to close the store for another couple of days in preparation for the further selling effort that resulted in closing out the entire stock.

### Advertising Draws Trade

Now while it would not be feasible for a country store to adopt tactics of this kind as a permanent thing, the lesson to be drawn from this experience is that the proper kind of advertising draws trade in the country as well as in the city. Had any person told that Cabri merchant that he could sell $3,000 worth of goods in a day by advertising, he would not have believed it possible. The point appears to be that in order to attract attention the small town merchant must adopt unusual methods from time to time. He must put life and fire and action into his announcements if he wishes to arouse his readers to the proper buying pitch. If he could only realize when he puts his advertisement into the local newspaper with a circulation of 500 that he is talking to an audience of over 2,000 people, practically all of them prospective buyers!

### Visualizing This Idea

Suppose for instance that he had such a crowd gathered before him, and that he was able to address them through a megaphone, would he adopt the milk and water style that appears in his advertisements, or would he not rather impress upon them with all the force in his command that a visit to his store would enable them to pick up bargains and values such as they had not dreamed of? He would tell them frankly and convincingly of his efforts to purchase goods that would give them service. He would tell them of odd lines to be cleared out, and new goods coming in, and how absurd it was for them to send away to the mail order houses when they could get just as good service at home. He would make his personality and friendship count for something, for sentiment goes a long way in a country district. How long would he hold his crowd if he started in to tell them that "Our Ladies' Footwear will be found comfortable and classy."

Ask the publisher of any country paper and he will tell you that he is almost distracted every week trying to get the merchants to change their announcements. He finds it a hard job to get them to write copy, and he must hound them and worry them continually to help themselves. In too many towns the attitude of the merchants is that the paper is helping to serve the community, and therefore, from a charitable standpoint, should be given a little assistance.

### Grocer Nearly Triples Business

But with regard to the second instance of effective advertising at Cabri. Arthel Simard, a general merchant there, purchased his present business three years ago. Prior to the time he took it over the greatest business conducted in any one year amounted to $39,000. Since 1916 his progress has been so rapid that his turnover last year amounted to $89,000. He attributes this largely to his advertising methods, although he has adopted a system of selling groceries in carload lots direct from the track to the farmers at harvest and threshing time, which is another story.

Mr. Simard began his advertising with a six-inch space, but he used that space intelligently to attract people to his store. His advertising from the first has been changed completely from week to week, for as he says an ad. run the second time is stale and the mark of a stale business. He has endeavored at all times to use originality in his captions, and has not been afraid to "boost" himself, his values and business to the limit. He goes by the principle that the man who displays confidence in himself and his store begets confidence in others. He had adopted the slogan: "You generally pay less at Simard's."

The advertisements of this store are patterned after those of the city stores. The articles offered for sale in each department of the store are grouped together and tabulated in ten point type, with the price printed in black. Every article advertised has its price mark, and in many instances there is a brief word of description, such as: "Our prints are all imported and guaranteed fast colors," or "White voile, just the thing for hot weather wear," "lovely pattern," "made of the strongest material," etc.

Mr. Simard has gradually increased his space until he now occupies five columns, 12 inches deep. While his announcements appear in the weekly paper on Thursday, his prices continue during the following week, for there are many farmers who do not get their mail until they come to town Saturday night.

### Sincerity Essential

"The country paper is a wonderful medium if it is used right," said Mr. Simard. "Out on the farms the people have plenty of time to read, and if an advertisement is attractive or is designed as mine are to create the impression of lists of bargains they study every word. Even in the heat of summer they watch the advertisements, and I know that I am constantly getting direct results for they come into the store and say: 'I see you are selling ———— for such a price.' The great thing is to be absolutely sincere and honest in advertising. It might be possible to put across a fake once or twice, but a lost customer is the penalty." This merchant says he tries to find time on Sundays to write his advertising, at which time he can concentrate on it, but in any event he takes the utmost pains to have his copy to the newspaper in good time, and planned out in a way to draw trade.

Where other merchants are continually marking up their old stock in accordance with the latest wholesale prices, Mr. Simard believes in taking advantage of his early purchases to announce special bargains. There is no better form of advertising, he says. In July he was selling old stock prunes for $2.00 a case that were then costing him $2.80 wholesale. At certain times of the year, notably in the fall, he takes a half page of space to announce his sales on the track.

### Merchandising Cuts Needed

It would seem that the Western Canadian newspaper field was ripe for a cheap service of merchandising cuts. These could either be sold direct to the newspaper or through them to the merchants, most of whom are in a position to pay and pay well. It might be feasible also to supply country newspapers with a small stereoptying outfit for moulding a service of matrices into casts. At the present time there are practically no cuts used whatsoever except in the case of certain implement firms who are supplied by the manufacturers.

It would also seem feasible for some enterprising publisher to supply to country merchants through the newspapers a miniature advertising course, setting forth in one publication the rudiments of the craft, and giving a great number of display advertisements as texts for their own announcements. Any efforts of an educational nature such as this will assist very materially in helping to fight the mail order houses.

### Hurry in Ad. Writing Costly

James Penny, one of the proprietors of the Cabri "Clarion," stated the other day that they experienced great difficulty in getting merchants to change their advertising from week to week. In many cases, he said, this was hurriedly done, "just to get it over with," and with results that can be easily guessed. At times, he says, from a purely defence standpoint, they have changed the advertisements themselves on the front page, for they were so glaringly the same as the former week as to rob the paper of freshness. Frequently, says Mr. Penny, the advertiser requests the publisher to make the change as he is "too busy." However, no matter how intelligent a printer may be he cannot possibly be expected to know what the advertiser wishes to lay before his readers. "Advertising space costs money, every inch of it," says Mr. Penny, "and some advertisers may as well throw their money in the gutter for all the good it accomplishes in trying to keep money at home where it rightfully belongs."

One day the proprietors of the 'Clarion' made the proposal to an advertiser that

# Hours of Work a Point Not Settled at Ottawa

## Labor Delegates Were the Orators, While the Employers Seemed to Have a Greater Array of Facts and Statistics at Their Disposal —Summary of Industrial Conference

By T. M. FRASER, Ottawa Representative of MacLean Papers

OTTAWA.—It was the intention of the Government, in order that there might be no appearance of capital and labor being drawn upon opposite sides with the suggestion that they were in hostile array, that the delegates to the National Industrial Conference should take their seats in chance fashion; but the sheep and the goats automatically sorted themselves, the representatives of capital occupying the seats on the left of the chairman, Hon. Senator Gideon Robertson, while labor faced them on his right. Down the middle of the Senate Chamber were grouped the representatives of the Governments. Such of the common people as could get room hung about the door of the chamber, though there were few of these.

The daily proceedings of the conference have been so fully reported that it is not the intention here to do more than mention a few of the interesting features and side-lights. How much, if anything material the conference may accomplish will not be known immediately. Broadly speaking, the expectations of the different parties to it might be summed up sufficiently well by an examination of three or four of the principal speeches delivered. As. Hon. W. L. Mackenzie King very ably pointed out in the able speech he delivered on the opening day of the convention, the parties to industry and its problems are not the two, capital and labor, most commonly mentioned; they are four: Capital, labor, management, and the community. And of these, the community is the most important and the most interested, in that it embraces the other three as well as the people in general.

While the two main parties to the conference came together with as much diplomatic courtesy as could be expected, and while the proceedings and debate suffered nothing from comparison in this or any other respect with any debate in the House of Commons, it would be only camouflage to say that capital and labor were not very far apart on their conception of what was rightfully due to each. Self-interest rather than pure reason has dominated the councils of both for so long that it is vain to expect that now or, probably, for a long time to come shall we find either being distinguished by a spirit of "sweat reasonableness," or see self-interest give way to self-sacrifice. On the first day of the convention, if we could have read the mind of those who looked across at each other, we might have found distrust, resentment, and the sense of being subjected to tyranny. It was plain that each expected more from the party in the middle (the Government) than from the party opposite.

### The Two Attitudes

The attitude of Labor at the convention was one of aggressiveness. Capital typified resistance. Labor said: "How much can we get?" Capital pondered: "How far can we afford to go?" And if the resistance of capital to the demand, for instance, for a 44-hour week was strong, it must be borne in mind that that, in the words of one of the labor representatives, was "not an ideal, but a compromise." And when Mr. Tom Moore, president of the Trades and Labor Congress, and chief labor representative, exclaimed heartily, "Hear, hear," those present were reminded that he himself, in a speech at Toronto not long ago spoke of a 36-hour week as about right. Capital, recognizing the necessity of production, sees the hours of labor heading towards an impossible minimum, with overtime, the handmaiden of the "shorter working day," reaching an impossible maximum. Capital believes, and not without justification, that the ideal of the vast majority of working men is to cut the length of the "straight" working day as short as possible in order that more overtime, with its enhanced rates, may be secured. The plea of certain of the speakers among the labor representatives that, with the present working hours, there is no time left to the workingman for "improvement," is sufficiently refuted by figures which the Minister of Labor introduced for the purpose of showing that the shorter day already obtains in large measure in Canada. Forty-seven per cent. of the working men of Canada already work eight hours or less.

### The Farmer's Status

This question of the reduction of the hours of labor—a constant scaling down of the length of the "straight" workday, then, is the big point—at least the big controversial point—of the convention. As stated above, it obtains so commonly that employers must, on the whole, be far from making much fight against it, but the object of labor is to have it made a statutory matter for the whole of Canada. I think the final quietus was put on this in a brief and moderate speech by Hon. Charles A. Dunning, Minister of Agriculture, and in charge of labor matters in the Government of Saskatchewan. He desired to have it made plain in the status of the farmer, who was in a sense both a capitalist and a laborer, and who represented probably the largest industrial element in the population of Canada, under a statutory standardization of the hours of labor. "It seems to me," said Hon. Mr. Dunning, "as a farmer of very long experience, that until it is possible for you to legislate to control the sun and the winds and the clouds and the rain, it is impracticable for you to legislate to effectively control the hours and the distribution of labor in agriculture."

It seems scarcely probable that agricultural labor, even if omitted from the operation and benefits of any possible 8-hour or other day which might be made law, would long rest content under this exclusion, or that organized labor could refuse to support the extension of the principle to them. As was also pointed out by Mr. Dunning, if working conditions are to be made still more attractive in the cities by shorter hours, the difficulty of getting men for farm work would be almost insuperable. The consideration of possibilities of this sort struck the members of the convention very forcibly.

### Eloquence vs. Facts

What would strike the impartial observer of the proceedings was that the right side of the assembly seemed to have almost a monopoly of the eloquence. There was scarcely a man among the many who spoke for labor but could present his arguments in well-chosen and grammatical language, and without a trace of diffidence; there were some who were speakers of a very high order, while the speaker with perhaps the most distinct enunciation, the most clear-headed manner of thinking, and the most fluency in the whole assemblage was a tailoress of Vancouver —Miss Gutteridge. She is an Englishwoman—and here it might be noted that the great proportion of the representatives of labor present were not Canadian-born. In fact, very few were. Perhaps the other ninety per cent. of labor in Canada, which was not represented at the convention, belong largely to that class. I mentioned to a representative of the manufacturers this striking fact that the speaking ability was so largely confined to the other side. "Naturally," he replied. "They spend most of their leisure time at it, and practice makes perfect. We have been too busy trying to raise the payroll to have had much time for practising oratory."

I think it would be fair to say, however, that if the position of the labor

representatives were represented with words, the so-called capitalists had almost a monopoly of the facts and statistics given to the assembly. Labor argued from what it had been able to force on capital in the past in Canada and other countries; capital presented the statistical position of the different industries, produced evidence to show what had followed the introduction of the minimum hour day in other countries, and the present position of industry in Canada. And labor listened with smiling tolerance.

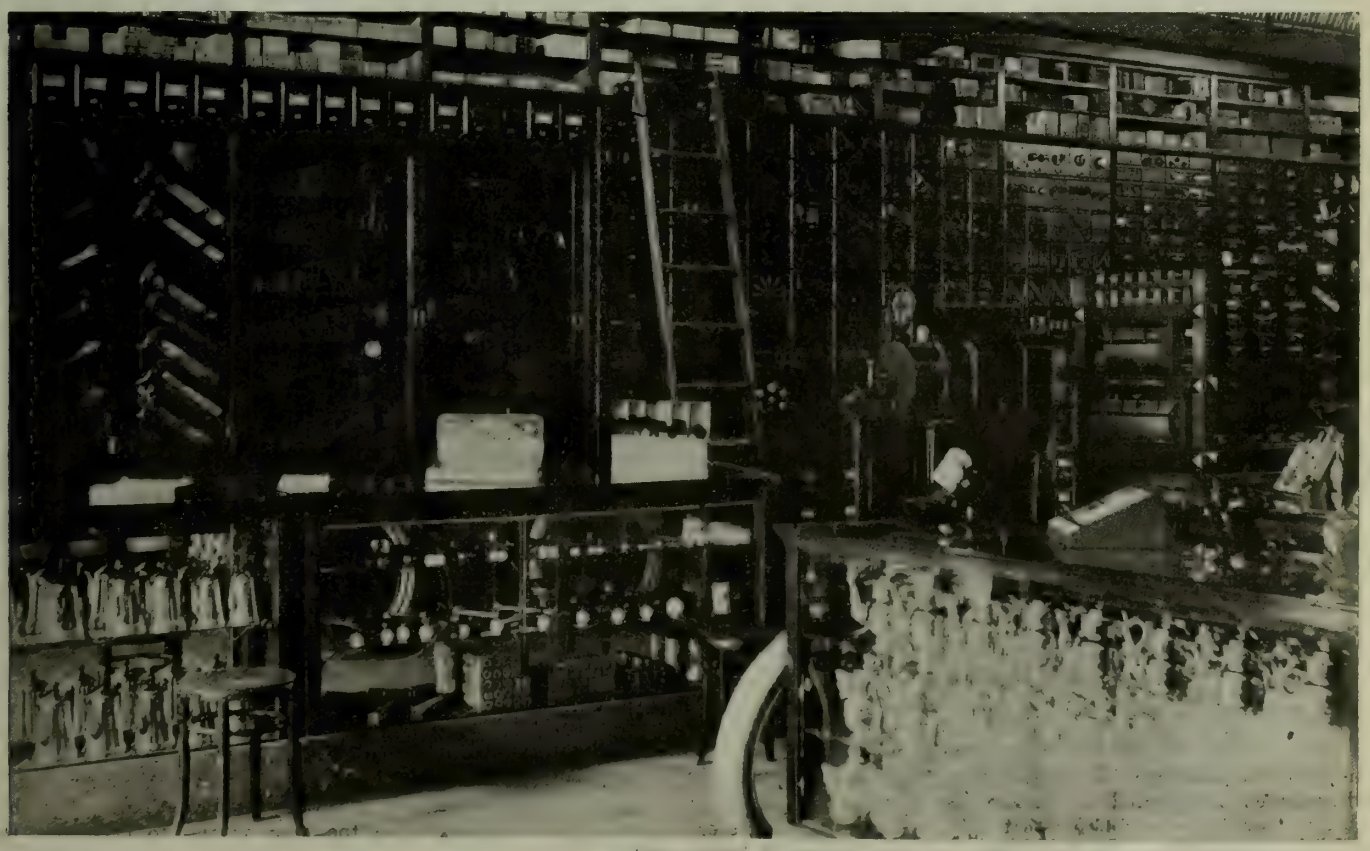
### Threats Were Few

Only in a few cases was the note of intolerance struck, and it was mainly in the case of some more or less notorious labor delegates such as James Winning, one of the leaders of the Winnipeg disturbance. There were threats of what would happen if the 44-hour week did not come; but mainly labor seemed to have a supreme confidence in its strength to secure its desires.

On the whole the conference should do good. It will be an expensive matter. With about two hundred delegates, with an expense allowance of $10 a day each, and an average of about ten days from the time they leave home until they return, the "indemnity" will run into a matter of close on to $25,000; but it will have been well spent if labor and capital can be brought to see each other's problems face to face, and to learn the necessity of give and take, and of increased production to help meet Canada's enormous commitments and debts. —T.M.F.

## HOT SHOT FOR THE ADVERTISING SLACKER

Continued from page 37



instead of using general terms in his announcements that he use his space once a week to clear out odd lines. This the merchant began to do, with such, to him, wonderful results, that he has developed into a consistently good advertiser. The story was told of another merchant who used a half page space to announce a special bargain sale, and who went further and decorated the exterior of his premises to make it appear something unusual was happening. This effect was achieved by taking large colored posters, cutting them in half, and making each half sheet into the form of a pennant with the paper cutter. On each of these paper pennants was printed the one word "SALE." Varied colored paper was used, and the plate glass windows decorated in such a way as to not affect the window dressing.

The Clarion is a good instance of a healthy country paper, and its service to advertisers has placed it where it is with a circulation of 1,050. Its advertisers are increasing their space to such an extent as a result of their success that they are automatically being forced off the front page, and it is the intention of the publishers to present a solid news front on page one just as soon as present contracts expire.

## ALUMINUM WARE INDUSTRY OF BIRMINGHAM

The development of the aluminum ware industry in Birmingham, England, is proceeding with rapidity, and city expects to rank soon among the world's chief centres for the production of aluminum wares. Before the war the metal was largely used in sheet form for the manufacture of motor bodies, and in ingot form for the production of cylinder castings, while the manufacture of spun and stamped hollowware was also carried on in the district to a fairly large extent, but the exigencies of war diverted the metal and its alloys from those uses to purposes of a military character, and the pioneers in the industry temporarily lost touch with the commercial world. But with the release of the material from war purposes there has come a rapid revival of interest in the trade. Many firms had been taught by their experience during the war something of the properties and uses of the metal, and a good proportion of these are now turning that knowledge to account and making aluminum articles of diverse kinds for general purposes.

A. H. Fraser, manufacturers' agent at Winnipeg, has been appointed sales representative for Canada for the American Grinder Co., of Milwaukee. Mr. Fraser will open an office in Toronto shortly.

*Keeping lots of merchandise out where people can see it and keeping it clean and attractively displayed is the secret of increased turnover. Many hardware merchants state that silent salesmen pay for themselves in a short time in increased sales besides keeping the stock in A1 condition and always on display.*

# EDITORIAL COMMENT

## *EDITORIAL BRIEFS*

THIS much seems certain, the longer it takes the world to settle down the longer it is going to take for it to settle up.

* * *

DON'T allow your clerks or anyone else to remove anything from a window display unless it is at once replaced with something else.

* * *

SUCCESSFUL advertising is frequently the result of knowing what should remain unsaid. Don't try to say too much. Get at the points that are essential and that will arouse interest.

* * *

THE rapidity with which the Belgians have got on their feet again suggests that they did not sit down and haggle about how many hours a day they should work.

* * *

THE best goods bring the best profit to both buyer and seller. Thousands of merchants and customers are realizing this now as never before.

* * *

BUYING for cash and selling for cash makes for better business all round.

* * *

A SATISFIED customer always talks, and in ninety-nine cases out of a hundred brings another.

* * *

THE man who does not advertise because he tried one ad. and did not get results should throw away his cigar because the match went out.

## *THE STEEL STRIKE*

THE greatest test of strength that has ever taken place in America between labor and capital commenced on Monday when a general walk-out of the union men in the employ of the United States Steel Corporation was ordered. More than 300,000 men, it is stated by the union officials, ceased work. It is impossible for an event of this magnitude to occur across the border without Canada being affected. It is too close to the starting of the strike now to even guess what the effects will be. One of the first results in this country was a rush on the part of some firms to order sheets and bars. There was not nearly enough to go round, and jobbers state that when they replenish stocks they expect to have to pay higher prices, if they can get the goods at all. If the strike is of short duration other businesses may not be materially affected, but if the battle runs into months and the labor men fulfill their threats to call out the railwaymen and other workers, the effects on Canadian business will undoubtedly be serious. The basis of settlement will, of course, have a great deal to do with the future prices of iron and steel goods and those in the trade are not looking for any reductions for some time. Hardware merchants generally, and those men who are in the iron and steel trade, declare that if the strike had not been called at this juncture Canada was just entering the greatest industrial boom it has ever known. They expect business will remain excellent but that its development may be checked if the strike extends over months and there is difficulty in obtaining supplies. These are needed and needed badly to meet the demands of the trade. Business in Canada is on a sound basis, in fact it has never been better and there is every indication that this will continue. There are those who see a short strike, basing their prediction on the fact that it takes enormous sums of money each week to provide the needs of 300,000 men and their families. They question whether the strikers' funds will permit them to remain out of work for any long period. There is also the fact to consider that 80,000 of the company's employees are shareholders in the firm and very few of these went out. The latest developments indicate that the Steel Corporation will centre its efforts on keeping a few of its plants in operation and running to capacity.

With winter coming on and a slackening up of building operations, the firm expects to be able to pick up quite a number of unskilled laborers. As far as bookings are concerned it has enough work on hand for six months.

## *HELP THIS GOOD WORK*

THE Canadian Government, by proclamation, has designated Thursday, October 9, as "Fire Prevention Day," and people all over the Dominion are being asked to make a close investigation of their premises with a view to discovering and removing all possible causes of fires. Merchants are vitally interested in this matter not only personally but from a community standpoint. Many firms realized long ago the dangers that lie in piles of rubbish in cellars and back yards or other places. Their neighbors do not always take the same view

and a little personal talk on this question may be the means of saving thousands of dollars from the fire demon. Statistics prove that Canada's enormous fire losses are due not to the fires that originate in the homes but to the destruction of stores and factories. Every time a large store goes up in smoke the loss runs anywhere up to a million dollars. If a home burns the loss seldom exceeds $5,000. The great quantities of goods that are destroyed every time a store or a factory burns means an absolute loss. They cannot be replaced. Due to fires of this kind and to forest fires, Canada's per capita loss has grown to be the largest in the world. The great majority of the costly fires are traceable to carelessness. It is to bring home to people the seriousness of the situation and to impress them with the need of being careful that the Government has instituted "Fire Prevention Day." October 9 was chosen because it was the anniversary of the great fire in Chicago which started when a cow kicked over a lantern in a barn. Every merchant can do something to lessen the fire loss in Canada, and it is his duty to do it and lend all the support he can to a movement that will make things better for the entire Dominion. Another matter in which the merchants can help is in seeing that the building by-laws in their community are so altered that fire dangers will be reduced to a minimum. In many towns and cities the building by-laws are obsolete. In others there are good regulations but they are not lived up to. Every effort should be made to see that situations of this kind are corrected.

## *BUYING FROM GERMANY*

THE first great industrial fair to be held since the close of the war is now in progress at Leipsic, Germany, and Associated Press cables indicate two noticeable features of interest to the commercial world. One is that the low value of the German mark is attracting numerous buyers from neutral countries. Many of these buyers, it is understood, are acting as middlemen for Entente purchasers. Some of their purchases, it is likely, will before very long find their way into the Canadian markets. Another feature shown by the cabled dispatches is the absence of substitutes. At all the Leipsic fairs held during the war period special comment was caused by the great number and variety of substitutes. This in itself was eloquent testimony to the effectiveness of the British blockade in completely shutting off supplies of raw materials. German industries were famishing for these materials. The extent and variety of the exhibits at this year's fair, together with the absence of substitutes, is an indication that German manufacturers are making every effort to recover not only their former positions but their former markets. Prices, it is stated, while much higher than those of pre-war days, are considerably lower than those prevailing in many other countries. The cables so far say nothing about the quality of the goods.

## *LET THEM TALK*

"IF a customer does not ask questions I know I am not interesting him," said a hardware merchant to HARDWARE AND METAL recently. "One of the biggest points in salesmanship is to hold the interest of people. There are times when it is necessary to talk briskly in order to get people started, but I find that the majority of customers, especially women buyers, want to hear all about whatever they are planning to buy. Salesmanship is a real art and the man who succeeds best must use his own judgment when to talk and when to listen. Some salesmen think they have to overwhelm prospective buyers with a flood of talk. This is a mistake. I have obtained the best results by letting the buyer ask questions and then answering them carefully, never trying to force matters."

## *POOR TELEPHONE SERVICE*

POOR telephone service, especially after being promised better service after the rates were raised by the company, is annoying. Business men have been complaining bitterly about long delays in getting calls through, being given wrong numbers repeatedly and similar annoyances. As far as Toronto goes there is apparently some justification for the complaints. It is extremely annoying for anyone who wants a number in a hurry to wait anywhere from three to five minutes before the 'phone is answered, and then to be given a wrong number. When he gets wrong numbers three or four times, with the usual delays in getting an answer at all, the party who is trying to 'phone is exasperated. It is just as annoying after one has given a number and waited some minutes without results to be asked by some sweet-voiced young thing: "Were you wanting a number?" and yet this sort of thing is happening dozens of times every day. If the statements of business men are even anywhere near correct there is ample room for improvement in the telephone service.

## *COURTESY IN BUSINESS*

DON'T regard the traveller as an intruder. Modern commercial conditions have made him almost as important a factor in the business world as the retailer. His business is honorable and he has a legitimate claim on your time and is entitled to be received courteously. If you do not have time to talk to him just when he calls tell him so and tell him in such a way that he cannot help seeing that you would gladly talk to him if you could. Make an arrangement to see him later. If he has a new line, listen to him for there may be some good profit in it for you. If he has goods that you do not need you can tell him so courteously.

# EVENTS IN THE TRADE

## Business Changes

Toronto, Ont.—The Majestic Electric Heater Co. has been taken over by the Renfrew Electric Co.

## New Firms

Under the firm name of Johnston & Richardson, Messrs. A. P. Johnston and J. J. Richardson have commenced business at Walkerton, Ont., and will handle plumbing work as well as hardware goods.

## Fire Losses

H. B. Brigham, hardware and implements, Alderson, Alberta, sustained a fire loss.

W. Howey, hardware merchant, sustained a loss in a blaze which swept away six business places at Port Rowan, Ont.

## Obituary

James Hillis, of Hillis Sons, Ltd., Halifax, N.S., foundry and stoves, died at Halifax, N.S. He was 80 years old.

Alpin J. Grant, of A. J. Grant & Co., hardware, died at his home in Halifax, after a long illness. For many years he travelled through eastern Nova Scotia and Cape Breton for the firm.

The death occurred suddenly at Flint, Michigan, of B. D. Harris, formerly superintendent of the Welland Vale Bicycle Works at St. Catharines, Ont., and recently mechanical manager of the Buick Auto Works at Flint.

## Personals

W. George Hillier, manager of the Halifax branch of Brandram-Henderson, Ltd., was a caller at the Toronto office during the week.

Emory S. Rockwell, who has been manager of the Chicago office of the Cook Paint & Varnish Company this week went to New York to assume the position of manager of the export sales department of this Glidden Company.

C. S. Sturges has been appointed sales promotion manager of the Glidden Co., of Cleveland, Ohio. He was formerly associated with the Eagle Picher Lead Co., and the Sherwin-Williams Co.

Paul Whitney, of Toronto, who served overseas for four years with an infantry battalion, and later with the engineers, has been appointed manager of the B. Blair Tile Manufacturing Co., Ltd., of Woodstock, Ont. He is a former resident of Prescott, Ont.

## Trade Notes

The Shawville Motor Co., of Shawville, Que. has been succeeded by P. B. Moyle.

Paul Turgeon has been appointed curator of the St. Paul Hardware at Montreal.

W. T. Eggins, hardware and harness, Bruderheim, Alberta, is disposing of his business.

W. W. Watts has purchased from H. G. Fraser the business of the Automotive Supply Co.

A charter has been granted to Automobile Batteries and Engineering, Ltd., of Montreal.

Cameron & Fraser, wholesale paper and twines, have moved to 107 Front Street E., Toronto.

The Taylor Forbes Co., Ltd., of Guelph, Ont., is erecting an addition to its foundry to cost $9,000.

The Premier Paint & Varnish Co., Ltd., E. Maples, president, has been registered at Montreal.

Bergeron & Pelletier, auto repairs and supplies, has been registered at Montreal by Henry Bergeron and P. Pelletier.

The Hochelaga Carriage Co., of Montreal, has been dissolved and is succeeded by the Hochelaga Carriage and Garage Co.

Comte & Bernier, manufacturers of phonographs, has been registered at Montreal by Henry C. Comte and L. P. Bernier.

The Sta.Brite Mfg., Co., Ltd., John McNaughton, president, manufacturers of furniture polish, has been registered at Montreal.

The Renfrew Electric Products, Ltd., has purchased the Majestic Electric Supplies, Ltd., of Toronto, Ont. The headquarters of the firm will be at 29 Richmond Street W., Toronto.

According to press reports, Messrs. N. Jamieson and John Barnsley, of Galt, Ont., have purchased from T. Davis the Preston Polishing and Plating Co. at Preston, Ont.

C. W. Sherman, president of the Dominion Foundries and Steel of Hamilton, went West earlier in the month, and while in Vancouver decided to establish an agency there for shipbuilders' and railway supplies.

The Imperial Oil Company, Limited, has been granted permission to subdivide the existing five hundred thousand shares of its stock valued at $100 each into two million shares having a par value of $25 each, and to change the name of the company to Imperial Oil, Limited.

The McClary Manufacturing Co. of London, Ont., which recently commenced work on an extension to its plant to cost $45,000, has decided to practically double the size of the building, which, when completed, will be five storeys in height.

The machine tool requirements of the General Motors Corporation for its Walkerville, Ont., plant constitute the most important activity in the machine tool markets. Purchases will total, it is stated, $2,000,000 to $3,000,000, and most of the orders will be placed at Detroit and Cleveland.

The annual convention of the travellers of the Canada Foundries & Forgings Co., Ltd., held at Brockville, Ont., was attended by men representing the various units of the firm. A number of matters in connection with business were discussed. P. J. McCormick presided and addresses were given by Messrs. J. H. A. Briggs, James Arnold, William Irving and T. H. Webster.

## Montreal News

Mr. Thompson, of Benjamin Moore & Co., was in Montreal last week.

D. G. Smith, of Smith and Hemenway, New York, called on the Montreal trade this week.

R. W. Shannon, with the Thermos Bottle Co., Ltd., Toronto, called on the trade this week.

L. H. Laythe, Sr., of Butterfield and Co., Inc., Rock Island, Que., was in Montreal this week.

C. E. Peabody, representing C. E. Peabody and Co., New York, was in Montreal last week.

William W. Anderson, of the Nicholson File Company, Port Hope, Ont., was in Montreal this week.

Wm. H. Simpson, of Wm. H. Simpson and Co., Inc., New York, was a Montreal visitor during the week.

Mr. Levine, representing the Superior Electric Co., Pembroke, Ont., called on the Montreal trade recently.

J. R. Latta was a Montreal visitor in the interests of his principals, L. J. Mueller Furnace Co., Milwaukee.

Mr. Tom Monypenny, Imperial Varnish & Color Co., of Toronto, was in Montreal attending the paint meeting.

T. Tully, Riverside, Ills., representing Joseph Gundry and Co. of Bridgeport, Dorset, England, and also S. Allcock and Co., Redditch, England, called on the trade this week.

Charles Hickman, of Ottawa, representing the Ottawa Paint Works, was in Montreal last week attending the paint meeting.

Andrew E. Hay, of Pratt and Lambert, Inc., attended the Canadian Paint, Oil and Varnish Association meeting last week.

W. W. Becker, of Berry Brothers, Walkerville, Ont., was in Montreal last week and attended the paint makers' meeting.

A. C. Ransome, represented Ault-Wiborg, Ltd., Toronto, at the meeting of the Canadian Paint, Oil and Varnish Association, held in Montreal last week.

L. C. Stephens, of George F. Stephens and Co., Ltd., Winnipeg and Calgary, attended the meeting of the Paint, Oil and Varnish Association held in Montreal.

The St. Paul Hardware Co., Ltd., St. Paul St. West, Montreal, has gone into liquidation, the assets being offered for sale by the assignee.

An office has been opened in Montreal by Marcus E. Reich, Trade Commissioner for the Republic of Czecko-Slovakia. Mr. Reich is located in the Southam Building and will act as medium between buyer and seller.

## Incorporations

John Bishop & Son, Ltd., capital $100,000, head office Brantford, Ont., plans to deal in hardware and implements.

Liberty Oil Refining Co., Ltd., capital $1,000,000, head office Toronto, Ont., plans to buy, sell and deal in petroleum and its products.

Non-Twist Canopy Ring Canada, Ltd., capital $500,000, head office Toronto, Ont., plans to manufacture and deal in all kinds of lighting and heating fixtures and accessories.

Wm. A. Kribs Co., Ltd., capital $250,000, head office Hespeler. Ont., plans to manufacture and deal in all kinds of goods, ware and merchandise.

United Home Builders, Ltd., head office, Windsor, Ont., capital $50,000, plans to manufacture and deal in builders' and contractors' supplies.

The Lufkin Rule Co. of Canada, Ltd., has been granted permission to increase its capital stock from $100,000 to $150,000.

General Wholesalers, Limited, capital $50,000, head office Toronto, plans to carry on a general business in machinery supplies.

Leger Lavoie, Limited, capital $100,000, head office Montreal, plans to manufacture and deal in automobiles, motor vehicles and supplies.

Dominion Railway Appliances Ltd., capital $10,000, head office Montreal, plans to manufacture and deal in special accessories for railway equipment.

Association of Canadian Building and Construction Industries, head office Ottawa, plans to extend construction and improve conditions in the combined industries.

Canadian Fabrikoid, Limited, capital $3,000,000, head office Montreal, plans to manufacture and deal in all kinds of merchandise.

# Hon. Frank Cochrane Dies at Ottawa Following A Long Illness

Following a long illness with arterial trouble, the death occurred at Ottawa on Monday of Hon. Frank Cochrane, former Minister of Railways and Canals, and president of the Cochrane Hardware Ltd., of Sudbury, with branches at North Bay, Sault Ste. Marie, Copper Cliff, Ont. Mr. Cochrane, who was 67 years old, was born at Clarenceville, Quebec. More than forty years ago he was entrusted with an important mission by the Hudson Bay factor in Northern Ontario, and later became one of the best posted men in the province on matters pertaining to the north country. His knowledge was so extensive that in 1905 he was appointed

*LATE HON. FRANK COCHRANE Former Minister of Railways and Canals, and head of the Cochrane Hardware, Ltd., of Sudbury, Ont.*

Minister of Lands, Forests and Mines for Ontario by Sir James Whitney. Later he was elected to represent Nipissing in the Ontario Legislature by acclamation. In 1908 he was returned for the newly-created electoral district of Sudbury. In 1911 he was called to the Cabinet formed by Sir Robert Borden, and became Minister of Railways and Canals for the Dominion. He resigned his portfolio when the Union Government was formed, and was appointed Minister without portfolio in that administration. He held this position at the time of his death. During the absence of ministers he acted as Minister of Railways and Secretary of State.

Mr. Cochrane had been ill for many years. In 1904 he was injured in a railway accident at Wahnipitae, Ont. As he grasped the handrail of a moving car he swung between the cars and slipped to the tracks, the wheels passing over his foot and leg. He maintained his hold on the handrail, however, and managed to swing himself on to the platform of the car. The train had gone some distance before he was discovered and removed to a hospital. In the meantime he had rendered first aid to himself with a handkerchief and stopped the flow of blood.

Although a man of quiet habits he was very popular, and his splendid ability was acknowledged by members of both parties. The death of his son, Ogden, who had served overseas, troubled him greatly, and hastened the end. He is survived by his wife, one son, Wilbur, of Ottawa, and one daughter, Miss Edith, of Ottawa. The funeral was held on Wednesday, the remains being sent to Toronto for interment.

### ROBERT MILLER WEDDED

Robert—"Bobbie"—Miller, of wholesale hardware firm of Starke-Seybold, Ltd., Montreal, was married in Montreal on Wednesday afternoon, Sept. 17, to Miss Edith F. Hale of the same city. Bobbie has a host of friends that will wish him the best of good things in his new home. Appreciation was shown him in a tangible way by the presentation of a purse by the firm. Mr. and Mrs. Miller will reside in Montreal.

### HARDWARE WHOLESALERS TO CONVENE

The Canadian Wholesale Hardware Association will meet in Montreal for its annual meeting on Monday and Tuesday next, September 29 and 30. Rumor has it that this year's entertainment will be a royal one, and there are matters of interest that will doubtless bring out a good attendance from all sections of the country. President Jos. Dowling of Montreal will preside.

### OPENS DETROIT OFFICE

The Carborundum Company announces the opening of branch offices and warehouses in Detroit, Mich. The new Detroit quarters will be located in the Burkhardt building at Second and Larned Streets. The Detroit branch is under the management of Anthony Dobson.

### ENJOYED INFORMAL DINNER

Members of the Canadian Paint, Oil and Varnish Association and a few friends enjoyed an informal dinner at the St. James Club, Montreal, on Thursday evening, Sept. 18. This was tendered them by Mr. George Henderson, president of the association, and the visitors from outside as well as those attending from the city report the dinner a decided success. To HARDWARE AND METAL one officer of the association expressed his great satisfaction with the excellent spirit which prevailed among the paint makers on this occasion. It afforded the members an opportunity of closer acquaintance, a feature which cannot always be developed during the strenuous work involved in a formal gathering.

# Shortage of Phonographs For Fall Trade

## Only 50 Per Cent. of Deliveries to Western Dealers, Says Winnipeg Manufacturer—Solid Woods and Veneers Very Scarce and High Priced—Canadian-Grown Oak Higher Priced Than Imported Mahogany

THAT little more than fifty per cent. of deliveries will be made to Western hardware dealers who placed orders for phonographs for Fall delivery, is the opinion of J. W. Poisson, manager of The Canadian Phonograph & Sapphire Disc Co., Ltd., of Winnipeg.

Mr. Poisson stated to a representative of HARDWARE AND METAL that all raw materials entering into the construction of phonographs, apart from the mechanical apparatus, have been taken up since last June, and that the market is practically bare of the various solid woods and veneers which are required by manufacturers of phonographs. There has been a marked scarcity of solid oak owing to the fact that there have been practically no lumbermen in the bush for the past two years. An indication of the heights to which the price of oak has risen is found in the fact that while oak is a Canadian grown wood it is much higher in price to-day than mahogany, which is imported. Oak and mahogany are the two principal woods used in the manufacture of phonographs.

### Doubled in Price

The present market quotation on undressed oak is $337 per M. This quotation is more than double the price of two years ago, and is considerably higher than the ruling quotation per M. on mahogany. Mr. Poisson states that two and a half years ago he paid only $165 per M. for select white oak.

While a marked scarcity of solid woods and veneers exists, it is significant that the mechanical apparatus used in phonographs is in good supply. Practically all such apparatus is manufactured in the United States.

Looking back over the history of the phonograph on the Canadian market, Mr. Poisson states that the demand for the present type of machine has been steadily increasing since February, 1914, when patent rights on the disc type of machine expired. Since the expiration of these rights—which had reserved for one or two influential manufacturers the right to market machines of this type—many small manufacturers have entered the field. A number of these were of mushroom growth and disappeared as quickly as they appeared, principally owing to the fact that they installed a poor type of mechanical apparatus in an imposing looking cabinet and sold the machines at prices which could not be equalled by the established companies. The misrepresentation was soon discovered, however, but too late, for the manufacturers were out of business and the discrepancy could not be made good. Mr. Poisson states that competition has not only wiped out the irresponsible type of phonograph manufacturer, but has resulted in a general improvement of the machines from every standpoint.

# West Has Increasing Demand For Builders' Hardware and Supplies

## More Activity in Building Industry—Municipalities Plan Steps to Relieve Housing Shortage

DEMAND for builders' hardware is steadily increasing in Winnipeg and district owing to the fact that there is a little more than ordinary activity in building. The total volume of building is not, however, very large at this time.

E. L. Sauder, of the Winnipeg Paint & Glass Company, states that in one residential district of Winnipeg there is nearly half a million dollars' worth of houses in course of erection. Another district comprising houses of a cheaper grade boasts one hundred thousand dollars' worth of house construction now under way. Better class houses are in good demand, and it is feared that at the end of the season this demand will be still unsatisfied to a great extent. Jobbers and manufacturers look for a large amount of building to start early next year providing labor conditions are such as to justify this action.

### Use Government Money

At the present time the City of Winnipeg has a building scheme designed to utilize the money provided in the Government loan. Furthermore, a guarantee fund has been raised by the business men of the city to guarantee the city against loss in the venture. Of late the scheme has been coming in for some criticism, as it is held that the number of houses which would be erected under the plan would be very small when compared to the number required to lighten the present burden. Under the scheme the applicant must deposit 15 per cent. of the total value of the house and lot. On a $4,000 deal this deposit would amount to $600. It is contended that very few of the families which should be benefited under the plan would be able to advance this amount.

Should the high cost of material continue to prevent the resumption of house building in Winnipeg and other Western centres by private parties, it is very probable that the various civic Governments will be forced to take action in building homes for rent.

# CATALOGUES and BOOKLETS

**National Steel Tank and Mfg. Co.**

Price list No. 9, issued by the National Steel Tank and Mfg. Co. of Bradford, Illinois, lists the lines of pneumatic and storage tanks manufactured by the firm. It is well illustrated. Copies of the price list will be sent to readers of HARDWARE AND METAL who are interested.

* * *

**Plymouth Cordage Co.**

A booklet in connection with dealers' co-operative service for the season of 1920 has been issued by the Plymouth Cordage Co. of North Plymouth, Mass., and Welland, Ont. It is printed in colors. Copies will be sent to readers of HARDWARE AND METAL upon request.

* * *

**Kraeuter & Co., Inc.**

Kraeuter & Co., Inc., 569 Eighteenth Ave., Newark, N.J., have issued a catalogue of the tools manufactured by the firm. The listings include pliers, wrenches, chisels, automobile tools, machinists' tools, ticket punches and other lines. The catalogue contains sixty-four pages, and is most attractively printed and illustrated. Readers of HARDWARE AND METAL may obtain copies upon request.

* * *

**Climax Baler Co.**

The Climax Baler Co., of Hamilton, Ont., has issued a catalogue in which are shown the various lines of balers the firm manufactures. Hand power, belt driven, and balers operated by being direct connected to motors are shown. The catalogue is splendidly illustrated. Any reader of HARDWARE AND METAL may obtain a copy of the catalogue upon request.

* * *

**J. Wiss & Sons Co.**

J. Wiss & Sons Co., of Newark, N.J., Canadian office 62 Temperance Street, Toronto, have issued a 92-page catalogue, in which is listed the full line of Wiss products, shears, scissors, razors, tinners' snips, orange clippers, pruning shears, and razor strops. The catalogue is most attractively printed on glazed paper, and is profusely illustrated. The same firm has also issued a 24-page book

of advertising suggestions. Copies of the above will be sent upon request to readers of HARDWARE AND METAL, also window display suggestions which are issued by the company.

## RAZOR COMBINE ALLOWS BIG ITEM FOR GOODWILL

The new American Safety Razor Corporation, which is a combination of the Star, Gem and Ever Ready corporations, has issued a balance sheet as a preliminary to trading in its stock which was begun on Thursday on the New York curb. Current assets amount to $3,299,111, to which are added the items of plant, etc., $819,386, organization expenses and deferred charges, $238,111, and goodwill, trade marks, etc., $8,596,305, to make total assets of $12,965,716. Current liabilities amount to $2,165,715, which includes the items for reserve for advertising, taxes and contingencies $1,660,714, and reserve for organization, capital, stock stamps, etc., $200,000. To this is added 400,000 shares of $25 par capital stock, issued at $18, making $7,200,000, and 400,000 shares of the same par value carried at $3,600,000 to make total liabilities. The item of "good will, trade marks, etc.," represents approximately two-thirds of the total assets, it is stated.

In a report accompanying the balance sheet, President Joseph Kaufman estimates net earnings for the current year will be at least $1,500,000, and for 1920 not less than $2,000,000. He estimated the combined companies will sell 2,000,000 safety razors and 105,000,000 blades.

## GOES TO MONTREAL

R. T. Kerr, chief accountant at the Toronto branch of Brandram Henderson, Ltd., has been transferred to the head office in Montreal. His place is being taken by C. H. Smyth, formerly accountant for the Mathewson Hardware Co. of Toronto.

## MAY ERECT MONUMENT TO MERCHANT MARINE

The Montreal Harbor Commission will, it is stated, erect a monument to cost about $50,000 to the memory of the British Merchant Marine for their great services during the war. This monument is to be erected on the Victoria Pier, and H.R.H. the Prince of Wales will probably lay the corner stone during October.

## J. C. NORTHCOTT BEREAVED

The sincere sympathy of his many friends in the trade will be extended to John C. Northcott in his sad bereavement caused by the sudden death of Mrs. Northcott, at her home in Toronto last week. "Jack," as he is familiarly known to the trade, is one of the best known members of H. S. Howland & Sons' travelling staff. The funeral, held on Monday of this week, was attended by many friends connected with the hardware trade.

Ralph & Wilson, Dundas, Ont.—Will you give us address of manufacturers of children's tables and chairs, also rocking horses?

Tables are manufactured by Schultz Bros., Brantford, Ont., and Henry Wise & Co., Palmerston, Ont. Rocking horses are made by the Gendron Mfg. Co., of Toronto, and the Dominion Toy Co., Victoriaville, Que.—Editor.

* * *

J. M. Adam, St. Marys, Ont.—Kindly advise us if there is anyone in Canada who handles the No. 1386 Blue Bird wick used in the short chimney "New Process" wick oil stove.

No. 1386 Blue Bird wick may be obtained from the Thomas Davidson Mfg. Co., Ltd., Toronto.—Editor.

* * *

### Fire Extinguishers

The Toronto, Hamilton and Buffalo Railway Co., Hamilton, Canada, Geo. W. Holmes, purchasing agent. Please advise if the American La France Fire Extinguisher Company have started a branch in Canada to make fire extinguishers.

The American La France Fire Extinguisher Company have a branch in Toronto at 195 Weston Road.—Ed.

* * *

### Kero-Gas Burners

Thompson and Sutherland, Sydney, N.S.—Will you please advise us who makes the Kero-Gas oil burner?

This burner is made by the Hiram Walker Metal Products Company of Walkerville, Ont.

* * *

C. B. Brown & Co., Aylmer, Ont.—Could you tell us where the Home Comfort Meat Chopper is made? We wish to get a repair for H. C. No. 2 Chopper.

We do not know this line of meat chopper, but it is believed that this was a premium given by some at present unknown company, some years ago.

* * *

The Cochrane Hardware, Limited, Sault Ste. Marie, Ont.—Kindly advise if possible the name of makers of Lennox Hack Saw Blades?

Is it not possible that this name is confused with Enox? Enox Hack Saw Blades are made by Fry's, Limited, 46 Upper Thames Street, London, E.C.

* * *

Thomas McCosh, Melfort, Sask.—Kindly advise us where we can secure power skate sharpeners?

These may be procured through H. W. Petrie, Limited, 131 Front Street West, Toronto.

J. W. Crowley, 323 Notre Dame Street West, Montreal.—Kindly advise me if there is any brass coated tubing made in Canada, and if so, where?

Brass coated tubing is not manufactured in Canada. Drummond, McCall & Co., Limited, Mark Fisher Bldg., Montreal, could no doubt secure some of this for you. Brass coated tubing is manufactured in the United States by Rome Mfg. Co., Rome, N.Y.; Phoenix Tube Co., Brooklyn, N.Y.; Waterbury Mfg. Co., Waterbury, N.Y.; Jackson Tube Co., Brooklyn, N.Y.

## READERS SHOULD BE MARKED

There is a practice that is becoming quite common among some papers, viz., running paid-for readers without any distinguishing marks. It would not be a hard matter for the average reader, not familiar with the way of doing things in newspapers, to wonder why the paper should go out of its way to give such publicity to a certain line of business.

Office rules and practice should make it necessary and obligatory that advertising marks should be placed on all these readers. Many of them are such palpable puffs for the line under question that no one will be deceived. The word "Advertisement" on top or bottom relieves the paper of much of the responsibility for all the nice and flattering things that are poured and dumped over the merits of the article in question.

## GET INTO SELLING END OF YOUR BUSINESS

Continued from page 47

become a salesman merely through energy, confidence, and a certain amount of "cheek." These are all desirable assets for a salesman, if you put a reasonable restraint on the cheek, but there is, as I have intimated, just as much study necessary to become a first-class salesman as there is to become a first-class engineer.

My message is not to tell you how to become a salesman, but to direct your attention to the thought that, from the standpoint of earning an income, there is a greater opportunity for you in the selling field than in other lines of effort. Even though you may have graduated from college with an engineering or any other degree there is, I believe, a greater income to be made by devoting the technical or professional knowledge obtained at college to the support of the selling of that line of products, or of effort. The man with a technical education has a greater advantage over an untrained mind in selling articles or ideas of a technical nature.

Don't get the idea that I am preaching money as the most important thing in life; there are, of course, many things more important, but to a young man starting in life, with the prospects of a family to support, the daily income must be considered first. To those young men who can afford it, I say by all means pick out the most congenial work, that which will bring you the greatest amount of happiness. To those young men who must make money to take care of responsibilities and support a family, I again say, "Go, sell."

Donnell, Carman & Mudge (Canada) Ltd., capital $40,000, head office Toronto, Ont., plans to carry on the business of merchants, tanners and dealers in leather and leather products.

# THE CLERKS DEPARTMENT

## Get Into Selling End of Your Business, Says Irving T. Bush

### The Opportunities For Making Money Are Greater and the Competition Less, Declares Founder of Big Terminal Company

IRVING T. Bush, president and founder of the Bush Terminal Company, New York, employs more than 10,000 people and has a plant covering over 200 acres. A year ago the firm opened a sales building which cost $2,000,000 and more than a thousand manufacturers have engaged space in it. Mr. Bush has much to say to young men that is of interest, and his story in the American Magazine is as follows:

Every man who has got a little way up the ladder of success without barking his shins too severely is asked by young men just starting in life how to pick a business career. That, at least, has been my experience, and as soon as I developed gray matter enough to reason the proposition out to my own satisfaction, I began to answer my young friends by saying:

**Become a Salesman**

"Become a salesman." I did not mean literally to get behind the ribbon counter, or to start on the road with a trunk full of samples. I meant to advise them to get into the selling end of whatever business they eventually determined to try out, and I usually qualified this advice by saying that I assumed they must possess, or could develop, some of the instincts of salesmen.

Any young man who chances to read this article may at least feel that I am a physician who is willing to take his own pills. I began the development of the Bush Terminal when I was about twenty-five years of age, and when I was forty-seven I suddenly waked up to the fact that, while I had for years been advising young men to "become salesmen," I was a hired man myself. The Bush Terminal had been an operating organization. It had been paid to store merchandise, to load it into freight cars, to cart it into the city, and to lighter it about the harbor. It is true that it had built up a unique industrial development where nearly three hundred manufacturers had located to increase efficiency, but, after all, it was an operating proposition, and brought only the limited reward due for such work.

**Was Too Close**

Why I didn't see that before, I don't know, unless it was because my nose was so close to the grindstone that I couldn't get a proper perspective. When I did get it, I said to myself—Well, no, I think I won't repeat what I did say to myself. It wasn't flattering, at any rate, and I determined to take my own advice even if I was some ten years late, and "become a salesman."

Through the medium of the Bush Terminal Sales Building in New York I am now engaged in an endeavor to turn the Bush Terminal Company into one of the biggest selling organizations in the world. I have already gone far enough to realize that my advice was good and my reasoning correct, and that the reward for selling is much greater than that for operating.

**In Every Business**

There is a selling end to every business. In some it is called "business getting"; but, no matter what the name, it is the job of securing new orders and it is the work for which the world pays the best salary. The world is willing to pay for salesmanship, because everyone who owns a business hopes to increase it. If an American merchant sells one hundred thousand dollars' worth of goods in a year, he hopes to sell two hundred thousand dollars' worth in the next year, and the man he is looking for and is willing to pay a good salary to is the man who can help him to do this. Go through any industry and you will find that the same grade of intelligence is better paid in the selling force than it is in other departments.

**Have No Prospects**

There are exceptions, of course, and there are embryonic young Edisons in every community; but the country is full of young men with college educations who are holding down operating positions paying them one thousand five hundred dollars a year, with little prospects of advancement. A salesman, if he has any selling sense, will command this to begin with, and he has constantly before him the stimulus that his salary does not depend upon any cut and dried formula establishing the value of the position he holds, but will increase as his customers grow in number. He knows that he can raise his salary by his own efforts and that his employer has an exact method of measuring his value, by the business he brings in.

**Many Opportunities**

Opportunities for selling jobs are ten to one in other fields. The world needs salesmen. This is supposed to be a day of labor surplus, but look over the advertisements of any daily paper and see how many salesmen are needed. There seems no surplus there. Compared with the openings in any other line, the call is ten to one.

Selling is not difficult after you have taken the first plunge. The idea that men can sell and can't sell is popular superstition. Selling has a shock to it like a cold bath or the first attempt at swimming, but after the first try the shock lessens gradually until there is no shock, unless it is a pleasant one. A man can learn to sell, even if it is not his natural bent.

**Tried Him Out**

I remember a man we employed whom we called the human jellyfish. You can imagine why. Nobody thought he could sell, least of all the man himself. He was back in the business, several miles back as far as importance went; but he had certain qualities that made us believe that if he got the backbone a jellyfish lacks he might sell. We had a talk with him, and he agreed to try. He told us the story of one of his first calls on a firm of wholesalers. He went down to the place, looked at it, and took a walk around the block. Then he looked at it again, and took another walk around the block. The third time he hesitated a little longer, and then took a third walk around the block. The fourth time he faced the door of the place he didn't dare to hesitate—he bolted through.

**He Learned How**

"I don't know why I'm here," he said truthfully to the head of the firm; "but everybody else has tried to get you and I've got to." He got the firm; he learned how to sell. To-day he is making four times the salary he earned when he was a jellyfish, and when you meet him on Fifth avenue you see his chest first, and his backbone is as straight as a ramrod. He'll never be a jellyfish again.

If this man could learn to sell there are few men who could not. Salesmanship is a profession. A man expects to give four years to study a profession; he expects to become a salesman in about four minutes. As soon as he has an outline of his material and a slight knowledge of it he expects to go out and sell. If the average man would put one-half the time and energy that he is willing to give to a technical education into studying selling, I'd guarantee that he'd become a salesman. The minute he is a salesman his chances for making money are unlimited.

**Difficult to Measure**

Have you ever stopped to think how much more difficult it is for an employer to measure the value of the services of the operating man? An engineer in charge of a plant is on duty a certain number of hours each day. He has a number of assistants, and uses each month a certain amount of supplies. He may do excellent work, and save money for the man he works for, without his employer's being definitely conscious of the fact. If, however, a salesman brings in double the number of orders this year that he did last year, the knowledge of the increase is at once present in the employer's mind, for the psychology of business effort is that the eye of the business man is always directed toward an increase in volume.

**May Be Wrong**

This may be wrong, for while it is of the first importance to increase the volume of a business, many enterprises fail because the attention of the executive is directed solely toward increasing business, and the leaks in the operating department are overlooked. But even if this unfortunate condition exists, it illustrates the fact that the character of the work done by a salesman is known at once, and if his services deserve a higher salary he is in a position to ask for it, and to give a good reason why he is entitled to it.

**Can Ask for It**

I am talking to ambitious and energetic young men, for without ambition and energy success is impossible except by accident.

The man who became a salesman from a jellyfish had somewhere in him latent ambition and energy, or we would never have got him started out. Every once in a while an accident does happen and somebody is struck by lightning, but in the long run success comes to the man who is ambitious and who works hard. When the longshoremen at the Bush Terminal were finishing their new club building they asked me to get them a quotation to put over the fireplace. I hadn't time to hunt up Shakespeare, so I wrote them one, which they accepted and used:

"Success is not an accident; it comes to the man who does his job a little better than the other fellow."

### A Little Better

And it isn't much better, either; it doesn't have to be. It's just a little better. But the young man who isn't ambitious enough to want to do his job a little better than the other fellow shouldn't take my advice to "become a salesman," for the same reasons which might put, face up, on his employer's desk the result of good work, might bring into the relentless limelight the fact that he is loafing on his job. A man in an operating position may go on for years, enjoying a comfortable sinecure and letting George do it for him, but a salesman cannot camouflage the situation. He either produces or he does not produce. He has the advantage of carving out his own future and of getting the reward for his efforts, but as an offset to this he faces the fact that he must "walk the plank" if he does not make good, and he cannot disguise a failure.

### Is More Stimulating

Not only is a salesman's job better paid in actual salary return for the effort expended, but it is more stimulating mentally. It brings him into contact every day with new people, new ideas, and new problems. I am not thinking, as I write, of the unusual mind of the genius, but of the mind of the average young men who starts life with a desire to succeed and a willingness to work. It may not be possible to make a dull mentality brilliant, but even a slow mind will develop if it works amid stimulating surroundings. This does not mean that a young man must necessarily attach himself to a big organization such as our own, for if a big firm is stimulating in itself a small one presents even greater stimulus. A man in a small firm may not find opportunities for rising within the walls of the firm, but he does get into contact personally with his boss and he gets the boss' ideas. The boss is usually a bigger man than he is, or a more experienced one, and so he gets into direct contact with a bigger and more mature mind.

### Often Unacquainted

Executives in a big firm are often unacquainted with their men. They need shocks of discovery. We get used to thinking of our boys as filling some particular kind of job, and we have trouble in waking up to the fact that they may fitted, or have fitted themselves, for something different. We try, always, to look out for deficiency and ability, but we are likely to pass it by despite our care.

Not long ago one of our heads was taken sick. His assistant jumped into his place and filled it better than his superior. He did not know he could do it, neither did we. Often the men themselves need this shock of discovery, the shock of a new stimulus. Changing from smaller firm to smaller firm gives this just as surely as a big firm presents opportunity in itself, and often results come more quickly through the smaller firm.

### Don't Be Too Smart

I don't want to make any young man over-confident. One of the most frequent faults among young men engaged for "business getting" is that they try to be too smart, and over-reach themselves. The too-smart-Aleck is of two kinds: One kind blows up; they are traveling on sheer nerve and have nothing to back it—neither ability nor energy, nor willingness to do real work. The other kind consists of the brilliant fellows who think just a shade too much of their own gifts. I know of one such man now, a man of very brilliant parts, a graduate of a college of technology. He is bright enough and capable enough, but he has such an enlarged ego that he will never be any good in business until he has been up against it good and hard. He is swelled up with his own importance; he needs hardship to bring him down. Why, we are just praying that he will get it! We want him! The best thing I ever heard about men like this was said to me just the other day by an Irishman, a man with little education but a sure perception of truth. Speaking of a man we both knew, he said:

### All Have to Grow

"He isn't big enough to be small enough to be big." I'm going to hold on that, it means just what it says. If you're big enough you will consent to go through the growing process.

The best salesman makes his customers feel that he treats them honestly, and is interested in selling them goods which they can sell again at a profit. If he consistently pursues this policy, he creates for himself a clientele which is in a large measure a personal asset. If he disagrees with his employer there is always some other man in the same line who will be glad to hire him to sell his goods. The operating man has no such advantage. While it is true that his capacity and ability grow with experience, he cannot bring to a new employer a line of friendly customers who have confidence in him.

### Can Go Back Again

The most successful salesmen realize that their success is not based on their ability to talk a customer into the purchase of one bill of goods. It is based upon an ability to go back to a customer and sell him again and again. Too many salesmen create unsuccessful customers by talking them into buying more goods than they can sell. An unsuccessful customer is not an asset to anybody. Every young salesman should paste that thought in the top of his hat where he can read it when he makes his opening bow. When he calls again, he will not wish to be remembered as the man who sold goods which are still on the shelves. The door is always open to the salesman whose goods carry with them the pleasant memory of a profitable resale.

### Not Good Business

This seems a perfectly obvious statement, but many salesmen think they have done a clever thing when they have sold a customer a bill of goods he does not need, and many a good story is told in the smoking compartment of how Smith or Jones was landed. In reality, such a sale is a liability to both the salesman and his employer. Many a customer has been made a friend for life by being restrained by the salesman from buying at an inopportune time.

A certain assistant salesman once welcomed a merchant who ran a store selling women's ready-to-wear clothing. He wanted to pick out a line for his store. The assistant salesman found him very easy to please. He was decided in his tastes. He liked certain styles and certain garments and selected them, laid them aside and admired them. The assistant salesman knew that he was selecting stock that had not sold well that year, but it was an easy order and his customer had a mind of his own, so he held his tongue.

### Made a Change

As the deal was being closed the head salesman happened along. He ran over the models selected, and knew that the combination would result in just one thing—full racks for the merchant at the end of the season. He paused and tactfully admired the merchant's taste. He went over garment after garment. But somewhere in his admiration he inducted the reminder that women's clothes are not sold on taste, but on style for the season, and after a time he had the merchant's confidence enlisted to the point where he could take him into his office and show him the repeat orders for that season.

When the merchant left there had been a complete change in the bill of sale. It had taken more than double the time of the first sale and a good deal more work. The sale was smaller, if anything; no gain was obvious. But—the next order that merchant sent in he did not even come to the city. He telegraphed the head salesman to select a line that would sell as well as the first had.

### Double Obligation

A young man who wants to sell must go into selling with the idea of a double obligation, not only to the boss but to the customer. He must go into it determined not to undertake to sell anything he does not believe in. Among the advertisements I recommended reading in the dailies are always a certain number of fakes. There are always a certain number of articles sold for far more than they are worth. If a man tackles these, he ought to fail. And if he succeeds, one fake connection—one connection selling something that isn't worth the price asked for it, from bogus mining stock to buttons sold for twenty-five cents and worth five—will stamp his whole career with the wrong impression.

### Is Still True

It's old and it's hackneyed, but it's just as true as ever that honesty is the best policy, and I never make a speech or write an article that I do not try to work that fact in. Honest salesmanship brings the rewards.

It requires a much higher order of ability to become a successful wholesale salesman than to be a success as a retail salesman; but even the retail salesman who makes good will make more money than other men holding positions in a retail store. The important difference between the two is the attitude of the buyer. A retail salesman is approached by a man who comes in a buying mood. The problem of the wholesale salesman is much more difficult and it requires a much greater ability for a young man to take a case of samples, a list of securities, and, most difficult of all, an idea, and get the attention of a possible customer, in his office, surrounded by the perplexities of business and perhaps in an unresponsive mood.

### Must Use Judgment

One of the first things that a young man trying out salesmanship has to learn is when not to try to sell, for there is nothing more fatal than to attempt to sell a man when he is in the wrong mood. The enthusiasm of many a young salesman has carried him "over the top" when the odds were ten to one against him; but he soon learns, if he is a success, to stay in his trench until the going looks good.

I remember one old and experienced salesman who told me very early in my business career that he never attempted to sell a man "on a rainy day or with the wind in the east." I have often thought of that remark, and many a time when I have been trying to sell an idea to somebody I have cancelled an appointment when the weather was bad. The reason underlying this is not foolish or superstitious. Selling ideas is the most difficult of all salesmanship. A man will take a chance on a clear, crisp day that he will not take in an atmosphere which is cold, raw and depressing.

### Should Study Work

This is not, however, an essay on salesmanship, but is intended as a word of advice to young men to aid them in the picking of a profession. If you decide to become a salesman, by all means study salesmanship. Do not think that you can

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### WIND SHIELD WIPER

No. 4 Model Clear Vision Windshield Wiper, manufactured by the American Automatic Devices Co. Products, Chicago, is claimed to be the easiest operating windshield made. It is stated that

*Wind Shield Wiper*

it is made of tempered spring wire with indestructible pure rubber squeeze securely fastened in flexible steel frame, scientifically constructed. It is stated it has a high grade baked enamel finish and that it will clean the entire glass with but slight effort.

### STEEL HEATER

No. 8XX Clark heater, the Duchess, manufactured by the Chicago Flexible Shaft Company, Roosevelt Road and Central Avenue, Chicago, it is claimed, is the handsomest heater ever built. It is stated that it is covered with plush in blue, green or maroon shades, that

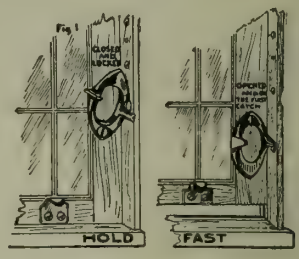
*Clark Heater*

it is extra wide, highly finished, nickel plated and flanged at both ends. It also has, it is stated, extra heavy body construction and insulation. All outside parts, it is claimed, are quadruple nickel plated, de luxe finish. The heater, it is stated, has side and end heat controls to give perfect heat regulation. There are two fuel drawers, one in each end, to use double charge of fuel if wanted in extreme weather. The heater, it is stated, is twenty-four inches long and weighs twelve pounds.

### "W. & B." WRENCH BOARD

The Whitman & Barnes Manufacturing Company, St. Catharines, Ont., are putting out an attractive new board for displaying their drop forged wrenches. The background, it is stated, is light golden oak, the display card is black with gold lettering.

The wrench board is designed, it is stated, to be of greatest assistance to both the dealer and the purchaser. Each wrench number is plainly marked in red, and wrenches, it is stated, may be had either semi-finished or black enameled finish. As the new board is only 8 inches wide by 28½ inches high, it may be used to advantage, it is claimed, in the window as well as in its more usual location on store column or walls.



The assortment of ten sizes of double-head wrenches, three of each size, is not intended, it is stated, to be complete or to take the place of the dealer's regular stock. It includes the most popular sizes for general use, and so serves as a guide, it is claimed, to the purchaser as well as a silent, but effective, salesman and stock-keeper for the dealer.

*Wrench Board*

### HOLDFAST WINDOW CATCH

G. S. Whitaker & Co., 117 Wellington Street West, Toronto, are offering to the trade the "Holdfast" window catch and lock, here illustrated. It is claimed that the lock is fool proof, simple and effi-

*Window Fastener*

cient. The catch may be used for holding the window up or fastening it down. The lock is described as being neat, and it is said does not mar the window. The catches are made in oxidized and dull brass finish and sell in half dozen lots to the consumer. The company supplies a demonstrator and silent salesman for use on the retail counter. Complete details will be supplied upon request.

### NEW LIST FOR COLD ROLLED AND DRAWN

A new price list has been issued by the United States mills and adopted by the Canadian mills for cold rolled, cold drawn, turned and polished steel, and as there is apt to be confusion in the minds of buyers when the new list comes out with such radical changes, an explanation of this list may be a help to our readers.

Ever since cold-drawn steel appeared on the market, it has been sold on the basis of a list price for the various sizes and shapes, with a discount which varied according to the market, therefore all quotations were made in the form of a discount. The new list now takes the same form as the hot-rolled steel, or iron bars, namely, a base price with extra for size and shape. It is only necessary for the buyer to know the base price and to add the extra for the particular size or sizes he may be ordering. The base price applies to all material covered by the new price list, that is, the same price base, is applicable to rounds, squares, hexagons and flats, or other shapes. It is not necessary to remember the list price of each individual size and take the discount from it, but all that is required is to remember the extra that the different sizes take over the base price.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THE strike of iron and steel workers in the United States has not yet had any marked effect on the Canadian hardware markets. The consensus of opinion is that if the strike is prolonged many Canadian manufacturers will be seriously inconvenienced. Many Canadian manufacturers are almost wholly dependent upon United States mills for certain requirements and as English steel supplies are available only in limited quantities a lengthy strike would have serious effects in Canada.

One of the first effects of the big American steel strike has been to cause dealers whose stocks were broken to rush to fill them. Those who got their orders in early were successful in obtaining small quantities of sheets and bars. This has left the jobbers with light stocks and they expect it will cost them more to replace their stocks and an advance all around is predicted. The greatest scarcity of stoves, tin and enamelware and furnaces that has been experienced in five years is now keeping many manufacturers wondering how they are going to fill the orders that keep pouring in from all parts of the Dominion. Labor troubles and lessened production are given as causes of the shortage. Supplies of both turpentine and linseed oil are reported very scarce and linseed crushers report in some cases paying a premium of 25 cents per bushel for seed for immediate delivery.

Price changes are again numerous on shelf hardware this week, in most cases prices having advanced to higher levels. Steel products are firm in price, particularly steel sheets and plates. Paint products are firm in price, but it is expected that present prices on ready-mixed paints will prevail for some time. Paint manufacturers have agreed on a plan for the standardization of paint containers, and it is hoped that a great saving will thus be effected.

# MONTREAL MARKETS

MONTREAL, Sept. 25—A large number of items have been advanced in price this week and as far as manufactured steel products are concerned they are on a firm basis. Soldering irons are higher and net prices appear elsewhere. Rolling pins have been moved upward, too. Stove pipe thimbles are on an advanced price basis and net prices will be found in the market items. Poultry netting discounts have been announced so that bookings can now be made on a definite price understanding. Japanned door bolts are marked up 10 per cent. Mop wringers are higher in price. Pliers of one number are marked up as are also various locks. Graphite, mirrors and coppered hat and coat hooks are all higher in price. Jute markets have continued to advance. The only decline made is that for ingot metals, these being quiet and dull.

Strong firming tendencies may be said to apply to steel sheets and plates and higher prices may be looked for. Steel and iron bars, wire and cut nails are also steadily firm, while all wares and stoves, particularly heaters and kindred lines, are firmed as a result of the steel workers' strike in the States.

Altogether, business is excellent and supplies are being shipped out to the country in large volume these days. The tendencies are strong on most commodities. Collections are good.

## *Poultry Netting Prices Are Out; Wringers Up*

**Montreal.**

POULTRY NETTING, WRINGERS.—Prices on poultry netting for orders placed now and for spring delivery are announced. The discount on Canadian Hexagon variety is 15 per cent. for 2 in. mesh and 10 per cent. for 1 in. mesh. U. S. or "lay flat" variety is quoted at a discount of 10 per cent. on 2 in. mesh, or 5 per cent. on 1 in. mesh, applying to Canadian standard list. White mop wringers are higher in price. The present quotations for the various numbers are: No. 1, per dozen, $35; No. 2, $23.50, and No. 4, $34.

## *Pliers and Locks Up; Graphite Advances*

**Toronto.**

PLIERS, LOCKS, GRAPHITE.—Advanced prices are in effect on various lines of locks of Peterboro manufacture, although the increased prices are not yet available. Pliers of the No. 1050 variety are also advanced, and the following net prices apply: 4 in., per doz., $13.50; 5 in., $14.50; 6 in., $15.50; 7 in., $19, and 8 in., $21. Dixon's graphite is quoted in one quarter at a price of 57½c per pound in 1 lb. tins, and at 55c per pound in 5s.

## *Higher Tool Prices; Mirrors Advanced*

**Montreal.**

TOOLS, MIRRORS.—Prices have advanced for Stanley line of tools, and this has previously been outlined. Net prices are just to hand, however, and these, on the average, indicate advances of approximately 15 per cent. Mirrors are higher to the extent of 10 per cent. The "Louise" pattern in 5x7 are quoted at $3 per dozen; 7x9, $4.25; 8x10, $5; XL, 4x6, $2.10 per dozen; 5x7, $2.65; 6x9, $3.40, and 8x10, $4.60.

## *Hat and Coat Hooks; Soldering Irons Up*

**Montreal.**

COAT HOOKS, SOLDER IRONS.—Advanced prices are in effect for coppered hat and coat hooks, the price now ruling for 3 in. size being $1.20 per

gross. Soldering coppers are selling at higher prices, the present quotations being in effect here: Prices per pair, 1 lb., 65c; 2 lb., $1.25; 3 lb., $1.75; 4 lb., $2.35, and 5 lb., $2.90. Handles are priced at 20c per dozen.

## *Rolling Pins Higher; Pipe Thimbles; Bolts*

**Montreal.**

ROLLING PINS, THIMBLES, BOLTS. —Advanced prices are in effect for rolling pins. The advance is about 10 per cent., and ordinary wood handle variety are selling at $2 per doz., and enamelled handled for $2.15. Stove pipe thimbles are advanced, too, the present prices being $6.60 per dozen on 7 in. wall; $7.80 on 7 in. ceiling, and $9 on 7 in. extension. Tower bolts of No. 9 variety, japanned, are quoted higher at the following prices: 3 in., $1.15; 4 in., $1.55; 5 in., $2; 6 in., $2.30; 7 in., $2.70; 8 in., $3; 9 in., $3.40, and 10 in., $3.80.

## *A Firm Undertone On Stoves and Wares*

**Montreal.**

STOVES, WARES.—In view of the fact that the present steel strike in the United States makes the outlook for material an uncertain one, the undertone is a strong one for stoves, heaters and also for various wares. At present the manufacturers are taking care of the trade very satisfactorily and the movement is heavy. Merchants who secure their requirements early will go far toward providing against possible shortages later on, should labor difficulties continue.

## *Rope Moves Slowly; Jute Fibre Firmer*

**Montreal.**

ROPE AND CORDAGE. — Little change of any description has been made in the rope market. The manufacturers report a fair demand but this might be better. There are no indications at present of a change in the basis, as far as prices go. Jute fibres are very strong and advances are being made frequently. Pure manila, base price is 32c per lb.; British or beaver manila, 28c, and sisal, 25c.

## *A Seasonable Sale For Oil and Gasoline*

**Montreal.**

OIL AND GASOLINE.—The basis for coal oil is an unchanged one at 22c to 25c per gallon, according to the grade. The movement is fair and supplies adequate to meet requirements. Gasoline is an active seller and the undertone is steady and unchanged, 33c per gallon being quoted for motor grade.

## *Basis Holds Firm For Wire and Nails*

**Montreal.**

NAILS AND WIRE.—There is a steadily strong undertone to the market for nails. The supplies are ample at present and a heavy sale in the country is obtained for various sizes, a considerable amount of building being conducted in the outlying towns and rural communities. Prices still hold at $4.75 per keg for both standard wire and cut nails. The steel wire basis is without change at $5 base, and the undertone here is also a firm one.

## *Very Firm Undertone On Steel; Iron Bars*

**Montreal.**

STEEL AND IRON.—Naturally, as a result of the steel workers' unrest in the States there has been a firming of the price basis on steel and iron products, but no actual changes have been effected as yet. If the strike difficulties are soon settled it is probable that advances may be held off, otherwise there is every reason to anticipate somewhat higher prices. There is a fairly heavy movement at present and stocks are reasonably satisfactory.

| | |
|---|---|
| Iron finish machinery steel | 3 80 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |
| Tire steel | 3 95 |
| Toe calk steel, per 100 lbs. | 4 65 |
| Band steel | 3 75 |
| Harrow tooth steel | 3 90 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond too steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *Tendency is Higher For Various Sheets*

**Montreal.**

SHEETS AND PLATES. — While there have been no actual advances in the local markets this week, higher prices are anticipated by some, particularly if the present strike troubles in the United States among steel workers are continued for any length of time. Already prices have been marked up for certain sheets at point of production, and the effects will reach here perhaps within a few days. Tendencies are decidedly upward.

| BLACK SHEETS— | Per 100 lbs. | |
|---|---|---|
| 10 gauge | $5 50 | $6 25 |
| 12 gauge | 5 55 | 6 20 |
| 14 gauge | 5 60 | 6 35 |
| 16 gauge | 5 70 | 6 50 |
| 18-20 gauge | .... | 6 35 |
| 22-24 gauge | .... | 6 40 |
| 26 gauge | 6 45 | 6 50 |
| 23 gauge | 6 75 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | $8 65 | $9 25 |
| 28 gauge | 8 30 | 8 85 |
| 26 gauge | .... | 8 50 |

| 28 gauge | .... | 8 35 |
| 26 gauge | .... | 8 10 |
| 24 gauge | .... | 7 40 |
| 22 gauge | .... | 7 30 |
| 18 and 20 gauge | .... | 7 00 |

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Lead Products Are Moving Seasonably*

**Montreal.**

LEAD PRODUCTS.—For the most part there has been but little change in the market undertone. Local conditions among the plumbing trade are none too satisfactory and there has been quite a determined effort to tie the activities of the master plumbers up through the strike. It is hoped that within a reasonably short while there will be a diminution of this trouble, when buying will again be larger.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |
| Lead waste | .... | 0 13½ |

| 50-50 | .... | 0 41¼ |
| Zinc sheets, casks | .... | 0 17 |
| Do., broken lots | .... | 0 18 |

## *May be More Sale For Old Materials*

**Montreal.**

OLD MATERIAL.—At the present time there is very little new feature to report. The movement has been rather a limited one, and until some definite trend can be forecast in the present unrest among steel workers it is impossible to say whether there will be much change of a quotable nature. The tendencies, if the steel strike lasts, would naturally be of a firming nature.

| Dealers' Buying Prices— | | |
|---|---|---|
| Pipe scrap, ton | .... | 8 00 |
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |

| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 15 00 |
| Malleable scrap (ton) | .... | 15 00 |

## *Some Weakness Shows For Ingot Metals*

**Montreal.**

INGOT METALS.—Considerable quiet prevails. There has, for the most part, been an easing of the tendencies for most ingots, and at present there is little inclination to buy for any length of time ahead.

COPPER.—Weaker. The movement is decidedly a small one, and 25c per pound is quoted.

TIN.—Some of the mills are reported closed and prices are weaker in consequence of a lighter selling movement. Price is reduced 2c, to 59c per pound.

SPELTER.—Some of the galvanizing plants are closed; there is little demand, and the prices are weaker at 9¾c per pound.

ANTIMONY.—The domestic business is a limited one, and the sales made are effected on the basis of ¼c per pound less, at 9½c.

LEAD.—This metal holds, and no quotable change has been made, the price remaining at 7½c per pound.

ALUMINUM.—Little trading and no quotable change. Price 35c per pound.

PIG IRON.—What limited business there is has been effected at $50 per ton.

# TORONTO MARKETS

TORONTO, September 25—Increasing difficulty is being experienced in getting many lines of metal goods and this situation, it is expected, is going to grow worse instead of better. The first effects of the big steel strike in the United States are already showing in a rush by dealers whose stocks are low to secure sheets, bars and other lines. The first few who placed their orders got some goods, but as jobbers' stocks were not large, many have had to go without. There is every indication that prices will be higher, although no changes have been made yet in either sheets or bars.

A general advance of ten per cent. has been made in cant hooks and peavies. Higher quotations are also in effect on Universal food choppers, American large head roofing nails, building paper, machine screws, Rogers 1847 silver, galvanized poultry netting.

There is every indication that leather goods and belting may be advanced shortly as firms who have been maintaining on old prices cannot replace their stocks at former figures.

It is announced that prices on rubber garden hose for the next season will show no change.

Business in general is reported excellent and collections good.

## *Rubber Garden Hose Will Remain the Same*

**Toronto.**

RUBBER GARDEN HOSE.—It is announced that the prices of rubber garden hose for the next season will hold without change. An improvement in shipping conditions by which supplies of raw materials are being secured is a factor in maintaining present price levels.

## *Advance is Made in Rogers 1847 Silver*

**Toronto**

ROGERS 1847 SILVER.—The discount on Rogers 1847 silver is now 32½ instead of 30 and 10 per cent. Lines sold on a net basis are advanced in proportion.

## *Poultry Netting Moving Upwards*

**Toronto.**

POULTRY NETTING.—Higher prices are now effective on galvanized poultry netting. The new quotations are as follows: 2 in. mesh Canadian pattern, discount fifteen per cent.; 1 in. mesh, Canadian pattern, discount ten per cent.; 2 in. mesh, American pattern, discount 10 per cent.; 1 in. mesh, American pattern, discount 5 per cent.

## *Food Choppers Move To Higher Levels*

**Toronto.**

UNIVERSAL FOOD CHOPPERS.—Higher quotations have been named on Universal Food Choppers and the prices are as follows: Nos. 0, 1, 2 and 3, $22.80, $28.00, $33.75, $44.75.

## *Cant Hooks, Peavies Advance 10 Per Cent.*

**Toronto.**

CANT HOOKS, PEAVIES.—A general advance of ten per cent. has been made in the quotations on cant hooks and peavies. Higher costs of production and materials are given as the cause for this increase.

## *Building Paper Joins the Upward Movement*

**Toronto.**

BUILDING PAPER.—An upward revision has been made in the quotations on building paper and the figures are as follows: Dry No. 1, per roll, $1.23; Dry No. 2, per roll, 64 cents; tarred No. 1, $1.35 per roll; tarred No. 2, 82 cents per roll; Surprise, 70 cents; tarred felt, $5.-15 per hundred pounds; carpet felt, $5.00 per hundred pounds.

## *Roofing Nails Are Revised Upwards*

**Toronto.**

ROOFING NAILS.—American large head roofing nails have been advanced. The new quotations are made on the basis of $8.75 per hundred pounds, and in twenty-five pound boxes, $9.75.

## *Market Stiffens in Machine Screws*

**Toronto.**

MACHINE SCREWS.—The market for machine screws is stiffening and new and higher quotations are now in effect as follows: Flat and round head steel screws, cut, 37½ and 10; rolled, 67½; oval and finister head, cut, 30; rolled, 62½; flat and round head brass, cut, 30; rolled, 42½; oval and finister head brass, cut, 15; rolled, 32½.

## *Nails Selling Well; Wire Holds Firmly*

**Toronto.**

NAILS, WIRE.—A brisk demand continues for nails. Prices show no change. Just what effect the steel strike may have on the situation is not yet apparent. Quotations on nails are as follows: Wire nails, $4.75 per hundred pounds base; cut nails, $4.75.

There is a good demand for smooth steel wire. Prices are holding steady at $5.00 per 100 pounds base.

## *Prices of Belting May Advance Shortly*

**Toronto.**

BELTING.—While no changes have yet been made in the prices of belting, it is expected that an advance will be made shortly. Dealers state that their old stocks are rapidly becoming exhausted as a result of steady business, and that they cannot replace them at former figures. Higher production costs and higher prices for hides are a big factor in this situation.

## *Coal Oil, Gasoline Remain Unchanged*

**Toronto.**

COAL OIL, GASOLINE.—Prices of coal oil remain steady at from 21½ cents to 24½ cents per gallon, according to grade. Gasoline is steady also at 32 cents. It is stated that no immediate changes in prices of either gasoline or coal oil are expected.

## *Market Stiffening in Steel and Iron Bars*

**Toronto.**

IRON AND STEEL BARS.—A general stiffening of prices is likely as a result of the American steel strike. Some fairly large orders have been placed in anticipation of trouble, but whether deliveries will be made is not at present known. The demand has been active. No one in the trade is looking for lower prices even if the big strike should be settled as production costs have been advancing steadily. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | .... | 4 50 |
| Band steel | .... | 4 25 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Boiler Tubes and Wrought Pipe Steady*

**Toronto.**

BOILER TUBES, WROUGHT PIPE.—It is too early yet to state what effects the steel strike will have on these lines, but in some circles an advance is expected. In the meantime prices are holding without change as follows:

| BOILER TUBES— | Per 100 feet Seamless | Lapweld |
|---|---|---|
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Market For Sheets and Plates is Strong*

**Toronto.**

SHEETS, PLATES.—There has been a rush to secure these lines and many have had to go without the goods they wanted as there was not enough to go around. If the American steel strike continues for any length of time an advance in prices, it is stated, is inevitable. The range of prices is as follows:

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | 4 75 | 5 45 |
| 16 gauge | 4 85 | 5 60 |
| 18-20 gauge | 5 70 | 6 15 |
| 22-24 gauge | 5 75 | 6 20 |
| 26 gauge | 5 80 | 6 30 |
| 28 gauge | 5 90 | 6 45 |
| 3-16 inch plate | 4 75 | 6 25 |
| ¼-inch boiler plate | 4 25 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

| GALVANIZED SHEETS. | | |
|---|---|---|
| 10¾ oz. | $7 80 | $8 00 $8 85 |
| U.S. 28 | 7 40 | 7 60 8 30 |
| U.S. 26 | 7 10 | 7 30 7 90 |
| 22 and 24 | 6 95 | 7 15 7 65 |
| 18 and 20 | 6 80 | 7 00 7 45 |
| 16 | 6 65 | 6 85 7 25 |
| 12 and 14 | 6 50 | 6 70 7 05 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Firmer Prices Rule in the Scrap Market*

**Toronto.**

OLD MATERIALS.—Firmer prices are effective in the scrap market, and a good volume of business is being handled. Shipments are still being made to the United States, but it is expected that the strike may have an effect on this business shortly. Quotations are as follows:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 11 00 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red Brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 03½ |
| Automobile tires | .... | 0 03¼ |

## *Corrugated Sheets Likely to Advance*

**Toronto.**

CORRUGATED SHEETS.—There is every indication of an advance shortly in the price of corrugated sheets. The matter, it is stated, is under advisement at the present time and an announcement may be made very shortly. Business is reported as fairly active. Quotations at present are as follows:

| Corrugated Sheets— | Per 100 Square Feet Galv'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Stoves, Wares and Furnaces Are Scarce*

**Toronto.**

STOVES, WARES.—"There is a greater scarcity of stoves, wares and furnaces than we have experienced in five years," said one of the largest manufacturers in discussing the situation. Prices, it is expected, will advance as a result of the steel strike affecting raw materials. In the meantime orders continue to pour in for these goods far faster than the manufacturers can fill them. Business is coming in from all parts of the Dominion. The outlook is that many shipments will be greatly delayed owing to production difficulties.

## *Prices of Cordage Are Holding Firmly*

**Toronto.**

CORDAGE.—Only a fair volume of business is being handled in these lines. Prices show no changes and are as follows: Pure manila 32c per pound, base; Beaver or British manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25c per pound, base.

## *Prices Are Firm For Lead and Zinc*

**Toronto.**

LEAD AND ZINC PRODUCTS.—The market in these lines is firm and a good volume of business is reported. Quotations are as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 6 inches, list, per lb. | .... | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 38½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Firm Prices Rule For Ingot Metals*

**Toronto.**

INGOT METALS.—The market for ingot metals is firm with the exception of tin, which is slightly easier. A good volume of business is being handled.

COPPER.—Copper is holding steady at 27 cents, with no indications of any immediate change.

TIN.—Tin is down a little, quotations ranging around 57½ cents. A fair volume of business is being handled.

LEAD.—There is a good demand for lead at seven cents. No immediate change in this figure is anticipated.

SPELTER.—Spelter is a little easier, the quotations being on the basis of 9¼ cents a pound. Trade is only fair.

ANTIMONY.—There is a fairly active demand for antimony, at from 10 to 11 cents a pound, many sales being made at 10½ cents.

ALUMINUM.—Business in aluminum is only fair and prices show little change, quotations being around 35 cents per pound.

# WINNIPEG MARKETS

WINNIPEG, Sept. 25—Price changes during the week are fairly limited, affecting only the following lines: Boxwood rules, Enterprise food choppers and measuring tapes, all of which show advances in price. The balance of the hardware lines hold firm at former quotations, but from present indications the market tendencies on most lines are for higher prices.

Business in all lines continues very brisk and at present indications point to a big fall trade unless the present weather conditions seriously affect the wheat crop.

## *Spring Bookings on Poultry Netting*

**Winnipeg.**

Bookings are now being taken by the Winnipeg jobbers on poultry netting for spring delivery at present prices, which are confirmed as follows: 1 in. mesh, 24 in., $6.30; 30 in., $7.65; 36 in., $9; 2 in. mesh, 24 in., $3.05; 30 in., $3.60; 36 in., $4.20; 48 in., $5.60; 60 in., $6.95; 72 in., $8.30 per roll.

## *Boxwood Rules Up About 10%*

**Winnipeg.**

New prices have just been issued on boxwood rules showing a general advance of approximately 10 per cent. over former quotations, due to the increased cost of production, and the new selling prices now in effect are given below:

Boxwood Rules.—No. 32, $7.80 dozen; 36, $5.10; 62, $8.95; 84, $7.05; 52, $8.10; 53, $5.10; 53½, $9; 54, $9.80; 51, $3.70; 69, $2; 68, $2.35; 70, $6.60; 61, $2.95; 66½, $6.70; 66¾, $6.90; 66¼, $7.75.

## *Taylor-Forbes Lines Slightly Advanced*

**Winnipeg.**

Taylor Forbes Co. have just issued new prices on all their products, which show a general advance of approximately 5 per cent., due to increased wages and shorter working hours. While there is no change as yet in the Winnipeg selling prices, new prices will be announced as soon as it is necessary to replenish stocks on the new basis. The lines which will be affected include Mrs. Potts' irons,

grindstone fixtures, harness hooks, thumb latches, and many other staple lines.

## *Enterprise Line Up From 5 to 10%*

**Winnipeg.**

The Enterprise Manufacturing Co. have just issued new jobbing prices on their food choppers, showing an increase of from 5 to 10 per cent. over former prices and are effective at once. New prices now ruling are given as follows:

Enterprise Food Choppers.—No. 5, $3.50 each; No. 10, $5.50; No. 12, $5; No. 22, $8.50; No. 32, $11.

Extra Knives—No. 5, 44c each; No. 10, 50c; No. 12, 50c; No. 22, 72c; No. 32, $1.

Extra Plates.—No. 5, 50c each; No. 10, $1; No. 12, $1; No. 22, $1.25; No. 32, $2.10.

Extra Cranks.—No. 5, 50c each; No. 10, 60c; No. 12, 72c; No. 22, $1; No. 32, $1.25.

Thumb Screws.—No. 5, 28c each; No. 10, 33c; No. 12, 33c; No. 22, 33c; No. 32, 38c.

Stuffing Attachments.—No. 5, $1.15 each; No. 10, $1.45; No. 12, $1.45; No. 22, $1.60; No. 32, $1.80.

## *Measuring Tapes Up About 10%*

**Winnipeg.**

Prices on measuring tapes have been advanced during the week based on new lists issued by the Lufkin Rule Co., and show an advance of approximately 10 per cent., due to increased manufacturing costs. New prices now in effect are as follows:

Measuring Tapes—No. 710, $4.45; No. 713, $5.95; No. 14, $7.15; No. 63, $4.65; No. 265, $6; No. 266, $7.50; No. 100, $3.25; No. 103, $4.75; No. 105, $6.80; No. 603, $3.30; No. 604, $3.65; No. 606, $5; No. 240, $2.95; No. 243, $4.10; No. 245, $5.15; No. 246, $6.65; No. 1033, $14.15; No. 1035, $18.45; No. 143, $7.54; No. 145, $10.10; No. 165A, $1.80; No. 3143, $4.55.

## *Wrought Pipe Prices Are Firm*

**Winnipeg.**

Prices on wrought iron pipe hold firm on the local market with the usual demand. Stocks in general are only moderate as mills are in many cases unable to make deliveries in certain sizes. With the present labor unrest and advancing markets in many hardware lines, new prices on pipe would not be surprising. To-day's ruling prices are as given below:

**WROUGHT IRON PIPE**

| | Per 100 ft. Black | Galvd. |
|---|---|---|
| ¼ in. | $4 91 | $7 20 |
| ⅜ in. | 5 00 | 7 34 |
| ½ in. | 6 66 | 8 37 |
| ¾ in. | 8 33 | 10 71 |
| 1 in. | 12 33 | 15 75 |
| 1¼ in. | 16 65 | 21 29 |
| 1½ in. | 19 94 | 25 43 |
| 2 in. | 26 82 | 34 25 |
| 2½ in. | 43 07 | 54 77 |
| 3 in. | 56 40 | 71 70 |
| 3½ in. | 73 86 | ..... |
| 4 in. | 87 25 | ..... |
| 4½ in. | 100 26 | ..... |
| 5 in. | 116 82 | ..... |
| 6 in. | 151 52 | ..... |

## *Paint Materials Hold Firm*

**Winnipeg.**

Turpentine prices continue firm on the local market and no immediate change is anticipated as exports are still reported heavy, while stocks are below normal. The local demand is reported very limited at present. To-day's ruling prices are confirmed as follows: Turpentine, bbl. lots, $2.70 gal.; ½ bbls, $2.73; 5-gal. lots, $2.75; 1-gal. lots, $2.75, plus the usual extras for containers. Linseed oil prices show no change during the past week, holding firm after the recent drop of 10c per gallon. Flax seed prices show a firm tendency and no immediate change is anticipated. To-day's market prices are given below: Raw linseed oil, $2 per gal.; boiled, $2.03 per gal.

# LONDON MARKETS

LONDON, ONT., Sept. 25.—Among lines which have advanced in price during the week are air waste and stop cocks, turpentine, shaft tips, calf meal, halters, seeders, cultivators. Business continues seasonably good. Fall lines are in good demand. Silverware, cutlery, etc., for Christmas trade is being bought early this year on account of shortage in these lines. Prices generally are very firm. Collections are excellent.

## *New Net Prices on Stanley Goods*

**London, Ont.**

In last issue an advance in Stanley goods was announced. New net prices are now available as follows, increases running from 10 to 15 per cent.

SCREW DRIVERS.—No. 70 x 3 in., $2.70; 4 in., $2.90; 5 in., $3.25; 6 in., $3.55; 7 in., $4.20; 8 in., $4.60; 10 in., $5.60 dozen.

No. 80 x 3 in., $2.10; 4 in., $2.45; 5 in., $2.55; 6 in., $2.75; 7 in., $3.15; 8 in., $3.75; 10 in., $4.35.

No. 20 x 3 in., $3 35; 4 in., $4.05; 5 in., $4.75; 6 in., $5.70; 7 in., $6.10 dozen.

No. 20 x 8 in., $7.05; 9 in., $7.90; 10 in., $8.90 dozen.

MITRE BOXES.—No. 50½, $9.15; No. 240, $18.55; No. 242, $19.00; No. 244, $19.45; No. 246, $19.95; No. 358, $22.85 each.

LEVELS.—No. 00, $12.95; No. 0, $14.40; No. 3, $25.25; No. 5, $32.20; No. 104, $9.70; No. 30, $2.95; No. 35, $2.55; No. 45½, $4.00; No. 48, $4.10; No. 36 x 12 in., $2.80; 18 in., $3.30; 24 in., $3.75 each.

BIT BRACES.—No. 966 x 10 in., sweep, 95c; No. 965 x 10 in. sweep, $1.90; No. 946 x 10 in. sweep, $1.70; No. 945 x 10 in. sweep, $2.70; No. 975 x 10 in. sweep, $1.65; No. 915 x 8 in. sweep, $3.10; 10 in. sweep, $3 15; 12 in. sweep, $3.25; 14 in. sweep, $3.35; No. 921 x 10 in. sweep, $4.40; 12 in. sweep, $4.45; No. 919 x 10 in. sweep, $4.80 each.

WOOD HANDLE SLIDING TEE LEVELS.—No. 25 x 6 in., $6.70; 8 in., $7.50; 10 in., $7.80; 12 in., $8.75 dozen.

LEVEL GLASSES.—1 in., 75c; 1¼ in., 75c; 1½ in., 75c; 1¾ in., 80c; 2 in., 85c; 2½ in., 95c; 3 in., $1.05; 3½ in., $1.10 dozen.

PLANES.—No. 3, $4.25; No. 4, $4.60; No. 4½, $5.30; No. 5, $5.30; No. 6, $6.80; No. 7, $7.80; No. 8, $9.30; No. 9½, $2.20; No. 9¾, $2.70; No. 16, $2.45; No. 17, $2.75; No. 18, $2.70; No. 26, $3.15; No. 35, $3.55; No. 36, $4.00; No. 101, 42c; No. 102. 80c; No. 103, $1.12; No. 110, $1.10; No. 130, $1.60; No. 140, $2.85 each.

BOXWOOD RULES.—No. 51, $3.55; No. 53, $6.15; No. 54, $9.35; No. 61, $2.65; No. 62, $8.55; No. 66½, $6.45; No. 68, $2.40; No. 70, $4.25; No. 84, $6.75 dozen.

WOOD HANDLE TRY SQUARES.—No. 20 x 4½ in., $5.85; 6 in., $7.85; 7½ in., $8.55; 8 in., $8.80; 9 in., $10.95; 10 in., $11.85; 12 in., $14.60 dozen.

## *Stop and Air Cocks Higher*

**London, Ont.**

New and higher prices have become effective on air, stop and waste cocks, with new discounts as follows:

Air cocks, 50-5 per cent. off list; stop and waste cocks, 38 per cent. off list; stop cocks, 38 per cent. off list; square head brass stop cocks, 23 per cent. off list.

# PITTSBURGH MARKETS

PITTSBURGH, Pa., September 23.—At this writing it is quite impossible to gauge the extent or make any attempt to estimate the duration of the strike in the iron and steel industry. The matter rests not so much upon the proportion of men going on strike at the outset as upon whether the movement gains or loses as the days pass. An important fact is that it is much easier to induce a man not to work than to induce him to work. If he attempts to go to work the strikers can fine him and employ the familiar methods of intimidation. If he stays away from work those who want to work are quite certain not to hunt him up and threaten him if he does not work. Undoubtedly the strike leaders depend much upon mob psychology to carry their point. Nor can the amount of idleness in the iron and steel industry be measured by the proportion of men who strike, first because a few strikers may close a plant because it cannot operate with a certain department idle, and second, because there are such ramifications between plants. A strike tying up the lake vessels that

carry iron ore would not affect the blast furnaces, as nearly all the season's ore has been moved, the full movement of one navigation season being sufficient to carry the furnaces into May or June the following year. Of the many cases in the opposite direction one may be cited. The foundries making ingot moulds for the steel works use direct metal from the blast furnace (no cupolas), and if the steel works close they do not need ingot moulds. Accordingly, the ingot mould foundry closes, the blast furnace must bank and the blast furnace suspends shipments of coke whereby coke ovens are made idle. At the other end of the chain there may be a rolling mill which uses purchased steel. Its men may be ready to work, but the stock of steel is small, hence, eventually the finishing mill would have to close if the steel producing mill closed. Thus the closing simply of steel producing plants would close coke works at one end of the chain and finishing mills producing merchant bars, sheets, tin plate, etc., at the other end of the chain

### Who are the Strikers?

Just who the strikers are is well defined. William Z. Foster, secretary-treasurer of the general organizing committee, and the leader in the Pittsburgh district; Fitzpatrick, the chairman, being in Chicago, was formerly an I.W.W. man and left the organization years ago upon being defeated in his aspiration to be editor of Solidarity, the I.W.W. official publication, joining the A. F. of L. with the statement that he intended to "bore from within." A pamphlet he wrote years ago, advocating the most lawless methods, is now being circulated to show his real character, which undoubtedly has not changed. Even as to the "24 unions" which the organizing committee was formed to represent, there is not unanimity. The officials made an effort to conceal the fact that the session occupying Wednesday and Thursday of last week was for the purpose of discussing whether the strike order should be recalled in view of the White House conference on labor, scheduled for Oct. 6, asserting that the subject was not being discussed, the meeting being for the purpose of making plans for the strike, but it became known positively that there was much dicussion of that subject, and in the letter the organizers sent to President Wilson the statement is made that they carefully considered for two days the matter of calling off the strike.

Just how many of the 24 unions were in favor of postponement is not known, but on Friday, the day after the conference adjourned, one of the unions, the International Union of Steam and Operating Engineers, sent an order to all its locals, saying that the officials were in favor of awaiting the result of the labor conference of October 6, and saying "all members are instructed to refrain from affiliating themselves in any way with the proposed strike." There may be several unions, anything short of a majority of the 24, to take similar action. As to the American Federation of Labor itself, its position is not clear. The strike is by individual unions banded together, not by the federation itself, and it is generally believed that Samual Gompers, president of the federation, is opposed to the strike.

### Is There a Strike Fund?

As to funds, it does not appear that there is any large strike fund. Foster made a curious statement more than a week ago, to the effect that strike benefits would be paid to strikers who had not joined as well as to those who had. Joining, at least in the case of a large part of the common labor taken in, consisted in the joiner paying $3, of which the organizer received $2 as payment for his work. Unions like the boiler makers, machinists, etc., may have much money, and as the great bulk of their membership is outside the steel industry, they can raise funds, but it is quite improbable that any of the funds would be diverted to payment of strike benefits to men not members of their respective crafts.

Considering all the information now available practically all the chances are that the strike will either fail shortly or will develop into an I.W.W. or Bolshevist movement. A regularly conducted strike such as union men usually plan to have seems entirely improbable.

A fortnight or more ago it was a common idea among iron and steel producers that if there was any prospect of trouble at any particular plant, that plant should be closed at once so as to "beat the men to it." This idea was abandoned a week or so ago by almost all the producers, through their concluding that it was improper to take the risk of closing a plant that might otherwise have been able to run, as public sentiment might be adverse. A few plants in the Pittsburgh district were closed before the end of last week. In the case of the two at Brackenridge the officials made a statement that the closing was for the purpose of giving the men opportunity to hold meetings Saturday to decide whether or not they desired to strike.

### Stocks Are Normal

Jobbers and manufacturing consumers of steel have approximately their normal stocks, and much larger stocks than they had last April and May, when buyers of steel had no confidence in the future of prices and were conducting business on a strictly hand to mouth basis. Normal stocks, however, are not large stocks, except in the case of a few manufacturing industries like the automobile industry. While jobbers' stocks would last for several weeks in fair shape, and for longer periods in broken condition, they would last but a very short time should consumers who ordinarily draw supplies from mills turn to jobbers instead. This, however, is quite improbable, as the cost would be too high. Moreover, it was understood several days ago that many jobbers had already planned to advance prices promptly in the event of any scarcity developing, so as to make as much money as possible out of their position. As this might be regarded as "profiteering," many jobbers may refrain from advancing prices in the event of a scarcity.

### The Strike Report

A rough guess would be that one-third of the iron and steel industry of the United States is idle on account of the strike. In some cases there are men willing to work, but the department is unable to run on account of other departments being on strike. The Chicago district is largely closed; the Wheeling district is practically altogether closed, or will be within a day or two. The Youngstown district is three-fourths closed, and the Pittsburgh district, including the Monongahela Valley, is operating almost full. Various detached plants are but little affected. Steel officials are strongly of the opinion that if the Monongahela Valley can be kept operating as well as at present, the men now on strike in other districts will return to work. The Carnegie Steel Co. has twenty-seven blast furnaces in the Monongahela Valley, of which twenty-two were operating and eleven are now banked, the other eleven being in full operation. At the steel works at these same points the operations are very good, as Duquesne is operating one hundred per cent., Edgar Thompson is operating practically full, and Homestead nearly full. The strike is confined entirely to the foreign-born labor. Officials of the steel companies state that the strike situation is somewhat better than they expected, and while they regard it as premature to predict that the strike will play out in a week or two, they have strong hopes in that direction.

## PAINT TRADE ACTIVE

"The paint and color trade seems to be immune to the troubles that are affecting practically all other departments of industry; strikes and threatened strikes, universal unrest due to high costs of living, and all the other agencies, disorganizing the business of the country, have not as yet placed their blighting influences upon it," says the "Journal of Commerce." "A building boom, country-wide, despite the extreme altitude of the cost of everything entering into construction, including wages, has caused a demand for paint such as has seldom if ever before been known in the summer season. Manufacturers of all products in this line continue to be largely oversold and are taxed to the outmost of their capacity to meet the urgent demands made upon them for deliveries on orders booked long since, while new business in large volume continues to come in."

## CORRECTION

On page 69 of the September 20 issue of HARDWARE AND METAL the address of the Toronto branch of the Ottawa Paint Works was inadvertently given at 135 Duchess Street, whereas it should reach 153 Duchess Street. The Vancouver branch was shown at 153 Parker and Raymer Streets. This should have read Parker and Raymer Streets only.

## HOW LONG WILL THE STEEL STRIKE LAST?

Continued from page 31

George Caverhill, head of the firm of Caverhill, Learmont and Company, stated that there had been as favorable a delivery of hardware requirements from the United States, to date, as there was a year ago. Mr. Caverhill thinks that there is some supply of raw material on hand to take care of the trade for some little time should supplies be cut off through the strike. There has been a good tone to business and the outlook is a satisfactory one.

Edward Goodwill, manager of the Thos. Davidson Manufacturing Co., Ltd., stated that the Canadian manufacturer was largely, in fact almost wholly, dependent upon the United States mills for his requirements. Of late deliveries have been much improved and yet the manufacturer has required a great deal of material and this has been utilized to a great extent, there being little surplus at the present time. It would be a serious matter, Mr. Goodwill thinks, if the strike were prolonged. For instance, English steel supplies are not yet available in anything like large quantities. The time will come when Canada will have supplies right at home, but it was pointed out that these will not be available for some months yet—probably not before next year. Mr. Goodwill believes that the trade will make no mistake in protecting themselves on their requirements early.

### IS IT BOLSHEVISM?

The American Metal Market and Daily Iron and Steel Report discusses the situation editorially as follows:

"Whatever be the outcome of the iron and steel strike, whether a few days hence or later, one thing it will make clear and that is that the issue is not one of the workmen in iron and steel plants seeking higher wages or better working conditions from their employers, but of outside agitators stirring up trouble for their own personal benefit.

During the progress of the agitation it was perfectly clear that the agitators were appealing almost solely to the ignorant workmen. Their arguments were of the most elementary character, the chief one being that the initiation fee was $3 then, but would be raised to $25 or $50 later. The first day of the strike showed that those who struck were almost wholly the foreign born, it being a strike of common labor, which has had such stupendous wage advances, particularly in the past three years. Obviously if this were a regular organization movement it would have appealed more to the skilled workman than to common labor, yet the reverse was the case.

### Scores Foster

There was a very distinct bolshevist element in the conduct of the "organization" campaign. This cropped out constantly in the speeches of the agitators. The record of Foster, one of the important leaders, was uncovered, how he had been an I. W. W. man of the most rabid type, counseling bloodshed and all manner of violence, and asserting that "the wage system" was the greatest crime in all history.

There is no record of Samuel Gompers, president of the American Federation of Labor, expressing approval of the strike. There has been much reason to believe that Mr. Gompers was opposed to the strike and did not stop it because he was unable to do so.

### Not All Approved

While the 24 unions that constituted the committee for "organizing" iron and steel workers are affiliated with the American Federation of Labor, it became well known that not all the unions approved calling the strike at this time, and perhaps only a bare majority favored going ahead with the operation. It is on record that one of the 24 unions, the day after the Pittsburgh conference to consider calling off the strike adjourned, issued an order to all its locals not to strike. That was the International Union of Steam and Operating Engineers.

The whole thing is marked as a bolshevist movement, and when it fails, as it eventually must, another and very strong record will have been written against such movements.

## PEOPLE WILL PAY THE PRICE

Discussing trade conditions with a large retailer in Montreal, HARDWARE AND METAL was informed that the average customer invariably will pay the price for an average article regardless of its cost.

"It is remarkable," said this merchant, "how people will continue to pay the high prices. Of course we have to charge more money for our goods, but the people want the goods and they will have them."

Here is another case in support of the contention so often made by HARDWARE AND METAL that high-class hardware will always find buyers. It reminds the writer of an interview he had recently with a Montreal retailer: "You cannot sell the goods if you haven't got them," he said. And again: "They want goods that are reliable, too."

The retailer of 1919 who is "sawing wood," so to speak, is making good. He it is who is pulling profits. He will continue in the same course if he attends to his own opportunities and embraces them.

J. B. Jackson, Ltd., capital $200,000, head office Simcoe, Ont., plans to manufacture and deal in building materials, petroleum products and machinery and supplies.

*One of the best methods of boosting the fall painting idea is by attractive window displays. There is a lot of painting to be done this season all over Canada and the hardware merchant who goes after the business can make some nice profits for his paint department.*

# Buying for the Spring of 1920

## Don't Let the Profits of Your Live Sellers Be Eaten Up With Losses in Overhead Charges on Dead Stock and Unearned Interest of Capital That Does Not Keep Moving Actively

"GOODS well bought are half sold," applies to paints and varnishes as to any other line. The season for buying 1920 spring stock is at hand. That means plans for 1920 spring business on the part of everybody in the trade have started, or are in the embryo stage.

There is scarcely anyone who has not made mistakes in buying. Either too much has been stocked or too little. Too much of a slow selling line has been taken on or too little of a fast selling line has been booked to meet the rush demand of the season. We all learn by mistakes.

But there are some paint and varnish dealers who make errors in the broader principles of buying their stock that can scarcely be scored up against any average lack of judgment. These consist of direct violation of sound business conduct. And there are as many errors of omission as there are of commission.

### Important Factors

Two factors should be mainly considered in buying. These are available capital and shelf space, which also involves overhead expense.

Unless a man is conducting a paint and varnish store solely, he should carefully calculate the amount of capital he can devote to his paint and varnish department. There is a tendency, where spring dating is allowed, to speculate on what the spring will bring forth. Even though spring dating is taken advantage of, a conservative attitude should be taken. Buying should be done as though the goods were for immediate delivery on the usual terms. This eliminates any tendency towards betting on the future and plays "safety first" from a purely business standpoint.

### Quantity of Stock

There are, of course, several considerations to be made in connection with allotting the amount of capital to be invested. Under present abnormal conditions only sufficient stock should be booked to permit of its being reduced to the very minimum when the active season closes next summer. Taking into calculation the demand experienced for paints and varnishes during the past two years, the allotment should also be made on what the probable demand will be for the spring of 1920.

Those in the know do not anticipate that the demand will slacken, in fact with the present progressive co-operative advertising campaigns being carried on in both Canada and the United States, it is expected that the demand will go steadily forward.

The paint and varnish trade has had so many scares about what will happen owing to high prices and other abnormal conditions, that merchants are now becoming hardened to the fact that business has kept on increasing in spite of the unrealized calamities that were prophesied from time to time.

### Know Local Conditions

Every paint and varnish dealer knows, or should know, his own local conditions better than anyone else and should reckon accordingly.

Where a hardware merchant contemplates pushing his paint department more extensively, due allowance for an extra expenditure of capital should be made in proportion to the amount of advertising and effort he intends to put forward.

Taking all these factors into consideration, and having made the allotment, stick to it and do not depart from it, unless of course capitalization has been increased in the meantime.

### Other Departments

Due regard must always be given to the other departments of the store. The relative proportion of capital invested in paints and varnishes to investments in other departments must be kept balanced. Where a general hardware, paint and varnish stock is kept, one department must not be overloaded and another starved. All the eggs in one basket is an axiom that scarcely need be repeated, yet it is surprising how frequently this condition pretty nearly applies in a great many stores.

Shelf space, a large percentage of which means overhead charges, is secondary only in its importance to capital. Every paint manufacturer and salesman is highly delighted to see his particular line bountifully and prominently displayed on a dealer's shelves if the dealer can pay for it. An overstock of paints and varnishes that is in excess of the demands of the community is not only a means of tieing up unearning capital, but it means that the overhead expense value of that stock unduly increases every day. This is especially true if at the end of the active season there remains on hand a surplus stock that must be carried over till the following season. Usually such overstocking consists of slow selling sizes

and colors. Such a condition is a decided handicap to the dealer when the sorting season comes around. He finds himself tied up with capital that cannot be quickly realized on and he is unable to reinvest in lines that are in demand. Not infrequently dealers are found who are unable to take advantage of current demands because their capital and shelf space are tied up with goods that they cannot liquidate on.

It is not to be inferred that the paint department should not be placed up front or given the prominence that advertising paint houses urge upon dealers. By all means take every advantage of the advertising value that a full display gives. But as with capital investment do so in proportion to the other departments of the store.

**The Real Essentials**

The whole question largely resolves itself down to a determination of what the minimum investment of capital and shelf space should be in order that the maximum turnover may be realized.

Condensation and concentration are principles that can be applied very well to accomplish this end.

If it is up to the dealer to change his line, or choose a line to begin with, he should settle upon one line and one line alone. There may be slight immediate advantages in stocking two or more lines of colors, an extra sale here and there may be made with two brands on hand, but if there is any salesmanship in the store's staff, and there is any merit in the one brand selected, then that one brand should be sufficient.

Comparing the advantages of investment of capital and shelf space in one line against duplicate investment in two lines, and then getting behind that one line whole-heartedly, in nine cases out of ten the single investment will pan out with greater profit.

A great deal has to do also with the concentration shown in the various lines of paint on the market. That is to say some lines are so diversified in their scope as compared with others which can meet a diversity of uses. This difference also involves a question of minimum investment of capital and shelf space. Quality being equal every dealer should carefully look into the merits of each line from this standpoint.

When the paint manufacturers decided to cut down the number of shades in their color cards it was undoubtedly a boon to every dealer from the investment standpoint. Besides eliminating slow sellers, it tended towards reduction of investment with a possibility of greater turnover. It is to be hoped that the old condition may never return. Furthermore, let it be said to the paint dealer, with limited demand and outlet, as well as capital, do not invest in a full line of colors if you do not think they will move. Pick out the shades and sizes that best suit your community and stick to them.

**Reduced Color Cards**

Many manufacturers offer reduced color cards adapted to the needs of smaller communities. Study these carefully relative to your demand, capital and shelf space and start with the one that best fits the circumstances. If the paint department shows sufficient progress and development, the larger line can be easily taken on afterwards. It is much better to do this than be stuck with a lot of shades that will not move or you have no prospect of disposing of.

There are some paint departments that look as though they had been the dumping ground of every line of paint in the country. Assigned stocks, the persuasiveness of a silver-tongued salesman, and the inability of a buyer to say "no," too frequently contribute to this condition. And it is surprising how frequently these can be found throughout the country. Never make the mistake of giving every salesman who comes around an order just because they are good fellows. Pick the line you can concentrate your whole attention on and stick to it. Never buy a little lot of some one line in order to keep a competitor from handling it on the exclusive agency basis when you are stocked up with all that you can handle of your principal line.

**How It Works Out**

You may be blocking him to a certain extent, but you are choking off the usefulness of your own money and shelf space, which will be far more harmful to your business.

At the expense of repetition, let it be repeated that spring buying should be done with a view to condensation and concentration in order that turnover may be increased. Don't let the profits of the live sellers be eaten up with losses in overhead charges on dead stock and unearned interest of capital that does not keep actively moving.

Then, of course, everyone is faced with the question of prices. No one is coming forward with any prophecy of what the price situation will develop into. That is, no one who from a thorough understanding of basic market conditions is in a position to offer an opinion. There are any number of people who are ready to offer opinions on their lack of knowledge, or who can tell what ought to be done.

It is just as unsafe to prophesy now as at any time during the war. It is quite unlikely that there will be any pronounced changes in prices. It is very doubtful that prices will go higher. It is just as unlikely that they will go lower on the average. If they do go lower it will only be to a small extent. Now this is just one man's guess on what may happen, and it is pretty much as good as any other fellow's. Take it or leave it alone, after you have looked as far as possible into the trend of market conditions.

And if further advice is asked, the writer would say, go ahead and prepare for your 1920 spring paint and varnish business as though the present price situation were certain to remain till the end of spring business.

# No Change Likely in Paint Prices

## Canadian Paint, Oil and Varnish Association Considers Important Questions—Save the Surface Campaign to be Continued For at Least Another Year — Export Trade to be Developed

BARRING unforeseen changes in the price of raw material, labor influences, etc., there will be no immediate change in the prices of prepared paints. Such was the decision reached last week at a meeting of the Canadian Paint, Oil and Varnish Association held in Montreal. This decision will, as far as varnishes are concerned, also apply, although the present varnish basis is a decidedly firm one. The decision thus reached means that existing prices will apply for all business placed with the manufacturers and also for bookings placed for spring.

This important matter brought out considerable discussion, and it was agreed that any interference with prices now was not justified. Linseed oil, while likely to be procurable in the near future more readily than it now is, will be in heavy demand for manufacturing and trade needs, and it is felt that the world requirements will be such as to maintain prices on a high level. When the prices of paint were last changed, oil was quoted at around $2.25 to $2.35 per gallon, so that for a considerable period past, manufacturers have been operating under much higher priced oil.

**Save the Surface Campaign**

One of the most interesting features of the meeting was that of receiving the report of the "Save the Surface Campaign" Committee. It will be recalled that this committee, comprised of George Henderson, chairman, and Messrs. R. C. Misson, A. T. Black, H. E. Mihell, A. W. Poole and Lionel Benison,

secretary, undertook the important task of launching this campaign in the interests of creating greater use of paint throughout Canada, and at this meeting its report—a very comprehensive one—was presented by the chairman, Mr. Henderson.

The most important consideration of the committee dealt with plans for the future, and it was strongly recommended to the members of the Canadian Paint, Oil and Varnish Association that the work already done be added to in a cumulative manner by continuing an energetic publicity campaign for the next four years, making the campaign a five-year one. After due consideration this was unanimously agreed to and this is the strongest possible argument that the efforts of the special committee were appreciated, and that the work done this year has been a success.

**To Co-operate With U. S.**

In speaking with Mr. Henderson this week, HARDWARE AND METAL was informed that the various members contributing to the "Save the Surface Campaign" were committed to contribute regularly to the funds required for this publicity work. Not only so, but there will be a very liberal increase in the appropriations made. In a general way, the Canadian paint companies are doing, it is understood, fully as much, and even more, to popularize the use of paint and varnish as are the United States companies, and the actual money subscribed in Canada for this important work, comparatively speaking, is greater than that contributed by firms doing business in the States.

One of the commendable features of this effort, as outlined by Mr. Henderson, is that of the co-operative nature of the campaigns being conducted by firms in the United States and firms in Canada. Almost immediately a number of those forming the committee for Canada will visit the offices of the "Save the Surface Campaign" committee in the United States and seek to further co-ordinate their efforts to the best possible advantage. It will be readily understood that the very nature of the appeal made to property owners through the slogan, "Save the surface and you save all," leaves room for a co-operative effort that few, if any, similar campaigns offer. It is the aim of the Canadian committee to make the best possible use of this opportunity in this spirit of co-ordination. The benefits will then be truly cumulative.

**To Standardize Cans**

One of the very important considerations taken up was that of the standardizing of paint and varnish cans. HARDWARE AND METAL has given considerable space from time to time to outlining the great handicaps that result from the adoption of so many sizes of containers.

For instance, there are in the neighborhood of fifteen to twenty different sizes of cans used by the different manufacturers. The slightest deviation by the part of an inch in the specification, makes it essential that a die be provided to turn out a can to meet these specifications. The reader will see, obviously, that for every maker to have sizes of his own, regardless of the sizes adopted and customarily used by others, creates a real problem for the can maker, to say nothing of the disadvantage in other ways. In view of these facts, therefore, it was agreed that, effective January 1, 1921, the members of this association will market paints and sundries, with the exception of white and colored enamels put up in specialty cans, in sizes which will be considered standard. The sizes to be agreed upon are one gallons, half gallons, quarts, pints, half and quarter pints and five gallons. A similar schedule applies for varnish cans. It is expected that this decision will meet with general approval throughout the country.

It was decided at this meeting that the varnish manufacturers should have a strong committee selected from within themselves to co-operate and work for the best interests of this branch of the trade.

**To Develop Export Trade**

Walter B. Ramsay, who some months ago went to Europe in connection with export trade in paints and varnishes between Canada and Roumania and other countries, reported favorably upon the progress of export business. Mr. Ramsay referred to the trade that had been conducted with Roumania and stated that he was informed that this country was again in the market for various supplies made by the paint manufacturers. He believed that she would perhaps buy larger quantities of goods than those purchased during the past season.

Greece, too, he stated, was a likely buyer of these products, and that country may become a customer.

It was strongly advocated that the services of a special representative be secured, who would act in the interests of the association in London, England.

One of the decisions was that any member of the association should not be restricted, in any way, if he desired to establish direct connections himself in an effort to secure business with a foreign customer.

# Greece May Become a Big Paint Buyer

## Reliable Information Reveals That Large Orders Pending May Greatly Exceed Roumanian Business Recently Secured—Likely to Have the Cash to Pay

THAT Greece will become a purchaser of Canadian-made paints and varnishes on a large scale is the information secured this week on very reliable authority by HARDWARE AND METAL. Interest attached to this announcement in view of the fact that the Canadian Paint, Oil and Varnish Association, through direct efforts and representation in London last spring conducted by Mr. Walter B. Ramsay, President of A. Ramsay and Son, Company, Ltd., Montreal, secured a large amount of actual business from Roumania. This special business has been taken care of, in large measure, and the products of various Canadian factories are now floating across the Atlantic to their mid-European destination, other cargoes to follow from the port of Montreal as soon as bottoms reach Canada's big shipping port to load them.

HARDWARE AND METAL has been informed that the business with Roumania developed most satisfactorily and that settlements have been secured which are pleasing to the manufacturers generally. It will be recalled that HARDWARE AND METAL explained that these orders were secured by the previously-named asosciation and then distributed among the various manufacturers to be filled as required by the specifications. Several hundred thousand dollars' worth of paint products were bought under arranged credits, and it is hoped that the initial orders are but the forerunner of larger orders to come a little later.

**Greece Can Pay**

While the Kingdom of Greece was a participant in the great war on the side of the victorious Allies, she was not so sorely stricken as was Serbia, Roumania and other of the minor central European nations. As a consequence of this she was not required to "pay the last farthing" in order to maintain her armies, and when the time of demobilization arrived and a reconstruction programme was mapped out, her Government found its exchequer to still contain some of the yellow metal now extremely scarce in most sections of old Europe. Credit she can have, it is stated, if credit she wants, but the indications are that she will pay the money and take the goods, making the transactions complete and disposing of the indebtedness in the regular way.

Not only have representatives of the

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Sept. 25.—The important feature of the week is the announcement that the price of paints and varnishes will be continued as on the present basis for fall and spring orders. This announcement is made following a meeting of the paint makers held last week, and of which announcement is made elsewhere in the present issue. Varnishes are particularly strong, as gums are scarce still, and high, while turpentine is higher than ever.

Another important announcement made is that of the standardization of cans for both varnish and paint, and this should be a welcome change. In order that the sales of paint may be increased the paint makers have planned to continue the work of an educative campaign in furthering the work begun this year by the "Save the Surface Campaign" committee.

Linseed oil still holds with little or no change for immediate deliveries, while turpentine is also unchanged in price. Business is good.

### *Future Oil Lower; Spot Hard to Get*

**Montreal.**

LINSEED OIL.—Quite a decided improvement is in sight for future oil, and with seed likely to arrive in fairly large quantities before many weeks pass there should be a reasonably sufficient supply of oil in the market early in October. The tendencies have been downward on flaxseed of late, and yet the present market is a firm one, little surplus of oil being available now. There is really no quotable change for spot oil, $2.92 being the low point. A month later it may be possible to purchase one's requirements for a lower figure, and prices will be dependent upon the delivery of seed to the crushers. The Canadian crop is estimated at from 5,000,000 to upwards of 6,000,000 bushels.

| | Imp. Gal. | |
|---|---|---|
| Raw— | | |
| Single barels | $2 92 | $3 02 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| Boiled— | Imp. Gal. | |
| Single barrels | 2 94½ | 3 04½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Turpentine Still Held; Fair Supplies Here*

**Montreal.**

TURPENTINE.—There has been little, if any advantage in the situation over the week. Stocks in hand are fair and there has been no reported difficulty in meeting moderate demands. Quotations are without change, and in view of the fact that moderate stocks, only, are reported held in the south, it is improbable that there will be any immediate change of consequence in the price basis.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | .... | $2 65 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Sales Goods On Steady Basis*

**Montreal.**

PUTTY.—Seasonable demand obtains for putty and there has been little new development. The price basis is being continued as at present for the balance of the fall season, and the stocks available are ample to meet present requirements.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases. | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *Steady Demand For White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—A good demand is made for white lead in oil from the regular sources. Heavy selling is not anticipated at this time of the year but the tonnage going forward is quite large, notwithstanding. Prices, as stated last week, are being continued until the 15th of December next unless there be unforeseen developments in the price of raw materials. Present quotations to the trade are as follows: Five-ton lots, per 100 lbs., $15.50; 1-ton lots, $16; smaller quantities, $16.35.

### *Mixed Paint Prices Remain in Effect*

**Montreal.**

MIXED PAINTS, VARNISHES.—Prices will be continued on present schedules for prepared paints, and for this fall's business and for orders booked for spring delivery the present basis will obtain. Of course this will depend upon the trend of markets for raw materials and the manufacturers hope that it will not be necessary to make advances.

It will be recalled that paint prices, when last readjusted, were based on oil costing in the neighborhood of $2.35 per gallon or thereabouts. In the meantime this commodity has advanced to $3. Aside from this wage increases have been large and the whole overhead expense of manufacturers of paints and varnishes has increased. To market the products is more costly. Little indication is given, therefore, that there will be any declines of price on either paints, varnishes or specialties. Business is reported to be brisk.

## TORONTO

TORONTO, September 25.—Firm markets for both turpentine and linseed oil prevail, with stock of both very low and deliveries slow. Turpentine prices show no change from $2.55 per Imperial gallon. Linseed oil quotations show a wider range and run from $3.00 to $3.25 for raw and from $3.02½ to $3.30 for boiled. Fall paint orders continue to come in briskly. The market for white lead in oil and for putty is expected to show no change in the immediate future. Prices of shellac remain firm and supplies are reported none too plentiful. A change has been made in plate glass discounts and 20 per cent is now quoted on orders of $100 and over and ten per cent. on less than $100.

### *Turpentine Prices Remain Unchanged*

**Toronto.**

TURPENTINE.—The market is reported bare as far as supplies are concerned and deliveries are very slow. A good volume of business is offering. Quotations are being made on the basis of $2.55 per Imperial gallon. Reports form the south state that the last quarter of the year will apparently bring no reversal of conditions that have been prevailing, as there are large deficiencies to be met in every direction. Heavy shipments continue to go to overseas points, while there is a brisk home demand. The crop is now approximated at 375,000 casks. The reports state that with both turpentine and rosin going out of the country as they have been doing, domestic consumption will necessarily have to be restricted. The whole situation revolves around decreased production and increased consumption, and

# YOUR OPPORTUNITY

There is nothing to prevent the B-H agent from doing *the* paint trade in any locality. On the other hand, when we ask a merchant to throw in his lot with us, we do not sit idly by and expect him to do all the "hustling for trade." Great though our line is in quality, favorably known though it is to householders everywhere, still we believe no product can to-day maintain leadership without constant and aggressive advertising.

So—advertising is bracketed with quality in our proposition to you—and by every form of publicity approved by merchandising experts, we aid our agents in making known to their customers the facts about B-H products which account for their Dominion-Wide popularity and prestige. Write us for particulars.

"Save the surface and you save all" *Paint & Varnish*

## BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

the general outlook is for very firm markets. Quotations are as follows:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) | $2 55 |
| 2 to 5 barrels (barrel included) | 2 54 |
| 5 gallon lots | 2 65 |

## *Supplies of Linseed Are Very Uncertain*

**Toronto.**

LINSEED OIL.—While little change has taken place in linseed oil quotations crushers are finding it extremely difficult to obtain anything like adequate supplies of seed. Little relief from this situation is expected before the arrival of the new crop, and buyers who are going into the market for seed are paying a premium, which, in some cases, runs as high as twenty-five cents a bushel. From American points come reports of markets almost bare. In the meantime seed from the Argentine continues to move steadily overseas. Linseed oil quotations are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | $3 00 | $3 25 |
| 3 to 5 barrels, gal. | 2 99 | 3 24 |
| 10 barrels and over | 2 97 | 3 22 |
| | Boiled | |
| 1 to 2 barrels, gal. | 3 02½ | 3 28 |
| 3 to 5 barrels, gal. | 3 01½ | 3 27 |
| 10 barrels and over | 2 99½ | 3 25 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

## *No Change Shown in White Lead in Oil*

**Toronto.**

WHITE LEAD IN OIL.—White lead in oil quotations remain steady and there is no indication of any change for some time. The demand continues active. Quotations are made on the following basis: five ton lots, $15.85 per hundred pounds; one ton lots, $16.35; and in smaller quantities, $16.70.

## *Change is Made in Plate Glass Discounts*

**Toronto.**

GLASS, PUTTY—No change is shown in the window glass quotations, but in plate glass the discount has been changed and is now 20 per cent. on orders over $100 and ten per cent. on orders less than $100. There is a great scarcity in some sizes of plate glass. Business generally is active, especially for window glass, as so many new homes have reached the stage where the glass is required. Putty prices are holding firmly, with no indications of change. Quotations are as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

### TORONTO PAINT ASSOCIATION HOLD MEETING

The first regular meeting of the Paint, Oil and Varnish Association of Toronto was held at the King Edward Hotel Tuesday evening. Since the organization of the club in May, twenty-six firms have been enrolled, together with 15 associate members. Among the matters taken up were business plans for furthering the interests of the paint and varnish trades in Canada. This association is said to be the first of its kind in Canada affiliated with the Paint, Oil and Varnish Association of the United States, and it is anticipated that similar organizations will be formed in Montreal and Winnipeg. The Toronto Club has under way plans for promotion work that will benefit all in the trade, and the "Paint Up and Clean Up" campaign idea will receive special attention. John Anthony, of A. Muirhead & Co., Toronto, was appointed delegate of the club to attend the annual convention of the United States association to be held at White Sulphur Springs this month.

## Some Figures That May Help You Sell More Paint

Some interesting figures which provide some strong talking points for the sale of more paint were given at a recent meeting of the New York Paint Club. F. J. Ross, in discussing paint selling, said that: "Property owners spent each year for insurance for protection against fire, four times as much as they spent against protection against the gradual decay of the property. He said that it would be good business for the property owners to spend at least one cent a year on the dollar value of the property. This is what, in his opinion, should be the goal of the paint industry to be striven for through the Save the Surface Campaign. As it is now, he pointed out, only one-fifth cent on the dollar is being spent each year to protect the surface. He said that there was an enormous market in front of the trade that had never been developed, and that would not be developed until the public had been educated to the proper habit of thought about saving the surface and saving all. He said that the campaign had already shown that when the matter is properly presented to property owners it is not difficult to make them see what is for their own interests, and that the time would come when the man who did not give the surface of his property proper protection would be regarded as a fool.

"The whole problem," declared Mr. Ross, "is how to deal with a habit of thought most effectively. About 25 per cent. of the people of this country perhaps have the right habit of thought about the use of paint, and the other 75 per cent. have not. There is probably more than 75 per cent. who neglect the surface to the damage of their property." Mr. Ross presented some rather interesting figures for the consideration of his hearers. He said that there were approximately $50,000,000,000 worth of building in the United States, although increasing valuation and new building have increased this total since the estimate was made. He said that the depreciation on this property was at least $1,000,000,000 a year, and that, as a protection against this depreciation the paint and varnish industries produced about $100,000,000 worth of goods a year.

### TO MANUFACTURE READY-MIXED PAINTS

It is understood that in the near future the Glidden Co., Ltd., will greatly extend their activities in Canada and add a line of ready-mixed paints.

### HEATH & MILLIGAN MFG. CO. SELLS TO THE GLIDDEN CO.

The Glidden Company of Cleveland, Ohio, has purchased the plant and good will of the Heath & Milligan Manufacturing Company of Chicago. The deal was closed some time ago by Adrian D. Joyce, president of the Glidden Company and the directors of the National Lead Company, but official announcement was withheld pending the ratification of the transfer of the National Lead Company officials. The Heath & Milligan Manufacturing Company was founded in 1851.

### GREECE MAY BECOME A BIG PAINT BUYER

Continued from page 60

Greek government visited Canada within the past few days, but private buyers it is understood, have been seeking goods, and for which there is at present a good demand in the little country of historic valor.

#### Canada is Favored

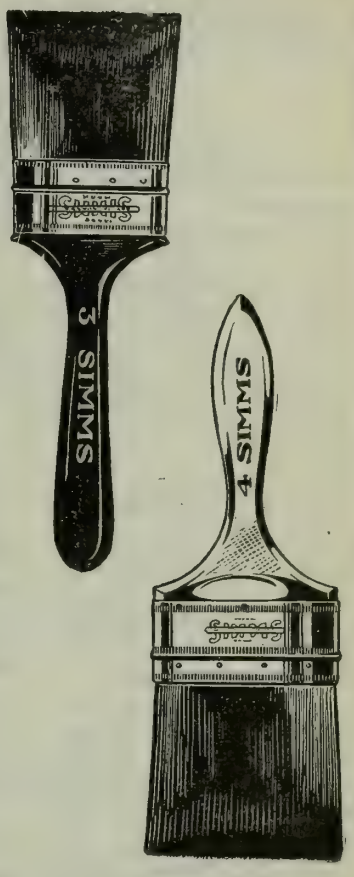
The purchases outlined will probably total a great deal more, in time, than those made by Roumania. In fact, they may exceed a million dollars in value, but definite figures are, for obvious reasons, not procurable at this time. The buyers are scouting the markets of this continent, and as is natural, they will buy with a view to their own advantage, other things being equal. Canada can offer good value; her experience with the Roumanian export business will have paved the way for a better handling of business offering, and with a knowledge of the grade of products used in that country—a high-grade it is said—the Canadian manufacturer will be able to meet competition and deliver his goods in acceptable condition that will doubtless bring him "repeats."

In a certain sense, there is some sentimental tendency toward the purchase of these goods in Canada. As a participant in the war, and through the closer connection which Premier Venizelos was able to effect when in London, and because the Canadian Trade Commission was in a positions to point out the abilities of Canada to produce a high-grade product, when wanted, Canadian goods will have a strong appeal to the Greek buyers. This has been pointed out to HARDWARE AND METAL, and it is not of interest, only, but of much satisfaction to see Canadian-made paints and varnishes taking their place in overseas markets.

TRADE SIMMS MARK
SET IN RUBBER

# Simms' Paint Brushes

## *Sold All Over The World*



The demand for Simms' Set-in-Rubber Paint and Varnish Brushes extends all over the world. There are none like them anywhere.

Your customers know this. See to it that you have a full stock on hand.

# C·C·M· Bicycles

THE new C.C.M. models for 1920 include a speedy track racer, "The C.C.M. Flyer," also an 18" men's model with drop bar. This will comfo r tably fit an average 8-year-old boy, but can be adjusted to accommodate the average rider requiring 20" or 22" frame. It can be had in any C.C.M. nameplate.

Regular C.C.M. models will carry still better equipment than before, grade "B" having a good Frame Pump and other standard equipment.

Grade "A" models will this year have outstanding features of beauty and distinction, including the new Dunlop Traction Cord Tires, Striped Frames, Bull-Dog Grips, etc.

All C.C.M. models will be equipped with Dunlop Tires and the high grade M. & S. Chains.

Full particulars may be had from C.C.M. representative or by addressing Head Office or nearest branch. A few good agencies still open in certain districts, but early action is advisable.

**The Principal C.C.M. nameplates are:**

**Massey**
**Gendron**
**Columbia**
**Ivanhoe**
**Perfect**
**Cleveland**
**Brantford**
**Red Bird**

# DOUGALL
# Blanchite
# WALL COATING

*A Beautiful, Clean, White Wall Coating Worthy of Your Best Selling Effort*

A stock of Dougall Blanchite Wall Coating in your paint department will link your store with a preparation that is second to none.

Contractors and builders everywhere are buying large quantities of Blanchite Wall Coating because they find that one coat is generally sufficient —Therefore, it is the most economical to use.

There is very good business waiting for you with this trade—the volume is large and the profit correspondingly attractive.

"Save the surface and you save all" *Paint & Varnish*

# Let this *Worthy Brand* Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination.* To the workman, however, Jamieson quality is determined only by *service.*

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want **you** to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will **pay** you to sell Jamieson Paints and Varnishes exclusively to your customers.

# Turn-overs Instead of Left-overs!

WHEN you figure it up at the end of the year, the line that fattens your profits is the line that makes a quick turn-over — and *does it often!*

When a small dealer takes on a new line for the first time, and inside of a year re-orders from three to four times, exceeding his initial order each time — *he's handling a live one.*

Hundreds of Pratt & Lambert Dealers are doing this every year because "61" Floor Varnish is a varnish with a million friends. For 30 years people all over this continent have been buying "61" and telling their friends how good it is! This Fall a lot more people will know about "61" through a big, hard-hitting series of full-page advertisements in the magazines going to millions of householders.

Hundreds, perhaps thousands, of these readers are right in your own community and they're going to spend money for "61" *somewhere* in your town!

*You* are going to buy varnish of *some kind* before Fall and your stock will make a quick turn-over if you're prepared to sell your customers the kind of varnish they'll want! The money you spend for "61" Floor Varnish will return to you quickly with a nice profit and you'll have a clear conscience about it because "61" will stand hard knocks and water without cracking or turning white.

It's a varnish with the good-will of a million people and a quality reputation of over 30 years' standing. Cash in on it now! Just a postal will bring the details!

PRATT & LAMBERT-INC.

# WA-KO-VER

## In the Windows—
## Or on the Counter

## *Brings Many "Reminder" Sales*

It's a powerful suggestion and reaches many minds that are wholly or partly made up to purchase.

*Stephens'* Paints and Varnishes are well liked by the Canadian public. The sight of *Stephens'* is like a glimpse of an old friend to many people. The mental process runs from recognition to remembrance of the need for paint.

Keep suggestion at work for you. The picture, or other reminder, of well-painted premises and homes often is compared in the customer's mind with a home that's badly in need of paint. At once there's an impulse. Are you prepared for it?

*A post card about our agency will bring you news of profits*

WINNIPEG, MANITOBA LIMITED

# THE BIG MARKET

## —*IS AT HAND*—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

***THE EDEN DOMINATES ITS MARKET***

Because its construction is time tested.
Because it has twenty-five inimitable and exclusive features.
Because it is nationally advertised.
Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

***THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.***

# GREAT WEST ELECTRIC COMPANY, LTD.

CANADIAN DISTRIBUTORS

WINNIPEG MANITOBA

***Distributors of LACO TUNGSTEN and NITRO LAMPS***

# THE BUYERS' GUIDE

*If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.*

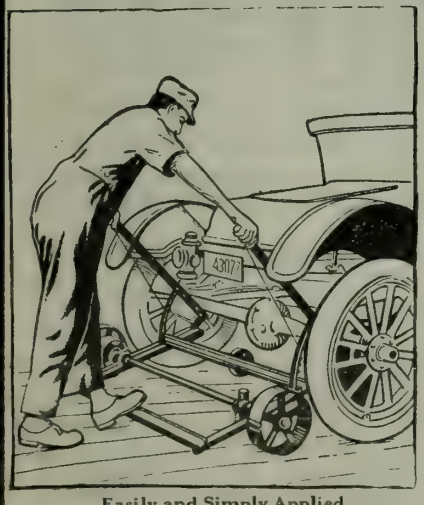
# LAY PORTA-POWER



**Fits your Car, regardless of make. No adjustment or alteration of Automobile is necessary. It utilises the power of Automobile Engines for belt power upon farms and ranches.**

**It doubles the value of the Farmer's Car**

**It takes the Arm Work out of Farm Work**

Lay Porta-Power is a durable and practical implement, well constructed, that takes its power from the rear wheels of any automobile and will develop from 5 to 20 H.P., depending on the size of the car. It acts as a portable gasoline engine, at just one-third the cost of a stationary plant. It takes the engine to the job, not the job to the engine. Wood sawing, feed grinding and cutting, pumping, ensilage cutting, silo filling and farm lighting are only a few of the farm jobs that this implement can be readily used for. It will not heat the engine nor injure the tires, and is a money, time and labor-saving device that ought to be on every farm. It is simply constructed and can be adjusted to fit practically any make of car or small truck.

Easily and Simply Applied

### To Dealers

The demand for Lay Porta-Power being so great already is an indication of the tremendous sales possibilities that it opens to dealers. It fits into any line you may be handling. If you are in "open territory" we will gladly talk business.

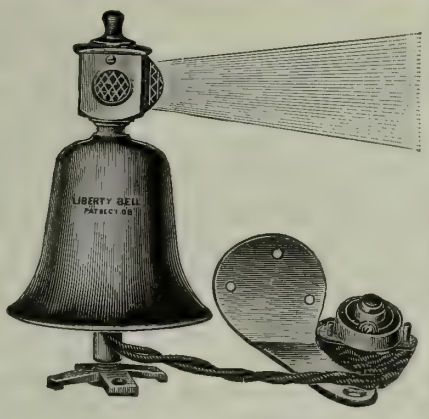
# Horse Collar Pads

## Keep Horses Fit for Work



TAPATCO Pads are exceptionally strong, durable and highly absorbent.

These money-savers and money-makers have our Patented Hook Attachment that lengthens their life.

These efficient, comfortable pads save galled, bruised and chafed shoulders. When your customers have these well-made pads the horse is kept "on the job," fit and contented. Handsome profits. Order through your jobber.

**The American Pad & Textile Co.**
Chatham, Ontario

**The Signal of Distinction**
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

# WARNS
## BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

# "LIBERTY BELL"
## DEFINITE AND DISTINCTIVE

The clear bell tone **carries** through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

### GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

### A POLITE SIGNAL

***We have an attractive proposition for you. Write for prices.***

**THE BUNYAN MFG. CO.**

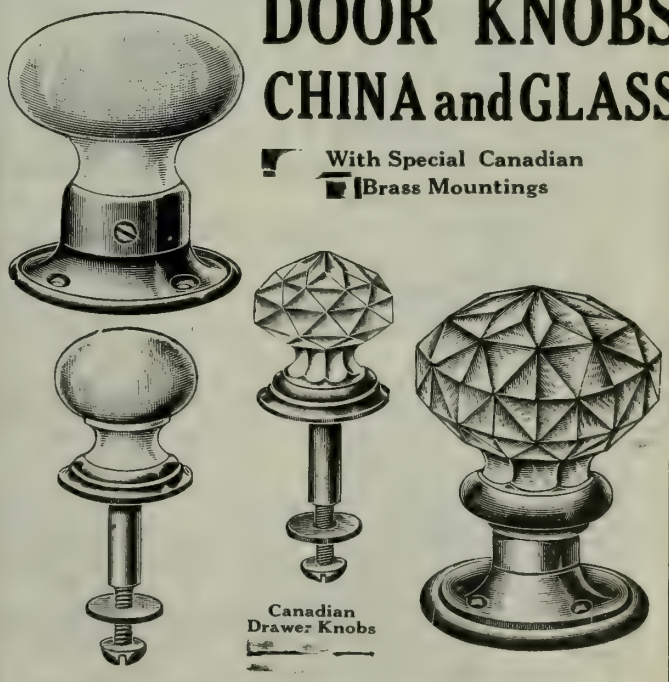
# MENDETS
*A PATENT PATCH*

FOR mending Graniteware, Pots, Pans, Boilers, Kettles, Hot Water Bags, etc.

Does the work effectively. Makes old things as good as new. Reduces household expenses.



**Mendets** is an easy line to sell—it meets such a popular demand. Thousands are sounding its praises. There are good profits in it, too. Order a display stand from your jobber or write us direct for information and prices.

# More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

# The Significance of This Trade Mark

Not only are Sherwin-Williams Paints, varnishes, stains, colors and enamels used all over the world, but this trade-mark is known wherever civilization has entered.

It is accepted as the best known paint emblem. Where it is displayed, purchasers buy paint without question, knowing that the reputation can only have been built upon quality and fair dealing.

If you sell the Sherwin-Williams line, your customers will know that you have secured the best there is. Besides being the best, Sherwin-Williams is the best advertised—For years we have been telling the merits of S.W.P. on billboards, painted signs, in newspapers, magazines, farm papers, etc. No other paint is so well advertised—no other paint is so well known—no other paint is so popular.

**You will sell more paint if you sell Sherwin-Williams.**
**Write us regarding the agency in your locality.**

# SAFETY FIRST

*then*

## Range, Accuracy, Penetration Dependability and Durability

The famous automatic safety feature sells thousands of Iver Johnson revolvers easily every season.

The continual, extensive national publicity given the famous "Hammer the Hammer" revolver sends prospects more than half sold to Iver Johnson dealers all over the country.

Are *you* willing to accept some of this business, close sales with a minimum selling effort, pocket a good profit, and deliver a revolver that stays sold, creates good will, and brings other business to your store?

Stock the entire line—22, 32, 32 special and 38 calibres, Hammer and Hammerless Models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

# IVER JOHNSON SAFETY—AUTOMATIC REVOLVERS

Send for free catalogs which show the entire line of Iver Johnson firearms. Complete dealer information will be sent you. Write for information on bicycles and motorcycles, too.

**Iver Johnson's Arms & Cycle Works**

*"The Safe Revolver to Sell"*

# ARROWHEAD SAWS

***Vanadium Steel***

Are called "Standard of Canada" because they have been the choice of skilled workmen since they first entered the market.

Arrowhead Saws are perfectly tempered, hang right, are set right and sell right. Cross-cut Saws, Hand Saws, Buck Saws, and Circular Saws.

**Our Catalog is a guide to profit; your name and address will bring it.**

## GREB RIM TOOL

Operates all types of cross-split rims. "Wallop" your rim with a hammer to force it in or out of place and you are bound to have greater trouble next time. Do the sensible thing: Provide yourself with the best rim tool on the market and save time, trouble and rims. TEN DAYS' TRIAL.—If your jobber does not have them, we will send you one. Try it ten days. If not satisfactory, return it to us and we will refund your money. We also make the Greb Automatic Grip Puller.

**FORSTNER BITS**

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

**PROFITABLE FOR DEALERS**

The reason Strong's Ironclad Gauge Glasses are the most PROFITABLE for dealers to SELL is simply because they are the most PROFITABLE for companies to USE.

**STRONG'S IRONCLAD**

Gauge Glasses are made so STRONG, so SAFE and so everlastingly DEPENDABLE that they do not require RENEWING nearly as often as other gauge glasses. Therein lies their ECONOMY.

We recently filled an order for 60,000 glasses for one company and 30,000 for another company.

The General Electric Company have been consistent users of our gauge glasses for over 10 years. They, like 10,000 other users, know from experience that the QUALITY and VALUE is there.

All sizes, in lengths of 1 in. to 72 in., in any fraction of an inch, with fused ends. Sell safe glasses and hold customers. Write for prices.

# IS THIS THE SOLUTION?

Another scheme to rectify the distressing prices now prevalent, by other than sound economic measures, was outlined before the Union of Canadian Municipalities which recently convened at Kingston.

## THIS RESOLUTION HITS YOU WHERE YOU LIVE

"We submit the principal root of the evil is the present wasteful, inefficient and antiquated method, or rather lack of method, of distributing the goods from the producer and manufacturer to the consumer—wasteful of time, labor, health, happiness and even human life—inefficient and antiquated in this age and to such an extent that even the huge economies effected by the greatest array of labor-saving machinery the world has ever seen are in a large measure rendered null and void. An ever-increasing army of unregulated distributors and relatively an ever-decreasing army of producers with the leaders of all these practising profiteering and price-manipulation as their fancy may dictate or opportunity may permit.

"Among the minor causes are the various classes of idlers and usurers, who in devious ways levy toll on labor and industry. Waste of time in high schools and colleges teaching dead languages and other unpractical subjects to the partial or total exclusion of vocational training, economics and useful branches of learning which would be of greater value for purposes of mind development and discipline and thereafter more useful to the individual and the country."

## SAYS THE FINANCIAL POST IN REPLY:

"It is, of course, possible that there might be a dissenting voice, heard above this chorus of condemnation. A voice that might suggest, for instance, that the fact that the producer is getting $24.50 per hundred for hogs, where he formerly got $6, might, perhaps, have as much to do with the matter of increased cost as the inefficient handling that gives to the packer 5-16 of a cent per pound on bacon, or to the retailer a bare 5 cents a pound. Or the fact that the farmer is now guaranteed a price of $2.15 a bushel for wheat that formerly he sold with satisfaction for 90 cents, may be as much responsible as the half cent a loaf profit of the baker, or the cent profit of the retailer.

"It is a question, too, whether all the blame for the trying conditions of the present time should be laid at the door of established trade, any more than at any other door. There seems no good evidence for believing that the business morals of the merchant class are worse than any other, and there might be those who might reply to the stricture that our schools and colleges are not devoting their attention strongly enough to the bread and butter needs that "man does not live by bread alone."

The frank object of this resolution was "to attain a substantial reduction in the cost of living generally, but without increase of hours of labor or reduction of wages." It is the possibility of this which THE FINANCIAL POST doubts.

You want to read such discussions as this. They appear weekly in THE FINANCIAL POST.

# Hardware and Metal

**is a dominating factor in maintaining efficiency, equipment and service in your store.**

Every issue teems with advertising and editorial matter of a character that will keep YOU right up to the minute in your business.

# *The Value of the Business Press to Business Men*

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

*"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.*

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

*"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."*

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

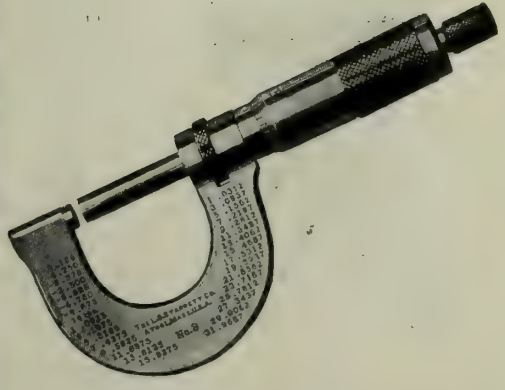
# The apprentice says:



"Almost the first tool I ever heard of was a Starrett 'mike.' Somebody pinched Dad's out of his jumper pocket and the fuss he made showed he thought it was *some* tool, even if he had had it close on twenty years.

"When I got into the shop myself, I noticed the toolmakers and everybody who had 'fussy' jobs preferred Starrett Tools.

"There's something about 'em that the fellows like. Yeh! They're accurate and they're convenient, but I guess the fact that the men who make 'em are pretty good mechanics themselves, has something to do with it.

"What? Sure I'm getting me a set of Starrett Tools—I need 'em every day. Yes, I got me one of those seventy-five cent Starrett Apprentice Books, too. It saves me asking the foreman a question every five minutes. Now, when I want to know how to do something, I can look in the book and study it out myself."

# Anticipate Their Needs

THE hardware dealers and the garage man who anticipate their patrons' needs are the men who get the business.

It gets you goodwill which can be counted into many hundreds of dollars by the end of the year.

Your customers are going to experience a number of unexpected wants this Spring and Summer.

If you are equipped to fill those needs when the articles are needed, you are the man who is going to hold that customer's trade.

He may be fond of gardening and take great delight in keeping his garden in shape.

His hose-reel may be somewhat worn.

If you have one that appeals to him he will buy it. A hose-reel would make an attractive feature of your Spring Display.

Our hose-reels are unusually simple in construction, yet are very durable. They are built for utility and permanence.

Camp stools, chairs, etc., are also in demand just now. You should have a good variety on hand.

We make every kind of camp chair, folding chair for motor cars, boat seats, child seats, etc.

Be ready to show your customers these most attractive lines.

We invite correspondence. Mark your communication "General Sales Department."

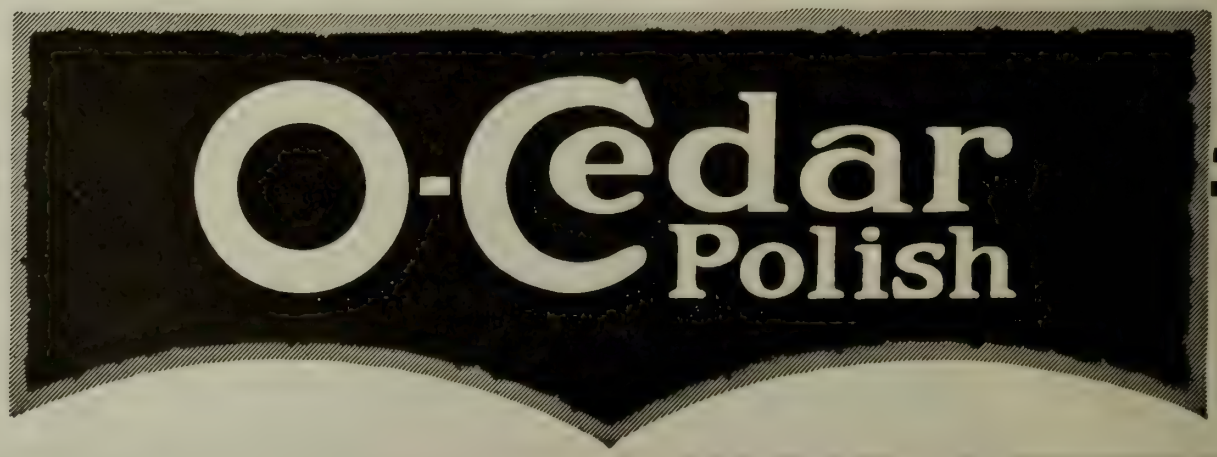
THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE: TORONTO, CANADA

# MARKETING O-CEDAR PRODUCTS

WHEN O-Cedar Products were first sold on the Canadian market there were not many retailers willing to try them; but after being continually approached by their wholesalers, the number of O-Cedar Merchants increased until to-day O-Cedar Products are sold in almost every store. This widespread distribution makes it easy for the consumer to buy the goods. And the selling of them is made easy for the merchants by the newspaper and other advertising whereby the women are constantly reminded of the advantages of O-Cedar Polish and the O-Cedar Polish Mop.

Effort inevitably finds its reward—and the merchant, who features and displays O-Cedar prominently, is bound to sell more O-Cedar than the man who expects the customer to ask for it. The goods **are** asked for; but sales can be greatly increased by suggestion.

To properly market O-Cedar Products, we need both Retailer and Wholesaler. Without either, our products could not have attained the wide distribution and sale they now enjoy.



Thanks to the co-operation of wholesaler and retailer, we are able to keep our factory going at full speed and to employ a steadily increasing number of Canadian work people.

O-Cedar Products represent the best in workmanship, materials, quality, value and satisfaction. So we know you will continue to get many repeat orders for O-Cedar Products.

# STRIKE OF U.S. MINERS ADDS TO LOCAL TROUBLE

## Toronto Dealers Abandon All Effort to State Possible Delivery Dates.

As a result of the addition of 20,000 men to the ranks of the strikers at the anthracite mines in the United States Tuesday, any attempt to set even approximate dates for coal deliveries has been abandoned by the Toronto coal dealers, until such time as definite information can be procured regarding the spread or probable life of the strike. The Elias Rogers Co. continue yesterday to take orders, with the explanation to customers that no idea could be given regarding the probable date of delivery. It was explained to patrons that, if the strike was of short duration, orders might be filled in six weeks.

According to a prominent dealer, 1919 deliveries at present are far behind those of 1918, his firm alone being 27,000 tons behind. This, however, he explained, is made up principally of stove coal, which is hardest of all to get.

**The above is an extract from the "Toronto Star"**

# *Friends in Need*

The coal situation looks rather unpromising from newspaper reports, but there is no need for anyone to worry. The main thing is to prepare for the inevitable temporary delay in coal deliveries by having ready such auxiliary heating appliances as the **Majestic Electric** or the **Perfection Oil Heaters.**

These well tried and proven appliances fill the bill for both city and country use and as last year, will turn out to be Friends in Need.

The **Majestic Electric Heater** is as handsome an article as is found in any home, but better than this, it is efficient to the last degree, giving as it does a wonderful volume of heat. It is made in all styles and sizes.

**MAJESTIC**
*Electric Heater*
**PERFECTION**
*Coal Oil Heaters*
**The Solution**

The **Perfection Oil Heater** has reached a wonderful state of perfection, both in providing heat and in overcoming the odor nuisance found in some oil heaters.

**You should have your stock in now — wire for immediate shipment of your anticipated requirements.**

# *It has the Grip of a Giant*

# *—this new* VICTOR No 1 GIANT *Game Trap*

## *An All-around Giant in Jaw-height, Spring Action and Power*

A new and different Victor Trap—a Giant in name, size and strength. A modern trap that catches and holds far up on the animal's leg. Especially adapted to trapping skunks, muskrats and mink.

This new Victor Trap is being advertised nationally in all leading fur and trapping magazines, and will be specially featured in an extensive circularizing campaign.

Write to-day for a complete assortment of circulars and selling aids on the famous trap.

## *The Giant Jaws Catch Far Up on the Animal's Leg--Spring Rises High*

Right here is where giant size counts, as the spring and other parts of the trap are built proportionately larger to take care of the additional height of jaw.

The pan and dog are wider and heavier, the chain is larger and the spring faster. The trap is also equipped with an improved swivel at the point where the chain connects with the spring, and possesses all of the regular Victor improvements, such as non-freeze, non-clog, "humped cross" and direct pan fastening.

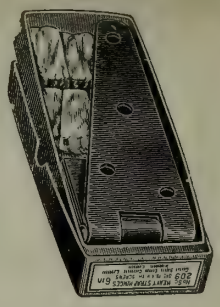
## The Most Popular Latch

This favorite Garage Door Latch, No. 27, is a winner with car owners. It is a fact that most automobile plants just now are unable to keep production up with the orders. Cars need garages and garage doors need latches. Your course is obvious. Stock this latch that sells with good profits; and get a catalogue of National money-makers.

No. 27 Latch is reversible for right or left hand door; adjustable for thickness from 1⅛ to 2¼ inches. Packed the **Unusual National Way,** one latch complete with screws, in a neat, strong box. Finished in Japan, Dead Black Japan, Sherardized and Dead Black Japan, Sherardized and Plated, any finish. Weight per dozen 26 pounds.



**NATIONAL MANUFACTURING COMPANY**
**STERLING, ILL.**

No. SC. 609

# Everybody Likes Strap and Tee Hinges

***Packed One Pair in a Box with Screws***

No. SC. 209

Before placing your next order for hinges consider the time wasted loosening bundles, selecting and counting out the screws and wrapping in paper.
Consider the additional customers you can wait on when hinges are already packaged, neatly labelled, ready to hand out.
Consider the advantages of having a clean, attractive stock that can be handled without soiling the hands.
Naturally this time and labor-saving method appeals to the trade and consumer as is shown from the ever-increasing demand.
In ordering, prefix the letters SC. to the class number to distinguish from the line of hinges in bulk.

# To cut down the cost per cut

## How Many S. P. M.?

"Haste makes waste" is just as true of hack saws as of anything else. Forcing a blade by increasing the strokes per minute means a quickly dulled blade. 50 to 60 strokes per minute is about as fast as it is economical to run when cutting dry. On soft steel, using compound, saws may be run to advantage at about 100 S. P. M., at from 65 to 80 on annealed steel, and on unannealed tool steel at about 60 to 80 strokes per minute.

Follow the Starrett Hack Saw Chart, put on the weight and watch the cutting cost decrease.

# WHEN ANTHRACITE COAL WAS FIRST USED IN AMERICA

IN 1808 Judge Jesse Fell of Wilkesbarre, Pa., succeeded in burning anthracite coal with some measure of success, but it was not until around the year 1824, the year of the founding of the Plymouth Cordage Company, that any general use of this fuel for domestic or factory purposes began.

The early coal miners found that in both mining and breaking the coal, large quantities of good rope were needed, and from the beginning of the industry in America, Plymouth Rope, the rope you can trust, has played an important part in the vast mining operations.

The rugged, durable qualities built into every foot of Plymouth Rope through pure material and expert workmanship are as valuable to every rope user as to the producers of coal.

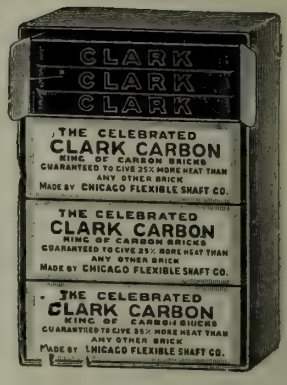
## No. 7X



**Popular for Fine Coupes and Electric Cars**

Slanting top, outside metal parts nickel plated and highly polished. Side and end heat control; covered with mohair plush in green, blue or maroon. Weight 6 lbs.

Seven other types and sizes.

## Now for the Winter Sales

THIS is the season for "Preparedness." Have a demonstration heater when the cold weather is numbing the hands and feet of the drivers that stop at your door. When a rural mail carrier, a doctor, or any other man who must drive in the winter cold enters your store see that he gets a demonstration of the cosy, comfortable warmth from a Clark Heater.

It's an irresistible appeal to such men.

Your circle of heater owners grows rapidly. Each is a steady customer for Clark Carbon Brick. This ideal fuel is placed for 2 or 3 minutes in any flame or fire, after which, when placed in the fuel drawers, it continues all day to give out a grateful, comforting heat.

*If you have overlooked this chance up to now, write your jobber to-day.*

## Chicago Flexible Shaft Company

**Roosevelt Road and Central Avenue :-: Chicago, Illinois**

# COMMON SENSE ABOUT HACK SAWS

It is not reasonable to try out a blade on high speed steel that you intend to use for cutting machine steel. Testing a blade in a hand frame gives little indication of what kind of work it will do in a machine. The testing of only one or one dozen blades will not determine what kind of work a brand will do continuously. The only fair test of a *Hack Saw* Blade is the test of continuous use for a reasonable period of time under normal shop conditions.

Goodell-Pratt blades are made to stand up under continuous shop use and not freak tests. The shape of teeth and the staggered set is in accordance with the most up-to-date design; and the methods of manufacture conform to the very latest and best shop practice.

# Get This Display for Your Window

*A VALUABLE ATTRACTION FEATURE*

# Bissell's "Peerless" Cooperative Display

Is of great general value to any merchandise showing—particularly of home furnishings, carpets, household utilities, furniture, etc.

It is a nine color lithographed reproduction of a $300.00 painting—would cost you that much to make just one.

It is an expensive, heavy cardboard "cutout" which when set up is about 7½ feet wide by 4½ feet high—an imposing background. (The girl's figure is a separate piece and is used with a real sweeper.)

***Furnished gratis with one dozen or more Bissell Sweepers for shipment from factory—Order direct or from your jobber***

# Your Windows Stop Buyers--

when you show Millers Falls tools and the national advertising in which they are featured.

Your customers recognize the tools they have been reading about and realize that by going a step further they can examine the tools themselves and find out all about them.

In that one moment your window has changed an advertising reader of ours into a prospective customer of yours on a sale that is already half made before your customer even crosses your threshold.

Wise dealers get all the half-made sales from our national advertising that their own co-operation will bring them. If you aren't doing it, send for our selling features that help you push tools.

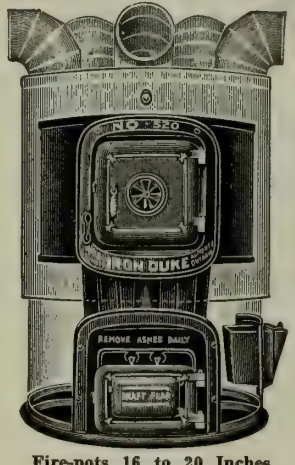
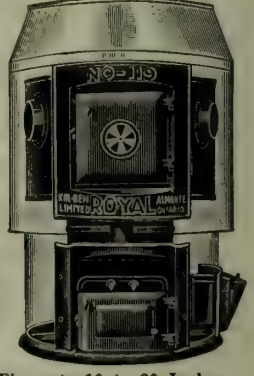
# A Furnace For Every Need and When You Need It.



Fire-pots 17½ to 27 Inches

**"The STERLING"**—For the unusual heating proposition that requires a furnace with a large amount of heating surface and one that will deliver large volumes of fresh warm air, the Sterling has no equal. In fact, the Sterling is so unlike other heaters in the results produced that there is no logical basis on which others can compete with it. "It is a fuel saver; nothing better in the field"—writes a customer. You don't have to make promises with the Sterling, but make substantial claims.



Fire-pots 17 to 29 Inches

**"The KIR-BEN"**—Needs no introduction to most of the trade. It is now a tried and tested product and is known to be a strictly high-grade heater. Dealers in every section of the country are developing a big business with the Kir-Ben. It is easy to sell because one sale invariably leads to another. Satisfied users are your best sale promoters.

Fire-pots 16 to 20 Inches

**"The IRON DUKE"**—A furnace of low construction particularly adapted to houses with low cellars, but equally as effective when installed in houses with high cellars. By installing a furnace of this construction the proper pitch to the hot air pipes may be obtained. The Iron Duke is a medium-priced furnace with all the best features of the better grade of heaters.

Fire-pots 16 to 20 Inches

**"The ROYAL"**—After all arguments have failed to talk quality and price, don't "give up." We build this furnace especially to meet competition. And in spite of its low price, it is a far better furnace than most furnaces which sell for more money.

# KRIBS MONEY-MAKERS

KRIBS WASHING MACHINES are unfailing in their continuous profit returns to dealers because the machines are unfailing in the splendid service rendered to the purchaser.

IT IS A PLEASURE to sell these machines, the points of superiority stand out so prominently. The class of wood—selected Cypress—and the evident care used in construction are attractive features. The CUT GEARS make slipping or loose action impossible—a fault so often found in the ordinary cast gear. The COVERED MECHANISM and the carefully distributed weight of the device—avoiding strained hinges and broken covers—are all splendid selling points daily used by hundreds of delighted dealers.

The KRIBS ELECTRIC WASHER supplies all the excellence of the most modern machine at a *reasonable price, wonderful performance* without the *purse-breaking* process.

# Everlastic Roofing

## Panamoid

is an excellent "rubber" roofing made with one surface sanded and the other finished in "Alligator" effect.

Panamoid, like all the other lines, contains 108 square feet to the roll 36 inches wide. Every roll contains one pint of Liquid Roofing Cement and one pound of large-headed nails neatly packed in the centre of the roll.

This desirable roofing meets the demand for a good grade roofing at a low price.

## Everlastic Slate Surfaced (Red and Green)

is our first grade of "Rubber" roofing. Its years of successful use throughout Canada has made it so well known that the name Everlastic has practically become standard.

Everlastic is made of strong, pliable fabric made by thoroughly saturating the best grade of roofing felt with a high-grade waterproofing composition. It is then heavily coated on both sides, because it must not only resist the attack of the elements from above, but also prevent deterioration due to steam, vapors and gases that reach the under side. Everlastic is supplied in three weights and like the other lines, contains a pint of Liquid Roofing Cement and a pound of suitable nails in each roll.

# SOUVENIR

## Stoves
## Ranges
## Furnaces

For the past seventy-five years Souvenir Stoves, Ranges and Furnaces have been known to dealers and consumers from one end of Canada to the other, and held in the highest esteem by all because the quality of the material used in their manufacture as well as the workmanship has always been high grade.

A number of dealers, however, have been disappointed by us during the last few years through our inability to supply their demands and to give them the kind of service that they are rightfully entitled to, and it is those dealers particularly that we hope to reach with this message.

Just one year ago our Company underwent a complete reorganization with the result that we are now in a position to give all customers a much larger range of goods to choose from, speedy shipments and a service that is 100 per cent. efficient.

We will be glad of an opportunity to prove this statement and to send you prices and catalogue if you will write us stating what line of goods you are interested in, or, better still, one of our travelers will call upon you if you wish. Please address all correspondence to our Head Office—

# Stanley Tools

## *Made in Canada*

The illustration above shows a line of Screw Drivers which should be in the store of every dealer who prides himself upon carrying a complete stock of tools.

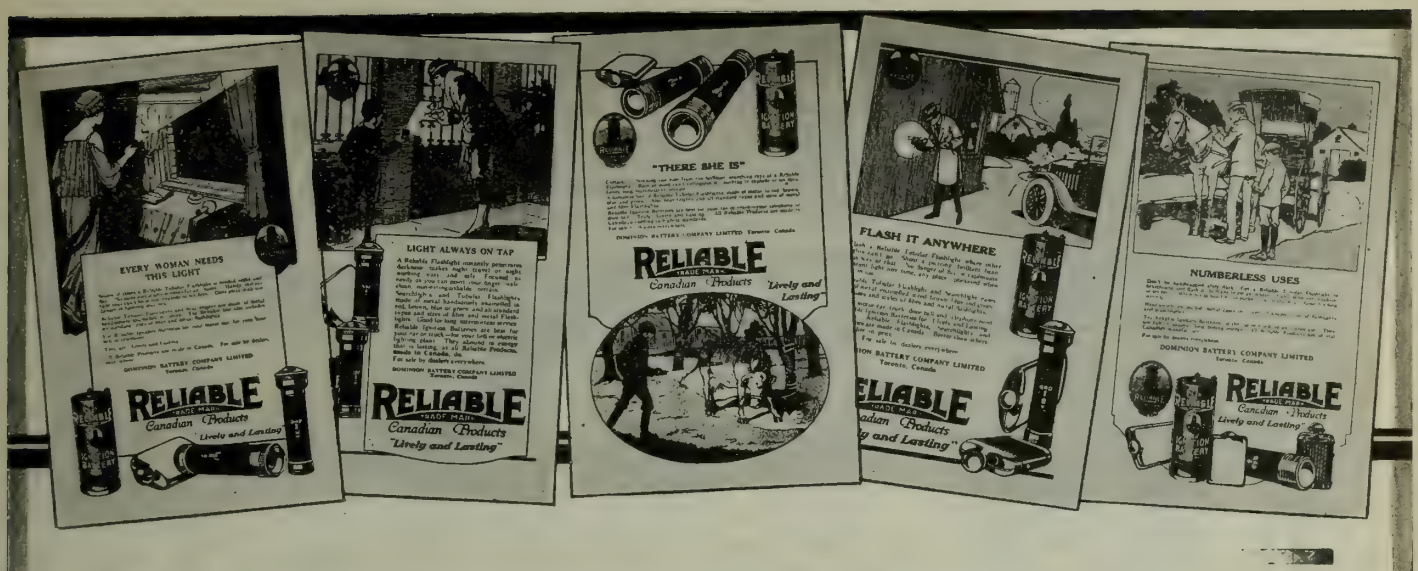
It is an assortment of SPECIALS that will appeal to many of your customers.

For instance—No. 21, shown at the extreme right of the picture—blade only 1½ inches long, just fits the vest pocket, a strong little Driver and very handy.

Also No. 60—shown at the left—only 1⅝-inch blade, but with a big sure grip handle. For heavy work into close corners it cannot be beaten. Used by Plumbers, Machinists, Millwrights, etc.

Nos. 51, 52 and 53—Called MACHINISTS' DRIVERS—Big, broad tips for large screws and extra large shanks for heavy work.

Nos. 51½, 52½ and 53½—also Machinists' Drivers, have hexagon nut on shank for use with a wrench.



No. 54—Note the DOUBLE GRIP, also the hexagon feature for wrench. With this latter Driver one can turn anything.

We make other drivers. See Catalogue.

# WILLIAMS'
## "Vulcan" Safety
# Lathe Dogs

WE HAVE embodied in these "Stout-hearts," built for a lifetime of strenuous service, the experience gained in the design and production of *Superior* Drop-Forged Machinists' Tools during nearly half a century. It is not too much to say that the automatic safety feature first introduced by Williams' "Vulcan" *Safety* Lathe Dogs has revolutionized the general design of this type of lathe tool. Like many improvements originated by us in other lines of Drop-Forged Tools, the safety feature of Williams' "Vulcan" *Safety* Lathe Dogs has since been adopted as *Standard*—a fitting recognition of efficiency and usefulness.

Many shops regularly specify Williams' "Vulcan" Dogs. Take advantage of this good will; add it to your own prestige.

They are in stock in Bent and Straight Tail Patterns, with 1 or 2 screws, 16 sizes of ⅜ to 6 inches maximum capacities.

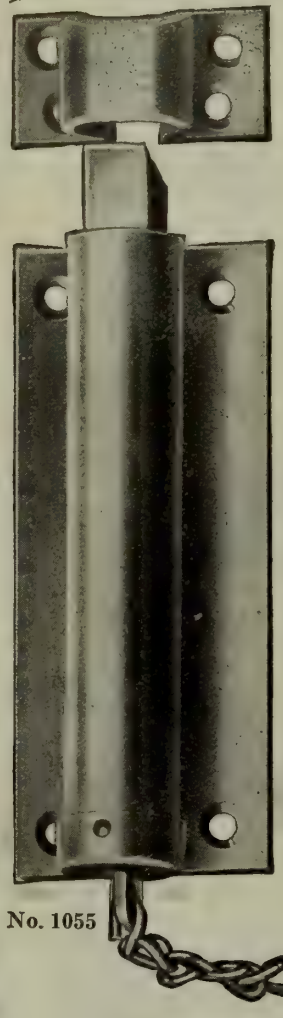
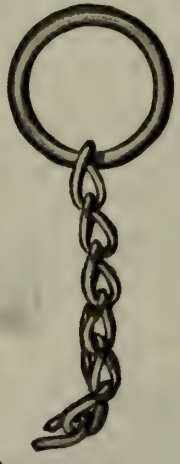
*"For good looking, 'he' foot and chain bolts, you can't beat this 1055 and 1056.*



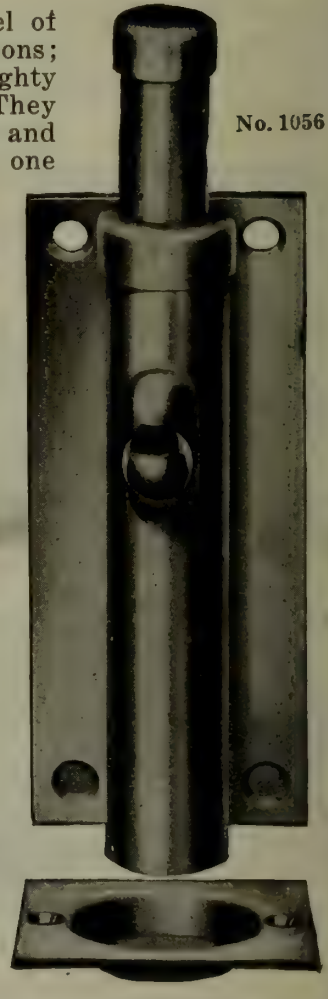
*"I'll let you in on this secret about them. The Stanley Works began 77 years ago as a bolt factory and to-day these two are pet numbers among all Stanley Bolts," says*



# Stanley Foot and Chain Bolts

"The barrel and plate of these bolts are formed up from the same sheet of steel. Their springs are Stanley sherardized so they can't rust and lose their pep. They are now being made in the 2, 3, 6, 8, and 10-inch sizes.

"In corresponding sizes the plate and barrel of both foot and chain bolts are the same dimensions; when they are used together they make a mighty neat appearance on your customers' doors. They come with all the necessary strikes, staples and screws. In the larger sizes they are packed one in a box."



No. 1055

No. 1056 Foot Bolt is locked and released by the foot. The bolt itself is heavy and doubly reinforced and sherardized at the bottom where the strain comes. The parts where the foot locks and releases it are of solid bronze.

No. 1055 Chain Bolt. The bolt proper is a bar of dropped forged steel running through the entire length of the barrel. Its head is beveled so that the bolt locks automatically. It is released by a pull on the chain. The bevel can be easily reversed for doors opening in.

No. 1056

**"The profit on them is as husky as the bolts themselves."**

# Hardware Wholesalers' Banquet

## Social Feature of Annual Convention Resumed After Lapse of Four Years—Attended by Many Trade Representatives—New Officers Elected

AFTER an interval of four years, a banquet to mark the annual gathering of the Canadian Wholesale Hardware Association, was held on Monday night of this week in the Rose Room of the Windsor Hotel, Montreal. President Jos. Dowling occupied the chair as toastmaster and made appropriate references in introducing the various speakers.

*C. A. WHITWAM*
*Elected President Canadian Wholesale Hardware Association.*

During the war period, the annual conventions of the Association were held as usual, but the annual banquet feature was eliminated owing to war necessities. Close contact with big questions was maintained through these meetings and representatives met at appointed centres annually. It was only natural that this year's arrangements should bring together a large gathering of the hardware fraternity from many sections of Canada.

Among the guests were members from the sister organization, the National Wholesale Hardware Association of the United States, thus attesting the warm regard the two associations have for one another in their common interests of developing various constructive programmes.

Past President Jos. Dowling fittingly welcomed the members and also the guests, referring to the lapse of entertainment for four years and referring to the visitors in the very fitting phrase—"Our American Cousins and our Canadian Friends." In deference to the speakers who followed, Mr. Dowling, deferred speaking at length until later.

One feature was emphasized that is worthy of note and that was the international character of the setting. It really was Canadian night, American night, French-Canadian night, Scotch night and Irish night all in one, and a stalwart Scot in full regalia, pleasantly introduced at an opportune moment by Archie MacFarlane, imparted the stirring music that stirs the blood and makes it warmer.

### U. S. Vice-President's Address

Mr. Decatur, 2nd vice-president of the National Wholesale Hardware Association of the United States, made an informal address that was followed with close interest. He believed, strongly, in Association work and such gatherings as these, in his estimation, were excellent in promoting the right spirit of understanding and co-operation. The Canadian Association, he thought, had justification for engaging in an entertaining evening such as this in view of the fact that they had not so celebrated for four years.

"The National Wholesale Hardware Association of the United States has accounted for stupendous growth in various association work there," continued Mr. Decatur. "That growth has been one of the most remarkable in connection with any mercantile effort, and it is due to the get-together spirit that is fostered in such organizations.

"There is no line between the two countries—Canada and the United States. We are brothers. No one knows the future, but let's take care of to-day and to-morrow will take care of itself.

"I have no objection to a high wage scale—supply and demand will eventually right the situation. I do not believe that we will see prices what they once were, but they will reach a more normal level."

In concluding, Mr. Decatur strongly commended the profit-sharing plan of remunerating jobbers' salesmen. This was, in his opinion, an excellent plan since it worked automatically, the salesmen getting pay for the efforts he expended in securing business. Its adoption, he thought, would remove a good deal of dissatisfaction which might sometimes exist, otherwise.

*LIEUT.-COL. ROBT. STARKE*
*Elected Vice-President Canadian Wholesale Hardware Association.*

### Steel President Speaks

Robert Hobson, president of the Steel Company of Canada, Ltd., Hamilton, stated that he has made but a conditional acceptance of the invitation sent him by Secretary Hardy. Mr. Whitton had assured him that he and Mr. McMaster would relieve him of any speech-making.

It was not a time, however, to express oneself in frivolous terms, he said. We are living in very serious times. He had never dreamed that men would make the demands they are making to-day. When the previous speaker had remarked that there was but an imaginary line between

Canada and the United States, he forgot the five per cent.

Two billions of debt saddled on Canada, Mr. Hobson continued, was a terrible load that would have been considered staggering a few years ago, "but," he continued amid applause, "three-quarters of that debt is owing to Canadians and the interest on it is not going out of the country but into the hands of Canadians again. Old Britain has owed her large debt, in the past, to her own people, but she has had to assume great burdens very recently outside.

"The United States has been more fortunate. She entered the war much later and had, in consequence, a lighter burden to assume. Her Government had not enacted the excess profits tax legislation until two years after we had been paying it.

"Sir Thomas White, before the launching of the last Victory Loan, had said—'Work harder and save more.' I will use that phrase now and add to it and say—'Work harder and save more, add to it and buy your goods in Canada and save 5 per cent.' I have no quarrel with our friends to the south of us."

Mr. Hobson thought that a levy on capital would be a serious thing, were it enacted by the Government. He believed that it would be quite unnecessary if the people of Canada supported the forthcoming Victory Loan to the very limit, and if they largely oversubscribed it.

### U. S. Secretary's Address

James Fernley, secretary of the National Wholesale Hardware Association of the United States, was the next speaker. "May I be considered a good fellow with you," was his happy introduction to an informal address that reached an attentive audience.

"Twenty-five years ago it was a mooted question whether there should be a wholesale hardware association—whether the wholesaler had a right to exist. Today manufacturers are respecting the rights of the jobber. Here, among you, I see this condition well guarded, and manufacturers are looking after your interests.

"While speaking with your genial president, he referred to the heavy mail he sometimes has to open, and expressed the wish that some of the big orders had gone to his competitors. We have no such cordial relations in our United States association as that."

Mr. Fernley referred to the long and pleasant acquaintance that had existed between himself and the secretary of the Canadian Association, Mr. Hardy, there having been a natural bond of understanding in the work they had both been doing for the past 16 or 18 years. His father had been born under the British flag, and naturally he felt very much at home on this occasion. He would hope that a larger representation should attend the forthcoming convention to be held in the United States in October. "And if we are invited officially, the next time, to Canada, it will be all the more acceptable, for then our expenses will be paid."

*JOSEPH DOWLING*
*Retiring President Canadian Wholesale Hardware Association.*

At this stage a very unique pleasantry was sprung, the banquet hall door opening unexpectedly, admitting "ye stalwart piper," who played a soul-stirring march, to which accompaniment Colonel Robert Starke and T. B. Williamson stepped briskly, carrying a sparkling set of silver around the end of the head table to where retiring President Dowling sat. As the strains of Highland music subsided Colonel Starke addressed the recipient.

"I've been asked by members of the Association, for you, Mr. President, to accept this little token of esteem to show the deep regard in which you are held by your brother members. You, Mr. Dowling, have carried the Association through four strenuous years. I would ask you to accept this little gift with the very best motives, and trust that you and yours may live many years to enjoy its use."

**Canadian Wholesale Hardware Association**

**Officers-Elect, 1919-1920**

**President—C. A. Whitwam, London, Canada.**

**Vice-President—Col. Robert Starke, Montreal, Starke-Seybold, Ltd., Montreal.**

**Secretary—James Hardy, Jenkins & Hardy, Toronto.**

**Executive Committee**

**George C. Davis, General Manager Frothingham & Workman, Ltd., Montreal.**

**Norman R. Howden, D. H. Howden & Co., Ltd., London.**

**John McD. Wilson, Manager Chinic Hardware Co., Ltd., Quebec.**

It was with evident emotion that Mr. Dowling expressed himself, and entire secrecy had made the surprise most complete. There had been nothing further from his thoughts, he said, and any effort that he had been permitted to exercise for the welfare of the Association he expended willingly and gladly. Others, he said, had worked hard with him. He would greatly prize the lovely gift.

Mr. Alexander of Hamilton pleasantly intercepted to remark that "when prices should have advanced on 40,000 lines, Joseph Dowling has guarded the ship to a safe haven."

The continuation of speeches on the toast—"Our Guests," brought others to their feet. W. McMaster, of Montreal, was pleased, he said, to observe the unanimity of interests which were recognized by the Association. His mind was carried back to the time when wages were $5.56 and $6.66 per month for apprentices, at the time he began his business career.

Introduced to a guest in the corridor, someone had said to him: "O you are the grandfather of young McMaster of the Steel Company," an obvious compliment to the snowy hair, which nature had richly endowed upon him.

Mr. McMaster referred to the great changes which had come about in the remuneration of workmen. There had been a great deal of pyramiding lately, in the scales of wages paid, and if this pyramiding were to continue it would only make matters worse. After all, the purchasing power of the dollar is what must be considered. He personally believed that a greater interest should be taken by the manufacturer in those serving him. The interests of capital and labor should be, in many ways, identical.

In concluding, Mr. McMaster expressed his feeling for Great Britain in the trials she was passing through. With coal now costing 39 shillings per ton, where it had previously sold for 5 to 6 shillings, a great cost problem had been created.

John Baillie, president of the Montreal Board of Trade, was glad to be present on this occasion. He had a great sympathy for Great Britain, and in the matter of Marine Insurance, and which a previous speaker had referred to as being altogether disproportionate and as working against the port of Montreal in particular, he believed that the country was getting what it paid for. Other companies, purely Canadian, had endeavoured to make this business pay but it was finally given up as unprofitable.

These associations, and these gatherings from time to time, Mr. Baillie thought, were an excellent means of bettering understandings as between man and man. They would help toward securing a fair and reasonable profit on operations being conducted in a business way.

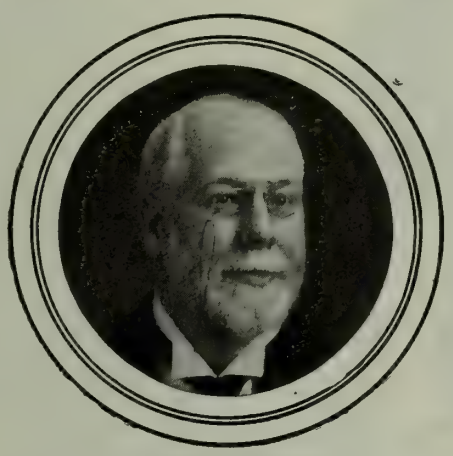
George Caverhill, of Caverhill, Learmont and Co., said that he felt as young as he did 43 years before, when he received his $8 per month. "There's a land

that is fairer than day," he continued, "and when the manufacturer keeps off our ground we're happy."

"There is a real thing in this country that will hold us together, and that is work. This spirit is greatly lacking in Canada to-day. Not only is this a condition among returned men, but it is likewise true of the 'stay-at-homes' who never went to war. We must now make these men work. Winter is approaching and they will get back to work and this is our only salvation."

Mr. Caverhill expressed his pleasure and satisfaction with the presentation that had been made the retiring president of the Association, and he believed the tribute was a deserved one.

Chas. Britton, formerly of Cowan and Britton, Gananoque, Ont., was introduced as the "Dean of the Trade." Despite his advanced years, Mr. Britton vigorously referred to many of the present day problems, including the high cost of goods, soldiers' gratuities, and urged that every man should do his part during the reconstruction period. Mr. Britton took a fling at the Germans, describing their brutal methods, and urged that Germans should be barred from Canada for ever.



Owing to the lateness of the hour, the speakers who followed spoke very briefly. C. A. Whitman, of Hobbs Hardware Co., London, Ont., expressed his pleasure at meeting so many old and new members of the hardware trade. He fittingly referred to the members who had pasesd on during recent years, and paid a tribute to their efforts during bygone years to create better conditions in the trade, and place the association on a mutually beneficial and sympathetic basis. The Wholesalers' Association, stated Mr. Whitman, has also been a great force in drawing the manufacturers together. Mr. Whitman referred to the good work of President Dowling and Secretary Hardy.

H. A. Alexander, of Wood, Alexander & James, Hamilton, Ont., referred to the value of co-operation with sister associations, and told of the great benefits which may be secured by co-operation. Mr. Alexander also paid a tribute to the splendid work of the president, Mr. Dowling.

F. H. Whitton, Steel Company of Canada, humorously confessed that he shines best when the president of the company is not present. Mr. Whitton spoke of the value of co-operation, and remarked that a much better feeling now existed between the manufacturers. One of Mr. Whitton's remarks caused more than usual interest. He referred to a recent meeting at Ottawa, called by the Minister of Labor, and attended by 76 representative men. The wholesalers and retailers were described as parasites. Mr. Whitton had taken the matter up privately with many of those at the meeting and explained the absolute necessity of wholesalers and retailers as distributors. He pointed out the difficulties which would be experienced if wholesalers and retailers were eliminated, and illustrated his point by telling of the days when he was a boy in England, when the Gypsy came around with pots and pans, etc., taking scrap iron and old metals in exchange.

James Davidson, of Thos. Davidson Mfg. Co., in responding to the toast to sister associations, referred briefly to the value of associations, and expressed his appreciation of the invitations extended to sister associations by the wholesale hardware men.

Col. Robert Starke, of Starke, Seybold & Co., Montreal, in proposing a toast to the returned soldiers, told of his experiences in drilling men for the Great War, and of the thrills he had experienced in seeing how anxious the young men were to get away to the active scene of battle. When the history of the war is written, stated Mr. Starke, we will then know more about the great part the Canadians played in the conflict. Mr. Starke did not think there

*Secretary Canadian Wholesale Hardware Association.*

was a hardware warehouse in Canada that did not send its quota of men forward. In practically all cases those who returned found their old positions, or better ones awaiting them.

T. B. Williamson, of H. S. Howland, Sons & Co., familiarly known as "Tom," could not understand why he was called upon to respond to the toast to "The Ladies." However, he rose to the occasion, and his recitation, "We All Love the Lassies," was heartily applauded. The singing of "Auld Lang Syne" and "God Save the King," closed the big event at a late hour.

Among those present were:

Joseph Dowling, Caverhill, Learmont & Co., Ltd.
C. A. Whitman, Hobbs Hdwe. Co., London, Ont.
T. B. Williamson, H. S. Howland, Sons & Co., Toronto.
Col. Robt. Starke, Starke-Seybold & Co., Montreal.
Herb. Seybold, Starke-Seybold & Co., Montreal.
James Hardy, Jenkins & Hardy, Toronto.
H. A. Alexander, Wood, Alexander & James, Hamilton.
Col. George Caverhill, Caverhill, Learmont & Co., Montreal.
S. Rae, D. H. Howden & Co., London, Ont.
"Dick" Terrell, Caverhill, Learmont & Co., Montreal.
Thos. Birkett, Jr., Thos. Birkett & Sons, Ottawa.
J. A. Frazer, Lewis Bros., Ltd., Montreal.
P. O. King, Kennedy Hardware Co., Toronto.

A. E. Hanna, Steel Co. of Canada, Ltd., Winnipeg.
A. E. Hough, Canadian Tube & Iron Co., Ltd., Montreal.
C. A. Walker, Ontario Lantern Co., Ltd., Hamilton.

Many letters of regret were received from those at a distance who found it impossible to be present.

---

## HEARD AT THE WHOLESALERS' BANQUET

Decided appreciation was expressed for the vocal duet of George Caverhill and Archie McFarlane. When two kind-red-spirited Scots have a mind to sing as they had, it just makes a banquet hall ring. Open jealousy was expressed in one quarter for Archie's fine tartan waistcoat. The skirl o' the pipes was a richt welcome sound.

Something was said on the menu cards to the effect that the hardware jobbers assumed themselves to be honest, and

# FIFTY YEARS IN THE WEST

## How James H. Ashdown Won Out on the Prairies

Reprinted by Courtesy MACLEAN'S MAGAZINE

This is probably the most recent picture of Mr. J. H. Ashdown, President of the J. H. Ashdown Hardware Co., Limited. The snapshot was taken at Ottawa as Mr. Ashdown was leaving a meeting of the National Industrial Conference.

ONE afternoon in the year 1861, a young man of about eighteen years—the age when ambition so frequently stirs in the male heart a desire to strike out and conquer the world—was riding briskly along a railroad track. In the near distance was a settlement which in after years was to become known as the town of Hespeler. At this time, however—it was a mere clearing in the dense forest. Despite the fact that he had come all the way on shank's mare from Guelph, a distance of twelve miles, and despite the further fact that he had previously walked all the way from his father's farm in Brant County to Guelph in search of employment and had failed to find it, he was still cheerful. So cheerful, in fact, that when he saw a sixpenny bit sticking in the sand between two railway ties, he accepted it as an omen of good fortune. He dug it out with his knife and held it up exultantly. A sixpenny bit was a small fortune to a boy of eighteen in the early sixties. For one thing it meant one more meal; and a meal is an important item when one has gone out into the world on his own.

"Anyway," said the young seeker after fortune, whose name was James Ashdown, "I believe I ought to stop at this place and try my luck here. This means something."

He stopped in Hespeler and the omen of the sixpenny bit, if omen it were, proved to have had some policy. He found not only employment, but a chance to learn a trade, and it might perhaps be said that this incident proved the first stepping-stone to a successful career. One of the first men he applied to was a tinsmith named John Zryd who needed an apprentice and, after the latter had looked the lad over carefully, he decided that he would do. So a three-year contract was duly drawn up and signed. James Ashdown was to work for that period of time with the tinsmith and was to learn the trade. In the meantime he was to be entitled to the following:

Board, lodging and laundry free.
Twenty-five dollars the first year.
Thirty dollars the second year.
Forty-five dollars the last year.

Of course, that was a long, long time ago, and it was a fair bargain as such matters went. Certainly it looked good to young Ashdown, who started to work immediately with the enthusiasm that is, after all, the main element that enters into the success of any beginner. The remuneration did not entirely satisfy him, however. Before long he had made the acquaintance of the village blacksmith and had entered into an agreement with that man of girth and brawn to leave the posting of his books to one of nimbler mind. Young Ashdown looked after the books of the local Joe Gargery at nights. The remuneration again was slight—$6 a year for the first two years and $8 for the third—but there was more than money to be gained. There was experience, for one thing. And James Ashdown was intensely ambitious and realized the value of any kind of business training.

### He Turns to the West

As soon as the young tinsmith had learned his trade he decided to seek his fortune in the Western States, for the general idea had spread in Canada that a great boom would follow the close of the War of Secession. But this prosperity was not so pronounced as anticipated, and, after spending some time in Chicago and St. Louis, he finally found his way to the limits of civilization, at what was to be known as Fort Zarah on the plains of Kansas. A block house was being erected to protect settlers from the Indians and the young mechanic from Ontario secured work on this building for some ten months. There he saw the herds of buffalo which were still numerous in the West; he saw the Indian tribesmen when they came to barter at the trading post; above all he saw and liked the boundless prairie country.

In 1868, there was no city on the map named Winnipeg, nor was there a province known as Manitoba. There was a straggling Red River settlement and two stone forts (one, Fort Garry, at the Settlement of the Red and Assiniboine rivers; the other, known as Lower Fort Garry, some twenty miles down the Red) on the river bank that were trading posts of the Hudson's Bay Company. Mr. Ashdown knew nothing of the commercial possibilities of the settlement, and from what he had seen of the frontier life in Kansas, he knew that he would have to put up with many hardships; would, in fact, have a difficult time getting to the vicinity of Fort Garry; but the West had called him, and once more he set his face towards the land of the boundless prairie and the buffalo.

In those days the only entrance to Western Canada was by the way of St. Paul and St. Cloud. There was

a new line of railway northward from St. Paul to St. Cloud, but beyond that little settlement there was nothing but the prairie trail totally unknown to any but the hardy Red River voyageurs. Several years later a line of steamboats was to carry passengers and freight down the Red River, but in June, 1868, when Mr. Ashdown arrived at St. Cloud, he had to make a bargain with the driver of a Red River ox-cart for the carriage of his luggage and provisions. He, himself, had to walk beside the train of ox-carts, stopping when they stopped and starting when they started. At meal time he had to prepare his own food, boiling tea, frying bacon, etc., and was incessantly assailed by clouds of mosquitoes. At night he slept beneath the carts or elsewhere as circumstances allowed. At last, after what was considered a very favorable journey of nineteen days, on the 30th of June, 1868, he reached Fort Garry.

### Arrived with the Grasshoppers

His arrival did not prove to have been auspiciously timed. The year before there had been a visitation of grasshoppers all through that part of the country, but owing to the fact that they had come in the autumn, the crops had been saved. They had left myriads of eggs behind them, however, which in due course hatched out, literally by the million. They had devoured every green thing in the settlement by the time the young tinsmith arrived. In fact, one of the first views he had of the future Western Metropolis was of a body of Hudson's Bay employees shovelling heaps of dead grasshoppers into carts and wheelbarrows. They were piled against the south walls of the fort in deep drifts. The carts were emptied into the Assiniboine River.

Altogether the impression he first gained was not a pleasing one. It was a scattered village, its log buildings sprawling over the prairie and its inhabitants numbering one hundred souls. He soon discovered that the advent of the plague of grasshoppers had rendered food supplies very scarce and prices had gone away up out of sight. The H. C. of L. was operating with a vengeance. Flour was selling for thirty shillings per hundred pounds and oats for horse feed were two dollars a bushel.

There was no reserve of food in the district owing to the fact that the settlers had little or no incentive to raise large crops. The Hudson's Bay Company was the only purchaser of agricultural products, and it frequently restricted its purchases to ten bushels of wheat and half an ox from each settler annually. It was not the policy of the company to encourage agriculture. Its chief interest was in furs and the wilder and more unsettled the country the better for the fur trader. Living under such conditions, therefore, the settlers depended upon freighting, hunting, fishing and the cultivation of the small amount of grain and garden stuff necessary for their own use. When the grasshopper plague came, all they could do was to appeal to the outside world for assistance to save them from famine.

### Cause of the Riel Rebellion

It is one of the ironies of history that the effort of the Dominion Government to help the settlers of the Red River country in their necessity was at least the excuse, if not the cause, of the Riel Rebellion of 1869 and 1870. The Ottawa authorities considered that it would be better to provide the starving settlers with work at good wages than to feed them gratuitously. Accordingly work was provided on the Dawson road under the direction of John Snow, and a survey of the district was instituted by Colonel J. Stoughton-Dennis. Soon Snow was employing men in opening a road to the Red River settlement from the northwest angle of the Lake of the Woods, and Dennis, accompanied by a large party, was busy surveying the whole district on a rectangular plan. Now in the early days French, half-breed and British settlers had squatted along the river banks. Their little farms had a narrow frontage, but extended back from the river for two miles. According to an old custom they also enjoyed hay rights on the wild land for two miles behind their own property. When the Dominion surveyor, therefore, came along and cut across their narrow, ribbon-like farms with his rectangular scheme there was much uneasiness, not to say hostility. The English-speaking settlers were the first to take offence, and their suspicion of the Government

*Officers of the J. H. Ashborn Hardware Co., Limited.*

was passed on to the French and half-breeds. When the latter commenced taking violent measures, the Scotch and English settlers withdrew from the agitation. But the fat was by this time in the fire, and the Red River Rebellion was the result.

In spite of the grasshoppers' visitation with its strain of misery and rebellion, in spite of the fact that in the fall of the year pemmican was selling at sixty cents a pound and flour at eighty cents, young Ashdown decided to stick it out. His people in the East wrote urging him to return home, but he was not the kind that turns back having once set his hand to the plough. He had already gained self-reliance and resolution in the school of hardship, and he was going to give the new country a chance to right itself. For the first summer and the following winter and summer he undertook any honest work that presented itself. For instance some of his jobs were the painting of Deer Lodge, Knox Church and Holy Trinity.

### His Chance Arrives

The local tinsmith was a German named George Moser. Characteristically enough Moser interested himself in every movement of discontent in the country and helped in no small degree to foment trouble among the settlers. He was outspokenly anti-British and quite a bit of a firebrand; so much so in fact that sentiment became aroused against him. Realizing this, he concluded that it might be the best policy for him to get out of the country before the storm broke. It became hinted around that Moser was willing to sell out and James Ashdown saw his opportunity.

The shop of Moser was at the rear of a store at the corner of Main and Portage, where the C.P.R. ticket office now stands. He had a fairly good stock, as things were in those days, and Ashdown knew that he could not swing the deal with his own slim resources. But he had made a friend in Colonel Dennis and to the Colonel he carried his proposition.

"I want to buy out Moser," he said.

"Can you find the funds?" asked the Colonel.

"That," said the young tinsmith, "is what I want to see you about. I want a loan." He explained exactly what he had and what he needed. It was going to take over one thousand dollars to buy out the business—a large sum at that time—but only a part of that would require to be in cash. He believed he could persuade Moser to accept the balance in notes.

The upshot of it was that Colonel Dennis advanced the loan and Moser accepted notes for the balance. Accordingly the business changed hands and so was laid the foundation for what has become one of the largest hardware concerns in the country. Just here it may be said that some months later, Moser rued his bargain and told some of his acquaintances that he hoped Ashdown would not be able to meet his notes when they came due. Once more the young Canadian who had bought out the German was cheered by the loyalty of a friend, a Mr. McBride, who went to him and told him he had heard that Moser wanted to get hold of the business again, but he would stand by Ashdown and would be glad to give him financial assistance if he needed any when the notes matured. While this kind offer was appreciated, there were sufficient funds on hand for the lifting of the notes at maturity without any assistance.

### Trouble With the Half-Breeds Begins

The young merchant soon removed from the undesirable premises which had satisfied Moser. He rented a shop on Lombard street but had hardly become established there before the rebellion fomented by Louis Riel came to a head. Had Hon. Joseph Howe, who visited Fort Garry in the early days of October, 1869, taken the advice of Mr. Ashdown, it is probable that the threatened rebellion would have been averted. Mr. Ashdown earnestly advised the famous Nova Scotian to call a public meeting and, by making a clear statement of the Government's intentions, disarm suspicion and meet all the objections of malcontents in open discussion. But for some reason or other, which Mr. Ashdown says he could never fathom, Howe refused to adopt this sensible plan. After a very short stay he started on his return trip. Somewhere south of the American boundary he met the Hon. William MacDougall, who was on his way to Fort Garry as Lieutenant-Governor elect to take over "The Hudson Bay Territory," including Assiniboia, which was governed by an elective council, presided over by the Governor of the Hudson Bay Territory, and to replace it with a popularly constituted provincial regime. Instead of stopping to hold a conference with MacDougall, Howe passed him with the curt greeting:

"It's a cold day!"

MacDougall and his party of officials deemed it imprudent to press on to Fort Garry, for they had already received word that the French would oppose them by force. The new Governor remained at Pembina, and appointed Colonel Dennis as his military representative to organize the loyalists against the rebels. It is significant that the overt act in the Riel Rebellion occurred on October 21, 1869, a few days after Mr. Howe's mysterious visit had terminated. A detachment of Riel's men erected a large cross at a narrow pass near Stinking River, barricaded the highway, and proceeded to hold up all travellers and all trains of freighting carts, allowing none to pass on their way to the settlement without permits from Riel's officers. Among other things that the rebels confiscated were arms and ammunition being sent into the country for the use of the new Lieutenant-Governor and his party. On November 3, Riel took a still bolder step by seizing Upper Fort Garry. This he accomplished without any resistance, marching through the gate of the fort at the head of 125 armed half-breeds, who forthwith took possession.

### Guarding Provisions

These events created great indignation among the English-speaking people in the little village near the Upper Fort. The men of the place, Mr. Ashdown among them, talked matters over, and Dr. Schultz and others advocated resistance. He urged the others to help him protect the Government pork and provisions stored in his warehouse. As the English settlers were without arms or in fact provisions, Mr. Ashdown said it would be folly to resist Riel in this way. "Let the Government guard its own provisions!" was his advice, and he went back to his store. Schultz's counsels prevailed, however, and he and his followers, some fifty volunteers, mounted guard over the Government stores. Mr. Ashdown relates that he went to bed that night, but not to sleep. Although the Schultz move was contrary to his better judgment, he did not feel that he could stand aloof, so, after an anxious night, he walked over to Schultz's store and lined up with the little band of unarmed citizen guards.

Three days after the English patriots went on guard, they were marched as prisoners through the gate of Fort Garry. As Schultz's store was under the guns of the Fort and as the English volunteers were quickly cut off by the half-breeds from all supplies of food and water, they were obliged to negotiate terms of surrender. When they marched out of the store they supposed by the message received from Riel through a negotiator that they would be given their liberty and allowed to go where they pleased, but they soon found that Riel's promise was worthless and they were in his power.

### In the Hands of Riel

The prisoners were locked up in the upper flat of a two-storey building, ordinarily occupied by the Hudson's Bay Company's staff of accountants and clerks. The five or six rooms in this upper storey were crowded. The ventilation was so bad the prisoners were compelled to break several of the windows to save themselves from being suffocated. They were imprisoned on December 7 and were doomed to stay in durance vile for sixty-nine days. Mr. Ashdown was confined with twenty-one others in a room twelve feet broad by sixteen feet long. And the French half-breeds were no tender jailers. The bill of fare consisted of pemmican and tea. Had it not been

for the kindness of women in the village and the good offices of Mr. Joseph Crowson, Mr. Ashdown's father-in-law, who on acount of lameness was suffered to go at large by Riel, and who carried provisions to the Fort, the prisoners would almost have starved. As it was many of the good things intended for them were snatched out of Crowson's baskets by the half-breed bandits.

Mr. Ashdown has very vivid memories of that weary imprisonment and many are the interesting stories that he has to tell concerning the attempts of his companions to escape and the general conduct of the guards. He formed a very unfavorable impression of Louis Riel. He says that Riel fancied himself a little Napoleon, but he was more like a strutting peacock. Nor was he really brave. When he heard that a party of English settlers were coming down from the Portage plains to attack him and his force and liberate the prisoners, he came and stood outside the door of the room where Mr. Ashdown was confined and in a shaky voice said:

"Bad men are coming. You must be quiet. You must not make any disturbance."

Riel, however, had a wonderful influence over the French half-breeds and if he had not made the mistake of putting Thomas Scott to death it is probable that he would have been pardoned by the Government for his share in the rebellion and would have been an important figure in the Western country.

Speaking of Riel's reason for singling out Scott for the supreme penalty, Mr. Ashdown has expressed the opinion that it was not because the genial young Irishman had been obstreperous or objectionable during his imprisonment, but because he was a fine figure of a man. The Indian always picks out a big man as the natural leader of any group, hence the half-breed Riel obeyed the redskin instinct in selecting Scott as his victim. Scott was well liked by Mr. Ashdown and the other prisoners.

### His Business Shows Growth

It is not surprising, with all this trouble going on, that the first year that Mr. Ashdown ran his business was not very prosperous. The coming of soldiers to the settlement at the close of the rebellion gave quite a fillip to trade, however. In spite of the Riel regime, he had been able to import in the preceding June an order of goods from wholesale houses in St. Paul. The goods had come through by ox train. Encouraged by the increasing volume of business, it was in this same eventful month that Mr. Ashdown decided it would not be long until he would need much larger premises. So on November 4, 1870, he purchased the lot on which the Main street retail establishment of the J. H. Ashdown Hardware Company now stands, for the sum of forty pounds sterling.

The following year was an important one in the history of this enterprising merchant, for his business had already yielded him such good returns that he was able to pay for the erection of a wooden building, twenty by sixty, two storeys high, on the lot which he had bought the previous year. Mr. Ashdown did some of the work on this building himself and a most interesting memory that he has in connection with his first permanent place of business is that the lumber was brought down the Red River, on the steamboat "Selkirk," by no less a person than J. J. Hill, who was afterwards to achieve fame as the railroad king of the North-Western States. This was the first trip of the steamboat down the Red River. Perhaps this helps to account for the high price of the lumber. At any rate Mr. Ashdown had to pay seventy dollars per thousand for the siding used in the building and one hundred dollars per thousand for the flooring.

### The Growth of Winnipeg

Time passed; and the business of James H. Ashdown grew; and a city was forming around what had been the scattered settlement of Fort Garry. It became a brisk business centre. In due course it became necessary to find a new name for the new metropolis and quite a fight developed. A party of the most influential citizens wanted the name "Winnipeg." Others wanted "Selkirk," "Garry" or "Assiniboine." A fight arose also on the question of incorporation as a city. There was distinct opposition on this score. When the Legislature assembled, the "Winnipeg" party collected its forces, once more resolved to push the question to the limit. It is significant of the confidence that his fellow-citizens had already come to repose in Mr. Ashdown that they selected him as chairman of the committee to fight out the question with the law-makers. They knew that they could depend upon him as a moderate but determined and resourceful spokesman. Mr. Ashdown relates that one of the strongest forces in opposition to the bill was the manager of the Hudson's Bay Company. When the chairman of the citizen's committee got down to actual work at the Legislature, the Hudson's Bay Manager argued the question stubbornly. First he wanted the committee to consent to have the municipality incorporated as a village. When he saw that they were obdurate, he said he would consent to have Winnipeg named in the bill as a town. But Mr. Ashdown would not give way an inch. He had big ideas about Winnipeg. "It is going to be a city, a metropolis, and we might as well start out right in the first place, and have it incorporated as a city!" No opposition could break down the resolution of Mr. Ashdown and his committee, and as their powers of persuasion were effective, and strong public feeling supported them, the bill was passed and the royal assent given. On November 3, 1873, the busy little village on the banks of the Red River, with a population of only 1,664, became at a bound the city of Winnipeg.

### Ashdown Fights the Boss

Winnipeg immediately clinched its claim to being a city by evolving a system of boss rule. One of the leaders of the crowd which had opposed the incorporation decided to organize a slate that would carry the first municipal election and so leave control in reactionary hands. His supporters made the boast openly that they would control the half-breed vote and so sweep the nominees of the citizens' party out of sight.

Mr. Ashdown was one of those representing the people's interests, and he put up an active campaign. On election day, however, the big chief of the reactionary ring went from poll to poll with sleighs full of half-breeds. Mr. Ashdown relates that the sleighs were so crowded that the men did not have room to sit down. And these unsavory electors voted at every poll without regard to residence or anything else. The political boss who was directing their unscrupulous activities met Mr. Ashdown at the poll where the Union Bank building now stands at the corner of William Avenue and Main Street.

"I'm sorry I can't support you!" he said with a broad smile.

"All right," replied the indomitable hardware merchant, "I'll get there in spite of you!"

And he did. But he was the only representative of the citizens' party that was elected. He continued to sit on the Council for several years and had much to do with the framing of early by-laws and the organization of the public utilities of the city.

### The Growth of a Business

This is the story of the very remarkable personal career of James H. Ashdown, and so nothing can be said in detail as to the growth of his business. During all the years that he was devoting himself so zealously to the welfare of the community, he was never for one moment losing sight of the business he had established. The years 1875 to 1885 were years of remarkable development. A handsome brick building replaced the original frame headquarters and at various times additions had to be made and the volume of business was always growing. In 1889, came the most radical advance in the establishment of a branch at Calgary. Other branches were established as the West grew and the prairies became dotted with live, growing towns.

Space does not permit of any detailed account of Mr. Ashdown's public career, for his record is a long one indeed. He was president of the Board of Trade and fought vigorously and successfully against high freight

# Carrying a Good Stock

## "If You Buy Right You Can Sell Right," Says Cannot Get Too Much Display"—

Based on an interview with M. Platt, of Platt

PLATT BROS., hardware merchants at 1356 St. Clair avenue, have learned the value of display. They have found that good store display and attractive window dressing have a definite value in dollars and cents and that they are a most effective means of speeding turnover. They have learned this lesson so thoroughly that this summer they erected a new store in order to accommodate their increasing trade and they built it just twice as large as their old one and along lines that would make for maximum display value.

### Cannot Get Too Much

"My idea is that a merchant simply cannot display too much merchandise," said Mr. M. Platt to HARDWARE AND METAL. "Our entire new store is designed with the idea of keeping the goods we carry constantly before the eyes of the buying public. We have learned from experience that this is a most satisfactory way of increasing our business."

"Another point we emphasize," he said, "is that we have a complete stock. We want our store to be known far and wide as the hardware store that has anything that should be found in a hardware store. Everyday we have people come into our store and ask if we have this or if we have that. Only a few minutes ago a woman came in and said she had tried in at least a dozen stores to get some polish for cleaning brass. We were able to supply her, and there is no doubt in the world that the next time that woman wants anything in the hardware line she is going to pass other hardware stores nearer to her home and come to us, because she knows we have the goods, that our goods are of good quality, and that our prices are right.

### An Important Matter

"That is an important matter. If a merchant buys right he can sell right, and it does not take people long to find out about this. I do not mean that we handle cheap stuff. We want to give people the best possible value for their money and our customers realize that and appreciate our store policy. As far as cheap goods are concerned, we want nothing to do with them. They are a poor advertisement for any store. They are dear in the long run, and if we sold stuff that did not work well, or give satisfaction, people would soon say, "I guess we won't buy any more at Platt Bros., see what they sold me. It won't work and it isn't any good."

### Satisfaction Counts

"Satisfaction counts every time. Every time we satisfy a customer it means that he is going to come back again, and not only that, but that he is going to talk about us to his friends, and that he is going to bring or send them into our store for goods sooner or later. People know every time when they are well and fairly treated by a merchant. We find people are willing to pay a fair price every time for an article that will give them satisfaction. If we had an article that we could recommend unreservedly at $2 and another article good, but not, perhaps, quite as good, for $1.75, the majority of people would gladly pay the $2 and take the article which we told them was unquestioned. There has been a noticeable tendency on the part of the buying public to demand quality goods. When they are paying higher prices than used to prevail they realize that cheap articles are dear and that there is no satisfaction in buying them.

### Likes the Workingman

Platt Bros.' store is located in a district which reaches one of the wealthiest residential sections in Toronto, and also sections in which large numbers of the better class of workingmen live. They have a stock that will meet the demands of all, but Mr. Platt says he likes to sell to the workingman.

"I like the workingman to deal with, because, invariably, he knows what he wants," said Mr. Platt. "If he comes down to the store for hinges, he will tell me right off the bat that he wants a six-inch strap hinge, or that he wants

# Will Bring Customers Back

## M. Platt, of Platt Bros., Toronto. "You Simply Cash Plan is Working Out Well

ros., by C. E. Parsons, of Hardware and Metal

a certain kind of a saw or pair of calipers, or whatever it is. If a wealthy individual comes in, all he knows is that he wants hinges or a saw, or something else. There is nothing definite in his mind about what kind he wants. He does not know and it takes a lot of questioning about the work, or whatever it is, before we can decide what is best fitted for it. In this way a lot of time is lost, and time means money. I can make half a dozen sales to workingmen while I am finding out what a man or woman of the other sort wants.

### Works on Cash Basis

Platt Bros. work as nearly as possible on a cash basis. They have to deal with a number of contractors in the course of their business and to these men there are regular periods for settlement, but all their general trade over the counter is strictly on a cash basis.

"I would sooner have the goods on my shelf any time," said Mr. Platt, "than hand them out to somebody who might pay me in six months, or who might never pay at all. We take no chances on people we don't know all about. The cash plan makes for better business all round. We buy that way and we can buy better and sell better. Our customers get the benefits and we have the money we need to carry on our business and replenish our stocks. If we granted credit we would have a whole lot of unnecessary bookkeeping to look after and a lot of chasing up and collecting to do, and we would have losses and conditions that would be much less satisfactory than they are on the cash plan."

### Street Car Advertising

Platt Bros.' store is located in a section which is reached, not by the regular cars, but by the Toronto civic railway. Everyone who goes into the district, unless he walks in or rides in in an automobile, has to go on the civic street cars. Hundreds of thousands of people pass in and out of the section each month. In order to reach these people Platt Bros. regularly use street car advertising.

"The cards in the street cars, our window displays and our store displays are the only methods we have of reaching the people," said Mr. Platt. "We are more than satisfied with the results we obtain from each one of these sources. We change our window displays each week and we always put in the prices of whatever we are showing. We change the cards in the street cars each week and we are constantly changing the goods around in our store.

### Use Display Tables

"We find we get splendid results from display tables and we use several of them and keep them constantly changed around and placed in different parts of the store. People like to look them over and the goods sell themselves, thus saving our salesmen's time.

As far as window displays are concerned, I believe that our two windows are without any question the best ads. we have. They sell goods and they sell them continually, and that is all we can expect of them. We always use price cards, as I believe that is one of the first principles of good window display, and also of good business. The very first thing anybody wants to know if he is interested in what is shown is how much it is going to cost and we aim to answer that question right then and there. People get it fixed in their minds and they don't come in and ask us to sell cheaper. Very often they are surprised to find out that the goods are a good deal lower in price than they expected they would be. If it had not been for the price card they would not have bought, because they would have gone away with the idea that whatever they wanted was too expensive.

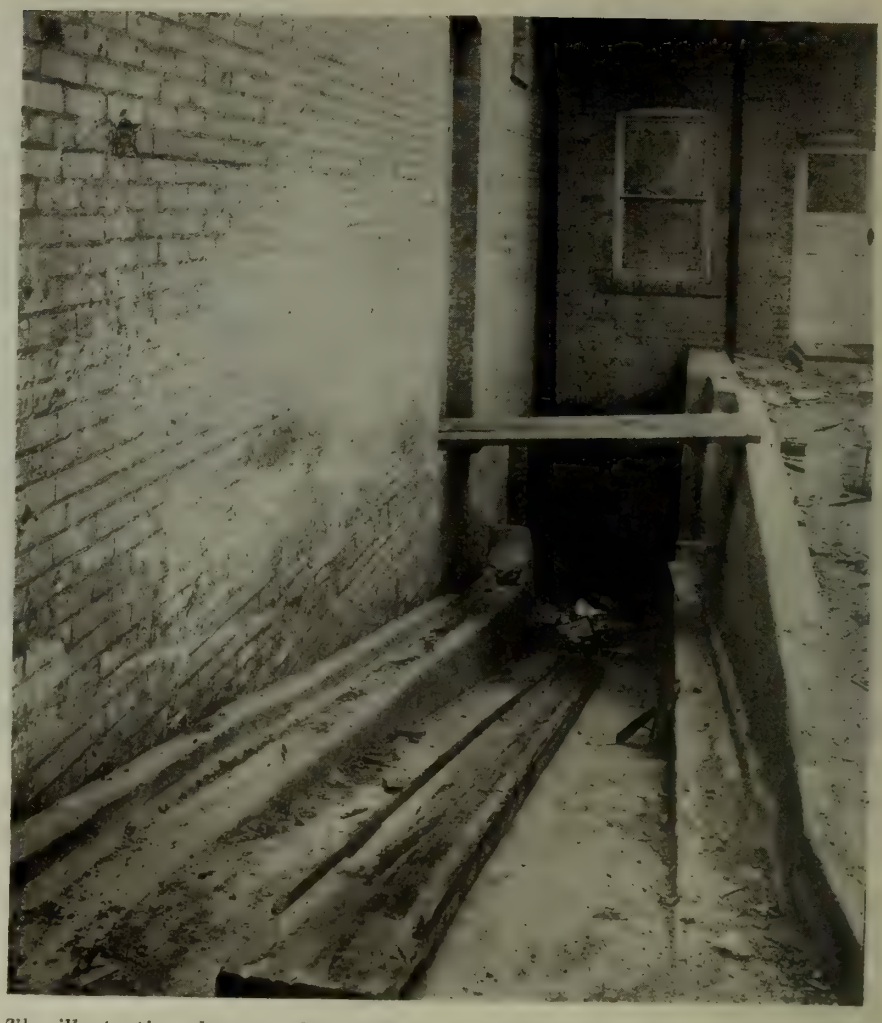
### Seasonable Displays

"We believe that it is most important, not only in our street car ads., but in our store and window displays, always to keep seasonable lines to the fore. Just now, for instance, with the cold weather coming on, people are interested in heating equipment. We have a window display of stoves and our cards

in the street cars show four sizes of heaters and the reading matter tells about them and extends an invitation to the prospective buyers to come into our store and see the goods and find out more about them. People, especially women, like to have a friendly invitation to a store, and we aim to treat them right if they come, whether we make a sale or not. We try to be of real service to them in helping them select goods that will be of real service to them and give them good satisfaction and value for their money. It pays to do this. Even if they do not buy at the time they get a good impression of our store and our service, and they will remember it and tell their friends about us. We can get no better advertisement than that.

### Quick Deliveries

Included in the service that Platt Bros. aim to give is quick delivery. They have an auto delivery, and Mr. Platt says it is giving the utmost satisfaction, not only to their customers, but to the firm.



"We can get merchandise to people quickly by our car," he said, "and they like when they ask to have a thing sent promptly to get it. We find that they appreciate this and come back. From our own standpoint it is economical and saves a lot of time and trouble. There is no horse to feed or clean and no feed to buy or stables to clean, or any of the other things necessitated by the keeping of horses. From a financial standpoint we figure that by having an auto delivery we save one man's wages per week."

### Saves Much Time

The district in which Platt Bros.' store is located is a residential section that has grown with great rapidity within the last few years and is still growing. In their business with contractors they handle considerable quantities of glass for windows for dwellings and do the glazing for many people who are building. During the past year they have sold over $25,000 worth of glass alone. In order to handle this business expeditiously and get the glazed windows or supplies of glass to the point of delivery quickly, they have constructed a cement runway at the rear of their store to the basement, where all the glass work is handled. As will be seen from the illustration, a concrete runway was built and the car is backed down to the basement door and the glass loaded in. While the grade is fairly steep, it is not too steep for the car to climb with a big load.

### Are Kept Busy

In the glass department three men are kept busy all the year round on glazing. The glass is kept in a specially constructed rack and a complete stock is carried of all sizes usually required. Each is in its own section and the size is painted below in large figures, so that the workmen can find it quickly.

*The illustration shows a plan worked out by Platt Bros. to save time in loading glass. Their glass stock is carried in the basement and the auto simply backs down the runway, is loaded and is on its way with no time lost in carrying the glass up stairs.*

"We use wheels for cutting," said Mr. Platt. "The trouble with diamonds is that if two men use a diamond it is done and no more use. We do all our work with wheels, and this season we have handled more than five carloads of glass. From our standpoint there is the most money in the glasswork on a six-roomed house, and it is easier to handle.

### No Early Closing

Platt Bros. have a system of hours that is all their own. The store is open until nine o'clock every evening except Saturdays, when it is open until eleven. The doors, however, are closed every afternoon the entire year round.

"We have been thinking of closing at six o'clock in the evening, and we probably will," said Mr. Platt. "We are only living once and might as well get a little fun out of life."

### Sells Auto Accessories

The firm's trade in auto accessories has grown steadily. As will be seen from the illustration, a large wall case close to the entrance of the store on the right as one enters, contains a partial display of the stock carried. Other lines are shown at another point in the store and window displays are put in occasionally.

"It is a nice business," said Mr. Platt, "and one that has grown steadily. We started in a small way and have reached the point where we have to carry a complete stock to meet the demands of car owners, of whom there a large number in this vicinity.

### The Paint Section

As will be seen from the illustration, the paint section occupies a prominent place in the store, being located well up to the front and on the right. Mr. Platt states that his paint sales show an increase this season of over fifty per cent. and that he has had a splendid year.

As might be expected in a residential section, he has had unusually good sales of garden tools, seeds and supplies. Also of poultry netting.

"Since the war," said Mr. Platt, "people are more thrifty. The high prices have got them into gardening and keeping chickens and our business in these supplies has increased greatly.

On an average, Mr. Platt says, his sales of roofing run about two carloads a year. Seasonable windows displays

(Continued on page 96)

### *REMARKABLE RECORD*

THE entire trade will extend congratulations and best wishes to J. H. Ashdown on the semi-centenary of the J. H. Ashdown Hardware Co., Limited. The story as told elsewhere in this issue of the great accomplishments of Mr. Ashdown will be read and re-read by men in all branches of the trade. The retail salesmen in the stores will also find an abundance of food for thought in the story of the development of the Ashdown business.

To have exceeded by six years man's allotted span of three-score years and ten, and in addition to presiding over a huge business continue to take an active interest in public affairs, is a most unusual record, but such is the record of J. H. Ashdown. HARDWARE AND METAL joins in extending congratulations and best wishes to Mr. Ashdown.

### *MAKING NEW RECORDS*

"PERMITS Continue to Soar," "Building Figures Break All Records," Hundreds of New Houses," headings like these are as common in the newspapers these days as dispatches about strikes, and there never was a time when strike stories were so numerous. It has unquestionably, though, been a wonderful building year, and there is every indication that the activity will increase right through the fall and break all past records in 1920. In spite of all the houses that have been built this year, it is practically impossible to obtain a house to rent in many places. In the larger cities conditions were never worse. Rents are higher than at any time in the history of the Dominion, and not only that, but there is an acute scarcity of houses to rent. A situation of this kind presents an opportunity to men with money to invest to make good returns and help their community grow by building dwellings. This is being done in many cases and among those building are several hardware merchants. All over the country plans are being prepared for new buildings. Some of this work will start this fall. Hundreds of thousands of dollars' worth will proceed in the spring. All this activity means business for the hardware merchant. It means business in two ways. The hardware merchants can supply not only the supplies for erecting the buildings, but also the hardware for the people who are going to live in them. Business has been exceptionally good this season and the greatest trouble most hardware merchants have had is to get enough goods to fill their orders.

### *DOING GOOD WORK*

HON. DR. CODY, Minister of Education for Ontario, is making good on the promises he made some time ago to revise the curricula in the high schools and continuation schools. The edict has gone forth that home work is to be cut down, that collection of insects and plants is to be discontinued and that a change is to be made in the methods of handling some of the other subjects. Business men as a unit are behind Hon. Dr. Cody in the task he has undertaken. For a long time it has been apparent that there was something radically wrong with educational matters in Ontario. Boys and girls were being loaded down with studies that had little practical value and would be of little or no help to them when they went out to make their own way in the world. From the standpoint of business men, the instruction the boys and girls were receiving was not such as to fit them to enter commercial life. Ontario's school system has been costing large sums of money annually. There was no complaint about this, as no money expended for education of the right kind is ever wasted. Not long after Hon. Dr. Cody took over the duties of Minister of Education, he promised certain changes with a view of making the instruction more practical. These are now being made and in taking action, Hon. Dr. Cody will have warm support from business men.

# EVENTS IN THE TRADE

## Fire Loss

T. E. Bissell & Co., Ltd., Ingersoll, Ont., manufacturers of agricultural implements, sustained a loss by fire.

Beardmore & Co., Toronto, wholesale leather, sustained a loss by fire.

Fire which was caused by overheated tanks did damage amounting to $5,000 at the factory of the Brantford Roofing Company, Brantford, Ont.

The Belleville Sash and Door Co., of Belleville, Ont., sustained a fire loss.

The plant of the Union Foundry and Machine Works, Ltd., at West St. John, N.B., was damaged by fire.

## Obituary

The death occurred at Hamilton, Ont., of Robert Buskard, carriage maker.

The death occurred in St. Thomas, Ont., on Monday afternoon of Mrs. Hazel McIntyre, wife of W. G. McIntyre, manager for South Western Ontario of the Sherwin-Williams Company of Canada, Limited. She was in her 27th year. The funeral was held on Wednesday afternoon and among those who attended was C. A. Thomas, manager of the Toronto branch of the Sherwin-Williams Company.

The death occurred at his home in Toronto following a brief illness with bronchial pneumonia of Elias Warren Chard. Mr. Chard was 68 years old and came to Canada as a young man.

He was employed with a Toronto hardware firm for a number of years, and later went into business for himself at 324 College street, Toronto, where, at his death, he had been in business for 38 years. He was a member of Georgian Masonic Lodge, also of the Royal Dominion Lodge of Oddfellows. Besides his wife, he is survived by one brother, Arthur Chard.

## Trade Notes

The St. Lambert Hardware Co., of St. Lambert, Que., has been dissolved.

The Nellis Hardware Co., of Vermilion, Alberta, is moving into new and larger premises.

Merveilleuse, manufacturers of stove polish, has been registered at Montreal by Gabriel Aubry.

The National Varnish Company of Canada has been registered at Montreal by Wm. A. Lowry.

The Brantford Oven and Rack Co., Ltd., Brantford, Ont., is building a $10,000 addition to its plant.

Partnership in the Robertson-Stewart Hardware Co. at Grande Prairie, Alberta, has been dissolved.

The head office of the Ross Can Company, Limited, has been moved from Toronto to Bowmanville, Ont.

Scarfe and Co., manufacturers of varnish at Brantford, Ont., have commenced work on an extension to their factory.

The Wentworth Mfg. Co., Ltd., Hamilton, Ont., manufacturers of stamped brass goods, has been taken over by the E. T. Wright Co., Ltd. of Hamilton.

## Personals

George L. Morrow, hardware merchant at Edgerton, Alta., was a recent visitor in Winnipeg on business.

John L. Huston has been appointed salesman by the Miller Lock Company of Philadelphia to cover New England, Ontario, Quebec and the Maritime Provinces.

John L. Huston has been appointed salesman by the Miller Lock Company of Philadelphia, to cover New England, Ontario, Quebec, and the Maritime Provinces.

## Montreal News

C. R. Burkhart, Moore Pushpin Co. representative, Philadelphia, called on Montreal jobbers.

A. W. Poole, of McArthur, Irwin, Ltd., Montreal, was a business visitor this week to Toronto.

H. A. Lawson, of the Bissell Carpet Sweeper Co., Ltd., was in Montreal on

W. McDonald, general hardware merchant, North Bay, Ont., was a caller at the office of HARDWARE AND METAL on Monday of this week. Mr. Cassidy intended making calls at U. S. points before his return.

## News From St. John

Harry C. Chase, of the staff of Emerson & Fisher, Ltd., St. John, N.B., accompanied by his bride, returned to-day after a pleasant honeymoon trip to Montreal and New York. His associates on the staff of the company presented

him with a handsome leather upholstered chair. He received a substantial check from the firm.

Two warehouses of the Wallace Machinery Works, Sussex, N.B., were destroyed by fire this week with a loss of about $25,000. Much of the material in the warehouses was destroyed, including eight threshing machines, wood-cutters and some valuable patterns.

Capt. William Burrill has returned after a lengthy stay overseas. Before leaving he was with the Canadian Fairbanks-Morse Co., Ltd., St. John, N.B. He left with the 26th Battalion in the spring of 1915 as paymaster.

W. S. Fisher, of Emerson & Fisher, Ltd., hardware merchants, Germain street, St. John, N.B., has returned after the recent Industrial Conference in Ottawa. Later he visited Quebec. Mr. Fisher expressed himself as very well satisfied with the success of the conference, saying that he expected much good would come of it, both to employer and employee, as each side had met and discussed the problems of importance to each harmoniously and fully.

H. J. Ramshaw, manager of the Garlock Packing Co., of Hamilton, Ont., was in St. John this week and while here established a branch at 149 Prince William street.

### IS GOING TO MONTREAL

John J. Coleman, who, for the past five years, has been resident manager of the Toronto branch of Thomas Firth & Sons, Limited, Sheffield, England, has been appointed Canadian manager. He will have his headquarters at Montreal and succeeds John A. Sherwood, who is retiring. Arthur E. Steer has been appointed resident manager of the Toronto branch. Mr. Coleman, who has been spending some weeks in Sheffield, England, is expected to arrive in Canada this week.

### TO LOCATE AT SASKATOON

According to press reports from Regina, the North Star Oil & Refining Co., Ltd., successors to the Continental Oil Co., Ltd., will make Saskatoon their Western headquarters. Messrs. G. M. Clayton and J. McCormick, two directors of the company, have, it is stated, selected a site and building will be commenced shortly.

### PLAN WESTERN BRANCH

Chas. M. Adams, of Toronto, president of the Adams Harness Manufacturing Co., Ltd., and F. W. Adams, of Winnipeg, Western manager of the company, are in Saskatoon.

F. W. Adams stated that the company would proceed with the construction of a branch warehouse on First Avenue as soon as conditions become more settled and building material more easily obtainable.

### MONTREAL HARDWAREMAN WEDS

Robert L. Hornidge, manager of the auto equipment department of Lewis Bros., Ltd., Montreal, will be married in Ottawa on Monday, Oct. 6, to Miss Margaret Hamilton of that city. "Tom" Houghton, assistant sales manager of Lewis Bros., Ltd., will assist in the pleasing capacity of groomsman. Mr. and Mrs. Hornidge will reside in Montreal.

### D J. LADD & CO. PURCHASES O-RIB-O BUILDING PAPER BUSINESS

D. J. Ladd, formerly secretary-treasurer and assistant manager of the O-Rib-O Manufacturing Co., Winnipeg, has by mutual consent severed his connection with that company, purchasing the company's complete stock of building paper, roofing and felts, etc., and is now in business under the name of D. J. Ladd & Co., 502 Trust and Loan Building, Winnipeg. Mr. Ladd represents in Western Canada the Alex. McArthur Co., Ltd., of Montreal. The purchase by Mr. Ladd of this department of the O-Rib-O Company business also includes storage warehouse and track facilities.

### PARKHILL BEDDING, LTD., NEW FIRM IN WINNIPEG

Parkhill Bedding, Limited, is a new company formed in Winnipeg, with J. H. Parkhill, for fourteen years president and general manager of the Alaska Bedding Co., as president and manager. A. B. Jones, formerly sales representative of the Alaska Bedding Co., is vice-president and sales manager of the new company. Reg. C. Young, also formerly of the Alaska Bedding Co., is director and superintendent of Parkhill Bedding, Ltd. The new company hopes to alleviate, to some extent, the conditions existing in the bedding business, wherein it is difficult for the trade to get prompt delivery owing to the limited supply of bedding available. Factory and office buildings of the new company are being erected at Notre Dame avenue and Erin street, Winnipeg. The factory is of modern construction, with good sanitary and lighting facilities. The machinery equipment will, it is expected, be in operation by November 1.

### MUST KEEP REGULATIONS

It is stated that strict enforcement of the regulations made by the Ontario Hydro Commission regarding electrical installations is to be made. In a case which was heard in court at Stayner, a Toronto electrical firm, which had a contract for wiring a mill, was fined $50 for not having obtained a permit for the installation and a further $400 for refusing to correct defects in their work when ordered to do so by the Hydro inspectors.

McArthur-Irwin, Limited, Montreal, has been granted permission to increase its capital from $360.000 to $1,000.000.

Canadian Edison Appliance Company, Limited, capital $1.000.000, head office Toronto, plans to manufacture and deal in electrical specialties and heating apparatus.

### MR. W. S. FALLIS BEREAVED

The friends of Mr. W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., Montreal, will regret to learn of his bereavement in the loss of his mother, whose death occurred at Palmerston, Ontario. The late Mrs. Fallis had been the victim of a stroke a month ago and while she rallied for a brief time, her advanced years prevented a permanent recovery. The strong bond that had so long existed between Mr. Fallis and his mother will make this separation the keener.

### BRANCHES OF BRITISH STEEL PLANTS FOR WINNIPEG

Arthur J. Holling, steel manufacturer of Sheffield, England, who arrived in Winnipeg recently, states that branches of British steel manufacturing concerns will be established in Winnipeg very shortly. Mr. Holling expects to found the new enterprise in Winnipeg. He will visit the Pacific coast before returning to England, and expects to return to Winnipeg very shortly after completing arrangements for the commercial venture he plans.

### SPORTING GOODS SALES BRISK

Dealers in sporting goods throughout the province report a busy season in connection with the opening of the big game shooting in these parts. The number of licenses issued for shooting game has been larger than for many years, due, it is thought, to the many returned soldiers going in for this sport. Sales of sporting goods have been particularly large and interest has been helped along by prominent displays of such goods in the merchants' windows.

### MAKERS OF EXPLOSIVES

C. W. Stockford, Atwood, Ont.—Will you please advise us regarding concerns manufacturing explosives for blowing up stumps?

These may be obtained from the Canadian Explosives Limited, Dominion Bank Building, Toronto, and from E. I. Dupont de Nemours, 63 Bay St., Toronto.—Editor.

### FAWN LAUNDRY STOVE

R. H. Williams & Sons, Limited, Regina.—We would appreciate very much any information as to the makers of the Fawn Laundry Stove, No. 8. We are in need of repairs for this stove.

The Fawn stoves, No. 8 and No. 9, were manufactured many years ago by the McClary Mfg. Co., of London, Ont. They advise that patterns for these stoves have been destroyed and that therefore it is impossible to furnish parts for repairs.—Editor.

# THE CLERKS DEPARTMENT

## How Long Since You Have Made Any Study of Your Job?

### One Trouble, Says Percy H. Johnston, is That Men Cease to Apply Themselves Earnestly and Systematically to Study and Become Absolute Masters of Their Work.

"ONE trouble is that the majority of men—except those in certain professions, such as doctors, electric engineers, and teachers—cease to apply themselves earnestly, persistently and systematically to study. They just frivol away their time. They may read, but reading and studying are two different things. One requires no real mental effort, the other does. Let a man become absolute master of his work, no matter what it is; let him know more about it, the history of it, the evolution of it, the why and wherefore of it, the basic principles of it, let him know his job from A to Z.

"There is no excuse for any healthy person remaining half-educated, for being content to be anything short of absolute master of his work. Why, the knowledge of all the ages is contained in a few rows of books. Even one hour's hard study a day will raise a man above the crowd. One's library can be a wonderful laboratory."

This is how Percy H. Johnston views a business career. This young man who at 38 is senior vice-president of the Chemical National Bank of New York, came off the farm and made his way by hard work. In the American Magazine his story is told as follows by B. C. Forbes:

#### Field Open to All

Any man can attain success if he is willing to pay the price—good habits, good health, much burning of midnight oil in study (not mere reading), the investment of an endless amount of genuine friendship, constant alertness to the little opportunities that lie at everyone's hand if the mind and eye have been trained to see them, and, of course, ceaseless industry, without which wishes and ambition are worthless."

So declares a man, still under forty, who already has travelled from poverty and obscurity to power and place. He started his journey from a remote townlet in Kentucky, where, as a boy of ten, he earned three dollars a month as a street lamp lighter. Later he became a bank "rat," and rose, by methods within reach of any of us, until he was the best-posted and most widely known youth in the whole county.

By going about things as this Southern lad went about them, success is not only possible, it is almost inevitable. He started with no special endowments, no money, no pull. "The only 'pull' worth having," he declares emphatically, "is the 'pull' you yourself earn by your own merits."

#### Always Ambitious

Percy H. Johnston's ambition was first aroused, when he was only a small boy, by the death of his father. The little chap felt that it was up to him to help provide for his mother and sister, who were left in very moderate circumstances. So he went to the local gas works—Lebanon, Kentucky, his birthplace, had about five thousand inhabitants—and arranged to light all the street lamps in the neighborhood every night.

His three-dollar-a-month pay was eked out by milking neighbors' cows, at fifty cents weekly a head. He was so small a tot that the cows often kicked him off the milk stool; but he displayed his ingenuity by strapping them up in a way that rendered the kickers powerless.

When only twelve, he made up his mind definitely that he would by and by become a banker.

#### Equipped Himself

"It did not take much brains to realize even then," he says now, "that if I hoped to become a successful banker the thing for me to do, the only thing for me to do, was to begin right away to equip myself for banking work. Long before I left school I was steeped in banking literature and banking facts. I could recite from memory the names of the fifty largest banks in America; I kept tabs on how their deposits were shaping; I knew who was at the head of each institution; I vowed that one day I would be president of one of them. Julius Caesar had no vaster ambition than I had! Nor was he more willing to battle to attain them than I was.

#### Figured It Out

"I had it all figured out just how I would proceed. For example, I made up my mind that, as soon as I had enough practical banking experience to qualify, I would become a Federal national bank examiner, so as to get thorough insight into how different banks were run, and thus learn the secrets of success and the causes of failures. I took to heart one memorable line in my school copybook, "Knowledge is power.' And I began in a modest way to get together a library on banking. It has grown, by the way, to be one of the very largest in America."

#### Made Good Suggestion

The local bank was glad to engage so earnest, diligent and ambitious a boy when he graduated from high school in 1897, at the age of sixteen. His pay started at ten dollars a month. But it did not stay long at that figure. Before the average office boy would have learned the difference between a check and a draft, Percy Johnstone astounded his superiors by suggesting to them that the bank ought to get closer to the people of the county; that it ought to have more information about conditions in the surrounding territory; that it ought to know which farmers were industrious, capable and thriving, and which ones were going down-hill; which ones had good farms, and which had poor ones. He volunteered to spend his whole vacation (and as much more time as might be necessary) doing this kind of work. The idea was somewhat revolutionary, but the good-natured officers didn't want to dampen his ardor.

#### Made Many Friends

Hitching a horse to a buggy, off he set as a representative of the Marion National Bank of Lebanon. He had a ready smile, a pleasing personality, and remarkable understanding of human nature. For a whole month he never spent a night except under a farmer's roof. He visited every farm in one-half of the county, and endeavored to make friends all along his route.

He could tell the farmers a lot about crop conditions elsewhere and about markets; he could discuss soil and cattle and horses intelligently; he could regale them with Lebanon gossip; and, equally important, he was able to get on a first-name basis with the farmers' sons and the younger farmers.

#### Had Valuable Facts

When he returned, he filed a greater and more valuable mass of detailed, first-hand information than the bank had ever before dreamed of acquiring. He deposited a record of the size and character of each farm visited, the condition of the dwelling and farm buildings, intimate facts about the farmer and his family and their connections and their interests, the number of horses, mules, cattle, sheep and hogs owned, the prices realized for live stock and products, whether the farmer had a bank account and, if so, where.

"As a mere boy I grasped the importance of saving money," says Mr. Johnston. "And when I began to read about banking and business I realized that they were all based on capital; that capital was needed to make a start in any line; that even a bootblack had to have enough money to buy a set of brushes and a supply of blacking. Therefore I was eager to do any little job that meant a few dollars.

#### Made Easy Money

In mixing among the people in and out of town he heard many complaints from those who did work for the county that their bills were paid only once a year, in December. Many contractors, engineers, carpenters, farmers, masons, and others, needed their money promptly. These county claims, as they were called, usually were for rather small amounts, and the bank didn't care to discount them. Young Johnston agreed to buy up these claims on an eight per cent. basis, and then had bundles of them discounted by the bank at six per cent. Very soon almost all the county claims were brought to him, and he not only made his two per cent. profit, but the sellers felt that he was helping them out, and were duly grateful.

#### Took Ten Per Cent.

Again, whenever witnesses for the commonwealth appeared at court they were handed a claim for three dollars or five dollars or some other small sum, payable by the state treasurer. Johnston had a man at the courthouse to tell each witness that if he wanted to get his money right away and without any trouble he could take the claim over to the Marion Bank, and Johnston would take it at ten per

cent. discount. He acquired practically a monopoly of this lucrative business.

"You are not likely to get anywhere in particular if you don't know where you want to go," says Mr. Johnston. "I had very early determined to become a national bank examiner as a stepping-stone to something higher. So when twenty-six I went to Washington and took the examination. I was so saturated with both the theory and practice of banking—I had read and studied every bank act that was ever printed in the English language—that I passed without difficulty."

**Worked Long Hours**

The reason for his rapid rise? For one thing, he worked every day three or four hours more than examiners usually choose to work. His foundational knowledge was most exhaustive; he had mastered all banking laws, he was versed in banking principles and theories as evolved abroad as well as at home, and his practical training had been excellent. This enabled him to devise new and better standards for conducting bank examinations.

Discovering that different examiners had different methods and symptoms, and that no standardization had ever been evolved, he painstakingly built up a model system which was available for universal use throughout the nation. This at once improved the efficacy of examiners and gave the controller's department systematic records to go by in supervising and correcting faults unearthed in any part of the country.

**Does Them Better**

"Don't accept things as they are, if they can be improved," is a morsel of Johnstonian home-made philosophy. In each position he filled he exercised his brains, as well as his hands and legs, to effect better results than had ever been attained before. He never asked, when undertaking a piece of work, "How is it done?" He always asked himself, "What is the best way it can be done?" Then he applied himself diligently every day and almost every night—he is a twelve-hour rather than an eight-hour-day worker—to finding out, through much brain sweat, how the work could be done more successfully. And no good idea was allowed to go to rust through lack of effort and "pep" to get it put into practice. Once converted to a new idea himself, he moved heaven and earth to have it endorsed and adopted by his superiors and associates.

**Earns Recognition**

The man of this type, the man who proves himself bigger than his job, the man who can make the work of any position whatsoever count for more than it ever did before, seldom has to go hunting for something higher. Jobs seeks him. When thirty-two the Citizens' National Bank of Louisville induced the aggressive Kentuckian to become its cashier. What hapened? Just what was bound to happen. In one year he was made a vice-president and in another year first vice-president, with a salary equal to that of a bank president.

How did he earn such notable recognition?

**Got the Business**

By becoming the most valuable executive in the institution, by making more friends than any other Louisville banker had ever made, by bringing in more new business than all the other bank officers in the city combined, and by exercising such judgment in analyzing men and credit that the bank did not lose one dollar on any new customer brought in.

Just how did Johnston go about getting so much new business? When he joined the bank it was opening an average of three new accounts weekly; he increased the number to thirty weekly.

Johnston's methods didn't call for superhuman ability, for extraordinary brilliancy, for genius of any description. They simply called for willingness, for industry, for intelligence, and, above all, for humanness; for broad, sincere human sympathy, a genuine feeling of brotherhood.

**Made Many Friends**

"I concluded at the very start that the sure and certain way to make good as a bank officer, or as any other kind of executive, was to make the institution intensely human, and to build up an ever-swelling host of personal friends," says Mr. Johnston of this part of his career.

"I made up my mind to make one call a day on some business concern. I didn't ask them to bank with the Citizens' National. I simply explained that I had come to Louisville in the banking business, that I was anxious to learn all I could about what the city produced, and that I would esteem it a privilege to be shown over the concern's establishment. When leaving I would express the hope that some day, when passing the bank, they would drop in to say how-do, adding, with a smile, that etiquette demanded that a call be returned.

"I kept a loose-leaf book in which I recorded every call I made, the names of the people I met, and any other helpful data. Under no circumstances would I pay another visit within six months. After that I would make another informal, friendly call, explaining that I was in the neighborhood and that I thought I would like to know how business was moving.

"This time, when about to go, I would remark, 'If at any time you contemplate increasing your banking connections, or want to make any change, we would like you to give our bank consideration. We have checked you up through the mercantile agencies and have studied your figures, and I assure you we would be responsive to your credit requirements.'

"The percentage of those who opened accounts following such visits was positively astounding. Our deposits quickly rose from $3,000,000 to $11,000,000. The plan was so successful that I took a bright young clerk, made him assistant cashier, and sent him out to cultivate the smaller concerns while I covered the bigger ones."

**Message of Sympathy**

Another wrinkle, based on insight into and sympathy with human nature: One or two clerks were delegated to read every line of the local newspapers and mark everything of interest that happened. No matter how small (or how large) the depositor, if a death occurred in the family, a note of sympathy that rang true was sent, or, if there was any occasion for congratulation, a cordial, appropriate letter was written. In this and other ways the bank was kept in personal contact with all its customers.

"I am a great believer in the value of a smile," said Mr. Johnston. "We saw to it that there was a real welcome and a cheery word for all. People have so many troubles of their own that they like to meet persons who are bright and happy and cheerful. We took out of our windows fellows who did not know how to be cordial and courteous and sunny, and put in fellows who had winning, attractive dispositions and personalities. The consequence was that people got to love coming to the bank. It was in the fullest sense a 'bank home' to them. It radiated good-will and optimism. This all counted."

**Genuine Friendship**

Charles M. Schwab once said to me that he could talk to workers because he "felt" what he said. It was not veneer with him. He was one of them and one with them. Percy Johnston could win friends because his friendship for others was not artificial, not bogus, but sincere. Within him was a flowing fountain of human sympathy. The spirit of helpfulness was strong within him.

"Many people make friends, but straightway forget them," said Mr. Johnston. "I try to keep in touch with them. Every human being likes to know that he occupies some part in the mind and the heart of others. Neglected friendships are less forgivable than neglected assets. Friendships are as flowers that spring up in the garden of business. They must be tended and watered and cherished. They give perfume to life.

**Banking Etiquette**

"Banking operations are so restricted by law that there is very little that one bank can do more more than another, in a strictly business way, to help a customer; for no honest banker will ever place the money of his depositors in jeopardy for any reason whatsoever. Therefore the personal element must be depended upon to attract clients—that and, of course, the very best of service."

"What pointers can you pass on to others anxious to get ahead?" I asked.

He hesitated to reply. Under further questioning he finally said:

"No man can afford to say in a position where the avenue to the top is closed.

"If you are to make a success in life you have to take some chance.

**Must Work Hard**

"A man may have limitless ambition, but unless he exerts himself to the utmost to qualify himself to attain his ambition, his mere ambition is worthless.

"You don't have to go to college for education. One trouble is that the majority of men—except those in certain professions, such as doctors, electrical engineers, and teachers—cease to apply themselves earnestly, persistently and systematically to study. They just frivol away their time. They may read, but reading and studying are two different things. One requires no real mental effort, the other does. Let a man become absolute master of his work, no matter what it is; let him know more about it, the history of it, the evolution of it, the why and wherefore of it, the basic principles of it, let him know his job from A to Z, let him put as much energy and enthusiasm into practising it as he has put into studying it, and he is morally bound to gain recognition sooner or later. One promotion invariably leads to another. The further you rise, the wider the circle your candle reaches.

**There's No Excuse**

"There is no excuse for any healthy person remaining half-educated, for being content to be anything short of absolute master of his work. Why, the knowledge of all the ages is contained in a few rows of books. Even one hour's hard study a day will raise a man above the crowd. One's library can be a wonderful laboratory.

"Of course, combine book knowledge with knowledge of human nature. And human nature can be studied even better in humble places than in Fifth Avenue, for at bottom human nature is very much the same everywhere—and then the poor are not so much given to using language to disguise their thoughts.

"Knowledge harnessed to work spells success. Keep hammering, hammering, hammering. Set your goal, turn your face toward it, and never under any circumstances, no matter how discouraging temporarily, turn your back to it. Expect hardships. Take punishment. Put all you can into life. And do it cheerfully. Keep smiling. And in time you are bound to reap pretty much what you sow.

**Big Men Needed**

"To-day America is crying aloud for men of brains, men of force, men of daring. The only reason this country is lagging in the development of its business, particularly its foreign business, is that there are not enough men of the right calibre to fill the places. Capital is ready, but it is waiting for the men.

"A young man should not consider what salary he can get at the start or the second year; but, rather, where he is likely to be in fifteen years. He must early decide, and decide very definitely, whether his chief goal in life is to be the making of money or the attaining of success. If he chooses the former, he may earn all the money of his wildest dreams, but he will have missed the real joy and happiness and purpose of life. These come from healthy, wholesome ambition. I know what I'm talking about when I stress the impotency of money to yield satisfaction. This may be an old story, but it is eternally true—and it needs to be emphasized to-day as much as ever before.

# Delay in Delivery Seems Worst Feature in Steel Strike Up to the Present

## Advices Sent Out by the Steel Companies Contain No Note of Alarm—Big Plant at Bethlehem is Working Almost at Normal Capacity

WHILE it is somewhat difficult to get definitely at the status of production of steel in the United States owing to the mass of conflicting statements made by the opposing interests, it seems fairly certain that the huge Bethlehem steel mills are working at near their normal capacity. It is stated that there have been many of the strikers return to work. It is also stated that a great many men have been picked up from other industries attracted by the wages offered.

Continued improvement from a production standpoint is reported from the Pittsburgh district. At Youngstown, however, all operations are still suspended.

### No Alarming Advices

Any advices received by Canadian firms contain no note of alarm. It is intimated that there may be some unavoidable delays in deliveries, but unless some unforeseen difficulties arise there is nothing so far to indicate anything worse. Large Canadian orders booked some time ago are in the hands of the mills and the firms have not been advised that they will not be filled.

Stocks in general in Canada seem to be very low, especially in sheets, plates, bars and tubes. There is an active demand and any supplies that arrive are quickly distributed.

### Notices Sent Out

Following is the type of notice being sent out to dealers by steel firms:

Gentlemen:—You undoubtedly are fully posted as to labor disturbances from what is appearing in the daily press. While we cannot give you any detailed information except to advise that we are doing the very best that we can in the interest of your trade.

Inquiries must be made preferably by letter rather than telegraphic, as in any event there will be a delay in making a reply, and possibly in a number of instances we will not be able to give you much satisfaction, as the conditions now prevailing are entirely beyond our control, and it is reasonable that the trade will so understand

Any interference with carrying out all our manufacturing schedules is most regrettable, but we are hopeful that the situation will clarify shortly.

### Want Their Opinions

Gentlemen:—It is impossible to forecast at this writing, or confirm that there is much, if any, disturbance, having in mind only the information as appearing in the press. However, in the case of mills making the same thing and occupying different locations, if one mill did not close down and the freight rates therefrom should be in excess of the mill that we originally intended to ship from, having in mind the minimum rate of freight in the interest of the customer, will you be agreeable to pay the additional freight, whether from mill or warehouse stock, as ordered.

Undoubtedly, you would be inclined to make reply asking us to bring to your attention each individual case, and while it can be done, it will mean excessive delay, and perhaps loss of opportunity to make shipment.

The object of this letter is to have your views on the general situation. Hoping that you will be able to extend to us the privilege of doing as suggested herein, the necessity of conference or decision depending entirely upon how urgently the goods are needed by our respective customers.

# Change in Control of John Lysaght, Ltd.

MUCH interest has been evoked by items recently published, referring to the sale of a controlling interest in the business of John Lysaght, Limited, Bristol, England, to certain Welsh financiers. Advices recently received by mail show that the prime mover in the deal was H. Seymour Berry, of Merthyr Tydvil, Wales, who had been closely associated with the late Lord Rhondda, and also with his daughter, the present Viscountess Rhondda, in their large enterprises, chiefly in the coal trade. With him are associated Viscountess Rhondda and D. R. Llewellyn, known as the "Coal King" in South Wales, as he controls about one-seventh of the output from those coal fields, Mr. Berry also controlling a very large output.

### Becomes Chairman

The remarkable success of the Lysaght business, which has been described as one of the romances of British industry, had attracted the attention of Mr. Berry, who had for several months been negotiating for the purchase of stock held by the heirs of the late John Lysaght. The deal was finally carried through, and Mr. Berry becomes chairman of the company, Mr. Llewellyn vice-chairman, with Viscountess Rhondda and two other Welsh directors representing the Welsh interests. The management, however, will be unchanged, as Messrs. S. R. Lysaght, the managing director; W. R. Lysaght, manager of the steel works and rolling mills; D. G. Lysaght and H. G. Hill, who have for years directed the company's affairs, will remain on the board.

### Improve Position

Authorities in British commercial and financial circles express keen satisfaction over the transaction, as it means uniting one of the most successful iron and steel companies with powerful colliery interests, thus insuring a supply of fuel at favorable rates, and improving the company's position for competing in the world's markets. The magnitude of the business is shown by the fact that cost of securing the control is said to have been approximately £5,000,000, although the total capitalization, outside of £300,000 of debenture stock, most of which had already been redeemed, was only £1,000,000, of which £600,000 was in 6 per cent. preference shares, and only £400,000 in ordinary shares, the latter held chiefly by the Lysaght heirs. The actual values of the properties, however, is immensely greater, the cost of the blast furnaces and steel works alone having been over £2,000,000, nearly all paid for out of accrued profits.

### Steady Development

The steady growth of the Lysaght business since the time that it was established by the late John Lysaght, in 1857, is full of interest. The original sheet mills were in Wolverhampton, but many years ago a new sheet-rolling mill plant was built on the seaboard, at Newport, Monmouthshire, and has been steadily enlarged, until it now contains fifty mills, being probably the largest individual sheet rolling plant in the world. The galvanizing and finishing works remain in Bristol, where they were originally established, and there the Company has other important departments, including structural iron works, wire netting department, etc. An important forward step was taken in 1913, when the company built their own blast furnaces and steel works in Scunthorpe, Lincolnshire, securing a large supply of low-grade iron ore, from which steel could be produced more cheaply than in any other part of the Kingdom. These works were greatly enlarged during the war, and are now considered probably the finest in Great Britain.

### Large Export Trade

The company has always paid special attention to the export trade, especially within the Empire, having branch houses in Australia, New Zealand, Canada, South Africa and elsewhere. In Australia, where they have a specially large trade, they have been erecting their own iron and steel works in line with the Commonwealth's policy of developing its own mineral resources. While they have not yet manufactured in Canada, they have had a branch of the company established for many years

(Continued on page 96)

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

THE hardware business is exceptionally brisk at the present time and there are shortages on many lines of builders' hardware and heating equipment. Collections are good.

Stocks of boiler tubes are very low and an advance in the present quotations is expected at any time. Some American houses have already put a ten per cent. increase into effect.

A very firm market prevails for sheets and bars. The question of future deliveries is bothering many firms. At some points already in the States goods consigned to Canada are being held up because there are no cars. The outlook for both sheets and bars is for firm prices and if the strike continues advances are inevitable.

Wood sleighs have been revised to higher levels and the new quotations are 25 per cent. above former figures. Steel sleighs are up fifteen per cent.

A general advance has been made in bolts and nuts, the new discounts applying to standard lists being in many cases higher than previous figures.

A new discount is effective on the O-Cedar lines, the figures being thirty per cent. in place of the former quotation of 33 1-3 per cent.

One effect of the American strike has been to ease the market for ingot metals. Lead is down a quarter of a cent a pound. A boom is expected very shortly in copper prices as a result of arrangements being made for sending large supplies to Europe, especially to Germany.

# MONTREAL MARKETS

MONTREAL, Oct. 2—Some important advances as recorded by the jobbing trade this week are embodied herewith. Higher prices are in effect for building papers and sheathings, as will be found noted elsewhere. The price of silverware is higher. Bath sprays are moving upward to some extent and new prices will be available immediately. Wood handles are being marked up. Bolts and nuts are materially increased in price and the cause of this is stated to be higher production costs to the manufacturer. Common foot valves are higher, as are also standard lubricators.

There is a decided firming of sisal fibre prices and while there may not be immediate advances, the market tone is a strong one. Jute materials are already marked higher in production centres, in fact sisal fibres are higher at some outside points. Steel sheets and plates are very firm and may move upward.

Nail pullers and bench rules are marked lower, and the ingot markets, due more to the quiet condition of trade than to anything else, are somewhat easier for a few of the basic lines. Old material is quiet still and unchanged and this condition also obtains in the manufactured lead products.

### *Advances Applied To Papers, Sheathing, Etc.*

**Montreal.**

BUILDING PAPERS, SPECIALTIES—An increase of price is applied to various tarred felts, dry sheathings, slate roofings and roof coatings. These changes do not cover the regular prepared roofings, and which, as HARDWARE AND METAL stated last week, were likely to hold steadily for the balance of the selling season.

"Everlastic" slate surfaced roofing is 20c per roll higher, 100 roll lots now selling at $3.40; 50 to 100 rolls at $3.45, and less than 50 at $3.50. These prices are f.o.b. Montreal to the retail trade. Tarred felt in 7, 10 and 16 oz. is advanced 35c per cwt. to $4.15; heavy dry straw sheathing advanced 30c per cwt. to $3.35; heavy tar straw sheathing 30c per cwt. to $3.50. Dry sheathing paper, No. 1 "Anchor" is up 3 c per roll to $1.23; dry sheathing No. 2, 4c to 64c per roll; "Anchor" brand tarred No. 1, 3c to $1.33; No. 2, ditto, 4c to 82c; "Stag" brand sheathing, 4c per roll advance to 70c. Roof coating is advanced to 50c per gallon in barrels; 4, 5 and 10 gallon cans are 60c per gallon, and 1, 2 and 3 gallons are priced 85c per gallon, package included.

### *Silverware, Bath Sprays And Various Handles Up*

**Montreal.**

SILVERWARE, SPRAYS.—Lines of silverware, known as "1847," have been advanced to the extent of 7½ per cent.

Various wood handles are also increased in price and new quotations will probably be 10 per cent. higher. Shower sprays are higher, the extent of advance not yet being stated.

### *Foot Valves Higher; Lubricators, Too*

**Montreal.**

FOOT VALVES, LUBRICATORS.—

Advances have been applied to foot valves. The ordinary japanned are selling now at, each, 1 in., 45c; 1¼ in., 55c; 1½ in., 65c; 2 in., 90c; while the corresponding prices for the galvanized are 60c, 75c, $1.00 and $1.50.

Standard lubricators have been advanced 10 per cent. over previous prices.

## *Nail Pullers Down; Also Bench Rules*

**Montreal.**

NAIL PULLERS, RULES.—Declines are announced for nail pullers. The present prices, per dozen, on "Sure Grip" are $19 per dozen, and on "Rex," $16.50.

Bench rules, No. 1003, are reduced to $13.90 per doz., and No. 1005 to $23.15 per dozen.

## *Bolts and Nuts Advance; Coach Screws; Tire Bolts*

**Montreal.**

BOLTS AND NUTS. — Increased prices are in effect for nuts and bolts. This is not a result of the recent strike conditions obtaining, it is pointed out, but rather a pure matter of increased costs to the maker through labor, etc. The new discounts are as follows: Carriage, 3-8 in. and smaller, 6 in. and shorter, 25 per cent.; 3-8 in. and smaller, above 6 in., 10%; 7-16 in. and larger, 10%; Machine bolts, 3-8 in. and smaller, 4 in. and shorter, 30%; longer lengths 20%; 7-16 and larger, 20%. Coach screws, lag screws, 40%; tire bolts 45%; square nuts, blank, add $1 net to list, tapped, add $1.25 to list; Hexagon blank, add $1.25 to list, tapped, $1.50.

## *Steady Basis Holds On Coal Oil; Gasoline*

**Montreal.**

COAL OIL, GASOLINE.—The Fall months have brought the usual heavier demand for coal oil and now that oil heaters will be used extensively, the demand will greatly increase. Prices are unchanged, 22c being the quoted basis for ordinary grade and 25c that for the better qualities. Gasoline is unchanged at 33c per gallon.

## *Builders Want Nails; Makes Brisk Selling*

**Montreal.**

NAILS AND WIRE.—The activity in the country centres has made for a brisk selling of nails and the jobbers report business as excellent. The base price of $4.75 for both standard wire and cut is held firmly, and there is no indication of any easing in the undertone. There has been a fair demand for export, it is understood, and the prospect for Canadian mills is bright.

Standard steel wire is steadily held at $5 per cwt., base.

## *Big Season Opens For Stoves; Heaters*

**Montreal.**

STOVES AND WARES.—The movement has been brisk of late for stoves, and particularly for heaters. With the present possibility in prospect, of there being a temporary restriction of shipments of steel plate from U.S. centres, it will be good policy to order one's requirements of heaters, it would seem, without delay. There is excellent business at present, the manufacturers state.

Wares have been in good demand, and the repeat and sorting business added to the booked orders which are going forward now, makes a very brisk time. Prices are very firm.

## *Sisal Ropes Firmer; Sift Fibres Higher*

**Montreal.**

ROPE AND CORDAGE.—There is much firmer undertone to the sisal market and quotations have been advanced in primary centres. Whether there will be an early change in this market is not forecast, but the undertone is naturally much stronger, because of the outside influences. Strikes of various sorts and other restrictions on export, etc., in producing points are factors of far-reaching consequence. Manilas are strong and firm. Jute goods, twines, etc., have been advanced in price and higher quotations to the trade may be anticipated at any time. The movement is seasonable with sisal, base price, 25c per lb.; Beaver and British manila, 28c, and pure manila, 32c per lb.

## *Good Trade Obtains For Iron and Steel*

**Montreal.**

IRON AND STEEL.—The orders received from the country are very satisfactory and the jobbers are well pleased. Stocks are ample to meet the needs and there is every reason to look for a continued brisk movement during the coming weeks. The Canadian mills will be, if anything, busier than ever, with the prospect of supplies being somewhat restricted from U. S. mills through the labor tie-up.

| | |
|---|---|
| Iron finish machinery steel | 3 80 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |
| Tire steel | 3 95 |
| Toe calk steel, per 100 lbs. | 4 65 |
| Band steel | 3 75 |
| Harrow tooth steel | 3 90 |
| Mining tool steel, per lb. | 0 22 |
| Black Diamond toe steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *While No Advances, Sheets Rather Firm*

**Montreal.**

SHEETS AND PLATES.—There is quite a firm undertone for black sheets and for galvanized, too, the tendencies are somewhat strong. The supplies available at this time are ample, but increases in stocks held cannot be anticipated if industrial strikes are maintained. The volume of business is fair and prices are quite unchanged.

| BLACK SHEETS— | Per 100 lbs. | |
|---|---|---|
| 10 gauge | $5 50 | $6 25 |
| 12 gauge | 5 55 | 6 20 |
| 14 gauge | 5 60 | 6 35 |
| 16 gauge | 5 70 | 6 50 |
| 18-20 gauge | .... | 6 35 |
| 22-24 gauge | .... | 6 40 |
| 26 gauge | 6 45 | 6 50 |
| 23 gauge | 6 75 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | $8 65 | $9 25 |
| 28 gauge | 8 30 | 8 85 |
| 26 gauge | .... | 8 50 |
| 22 and 24 gauge | 7 70 | 8 35 |
| 20 gauge | 7 50 | 8 35 |
| 18 gauge | 7 50 | 8 35 |
| 16 gauge | 7 30 | 8 00 |
| English Standard— | | |
| 28 gauge | .... | 8 35 |
| 26 gauge | .... | 8 10 |
| 24 gauge | .... | 7 40 |
| 22 gauge | .... | 7 30 |
| 18 and 20 gauge | .... | 7 00 |

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Not Much Sale For Some Lead Products*

**Montreal.**

LEAD PRODUCTS.—There is not a great deal of business for lead pipe and kindred lines, although there is the routine business from week to week and this totals up fairly well in the course of time. The basis is maintained, little feature being evident that is worthy of note. Solder is a fair seller.

| | | |
|---|---|---|
| Lead pipe | .... | 0 12½ |
| Lead waste | .... | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | .... | 0 13 |
| Lead sheets, 3 to 3½ lbs., sq. ft., lb. | .... | 0 12½ |
| Lead sheets, 4 to 8 lbs., sq. ft. | .... | 0 09½ |
| Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | .... | 0 36½ |
| Solder, strictly, lb. | .... | 0 32 |
| Strictly, commercial, lb. | .... | 0 31 |
| Solder, wiping, lb. | .... | 0 29 |
| Solder wire (8 gauge)— | | |
| 40/60 | .... | 0 36 |
| 45-55 | .... | 0 38¾ |
| 50-50 | .... | 0 41¼ |
| Zinc sheets, casks | .... | 0 17 |
| Do., broken lots | .... | 0 18 |

## *Old Material Rests; Movement Restricted*

**Montreal.**

OLD MATERIAL.—The present conditions surrounding the market are of an unchanged nature, practically-speaking. The movement is in quantities for immediate use and some lines are in restricted demand. The price tendencies are rather steady, excepting that steel and iron scrap are inclined to hold firmly.

| Dealers' Buying Prices— | | |
|---|---|---|
| Pipe scrap, ton | .... | 8 00 |
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |
| Bicycle tires | .... | 0 03½ |
| Automobile tires | .... | 0 04 |
| Yellow brass | 0 09 | 0 10 |
| Red brass | 0 15 | 0 16 |
| Light brass | 0 07½ | 0 08½ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | .... | 0 15 |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 15 00 |
| Malleable scrap (ton) | .... | 15 00 |

## *Ingot Market Quiet; Await Strike Outcome*

**Montreal.**

INGOT METALS.—There has been little excitement in the ingot list during the week. Naturally, the industrial conditions will have an effect on deliveries

if the conditions continue for any length of time.

COPPER.—This is moving quietly and with a slight weakness manifest, the price being 24¾c per lb.

TIN.—Shipments of English tin are naturally likely to be retarded if the labor conditions continue as at present in Great Britain. The basis is still unchanged here at 59c per lb.

LEAD.—Not a big movement and the basis is slightly weaker at 7¼c per lb.

SPELTER.—While there is not a great demand for this there have been sales of late in a small way, and the basis is held at 9¾c per lb.

ANTIMONY.—No new features have arisen and price holds at 9½c.

ALUMINUM.—Ingots are in small demand and the price is a shade weaker at 34c per lb.

PIG IRON.—The quoted price is $50 per ton.

# TORONTO MARKETS

TORONTO, October 2—The strike in the American steel mills is a dark cloud on the horizon of many firms and with rumors of a railway strike it is impossible for them to tell yet where they are going to be in the matter of getting supplies and deliveries of sheets and bars. Already there is talk that orders booked now may not be received before the first of the year, if then.

An advance is expected at once in the price of tubes. The strike finds the stocks of tubes in Canadian warehouses very low. Already an advance of ten per cent. in prices has been announced by some of the warehouses in the United States and nothing is promised that is at all definite regarding deliveries. In some cases it is reported that there are no cars to move goods at American points. This applies not only to tubes, but to other goods.

A new discount is effective on the O-Cedar line, the new quotations being on the basis of thirty per cent. in place of the former figures of 33 1-3 per cent.

Wood sleighs have been advanced 25 per cent. and quotations on steel sleighs are 15 per cent. higher.

A number of important changes have been made in the quotations on bolts and nuts, prices in all instances showing advances. The details will be found in the market reports.

One effect of the strike across the line has been to make ingot metals easier. A decline of a quarter of a cent a pound is shown in lead.

While tin shows a decline in primary markets the Canadian quotations are firm and are likely to continue so, as owing to the strike in England there will be difficulty in getting boats away and consignments moved by rail.

An advance is looked for in copper, contingent upon Germany becoming a very large buyer shortly. As soon as credit arrangements are completed a boom is looked for in the copper market.

## *Wood Sleighs and Steel Sleighs Higher*

**Toronto.**

WOOD SLEIGHS, STEEL SLEIGHS.—New quotations on these lines show substantial advances over former figures. Wood sleighs are 25 per cent. higher and on steel sleighs the advance is fifteen per cent.

## *New Discounts Named on Bolts and Nuts*

**Toronto.**

BOLTS AND NUTS.—New discounts on bolts and nuts applying to standard lists are now effective as follows: Tire bolts, 45 per cent.; Carriage bolts ($1.00 list) ⅜ in. dia. and smaller, 6 in. and shorter, 25 per cent.; Carriage bolts ($1.00 list) ⅜ in. dia. and smaller,, long lengths, 10 per cent.; Carriage bolts ($1.00 list) 7-16 in. dia. and larger, 10 per cent.; Machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 30 per cent.; Machine bolts, ⅜ in. dia. and smaller, longer lengths, 20 per cent.; Machine bolts, 7-16 in. dia. and larger, 20 per cent.; Sleigh shoe bolts, all sizes, Net List; Coach and lag screws, 40 per cent.; Square head blank bolts, 20 per cent.; Bolt ends, 20 per cent.; Plow bolts, 15 per cent.; Elevator bolts, large flat head, 15 per cent.; Elevator bolts, corrugated head, 50 per cent.; Fancy head bolts, 15 per cent.; Step and shaft bolts ($3.00 list), 15 per cent.; Whiffletree bolts, 15 per cent.; Nuts, square blank, add $1.00 to list; Nuts, square tapped, add $1.25 to list; Nuts, hexagon, blank, add $1.25 to list; Nuts, hexagon, tapped, add $1.50 to list; Terms—2 per cent. 30 days.

## *Higher Quotations on O-Cedar Goods*

**Toronto.**

O-CEDAR LINES. — New discounts have been made on the O-Cedar lines and the quotations are now on a basis of thirty per cent. in place of the former figure of 33 1/3 per cent.

## *Firm Market For Steel and Iron Bars*

**Toronto.**

STEEL AND IRON BARS.—A distinctly firmer tone to the market is noticeable as a result of the strike. Supplies are none too plentiful and with a good volume of business offering are being rapidly depleted. The matter of future deliveries is causing some concern, and many dealers do not expect to get orders they placed recently filled before the end of the year. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | .... | 4 50 |
| Band steel | .... | 4 25 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Advance Expected in Boiler Tubes, Wrought Pipe*

**Toronto.**

BOILER TUBES, WROUGHT PIPES.—An early advance in both these lines is expected as a result of prevailing conditions. Stocks of tubes are low, generally speaking and it would be difficult to obtain any quantities of some sizes already. Some American firms have already advanced their prices on tubes ten per cent. The outlook for delivery of tubes as far as American firms are concerned is anything but satisfactory. Quotations are as follows:

| | Per 100 feet | |
|---|---|---|
| BOILER TUBES— | Seamless | Lapweld |
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Very Firm Market in Sheets and Plates*

**Toronto**

SHEETS AND PLATES.—The general situation in the market for sheets and plates seems to grow steadily more complicated and uncertain owing to conditions due to the strike. Prices are firm and there seems little doubt that they will go higher. Aside from prices is the question of delivery, and many firms are most uncertain as to how they are going to come out. The longer the strike lasts the worse the situation will be. At present some of the mills are still at work on raw materials they had

on hand before the walkout occurred. When these supplies are worked up, there is no telling when more can be procured. In some cases the situation is complicated further by the fact that goods consigned to Canadian firms are ready for delivery, but there are no cars to haul them. Quotations are as follows:

| BLACK SHEETS— | |
|---|---|
| 14 gauge | 5 45 |
| 16 gauge | 5 60 |
| 18-20 gauge | 6 15 |
| 22-24 gauge | 6 20 |
| 26 gauge | 6 30 |
| 28 gauge | 6 45 |
| 3-16 inch plate | 6 25 |
| ¼-inch boiler plate | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

| GALVANIZED SHEETS. | | |
|---|---|---|
| 10¾ oz. | $8 20 | $8 85 |
| U.S. 28 | 7 80 | 8 30 |
| U.S. 26 | 7 30 | 7 90 |
| 22 and 24 | 7 15 | 7 65 |
| 18 and 20 | 7 00 | 7 45 |
| 16 | 6 85 | 7 25 |
| 12 and 14 | 6 70 | 7 05 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Business* A1 *in Stoves and Wares*

**Toronto.**

STOVES, WARES.—Business continues very active in these lines and the main trouble of the distributors is to get enough goods to fill their orders without annoying delays. Just what is going to happen in regard to raw materials seems uncertain. The mills in the United States are booked away ahead with orders from Canadian firms. An early settlement of the strike would relieve a lot of anxiety that is being experienced at present in regard to future deliveries. From present indications there is nothing to show that prices are going to do other than stiffen.

## *Market is Steady For Corrugated Sheets*

**Toronto.**

CORRUGATED SHEETS.—With any amount of business offering, stocks are being rapidly depleted. Large quantities of goods are on order but indications point to some delays in delivery. It is not generally expected, however, that these will be serious. Quotations are as follows:

| Corrugated Sheets— | Per 100 Square Feet Gal'zed | Painted |
|---|---|---|
| No. 28 gauge | $8 25 | $7 00 |
| No. 26 gauge | 9 00 | 8 00 |
| No. 24 gauge | 13 50 | 10 00 |
| No. 22 gauge | 16 00 | 12 50 |
| No. 20 gauge | 19 00 | 16 00 |
| No. 18 gauge | 24 00 | 19 50 |

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

## *Strike is Making Scrap Very Quiet*

**Toronto.**

OLD MATERIALS.—The scrap market is showing the effects of the American strike and things have been very, very quiet all week. Rubber has weakened considerably. Stove plate is the only material to show a firmer tendency and the advance here is very slight. Quotations are as follows:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | 0 | 03½ |
| Heavy lead pipe | 0 | 05¼ |
| Pipe scrap | 8 | 00 |
| Stove plate, per ton | 12 | 50 |
| No. 2 busheling | 11 | 00 |
| Yellow brass | 0 | 10 |
| Red Brass | 0 | 16¾ |
| Light brass | 0 | 07 |
| Scrap zinc | 0 | 05 |
| Heavy copper | 0 | 18 |
| Wrought iron, No. 1, per gr. ton | 14 | 50 |
| No. 1 machinery cast | 18 | 00 |
| Heavy melting steel | 14 | 00 |
| Old rubbers, boots and shoes | 0 | 07 |
| Overseas, lumbermen's rubber boots | 0 | 05 |
| Bicycle tires | 0 | 1½ |
| Automobile tires | 0 | 03 |

## *No Changes Shown in Prices of Cordage*

**Toronto.**

CORDAGE.—Business is only fair in cordage. Prices are holding without any change, the quotations being as follows: Pure manila, 32 cents per pound base; Beaver or British manila, 28 cents; New Zealand hemp, 28 cents; Sisal, 25 cents; Sisal lath yarn, 25 cents per pound base.

## *Market is Steady For Lead and Zinc*

**Toronto.**

LEAD AND ZINC PRODUCTS.—Business is reported quite active in all these lines. Prices are remaining steady and no immediate revision in the following quotations is looked for:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | $0 | 12½ |
| Lead waste pipe, list, per lb. | 0 | 13½ |
| Do., over 6 inches, list, per lb. | 0 | 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 16 |

Cut sheets ½ to ⅝c lb. extra and cut sheets to size, 1c lb. extra.

| | | |
|---|---|---|
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | | 0 17 |

## *Copper May Advance Ingot Metal Easier*

**Toronto.**

INGOT METALS.—One result of the strike in the United States has been to make the market for ingot metals distinctly easier. Lead has declined a quarter of a cent a pound. Spelter shows no change. At primary points tin is easier but in the Canadian market it is firm owing to the probability that shipments from England will be held up indefinitely owing to the strike. A big boom in copper is expected shortly and if it develops, an advance is looked for.

COPPER.—There is every indication that European countries, especially Germany, will enter the market shortly and take large quantities of copper. It is understood that arrangements for the financing of these purchases are already under way. In the meantime prices are firm at 27 cents a pound.

LEAD.—Prices of lead show a falling off of a quarter of a cent a pound, the quotations being on the basis of 6¾ cents.

SPELTER.—The market for spelter is a little easier but prices are holding without material change.

TIN.—Quotations for tin range around 57½ cents a pound. Only a fair volume of business is offering.

ANTIMONY.—The demand for antimony has shown a falling off. The quotations remain fairly steady and range from 10 to 11½ cents.

ALUMINUM.—The volume of business in aluminum is not large. Prices are holding unchanged at 35 cents a pound.

# LONDON MARKETS

LONDON, October 2—Business here continues good. Regular fall lines are all selling well and also carpenters' tools, household lines and builders' hardware. On a great many lines merchants are finding it very difficult to get the goods. Roofing is having a good sale at present, also stoves, heaters and stove accessories. Prices are all firm. Bolts and nuts show an advance. The advance on bolts is from 10 to 20 per cent. and on nuts 25 cents per 100 pounds.

## *Bolts and Nuts Revised Upwards*

**London, Ont.**

BOLTS AND NUTS.—New and higher quotations on bolts and nuts are now in effect as follows:

Discounts apply to list of Feb. 1, 1913. Carriage bolts ($1 list), ⅜ in. dia. and smaller, 6 in. and shorted, 25 per cent.; Carriage bolts ($1 list), ⅜ in. dia. and smaller, 6 in. and shorter, 25 per cent.; Carriage bolts $1 list), 7-16 dia. and larger, 10 per cent.; Machine bolts, ⅜ in. dia. and smaller, 4 in. and shorter, 30 per cent.; Machine bolts, ⅜ in. dia. and smaller, longer lengths, 20 per cent.; Machine bolts, 7-16 in. dia. and larger, 20 per cent.; sleigh shoe bolts, all sizes, net list; Coach and lag screws, 40 per cent.; Square head blank bolts, 20 per cent.; Bolt ends, 20 per cent.; Plow bolts, 15 per cent.; Elevator bolts, 15 per cent.; Fancy head bolts, 15 per cent.; Shaft bolts ($3 list), 15 per cent.; Step bolts, large head ($3 list), 15 per cent.; Whiffletree bolts, 15 per cent.; Nuts, square, blank, add to list, $1.00; Nuts, square, tapped, add to list, $1.25; Nuts, hexagon, blank, add to list, $1.25; nuts, hexagon,

tapped, add to list, $1.50; Stove bolts, 65 per cent.; Tire bolts, 50 per cent.; Terms: 2 per cent. off 30 days from date of shipment. F.O.B. Montreal, Toronto, Hamilton, London, Ont.

## *Nails Selling Well; Prices Remain Firm*

London, Ont.

NAILS.—Nails are selling well. Prices are firm, the quotations being as follows: Wire, $1.70 base; Cut, $4.75 base.

## *Higher Quotations on Building Paper*

London, Ont.

BUILDING PAPER.—New and higher quotations are in effect on building paper. The figures are as follows:

Tarred felt, $4.15 per 100 lbs.; No. 1 Dry Fibre, $1.23 per roll; No. 2, Dry Fibre, 64 cents per roll; No. 1 Tarred Fibre, $1.35 per roll; No. 2 Tarred Fibre, 82 cents per roll; Surprise sheeting, 70 cents per roll.

## *Advance is Made in Sweat Pads*

London, Ont.

SWEAT PADS.—Higher prices have gone into effect on sweat pads, the new quotations being: $9.00 per dozen for Yellow or Gold Edge.

## *Higher Prices Named on English Graining Combs*

London, Ont.

ENGLISH STEEL GRAINING COMBS.—New quotations on English steel graining combs show a revision upwards, the price being 85 cents per set.

## *Bent Packing Needles Show an Advance*

London, Ont.

ENGLISH BENT PACKING NEEDLES.—Higher quotations are in effect on English bent packing needles, the prices being as follows:

3½ in., 30c.; 4 in., 33c.; 4½ in., 40c.; 5 in., 50c.; 5½ in., 55c. dozen.

## *Wood Handle Gimlets Join Upward March*

London, Ont.

ENGLISH WOOD HANDLE GIMLETS.—Higher prices have been named on these goods, the quotations being ⅛ in. to ¼ in., 95 cents per dozen.

## *Active Demand For Cow Chains*

London, Ont.

COW CHAINS.—There is an active demand for cow chains just now. The quotation is 20 per cent. off list.

## *Ready Sale Found For Ash Sifters*

London, Ont.

ASH SIFTERS.—A brisk demand is being experienced for ash sifters. The prices are as follows:

Common wood side, $3.00 per dozen; Banner, $3.20 each; No. 1 Rocker, $4.75 each.

## *Weather Strip and Buck Saws Moving*

London, Ont.

WEATHER STRIP, BUCK SAWS.—There is a steady demand for weather strip. Prices are as follows:

Wood and felt, 55-5 per cent off list; Frost King, $4.40 per dozen packages; Swan Hardwood, 75 cents per set. Buck saws are also selling well. Quotations are:

Happy Medium, $9.60 per dozen; Prince Rupert, $15.30 per dozen; No. 50 Disston, $15.30 per dozen.

## *Cross Cut Saws and Axes Are Selling Well*

London, Ont.

CROSS CUT SAWS, AXES.—There is a brisk demand for both cross cut saws and axes. Quotations on cross cut saws are:

Maple Leaf Lance, 5 ft., $4.95 each; Maple Leaf Racer, 5½ ft., $5.85 each; Maple Leaf Premier, 6 ft., $6.60 each; Pangburn; Simonds; Champion, 57 cents per foot.

Axe prices are as follows:

Handled, Eagle, $17.50 per dozen; handled, Cherokee, $20.50 per dozen; Axe heads: Keystone, $13.25 per dozen; Cherokee, $15.50 per dozen; hand made, $15.50 per dozen; Black Diamond, $16.00 per dozen; Welland Vale Special, $14.75 per dozen; Welland Vale Double Bit, $19.50 per dozen.

## *Higher Prices For Baseball Goods*

London, Ont.

BASEBALL GOODS.—Booking prices for baseball goods for the spring of 1920 show considerable advance in most lines. The official league baseball is $21.00 per dozen, as against former price of $16.80 per dozen.

## *Further Advance is Made in Zenoleum*

London, Ont.

ZENOLEUM.—New and higher prices are effective on zenoleum. The quotations are:

35c size, $2.85 per dozen cans; 65c size, $5.50 per dozen cans; $1.25 size, $10.50 per dozen cans; $2.00 size, $16.50 per dozen cans; Lice Powder, $2.50 per dozen packages.

## *Booked Orders For Skates Being Shipped*

London, Ont.

ICE SKATES.—Booked orders for ice skates are now being shipped. Starr make is quoted at 30 per cent. off list.

## *White Lead in Oil; Sales are Light*

London, Ont.

WHITE LEAD IN OIL.—No change is shown in quotations on white lead in oil. Sales are light. Prices are:

Pure, tons, $16.35 per 100 lbs., less tons, $16.70; Elephant, tons, $16.95 per 100 lbs., less tons, $17.30.

## *Roofing Nails Are Finding Good Sale*

London, Ont.

LARGE HEAD ROOFING NAILS.—No change in prices is shown in this line. Sales are very brisk just now. Prices are:

Kegs, $8.50 per 100 lbs.; 25-lb boxes, $9.00 per 100 lbs.

## *Glass and Putty Holding Unchanged*

London, Ont.

GLASS, PUTTY.—These goods are in brisk demand.

Single Diamond, 30 per cent. off list; Double Diamond, 30 per cent. off list; Cut Lights, 10 per cent. off list.

Putty—Standard, 100-lb drums, $6.80 per 100 lbs.; Standard, 25-lb. drums, $7.05 per 100 lbs.; Pure, 100-lb. drums, $9.30 per 100 lbs.; Pure, 125-lb. drums, $9.55 per 100 lbs.

## *No Change Shown in Linseed Oil Prices*

London, Ont.

LINSEED OIL.—Prices are holding steady, with a fairly active demand. The figures are:

| | Raw. | Boiled. |
|---|---|---|
| 1 to 2 barrels, gal. | $3.25 | $3.28 |
| 3 to 5 barrels, gal. | 3.24 | 3.27 |
| 6 to 9 barrels, gal. | 3.22 | 3.25 |

Less barrels, add 10 cents gallon.

## *Turpentine Market Holds Unchanged*

London, Ont.

TURPENTINE.—No change is shown in the quotations on turpentine, the prices being as follows:

| | |
|---|---|
| 1-barrel lots, imperial gal. | $2.55 |
| 2 to 4 barrels, imperial gal. | 2.54 |
| 5-gallon lots, imperial gal. | 2.65 |

# WINNIPEG MARKETS

WINNIPEG, October 2—Price changes for the week show very little difference over former quotations. About the only lines of note to affect the hardware dealers are as follows: Tin plate, marking gauges, butt gauges, clapboard markers, pipe reamers, sash cord, wrapping twine and Kasement Skrene Dores, all of which show slight advances over former quotations. Hardware markets in general reflect a firmer tendency in practically all lines and with the steel industries in the United States at a standstill, owing to the strike, higher prices will no doubt be issued on their lines in the near future.

Business is reported to be slackening up somewhat after the big rush of the last few months. However, sorting orders are reported very good.

## *Tin Plate Advances One Dollar a Box*

**Winnipeg.**

TIN PLATE.—Prices during the week show an advance of $1.00 box in the price of Tin Plate, due to further increased costs of production, while supplies of this commodity are reported limited. To-day's ruling prices are given as follows:

Tin plate, 1C, 20x28, full boxes, $23.50 box; 20x33, half boxes, $14.50 each, full boxes, $28.00 per box; 20 x 39, half boxes, $16.75 each. Tin Plate, 1X, 20 x 28, full boxes, $27.00 per box; 20 x 33, half boxes, $16.50 each; 20 x 39, half boxes, $19.25 each.

## *Marking Gauges Revised Upwards*

**Winnipeg.**

MARKING GAUGES.—Revised prices are now effective on Marking Gauges. Butt Gauges and Clapboard Markers showing a general advance of from 5 to 10 per cent. To-day's market prices are given below:

Marking Gauges, No. 90, $7.20; No. 91, $13.95; No. 72, $5.30; No. 77, $15.20 per dozen. Butt Gauges, No. 95, $17.60; No. 95½, $12.00 per dozen. Clapboard Markers, No. 88, $9.20; No. 89, $9 20 per dozen.

## *Higher Quotations On Pipe Reamers*

**Winnipeg.**

PIPE REAMERS.—Pipe Reamer prices have again been revised to higher levels, based on new prices issued by manufacturers, showing advances of from 5 to 10 per cent. over former quotations and are now selling at the following figures:

Pipe Reamers, No. ⅛, 53c; No. ¼, 63c; No. ⅜, 84c; No. ½, $1.05; No. ¾, $1.47; No. 1, $2.31; No. 1¼, $2.63; No. 1½, $3.47; No. 2, $5.25 each.

## *New Prices Named on Kasement Skrene Doors*

**Winnipeg.**

KASEMENT SKRENE DOORS.—New prices for next season have just been issued on Kasement Skrene Doors, and orders are now being solicited by the Winnipeg jobbers at the following figures:

Kasement Skrene Doors, No. 1, 2 ft. 8 in. x 6 ft. 8 in., $37.25, No. 2, $39.00; No. 1, 2 ft. 10 in. x 6 ft. 10 in., $38.25, No. 2, $40.00; No. 1, 3 ft. x 7 ft., $39.50, No. 2, $41.00 per dozen.

## *Cotton Goods Are Showing Strength*

**Winnipeg.**

SASH CORD, WRAPPING TWINE.—Prices on cotton goods have again strengthened, showing advances of from 1 to 2c per lb., and affects Sash Cord and Cotton Wrapping Twine, making to-day's selling prices as given herewith:

Hercules Sash Cord, in hanks or coils, No. 7, 77c; No. 8, 76c; No. 9, 76c; No. 10, 76c. Cotton Wrapping Twine, 3-ply, in balls, 78c per lb.; 3-ply, in cones, 75c per lb.; 4-ply, in balls, 82c per lb.; 4-ply, in cones, 80c per lb..

## *Further Advances in Guns and Rifles*

**Winnipeg.**

GUNS AND RIFLES.—Further advances have been made by American manufacturers of guns and rifles and will average from 3 to 7½ per cent. over former quotations, and new prices will be issued within the next few days. Stocks in all lines of guns is very low, while only a limited stock of rifles are on hand, while deliveries from the factories at present are proving very unsatisfactory.

## *Stock of Lamp Chimneys Are Low*

**Winnipeg.**

LAMP CHIMNEYS.—A heavy demand is reported in all lines of lamp chimneys, while stocks are very low owing to the inability of the factories to make deliveries; however, an improvement in shipments is looked for in the near future. To-day's prices are as follows:

Lamp Chimneys, A, 8 dozen, cases, $9.10 per case. Per dozen, $1.25; B, 6 dozen cases, $7.80 per case. Per dozen, $1.40.

## *Linseed Oil Prices Show No Changes*

**Winnipeg.**

LINSEED OIL.—Linseed Oil prices show no change on the local market, holding firm at former quotations, while it is reported from some quarters that higher prices are coming. To-day's ruling prices are given as follows:

Raw Linseed Oil, barrel lots, $3.00 per gallon; Boiled Linseed Oil, barrel lots, $3.03 per gallon.

## *Putty Prices May Advance Shortly*

**Winnipeg.**

PUTTY.—The demand for putty at the present time is very heavy, as dealers are stocking up for the usual fall requirements. Prices show no change in this line up to the present, but reports indicate an upward trend in the near future. To-day's prices are confirmed as follows:

Putty, 100-lb drums, $7.20; 25-lb. drums, $7.80 per 100 lbs.; 1½-lb. tins, 14½c each.

## *Turpentine Prices Are Holding Firmly*

**Winnipeg.**

TURPENTINE. — Turpentine prices still hold firm on the local market with only a very limited demand; however, no drop in price is anticipated as the export demand is reported heavy, and as long as it continues, high prices are to be expected on this commodity. To-day's ruling prices are confirmed as follows:

Barrel lots, $2.70 per gallon; ½ barrel lots, $2.73 per gallon; 5 gallon lots, $2.75; 1 gallon lots, $2.75 per gallon. Plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURG, Pa., Octobeh 2.—The steel strike started out as a serious matter, but not altogether as serious as expected. For four days, or until Friday morning, September 26, the matter hung in the balance, whether the strike would spread or would recede. The information gathered together Friday morning showed positively that the strike was losing ground, proving conclusively that, barring accidents, it would be lost, and probably in a few weeks.

The character of the strike was determined the first day. The organization campaign, authorized at the annual convention of the American Federation of Labor at St. Paul, June, 1918, was under the auspices of 24 unions affiliated with the federation, these unions being of various crafts which had more or less employment in the iron and steel industry as a whole, but did not represent any large proportion of the men employed. Machinists, engineers, moulders, etc., are employed to an extent and their joining the unions and going on strike would cripple operations more or less. The organization campaign also took in common labor.

When the strike started it was at once disclosed that it was not primarily a strike of these skilled men at all, but of the common labor, and chiefly the foreign born labor at that. The latter struck practically 100 per cent., while of the American born common labor many were willing to work. Then two things occurred, making the influence of the strike more serious. Men who wanted to work were thrown out of employment because other men, needed for operating a plant or a department as a whole, were on strike, and men who were at work were intimidated by strikers and gotten out. For illustration, practically all of Youngstown was on strike by the end of the second day, but the Trumbull Steel Company, operating a steel mill and sheet and tin plate mill at Warren, a few miles distant, was in full operation. Strikers marched up the Mahoning valley to Warren and "got" the mill at the time of changing turns, the fresh turn not being allowed to go to work. The same thing occurred at Canton, the men from a striking plant marching to the Canton Sheet Steel Company plant, which was not on strike, and closing the mill.

By Tuesday night a low point in operations was reached. When the strike

started, at 6 a.m. Monday, September 22, about 35 per cent. of the productive capacity of the iron and steel industry was thrown idle. Then a process began of the strike losing at places where it had started poorly, and of spreading where it had started well. By Tuesday night the idleness amounted to about 40 per cent. Then began a close watch of how things broke from hour to hour. As the Youngstown and Wheeling districts were down tight and the Monongahela Valley was working moderately well, while the rest of the Pittbsurgh district was nearly normal, it was evident that if the Monongahela valley could continue operating the fact would break the strike in Youngstown and even Chicago and Gary, which were about two-thirds down, would eventually feel the influence. Accordingly, the close watch was kept on the Monongahela valley. As it was chiefly a strike of common labor the blast furnaces were most affected, and the blast furnaces were also more vulnerable because the men have to work in the open. After Tuesday night the number of blast furnaces began to gain, but as there were losses elsewhere it was not a clear case, Chicago and Gary going down more and more, while the strike in Cleveland became practically complete. By Friday morning, however, as noted above, there was good news only and the swing was towards the strike waning. An important influence outside the Monongahela valley was that Tuesday and Wednesday there was a cleaning out of Bolshevists at Sharon, in the Shenango valley, 70 miles north of Pittsburgh. Nearly a hundred were gathered in. Then the intimidation that had gotten out many men in the valley in addition to those who had struck, ceased, and beginning with the resumption of one Shenango merchant stack at Sharpsville Thursday night, operations in the valley increased, although very slowly. This is counted upon to have a favorable effect upon Youngstown and the rest of the Mahoning valley, just over the state line in Ohio, where everything is still closed.

It is largely a matter of protection by the civil authorities. In Pennsylvania nearly all the county and municipal authorities have done well to preserve order, and the magnificent Pennsylvania State Constabulary, a perfectly trained body of mounted men, has worked wonders. Two of these men can take care of a moderate sized riot. In Ohio there is no state constabulary.

The issue of a strike is usually settled the first week, though the strike itself may last much longer. With the start this strike made, it could have no hope of success unless it continued to gain throughout the first week, but it gained only during the first two days. Wednesday it was suffering more losses than gains, and since Wednesday it has had losses only, and no gains. Barring accidents, it is lost to the agitators and won by the manufacturers, and not by the latter doing anything except endeavoring to keep the agitators from doing mischief.

Winning a strike and producing steel, however, are different things for the manufacturers. The test, in this instance, has not been the amount of steel produced, but the number of men willing to work. Men have been kept in employment at works when the efficiency of the plant was more or less diminished by departments not being uniformly manned, and production has not been in the same proportion as employment. Thus, if as estimated there was 40 per cent. idleness when the strike was two days old, that does not mean that actual tonnage production was 60 per cent. of normal.

Furthermore, assuming that there are no accidents or unexpected developments and the manufacturers have virtually won the strike, it does not mean that production will be fully restored in the near future. The strikers in some districts may hold out for weeks, perhaps many weeks, depending in considerable part how well order is preserved, for twenty per cent. of the men can often intimidate eighty per cent. of the men and keep them from working. At the best there will be a large loss of production and consumers of steel will be incommoded very considerably. There are stocks in buyers' hands, but the stocks are not large and are probably somewhat below normal. Buyers of steel products have displayed a fine feeling of sympathy for the steel producers and are indisposed to bother them about deliveries.

Of course, it is impossible to be absolutely precise as to the extent various producers are affected by the strike, but the following is a summary that cannot be far from the exact fact, dealing with conditions as they were at the end of last week: East of Johnstown, Pa., and Buffalo, N.Y., practically everything working. Cambria at Johnstown, closed tight, also Lackawanna at Buffalo and some of the merchant furnaces at Buffalo. Cleveland, down tight; Lorain, nearby, running full. In the Pittsburgh district, Jones & Laughlin Steel Company operating both South Side and Woodlawn works practically full, the remainder of municipal Pittsburgh operating above 50 per cent. Monongahela valley, the largest single section of the Pittsburgh district, lower part including Homestead, Duquesne and Edgar Thomson works of Carnegie running nearly full; middle part of McKeesport, almost full; Monessen, at upper end, both steel plants closed. New Castle, at foot of Shenango valley, operating almost full; Farrell and Sharon, near middle, operating little, but increasing; upper part, almost idle, but gaining. Mahoning valley, including Youngstown, down tight. Wheeling district, down tight, except a few mills running practically full. Calumet district (Chicago and Gary) almost down. The south running almost normal.

Fire Security Appliances, Limited, capital $20,000, head office Swift Current, Saskatchewan, plans to manufacture and deal in electrical appliances and equipment.

## DELAY IN DELIVERY SEEMS WORSE FEATURE IN STEEL STRIKE

(Continued from page 80)

### Scrap Supplies

Discussing the effects of the strike on the scrap metal market, the Waste Trade Journal says: "What then is there in store for the waste material market as the result of the steel strike which, because of the representative character of the industry involved, has been chosen as the determinant of the entire labor and cost issue? As a fact, it must first be recorded that the mills, possibly in a mistaken attempt to lower values, have been purchasing scrap iron from hand to mouth in the last few months and, in consequence, many of their yards did not hold enough scrap, when the strike broke, to enable them to continue even curtailed operations without obtaining fresh supplies. This accounts for what buying was reported during the week and scrap iron was no exception in this respect, for the same condition was noted with reference to pig iron and alloys.

### Demand is Active

We have, therefore, in evidence a large suppressed demand for scrap and, because of the difficulties attending shipping and unloading during the strike, this suppressed demand will not show its full force until after the strike is over, when intensive competition for rush deliveries of scrap is likely to be witnessed between mill purchasing agents with the result that values will sharply reflect this competition for material between buyers. This condition is likely to become all the more accentuated as the threatened interruption of lake traffic is certain to curtail ore shipments to blast furnaces with the further result that, when the latter resume operations in full, they will find themselves lamentably short of ore. Which condition must naturally result in increased demand for scrap iron. So much for the directly visible effects on the scrap iron market.

### Would Cause Rise

"Let us now consider the effect that the various possible solutions of the problems presented by the steel strike may have on scrap iron values. If the demands of the unionists should prevail, the cost of finished steel products must necessarily rise in proportion to the advance in the cost of labor that enters into their manufacture. To whatever extent the cost of finished steel is enhanced that of scrap must naturally follow suit. On the other hand, let us for the sake of argument consider the possibility of the steel mills scoring a clean victory over labor. In that event labor costs in all industries would be accepted to have reached their peak and to be subject to downward revision only."

Burns Hardware, Limited, Toronto, Ont., capital $100,000, plans to manufacture and deal in hardware goods.

# More Facts are Needed to Sell Paint

## Men Who Know Their Goods and All the Points About Them Find Little Trouble in Selling Them—Can Render Real Service to the Prospective Customer and Retain Trade Permanently

THREE paint men were sitting in the Pullman smoker, discussing the outlook of the paint trade for the year 1920.

One was the salesmanager of a large manufacturing concern, another was his advertising manager and the third, a travelling salesman.

The advertising manager had dwelt enthusiastically upon the fact that paint advertising had at last reached a sound, sensible basis in which the public were being led to the conviction that painting was an economic necessity. That instead of shouting brands, qualities and a thousand and one other self-centred slogans, the "Save the Surface" campaign had brought into use a slogan that the public could call their own. It announced a fact that directly affected and interested the property owner from standpoint of his own pocketbook.

### He Was Skeptical

"So far so good," remarked the salesman, " when that campaign started I was skeptical as to whether it would do any good. This summer has proven that not only will it do good, but it is doing good right now, and everybody is getting something out of it, from the manufacturer, the painter and the retailer, right down to the consuming public themselves."

"I doubted if it could be done, as it has been done," he continued, "but we've got the proof in the stimulus it has given to business this year. But,—there's a lot more to be done, and I believe it can be done pretty much the same way."

"What's on your mind now?" asked the salesmanager with interest.

### Aroused Interest

"The 'Save the Surface' campaign has undoubtedly awakened the minds of the public to the need of painting and paint," explained the salesman, "and it has also awakened the trade to the extent of its possibilities."

"But there still remains a great deal of awakening to be done amongst those who sell paint. I don't mean the paint dealer himself, but the sales clerks, even painters who are to a certain extent salesmen."

"Isn't this co-operative campaign affecting them too?" inquired the salesmanager.

### Due to Ignorance

"Yes and no," answered the salesman. "Save the surface carries just one big blanketing conviction to the public, but there are thousands of details about painting and paint that remain to be carried out in the saving of the surface. You know as well as I do that in ninety-nine cases out of a hundred the abuse and wrong use of paint is due to ignorance rather than wilfulness. I've seen more paint sales spoiled or lost through ignorance of facts on the part of retail sales clerks than for any other reason. Paints and varnishes are everywhere sold for the wrong purpose. People are allowed to buy and use them on surfaces that are not fit for painting, when a little guidance or a few helpful suggestions on the part of the retail salesman might have avoided it."

"I believe you're right," broke in the advertising man, "if the public after their conviction that painting should be done, do not receive the full value of their purchases through ignorance or lack of sufficient knowledge of facts, it most certainly is going to discount the value of any educational work that the paint trade is carrying out on a co-operative basis."

### Got Them Coming

"You get me right," remarked the salesman, "you've got the public coming. Now keep them coming with good service. While ignorance of painting and paint facts exists, it should not be allowed to be an excuse if any effort on the part of the trade can eliminate it."

"Whew——!" exclaimed the advertising man, "to think of the tons and tons of literature that every paint house has scattered broadcast throughout the country and then have this thrown in your face. The devil of it all is that I know it's only too true. It makes a fellow feel as though the job of advertising manager is put on a manufacturer's list like one of those pretty things you put on the plate rail—highly ornamental and that about lets you out. We fuss around experimenting and testing to get the latest and best information on paints and varnishes and that is all the regard that is paid to it."

"No man will ever know all there is to be known about paints and varnishes," broke in the salesmanager, "but there's a lot of people selling them that don't know all that they might. No doubt about it that the paint and varnish trade could be increased immensely if those who sell them did so on a more intelligent basis. More than once, confidence in paint on the part of the consumer, has been destroyed through the fact that the person selling it has not rendered the service that he might have done.

# Tile-Like

"Save the surface and you save all" *Paint & Varnish*

# Finish

## A Varnish and Stain Combined

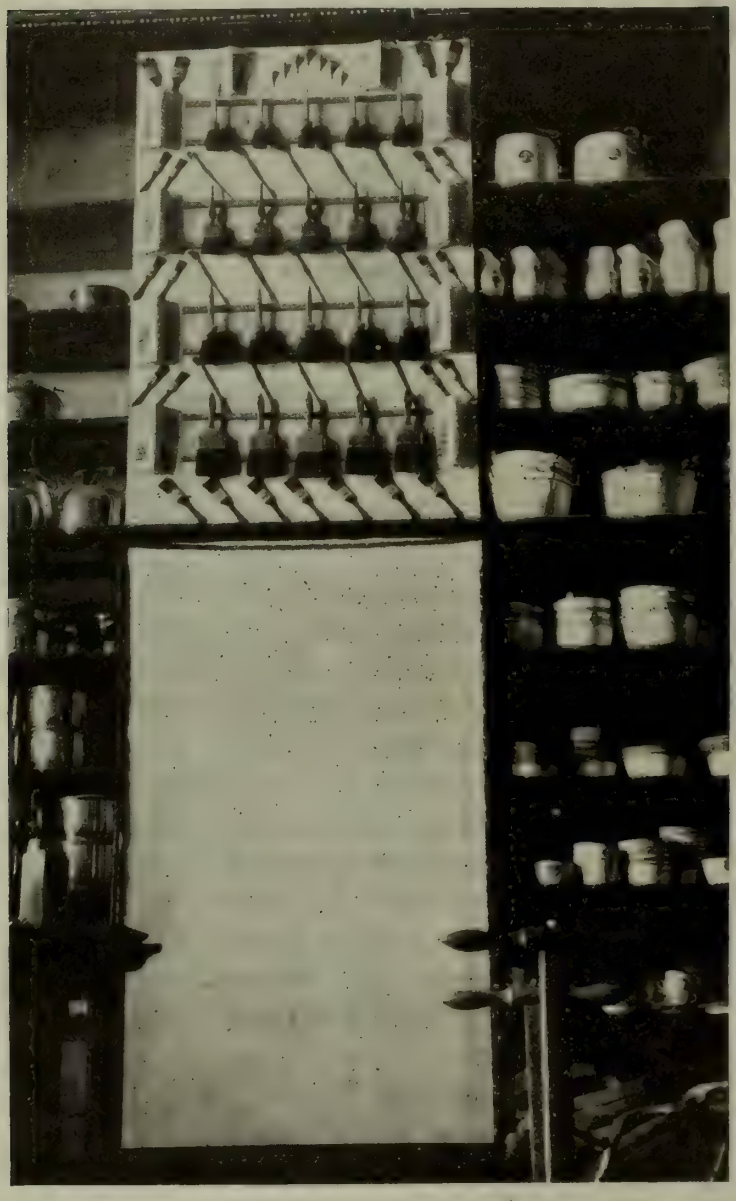
**Put up in large and small size cans**

For use on hard or soft wood floors, old furniture, wicker furniture, porch chairs, linoleum or oilcloth, etc.

Tile-Like is the greatest renovator of old furniture you can sell in your store. Makes everything look like new.

For beautiful effects and great durable wearing qualities recommend Tile-Like. It's sold at a reasonable price and there are splendid profits in it for the dealer.

Write to-day for our agency proposition. It will put you in touch with a line of Paint and Varnish products that are being recognized by the public as the **"best money value"** on the Canadian market to-day.



# Benjamin Moore & Co., Limited

**One of the Largest Paint and Varnish Industries on the American Continent**

**Toronto** **Halifax** **Winnipeg**

# The Brush Department

## Take Care of Your Stock of Brushes

*This simple yet attractive and very effective display of brushes was in process of arrangement when a representative of* HARDWARE AND METAL *dropped into the store of McPherson Bros., at Medicine Hat, Alberta. The lower panel will also show brushes. Store display is one of the easiest and best methods there is of increasing brush sales.*

"MANY merchants who handle brushes have a great deal to learn in regard to taking care of their stock," said the traveler for one of the large brush manufacturers in discussing the brush business with HARDWARE AND METAL.

"It is surprising how many firms as soon as a shipment of brushes arrives unwraps the whole consignment and dumps the brushes higgledy piggledy into the drawers or bins, where they are going to stay until sold. What is the result? In nine cases out of ten the drawers have not been cleaned for goodness knows how long. They are dark and they are warm. This simply makes an ideal place for moths to live and the moths are not a bit backward about taking advantage of the opportunity.

### Spoil the Bristles

"The damage done to bristles by neglect of this kind runs into many dollars. The larvae of the moths eat the bristles and while they will not eat them all, they seriously impair the usefulness of the brush.

"Another trouble that follows this indiscriminate dumping of brushes into a dusty drawer is that the brushes become filled with dust. Some brushes are so dusty that when people take them home they think they had better wash them, and into a pail of water they go. No new brush should be put into water as the cells of the bristles absorb the water and then when the brush is dipped into paint for work trouble starts as the paint is not absorbed and streaky work results.

### Get Knocked About

"Brushes get knocked about considerably when they are thrown into a drawer one on top of the other. I have seen brushes so cut and scratched that if they were offered to me I should hesitate to buy them. A little care in looking after the stock would have obviated this and left the brush when it was shown to the customer just as good as when it came from the factory.

"Brushes should be looked after and not thrown around or left in places where they will get filled with dust and moths. The dealer who can hand out a nice-looking, spotless brush to the customer will make sales a lot easier than if he shows one from which the dust comes in a cloud and which bears evidence of hard usage."

### BOOSTING WESTERN BUSINESS

F. J. Penberthy, vice-president and managing director of Lowe Brothers, Toronto, is in Winnipeg in connection with a Western sales campaign. Mackenzie Brothers, Limited, of Winnipeg, have been appointed sole distributing agents for the three prairie provinces. Mr. Penberthy took with him to the West as salesmen, Herman Scrotch, W. J. Keyes and Fred Hutton, of Toronto, and the salesmen selected in Winnipeg by Mackenzie Brothers include J. T. McCullough, P. W. Tinline and D. A. Macdonald.

### SAYS IT WAS SUCCESSFUL

The last issue of the "Labor Gazette" contains the following:

"A unique experiment has recently been concluded at the plant of the Humphreys Glass Works at Moncton, N.B. Last May when the employees demanded higher wages the directors proposed to hand the plant over to the men for three months if they would agree to deposit with the board twenty-five per cent. of their wages as a guarantee. This ar-

# Hundreds of Ways to sell BOECKH'S HOUSEHOLD BRUSHES & BROOMS

EVERY housewife in your locality, and there are hundreds of them, will buy Boeckh's brushes and brooms if you only demonstrate them to her——because every housewife is continually looking for brushes and brooms that will save her time, labor and expense.

Boeckh's household brushes do this——and do it so thoroughly that they have become household necessities.

Women in all parts of the country have come to realize that Boeckh's are the most satisfactory brushes and brooms to use. The demand for Boeckh's has been created——all you have to do is to supply it.

Make use of your windows to attract women to your store——display Boeckh's! Once displayed sales readily follow.

**THE BOECKH COMPANY, LTD.**

158 to 168 West Adelaide Street

TORONTO -- CANADA

rangement was carried out and during June, July and August the factory was under the control of the men, and the union scale of wages was paid. It is reported that the experiment was successful and that at the end of the period the guarantee of twenty-five per cent. was returned to the men."

### MORE FACTS ARE NEEDED TO SELL PAINT

(Continued from page 88)

Paints and varnishes are not the only line that suffer from this cause. Manufacturers and the larger stores are recognizing this fact. Efforts to remedy this condition are being put in effect by many, but these are largely in the embryo stage."

"I, with many others, have recognized for a long time, that those who sell goods, both wholesale and retail, must take a deeper interest in them. Successful merchandising no longer consists of piling up a sales record, it involves rendering the most intelligent service possible, if the confidence of the public is to be fully gained and retained. And intelligent service cannot be rendered without a thorough knowledge of the goods sold.

"The great bulk of the buying public is at the mercy of the salesman. He can gain confidence or lose it with the character of the service rendered. His business record will grow just in proportion as he renders that service which the public seek.

"The business world is hungry for salesmen who can sell with intelligent knowledge of what they are selling. If to this they can add initiative and originality of ideas, there is scarcely any limit but the sky in chances for advancement. Every salesmanager has his weather eye constantly set for such men.

"I know of several likeable young retail clerks, with good address and personality that I would like to give a try out on my staff, but for one thing; they don't know what they are selling, and they are not making any effort to inform themselves so that they can render that service that is now a necessary asset to the rising salesman.

"On the other hand, I know of some fellows of less brilliant parts who are plugging along steadily, sponging up every fact and morsel of information they can get. If somebody else don't snap them up for better jobs, I will at the first opportunity.

"So far as any effort on the part of the paint and varnish manufacturers to overcome lack of adequate knowledge about the service of their goods both with the consumer and the salesman is concerned, the problem is somewhat different in the two cases. The public had no business obligation or interest to cause them to take a deeper interest in our products other than that set before them by the advertising manufacturer. The salesman who has made the selling of goods his business should, in his own interests, endeavor to dig for every scrap of information possible that will help him to render the service he should.

"After all, it is pretty much up to the individual. By his efforts he will either sink or swim. You may lead a horse to water, but you cannot make him drink. As our advertising manager has just said, tons and tons of literature have been thrown at the trade for years, yet we find the condition that exists to-day. There are men who will rise little above the position that they occupy to-day. On the other hand, there are men, who in spite of handicaps will, and of their own initiative, rise into the trusted positions of to-morrow. Some men you couldn't raise with a derrick. Others will swim with a millstone of difficulties tied about their necks.

"If the paint and varnish trade undertake a broad educational campaign to brighten the interest of salesmen, all I can say is 'Amen,' and I'll back them to the limit. But—whether they do or not, there are sources of information galore, which a salesman can take advantage of—if he only will.

"To-morrow I am going to interview and look over a man for an important job, who studies the goods he sells and who because he renders the service at his disposal in his salesmanship is, I believe, fitted to fill the place. There are a lot of smart chaps who have applied for the place, but who I know cannot render the service I want because they have not equipped themselves as they should have done in their spare time."

## Howard W. McConnell Moving to Winnipeg

Howard W. McConnell, who, for the past sixteen years has represented the A. Ramsay & Son Co., of Montreal, has left for Winnipeg, where he will represent the firm in Manitoba and Saskatchewan. He will be associated with H. L. Perry Co., Ltd., 214 Princess St., Winnipeg, and will also have charge of the commission lines now handled by that firm. He will be located at 214 Princess Street. Mr. McConnell is a native of Morewood, Ont. During the sixteen years he has been with A. Ramsay & Son Co., he has covered the territory from Quebec City to Victoria. During 1912, '13 and '14 he was in the wholesale trade out of Winnipeg. In 1915, '16 and '17 he was in the wholesale trade in Toronto, and looked after points between Kingston and London.

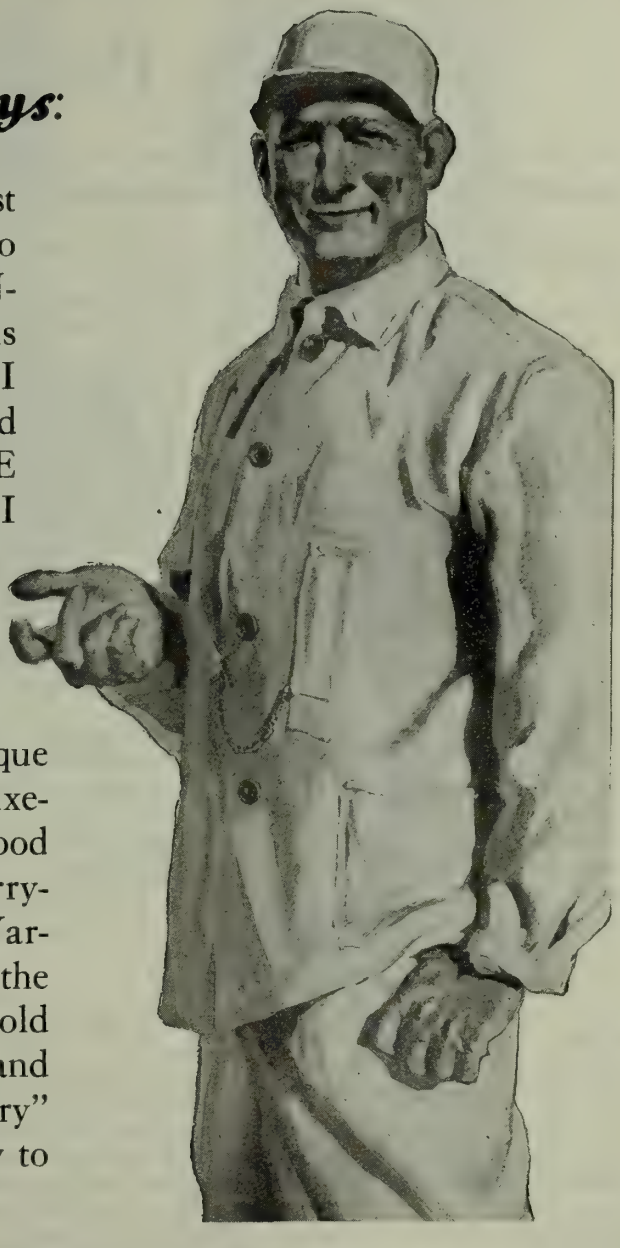
HOWARD McCONNELL,
Who is going to Winnipeg as Manitoba and Saskatchewan representative of the A. Ramsay & Son Company, of Montreal.

## Brandram-Henderson Hold Western Conference

In the Royal Alexandra Hotel at Winnipeg on September 24 and 25, the managers and salesmen of Brandram-Henderson, Ltd., met for a conference on business conditions and to consider the program for 1920. This conference was presided over by W. S. McLennan, general sales manager, of Montreal, and there were in attendance, also, the managers of Western branches from Winnipeg to the Coast. J. Leonard Paul, manager Western division, Winnipeg; George E. Smith, manager B. C. division; and F. E. Truesdale, manager Alberta division, addressed the conference and fifteen salesmen from the various territories covered in the West came in to Winnipeg for the two days' discussions.

While in the West, Mr. McLennan sized up the general conditions and expressed to HARDWARE AND METAL his great satisfaction with the outlook. "Some districts will suffer," said Mr. McLennan, "owing to poor crops. But as the territory is a vast one there will be many places that will reap a fair yield and in a general way we expect that business will be as large as it has been. Some districts will show up well, and while there are some sections that were hard hit, it average will be quite satisfactory."

The following program was carried out during the duration of the Winnipeg conference:



**Wednesday, September 24th, 1919.**

Group Photo at Office.
Visit to Grain Exchange Pit.
Luncheon—Carleton Club.
Opening Business Session at Royal Alexandra Hotel—W. S. McLennan (Chairman).
Advertising Campaign for 1920. By W. S. McLennan.
General Discussion — Advertising Campaign for 1920. By Conference Members.
Adjournment.
Informal Dinner at Royal Alexandra Hotel.
Theatrical Party.

**Thursday, September 25th, 1919.**

Auto Tour of City, starting at Royal Alexandra Hotel.
Managers' Meeting at Office.
Agency Talk:
(a) What Constitutes an Agency. By W. S. McLennan.
(b) What is Hoped For in an Agency. By George E. Smith.
(c) Regulating Agent's Cost. By J. Leonard Paul.
Agency Discussion. By Conference Members.
Lunch. At Royal Alexandra Hotel.
Business Session at Royal Alexandra Hotel.
Sales Campaigns for 1920. By W. S. McLennan.
General Discussion of Sales Policies. By Conference Members.
Reports on any Salesman's request.
B.-H. Product Discussion. Conducted by W. S. McLennan, at which time members are requested to seek information needed concerning manufacture and use of different products.
Closing.
Informal Dinner. At Royal Alexandra Hotel.

# The Luxeberry Painter Says:

"I guess the Simpson folks must have brought in all the neighbors to see the floors I LIQUID GRANITED for them. I've had more calls to finish floors 'like Simpson's' than I can take care of. Some don't wait and are buying the LIQUID GRANITE and doing the work themselves. I always use LIQUID GRANITE. Every such floor is a lasting testimonial for me."

Liquid Granite is one of the unique group of finishes that includes Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall Finish, Berrycraft Stain Finish, Luxeberry Spar Varnish, etc. These finishes have made the name of Berry Brothers a household word among achitects, painters and home builders. This is why all "Berry" products are so easy and satisfactory to sell.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, October 2.—Linseed oil prices show greater spread this week, and there is likely to be a freer supply in the course of a couple of weeks. In the meantime, seed shipments are finding their way eastward and these should soon relieve the rather stringent situation that has existed these many weeks. Turpentine prices have been somewhat easier in one or two quarters, and there is little increase in the available stocks yet. Movement of putty and white lead in oil is seasonably satisfactory, while mixed paints and specialties are very active.

### *A Few Weeks Still Before Oil Plentiful*

**Montreal.**

LINSEED OIL.—It was hoped that there would be relief in the matter of linseed oil supplies before now, but crushers state that another two weeks will be required to secure supplies and crush the seed for marketing. The basis thus far is therefore a decidedly nominal one. Within a short while there will be relief in point of supply and perhaps prices will rule somewhat lower. Just at the present time there is practically no supply to be had in quantity, and the quotations below the for single barrel lots.

| Raw— | Imp. Gal. | |
|---|---|---|
| Single barrels | $2 90 | $3 02 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| **Boiled—** | **Imp. Gal.** | |
| Single barrels | $2 92½ | $3 04½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *Greater Spread Moves Turpentine Downward*

**Montreal.**

TURPENTINE.—The local situation is not changed a great deal excepting that one jobber has reduced his price on single barrel lots to $2.45. There is not much improvement in the supply, but with consumption rather limited there has been little distress in this market.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | $2 45 | $2 65 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Putty Movement Has Not Started Actively*

**Montreal.**

PUTTY.—While there will be a heavy movement of putty in the next few weeks, the activity is not marked as yet. The undertone is steadily firm and no changes are anticipated at the present time. Supplies are ample to meet the requirements of the trade.

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days, net 60.

### *Seasonable Goods Sales Of White Lead in Oil*

**Montreal.**

WHITE LEAD IN OIL.—The movement of this commodity is an active one but the sales are just what the season would usually bring. The undertone is steady, and without features of importance the following basis obtains on the various quantities usually purchased: Five-ton lots, per 100 pounds, $15.50; 1-ton lots, $16, and smaller lots, $16.35.

### *Mixed Paints Sellers On Extensive Basis*

**Montreal.**

MIXED PAINTS.—While paint makers have anticipated a quieting down of business conditions for these goods, there has been little diminution in the outgo. One large manufacturer stated that the activity was quite as marked in point of actual business as it was in the early summer months. Much fall painting must be done now, and the fine sunny weather, if continued, will account for many a job being done this fall. The basis is, of course, unchanged.

## TORONTO

TORONTO, October 2.—There is a tendency for linseed oil to be very slightly easier, but crushers are still having difficulty in obtaining supplies of seed and are not looking for any material decline until the middle of December. Prices range from $2.95 to $3.25 per gallon for raw oil, and from $2.97½ to $3.28 for boiled. Conditions resulting from the big strikes in the United States and England have temporarily depressed the turpentine market at primary points, and this is reflected in slightly easier conditions here. Turpentine prices range around $2.45 to $2.50 per Imperial gallon. Paint manufacturers report large bookings for the spring. There is little chance, they state, of any reduction in the prices.

### *Linseed Oil Prices Show Wider Range*

**Toronto.**

LINSEED OIL.—Linseed oil prices show a slightly wider range this week. Deliveries of seed for immediate use continue slow. Little change is looked for in prices before the new crop comes in and deliveries after the first of the year will, it is stated, be made on lower quotations. It is stated that some of the American paint firms are making large purchases for future delivery, preferring apparently to pay the Canadian price, plus the duty, to buying at home. The latest reports indicate that the flaxseed crop will be a splendid one as the excellent fall weather has allowed the seed to develop nicely. Estimates are that it will run over 7,000,000 bushels. Linseed oil quotations are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | $2 95 | $3 25 |
| 3 to 5 barels, gal. | 2 94 | 3 24 |
| 10 barrels and over | 2 92 | 3 22 |
| | **Boiled** | |
| 1 to 2 barrels, gal. | $2 97½ | $3 28 |
| 3 to 5 barrels, gal. | 2 96½ | 3 27 |
| 10 barrels and over | 2 94½ | 3 25 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

### *Trading is Quiet In White Lead in Oil*

**Toronto.**

WHITE LEAD IN OIL.—Business in white lead in oil is a little quieter. No change is shown in the quotations, which are as follows: Five-ton lots, $15.85 per hundred pounds; 1-ton lots, $16.35, and in smaller quantities, $16.70.

### *Turpentine Prices Temporarily Easier*

**Toronto.**

TURPENTINE.—As a result of all shipments overseas being held up at Southern points, due to strike troubles in England and the United States, the market at primary points is depressed. The condition exists that while a nominal price exists there is absolutely no goods to be purchased at the figures quoted. Deliveries from the South have been very slow, and as far as local conditions are concerned stocks are getting very low. Prices in Toronto are a little easier and range around $2.45 to $2.50 per Imperial gallon. According to advices from the South, the depressed market is merely temporary as with the resumption of shipping there are large orders to be

# A Chance to "Cash In"

We offer you a chance to "Cash In." Why waste your time with a line of Paints and Varnishes that requires uphill work to sell, when you can link your store's future to a Brand to which the public has been completely "won over." We long ago secured the all-important "quality" advantage—by **knowing how** to make a superior Paint. We later secured the "publicity" advantage — by consistently advertising our product in aggressive and unusual ways. Both these advantages we hand over to you the day you become our Agent.

We offer you a chance to "Cash In" on B-H prestige—a chance to get the trade of all those people who have been converted into staunch adherents of the B-H line by reason of what we've told them about it through our national advertising.

We place at the disposal of our Agent a complete assortment of color cards, counter cut-outs, store fixtures, window displays and newspaper ads, etc.—we co-operate with him to the fullest possible extent.

**Write us for particulars of our attractive agency proposition.**

"Save the surface and you save all" *Paint & Varnish*

filled. In addition there is a big home demand to be filled. No supplies are being offered, those having them preferring to sit tight and await developments. Quotations are as follows:

| Turpentine— | Imp. gal. | |
|---|---|---|
| 1 barrels (barrel included) .... | $2 45 | $2 50 |
| 2 to 5 barrels (barrel included) | 2 44 | 2 49 |
| 5 gallon lots ..... | 2 55 | 2 60 |

## *Good Paint Orders For Spring Delivery*

**Toronto.**

MIXED PAINTS. — Manufacturers state that orders are coming in most satisfactorily for spring, and also that business continues to come in for the fall trade. "There is a lot of painting to be done," said one manufacturer. "People for one reason or another have not been able to get at it. We are looking for good business throughout the fall, and an excellent business in the spring." There is no indication, manufacturers state, of any immediate change in prices.

## *Glass and Putty Holding Unchanged*

**Toronto.**

GLASS, PUTTY.—Business in both window and plate glass is fairly active, as might be expected at this season when so many buildings are being finished up. No changes have been made in the quotations. There are rumors that putty prices may be revised upwards shortly but there is nothing definite regarding this. Quotations are as follows:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels ..... | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron ... | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron .... | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons.. | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels ... | 7 10 | 7 35 | 7 70 |

## Small Paint Sales Make Big Aggregate

Frank J. Penberthy, of Toronto, vice-president and managing director of Lowe Brothers, discussing conditions in the trade in Winnipeg recently, said:

"The paint business is so good that we are all happy. The demand has been continuous through the war period and is large and continuing so still. Many people are under the impression that there is a close connection between the amount of new building that is done and the general prosperity of the paint business. This is not the fact at all."

In the fall of 1914 there were a very large number of people in Canada who were thrown out of employment. Yet in that fall we sold four times as many quart and pint tins of paint as in any similar period in our history. It is a question of a citizen having some spare time and a little money.

You must remember that there is as a rule three or four times as much painting space inside a house as there is outside. When a man builds a new house, he paints the outside, and as far as the paint business is concerned, there is nothing further stirring for six, seven, or eight years. What creates the demand for paint is the work which is done on the kitchen floor, on the verandah, the touching up of the house, the painting of the flower pots, etc., the little insignificant jobs, which yet aggregate immense amounts in the total.

### CHANGE IN CONTROL OF JOHN LYSAGHT, LTD.

(Continued from page 80)

past, in charge of A. C. Leslie & Co., Limited, Montreal, who have been agents for the company's products for over fifty years. Canadian users of sheets will, therefore, be specially interested in this new development, and there is every reason to believe that the future policy of the company will include an active campaign in Canada, whether they should decide to manufacture here or to continue shipping the sheets made in Great Britain.

### WHOLESALERS' BANQUET

(Continued from page 65)

still they "sell iron and steel for a living." It's an honest man that will "fess up."

Past President Dowling's smile bespoke his real appreciation of the kindness manifest through the presentation made of the fine silver tea set. HARDWARE AND METAL doubts not that the genial recipient will become justly famous now as an expert tea maker.

Who said the weather had been wet in Montreal recently?

Is it any wonder that T. B. Williamson felt at home in Montreal? With a genial spirit like Archie MacFarlane leading in the husky piper it was full weel enough to make one's teeth fairly water.

Credit is certainly due to the entertainment committee for the royal manner in which they treated their many guests. Such plans, to be a success, must needs call for hard work.

The presence of the "American Cousins," Messrs. Decatur and Fernley, lent an air of international interest to the banquet. They were warmly received.

One's musical taste could be well met at the banquet. There was a song sheet —a great long one with an excellent selection of soul-stirring airs—the Marsellaise among them. Then there was comical Jimmy Rice, with his variety monologues, but the evening's pleasure would have been less complete without Archie MacFarlane's piper—he was great.

You can get anything—almost anything, in Montreal. But there are intricacies connected with satisfying one's thirst that all are not aware of. It pays to ask questions—you may thus secure the password.

Although relieved of his responsibilities only twenty-four hours, Retiring President Dowling told HARDWARE AND METAL that it felt strange to have laid aside his mantle. In heart he will continue to be a hard worker in the interests of better association effort.

### GOOD STOCK WILL BRING CUSTOMERS

(Continued from page 72)

help this and also his connection with contractors.

Sales of tools are always good, he says, and have been helped greatly by both window and store displays.

"I used to have a small stand of saws on display," said Mr. Platt, "now we have the wall cases and we easily sell ten times as many saws as formerly, and I think the same holds good of other tools."

"We also sell a great many alarm clocks and have good sales of razors and cutlery."

#### A Separate Department

Sales of household goods have been growing so steadily that Platt Bros. plan to make a separate department for them and place them in a store to themselves. It will be immediately adjoining the present premises.

"We have had so many inquiries for suitcases that I am going to stock them, too, and will put them with the household goods," said Mr. Platt. "I am planning to put the entire household goods section in charge of a woman. A great deal of the buying in these lines, enamelware, washers, stoves, etc., is done by the women, and I think if we have women to sell them the things they can talk to them better, perhaps, than a man can. At any rate, that is what I am planning to try out."

## CATALOGUES and BOOKLETS

### ASHDOWN'S PUBLISH JUBILEE BOOKLET

An attractive booklet comprising a short story of the founding of the J. H. Ashdown Hardware Co., of Winnipeg, a brief review of the building of its trade, an account of its different locations in Winnipeg, Calgary and Saskatoon, together with a brief biography of Mr. Ashdown from his early boyhood up to the present day, was published by the printing department of the company in connection with its Golden Jubilee. The booklet is a sample of the best workmanship in printing, and is complete even to gold embossed lettering on the cover in an illustration of a standard-bearer sounding a trumpet call. The booklet is a tribute to the completeness of the Ashdown printing department, which is under the management of W. S. MacDonald, manager of the printing, catalog and advertising departments.

**TORONTO MONTREAL WINNIPEG VANCOUVER**

# Now is the Time to Secure Agency for
# C·C·M· Bicycles

EXPERIENCED bicycle dealers are placing their orders now for next season's requirements.

An unusually large number are requesting delivery this Fall, although March or April delivery may be specified if preferred.

Naturally, prompt action means a better choice of the nameplate agency than might be made later.

For Price, Agency Terms and full particulars, see the C. C. M. representative or address Head Office or nearest branch.

The Principal C.C.M. nameplates are:

**Massey**
**Gendron**
**Columbia**
**Ivanhoe**
**Perfect**
**Cleveland**
**Brantford**
**Red Bird**

## WHERE IS HE?

The CALM, CAUTIOUS man who weighs his proposition thoroughly—
The cool, CALCULATING man who looks ahead and considers RESULTS—
The SCIENTIFIC man who **insists** on FACT—PERFORMANCE—PROOF—who will not be told—who wants to see for himself—to know.

For such a man Lowe Brothers have an opportunity he has been looking and waiting for. They offer him a DIFFERENT proposition.

If you are HE—challenge them by a card to **show** you how they are different and how their difference affects your production—your PROFITS.

**LOWE BROTHERS LIMITED**

have for you an INDIVIDUAL service—an INDIVIDUAL Proposition. Communicate with them now. Looking into the High Standard proposition means looking into your PRODUCTION.

Lowe Brothers LIMITED

# A SPLENDID TIME

TO PUSH THE SALES OF WINDSOR SOLVENT STAINS IS THE FALL SEASON.

Dealers who are themselves educated to the wonderful performance of these stains reap fine profits with very little effort—just from showing the stains and carrying on a very simple demonstration of what can be done by their use.

IT SEEMS LIKE MAGIC to see the wood changed in color without disturbing the original varnish surface. The stain penetrates the varnish, leaving it intact, but light oak may be made mahogany, walnut turned to green or weathered, and similar combinations.

A SIMPLE REQUEST to us will bring you all information and put you on the road to additional profits in your paint department.

## "New Era" Paints

ARE "**QUALITY**" GOODS. Their reputation puts them in the very fore-front of Canadian paints and marks the agent as a "QUALITY DEALER."

Floors painted in the fall make an all-winter pleasure in the home. They give brightness and warmth to the dull and cold seasons. See that you have FLINT COAT in all the lovely colors, prominently displayed just now.

# Jamieson Sales Mean Larger Profits

"Save the surface and you save all" Paint & Varnish

## *ASK*

the dealer who has been selling our line.

***"HE IS A SUCCESS"***

The veteran painter, tried and proved, the man who does paint well.

***"HE KNOWS"***

The chemist, who can analyze,—he smiles and says

***"ALL RIGHT"***

## *Because*

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

# Economy Is a Great Sales Force

## SILKSTONE

(REGISTERED TRADE MARK)

**FLAT WALL COLOURS**

**The Economic Appeal** is a powerful force in business to-day. Economy for your customer can also mean good profits for you—no salesman needs argument on that. It may mean larger profits on each sale, or more turnovers per year; what you as a business man want is a constant flow of money with a profit in it to your cash register. Silkstone Flat Wall Colours fill this want exactly. Cheaper than wall paper, more sanitary and longer lasting, it can be washed often and never rubs off.

Silkstone gives a beautiful, soft, silky finish. The economy of Silkstone appeals forcibly to all.

**There is something ahead for you; write for our agency proposition.**

# THE BIG MARKET
## *—IS AT HAND—*

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

***THE EDEN DOMINATES ITS MARKET***

Because its construction is time tested.

Because it has twenty-five inimitable and exclusive features.

Because it is nationally advertised.

Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

***THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.***

## Fifty Years in Step With the Progress of the Canadian Northwest

Each day of the fifty years from 1869, when the first Ashdown store was erected and goods were shipped by ox-cart, to 1919, when a marvellous wholesale organization supplies Western Canada by trainload shipments, the name of J. H. Ashdown and the Diamond "A" Trade-Mark have gained a stronger place for Quality and Service in the confidence of the public.

Half a century of successful merchandising is behind Diamond "A" Trade-Mark. It stands for the highest quality hardware and is backed by all the resources of the largest hardware house in Canada.

## Fifty Years of Service Backed by Continuous Public Confidence

have made Ashdown's a household word for good hardware.

From the days of the Indian, the Pioneer and the Buffalo to the days of the Automobile, the Submarine and the Airplane, Ashdown's has been building, day by day, a great promise of continued faithful service and highest quality during the next 50 years.

THE varnish that gives floors a hardwood finish—brings out the natural grain perfectly.

Specially made for the hard usage to which floors are subjected.

—impervious to water—even boiling water won't hurt it;
—elastic—don't show tell tale heel marks;
—durable—don't show white marks when scratched.

DRY COLORS

This is the season when folks overhaul the house for winter. It's a season when, following fall housecleaning, many small repairs are made—broken and cracked window glass reset, floors, doors and furniture varnished or waxed. There is inside and outside painting to be done.

Be stocked up to meet the demand.

**Write us to-day.**

# CARTER'S

**Carter's Genuine Red Lead Means Good Business for You**

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

**Carter's Genuine Dry Red Lead**

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

*We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.*
*Make sure you have ample stock on hand.*

**The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal**

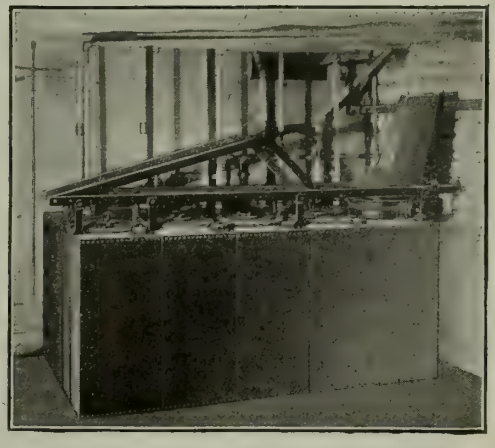
EHRET MAGNESIA MFG. CO.—85% Magnesia Products.
ASBESTOS PROTECTED METAL CO.—Corrugated Siding and Roofing.



# System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

## Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

# BARCALO

## "S" Wrench

No Mechanic's Tool Kit is complete without a Barcalo "S" Wrench.

On the difficult jobs—in the tight corners—there's where it proves its worth.

The Barcalo "S" wrench is a Quality Wrench. Made from the best materials—of few parts, simple in construction, strong, and handy to use.

We absolutely guarantee this wrench unreservedly.

Barcalo Wrenches are **"making good"** and dealers are **"making money"** selling them.

Sizes — 6, 8, 10, 12 and 14 in. Write to-day for catalogue and prices.

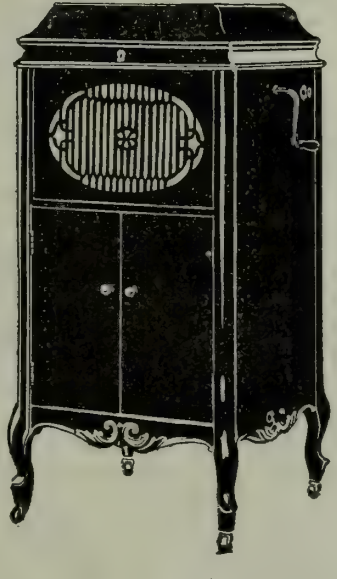
The Brunswick
ALL PHONOGRAPHS IN ONE

# Now's The Time To Put In The BRUNSWICK Line

This is the harvest season in the phonograph business. You might just as well be making the extra profit which the Brunswick line will bring you.



Because of its new method of reproduction the Brunswick is the FINAL phonograph. "It is all phonographs in one."

## The Ultona

—an exclusive Brunswick invention — plays a very important part in phonograph sales. It carries the Diamond Point, the Permanent Jewel Point and the steel needle holder ALWAYS in position, ready, at the mere turn of a hand, to play each make of record. Then, in the tone arm is the WEIGHT ADJUSTMENT that gives the exact weight for each record and prevents all possibility of injury to any make of record. This is a selling point of exceptional value and found only on the Brunswick.

## The All-wood Oval Tone Chamber

In this Brunswick feature you have another most convincing selling point. The complete absence of all metal in its construction results in the elimination of harsh metallic notes. This is no mere assertion. It is a fact that you can prove to every customer by actual demonstration. This tone-chamber combines with the Ultona to give the perfect method of reproduction. It is the method that makes the Brunswick the one truly universal phonograph.

Progressive dealers everywhere are adding the Brunswick as a line that can be depended upon for permanent business development.

***Increase Your Phonograph Sales This Fall***

The Brunswick will help you do it. Now is the time to secure an agency. Write to-night for our dealer's proposition.

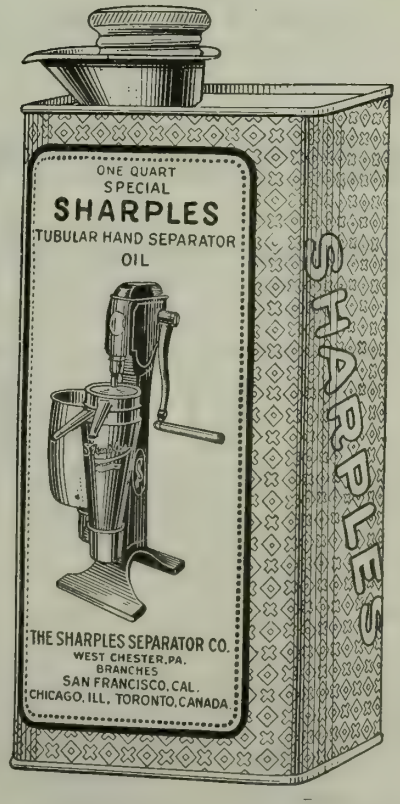
# A *special* lubricating oil that makes separators run more smoothly and last longer

The Sharples Separator Company, the pioneer and largest manufacturer of separators, has made and put on the market a special oil for separators.

This oil has been perfected after many tests in the Sharples factory—first to make a separator run faster and better, and second, to keep the separator in a uniformly good condition. Fifty per cent of the breakdowns in all separators is due to the use of the wrong oil. The high speed which a separator attains requires



## SHARPLES SEPARATOR OIL

As a dealer, you should feature and sell Sharples Separator Oil because of the large profit it pays and because every owner of a separator, emulsifier or clarifier is a logical prospect. The field is *wide open.*

The strong, handsomely lithographed container is an advertisement in itself. Display it on shelf or showcase. It will attract attention and bring sales. Arrange now for an advertising display of Sharples Separator Oil.

Write today for full particulars, prices and selling plan.

***Sharples Separator Oil comes in quart and gallon cans.***

HARDWARE AND METAL'S electro catalog shows upwards of 400 hardware electros. These are supplied, mounted on wood blocks, at 25c each. Write for free booklet showing assortment.

HARDWARE AND METAL
Electro Service Dept.
143 University Ave. Toronto, Can.

## INCREASE YOUR SELLING CAPACITY

How much of the valuable time is there taken of your limited staff of salesmen by running for the purpose of change making? It is fair to presume that one-sixth of it is necessary during the busy periods, when their services are most valuable, which is equivalent to one salesman's time for this purpose in an establishment where there are six salesmen employed; in other words, five salesmen can perform the duties of six when the running is eliminated.

Our Cash Carriers will do this for you, even in a more rapid and efficient manner, and at a greatly reduced cost. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money would be in the custody of one person.

**GIPE-HAZARD STORE SERVICE CO., LTD.,**
**113 Sumach Street**
**Toronto, Ontario, Canada**

## Trade With England

British firm, with important offices in the City of London, England, is prepared to accept selling agencies for Canadian manufacturers of household articles.

Show-room and full selling organization are offered.

**No. 443 c/o Hardware and Metal**
**143-153 University Ave.** **Toronto**

# Is the Alien a Menace?

IN the October issue of MACLEAN'S MAGAZINE a strong presentation is made of the reason why the people of the West are against further foreign immigration.

"The Menace of the Alien" depicts the foreign problem in the Canadian West as it exists to-day, and shows every one of us why we must Canadianize our Ruthenians, Austrians, Slovaks, and our fifty-seven other varieties before we allow any further "unrestricted" immigration.

This article is written by a member of MACLEAN'S MAGAZINE staff who has just returned from a careful, personal investigation of the situation. Shall we have a "White West?" Many Westerners are demanding it. Are the aliens to swing labor into the bosom of the O.B.U.? It is being done—and what must we do to stop it?

The "inside" story of the routing of the Drumheller miner aliens by returned Canadian war veterans is here hold by MACLEAN'S for the first time. What leadership must be substituted for the O.B.U. leadership of these foreigners?

*The October issue of MACLEAN'S is a Western number in the sense that it contains many articles and stories of distinctly Western interest. For instance:*

### X "Those Pesky Farmers Out West"

*By Hopkins Moorhouse, author of "Deep Furrows"*

They have completely upset the old order of things. No longer will politics consist of the comfortable fight between the Ins and Outs with the old party lines maintained. The grain growers on the Prairies have upset the calculations of the professional politicians and completely changed the face of Dominion politics.

### X "Fifty Years in the West"

*By Professor W. T, Allison*

A breezy and readable sketch of the business career of Winnipeg's veteran business man, James H. Ashdown.

### "Further Discoveries of New Lands"

*By Vilhjalmur Stefansson*

The final and most interesting instalment of Mr. Stefansson's story of his wonderful trip of five years' duration in the Canadian north in which he tells for the first time of finding new continents in the Arctic and hoisting there the Canadian flag.

### X "The Banshee Bell"

*By Edith G. Bayne*

A bright love story laid in the mountains of British Columbia.

## *Other Splendid Features of October MacLean's*

### X "The Turmoil at Ottawa"

*By J. K. Munro*

A comprehensive survey of Dominion politics, written with complete impartiality and absolute candor. It is bright and breezy, with a knock in every line for the politicial opportunists. It plucks many tail feathers from our party leaders.

### "Spanish Doubloons"

*By Camilla Kenyon*

The start of a bright and fascinating serial story by a brilliant young writer. It is the Spanish Main brought up-to-date, treasure hunting with a background of fun and romance.

### "The Airy Prince"

*By Arthur Beverley Baxter*

A complete novelette in which is presented a bird's-eye view of England in time of war. It is one of the most brilliant stories that has been written of recent years.

### "His Majesty's Well-Beloved"

*By Baroness Orczy*

The latest novel by this popular authoress appearing exclusively in MACLEAN'S.

### "Ebb and Flow"

*By C. W. Stephens*

A strong business story laid in the province of Quebec.

*Over 70,000 Canadian Families Buy*

# MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

## *OCTOBER ISSUE* *Now On Sale At All News Dealers* 20c

**If there are no newsdealers in your town, or if your newsdealers cannot supply you, send 20 cents for a sample copy or $2.00 for a whole year's subscription to MACLEAN'S MAGAZINE, 143-153 University Avenue, Toronto, Canada.**

# 70% of these cars are lubricated with Imperial Polarine

Motorists everywhere depend on Imperial Polarine for efficient lubrication. Over seventy per cent. of the motor cars in Canada are lubricated with Imperial Polarine.

Practically seven out of every ten cars which pass your door are giving satisfactory service because lubricated with Imperial Polarine. Dealers who sell and recommend Polarine are reaping the harvest of this consumer satisfaction. Motorists naturally buy where they know that their grade of Imperial Polarine is carried in stock in the size they want.

If you don't carry the complete Imperial Polarine line you are automatically keeping much of this business away from your door. The customers you do get may expect just oil when they ask for oil—but the chances are they expect Imperial Polarine. If they don't come back it may be because you didn't give them Imperial Polarine.

If you expect to get 70% of the business from your territory you should carry a complete line of Imperial Polarine—then you'll satisfy your customers—and they'll come again for more Imperial Polarine and other motoring needs as well.

There's a big profit in Imperial Polarine when you build up your volume—a profit worth fighting hard to keep coming.

**Write to 56 Church Street, Toronto, for advertising matter, dealer helps and our dealer proposition.**

**BRANCHES IN ALL CITIES**

# You Can Have Brighter, Cleaner Stocks

RID your store of dust—customers both men and women dislike dusty goods. Bright, clean merchandise creates a desire to purchase. Banish dust from your store and maintain your reputation for clean merchandise.

Dust cannot rise if your floors and shelving are treated with Imperial Standard Floor Dressing—the modern dust preventer.

## STANDARD Floor Dressing

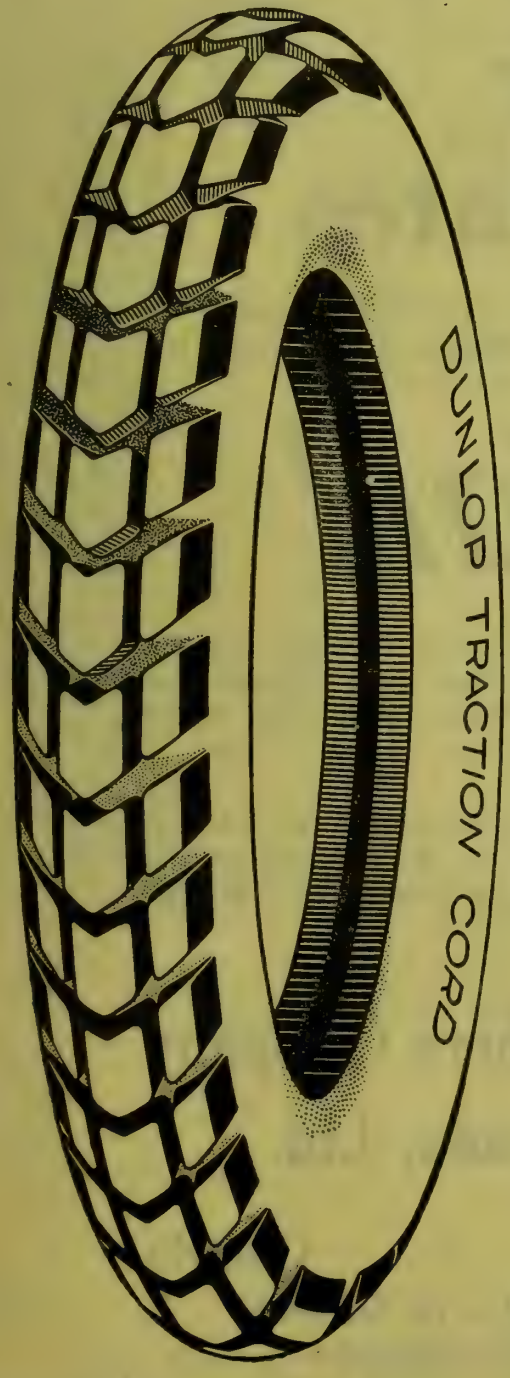
prevents dust by its action. Floors treated with it retain their first clean smoothness. To keep the floor clean, sweep regularly with a stiff broom.

Imperial Standard Floor Dressing is a high quality non-evaporating *preservative* for the surface of wood, linoleum and oil cloth. One application every three or four months will keep dust off your merchandise and your floors bright and clean.

A gallon is sufficient to treat 500 to 700 square feet of floor surface.

Apply with the Imperial Floor Oiler or an ordinary sprayer.

Sold in one gallon and four-gallon cans, also half-barrels and barrels.



Ask the Imperial Oil man.

## IMPERIAL OIL LIMITED

BRANCHES IN ALL CITIES

# Dunlop Cord Tire —a Triumph

The tremendous popularity of Dunlop Cord Tires to-day is because of the actual lower tire cost per mile when the car is equipped with them; the greater freedom from road shocks, the smaller gas consumption, our fair and square price list and many other features, both money-saving and nerve-saving.

Test Dunlop Service at any Dunlop Depot.

Dunlop Cord Tires, either tread—"Traction," "Ribbed."

Dunlop Fabric Tires obtainable in "Traction," "Special," "Ribbed," "Clipper" and "Plain."

# SHOW IT —It Sells Itself

Show the motorist how this little vulcanizer can permanently vulcanize his punctured tubes —as good as new—with a firm, flat, feather-edge, **vulcanized** repair—in 5 minutes.

He has read about this wonderful vulcanizer in our advertisements—now let him know you sell it.

Let him see how simple it is—that anybody can perfectly mend tubes with it—anywhere—in any weather—without gasoline, cement or flame—without delay, without danger of injuring the tubes. The vulcanizer will quickly **sell itself.**

The Shaler 5-minute Vulcanizer gives you a good profit selling the vulcanizer—and besides it makes motorists come back to you to buy Patch-&-Heat Units to use with it—and you get "repeat sale" profits—regularly—selling additional Patch &-Heat Units.

## Get These Big Profits—*Order From Your Jobber NOW*

Start now—to increase your sales and profits by demonstrating the SHALER 5-Minute Vulcanizer. It builds business—it sells itself. Order from your jobber to-day to insure prompt delivery—write us for catalog of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use.

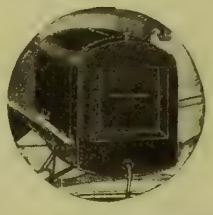
# PUSH THESE FOR FALL SALES

Now that the fall chill is here these wind breakers will please your Ford customers. Show them.

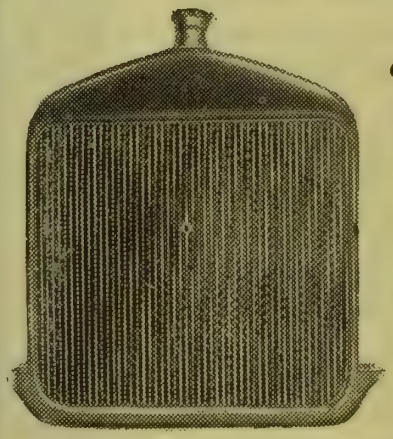
Also, these stick tight curtain windows help keep out the cold.



The early dark of fall means that a trouble lamp will come in handy.

Engine covers make the car start easily in cold weather and save gasoline.

While keeping the engine warm why not suggest a car heater.



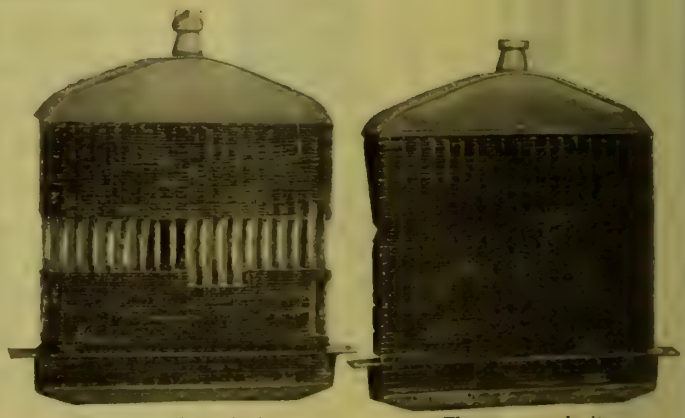
**Mr. Dealer—the next move is to try our "24-Hour Service Worth While." We have them all in stock.**

## WALKER-VALLANCE LIMITED

HAMILTON - - - CANADA

# A Frost-Proof Radiator

## "Perfecto" Radiators



are built on scientific principles, with the greatest cooling service made. No overheating in summer. We know the capability of the "Perfecto" Radiator thoroughly. As an evidence of our confidence in the superiority of the "Perfecto" we offer the following guarantee:

"The undersigned hereby guarantee the "Perfecto" Frost-Proof Radiator, numbered 1919-20, against frost for the coming winter ending March 31st, 1920, by replacing same with our new Perfecto Radiator if same has been burst from frost.

"Guarantee Sheet Metal & Roofing Co."

**A MONEY-MAKING AGENCY.**

A splendid opportunity to increase your turnover lies in "Perfecto" Radiators. Write to-day—a post card will bring the proposition. Ford size, $50. Estitmates free on other sizes.

The way others do it. The way we do it.

## Radiator Repairs

If it's repairs, we have the most up-to-date Radiator Repair Department in Western Canada. Give us an opportunity to demonstrate for you the right kind of repairs—the kind that satisfy.

## Guarantee Sheet Metal & Roofing Company

**490 Portage Avenue, Winnipeg**

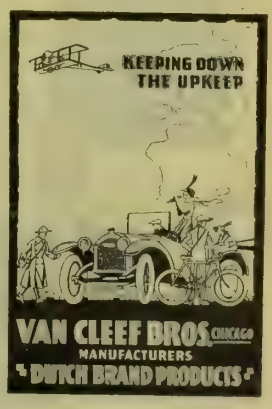
# DUTCH BRAND PRODUCTS

## 2 in 1 Cut Filler

**ONE OF OUR BIGGEST SELLERS**

Motorists use Dutch Brand 2 in 1 Cut Filler for filling small cuts, bruises and gashes in casings. This heavy, liquid rubber prevents formation of sand and water pockets.

Easily applied; dries quickly.



One dozen tubes in attractive cartons—a real "Sales Help." Through your jobber, or write us.

## Fine Shelf Goods For Hardware Merchants

Our lines cover many needs of automobiles, bicycles, trucks, tractors and airplanes. Some of these money makers are Auto and Cycle Patching Cement, Vulcanizing Cement, Radiator-Seal Compound, Valve Grinding Compound, Gasket Shellac—Tire Talc, Tire Fluid, Friction Tape, etc.

### *"Keeping Down the Upkeep" Keeps Sales Up*

We want you to have this little book telling about our products. If you are not already selling Dutch Brand products we'd like you to know about them.
Situated at Chicago we are able to serve Canada promptly to the East or West.
We have splendid equipment for turning out goods; modern buildings, methods and appliances; we maintain a high standard; we advertise extensively, and take care of the trade.

**77 to 78 Sts.**

From A to Z

VERY little verbal argument is necessary to effect a sale in the case of

## "SPHINX"

**England's Most Durable Plug**

interest is at once created in the attractive green metal box with the ingenious sealing band permitting the lid to be opened and the identification card to be perused. The sterling merits of the plug enclosed are vouched for by the Guarantee, unequivocal and without time limit, printed plainly on the box.

It is easy to sell Sphinx Plugs—and profitable. I shall be pleased to quote and to send you literature on request.

Sole Agent for Dominion: Wm. T. Evans, 1084 St. Urbain St., Montreal

Manufacturers: Sphinx Mfg. Co., Birmingham, England

Patent Pending.

**Keep your chains from running too loose with**

## Merchant's Anti-Skid Chain Tightener

**$1.00 PER PAIR**

Catching the chain at five points gives even tension all around. You can not lose chains and yet the chains are allowed to creep around wheels. Simple, light, neat, compact, durable — easily carried and easily applied. Can be used on any tire. If your dealer can't supply you, write us direct.

M. H. MERCHANT CO., 236 Emma Street, Syracuse, N. Y.

# Every Motorist Is a Locktite Prospect

Because it seals a rip or hole in a tube absolutely tight—in a jiffy—with no waiting for the patch to set—

Because it is a complete tube repairing patcher—with cylinder and clamp for holding tube in place—with emery—with strong, Locktite, canvas-back patching sheet—gasoline swab—tube buffer and cement—

That's why the Locktite Auto-New-Matic Patcher is in great demand by all motorists.

Blowouts or punctures—any size repair is made easy with the Locktite.

**HOW IT WORKS**

First place the tube around the container—as shown in the picture. Clean and roughen the surface around the hole with emery, apply cement. Then press on the patch firmly—and the tube is ready to go into casing. No waiting for the patch to set.

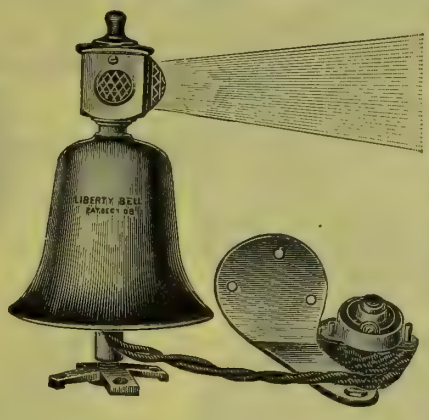
**Write for Dealer Proposition**

Find out how motorists regard the Locktite Patcher.

You'll discover that 9 out of 10 will want this handy Patcher that repairs tubes in half the time required by the old-time, antiquated methods.

And just think for a minute—how large the market for this Patcher that gives the auto owner a complete workshop on the road.

Write us to-day for our dealer proposition. Stock up at once—a few of the Patchers displayed on your counter will sell themselves.



There is a special larger size Locktite Patcher for garages and repair shops.

**Lockite Patch Co., Windsor, Ont.**

American Plant, Detroit, Mich.

# LOCKTITE
## AUTO-NEW-MATIC PATCHER

The Signal of Distinction
An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

# WARNS
## BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

# "LIBERTY BELL"
## DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

**GETS THE RIGHT OF WAY**

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

**A POLITE SIGNAL**

## ACETYLENE BRILLIANT SEARCHLIGHT

First of acetylene lights worn on the head. On the market over 17 years. Used throughout the world, because of its dependability, and powerful light. Twelve different styles to choose from. Can be operated at one-fifteenth the cost of the average flash lamp. Ask for the Brilliant Searchlight.

The following jobbers in Canada carry a stock at all times:—
**John Hallam, Ltd., Toronto; Marshall-Wells Co., Winnipeg; Marshall-Wells Alberta Co., Edmonton.**

Brilliant Searchlight Manufacturing Co., 529 So. Dearborn St., Chicago, Ill., U.S.A.

## O-Rib-O Monarch

Latest and best air-tight heater. Made of uniform blued steel with a deep lining, all nickel trim, cast iron feet, slide condenser close to pipe collar, pressed cover, reinforced top and altogther a well made, beautifully finished, satisfactory, profitable seller.

**O-Rib-O Mfg. Company**
Winnipeg, Man.

## Cannon Oilers

**Easy Seller Because—**

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

# Cleans Out Over 25% More Carbon!

## Car-Owners Should Try It! Dealers Should Sell It!

Repeated tests against other carbon removers prove that our new discovery actually cleans out over 25% more carbon from gasoline motors. More than that, this wonderful preparation —

# NEVER-KNOCK CARBON REMOVER

does the job satisfactorily in one hour's time as against ten hours recommended by others. It greatly increases power, restores the old "pep," eliminates the knocks, and saves gasoline. Nothing like it has ever been offered for sale.

Don't take our word for it. Try it! You will save yourself the delay and expense of the old-fashioned method. Simple to apply through spark plug openings. At your dealers or sent direct. 50c can for 4-cylinder engines, 75c and $1.00 cans for larger engines.

GUARANTEED SATISFACTORY and will not harm in any way.

DEALERS—Our advertising campaign is just gathering headway on this remarkable, new, big profit-paying accessory. Send for our attractive introductory offer. You simply can't go wrong on this. Write us.

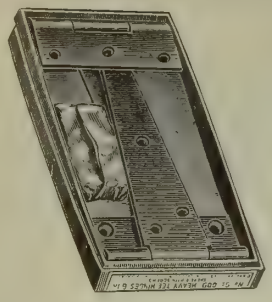
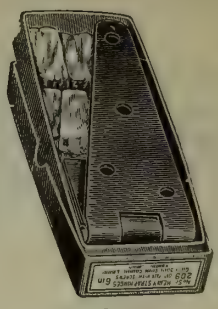
**No. 810 Door Holder**



This serviceable and useful door holder renders swinging garage doors harmless. The door is held securely open and cannot damage the car while entering or leaving.

The holder has a rigid, U-shaped steel arm 32 inches long. A swivel allows the arm to fold out of the way when the door is closed.

Packed one pair in a package, complete with screws, in the following finishes: Japan, Dead Black Japan, Sherardized, Sherardized and Dead Black Japan.



**National Manufacturing Company**
**Sterling, Ill.**

No. SC. 609

# Everybody Likes Strap and Tee Hinges

*Packed One Pair in a Box with Screws*

No. SC. 209

Before placing your next order for hinges consider the time wasted loosening bundles, selecting and counting out the screws and wrapping in paper.
Consider the additional customers you can wait on when hinges are already packaged, neatly labelled, ready to hand out.
Consider the advantages of having a clean, attractive stock that can be handled without soiling the hands.
Naturally this time and labor-saving method appeals to the trade and consumer as is shown from the ever-increasing demand.
In ordering, prefix the letters SC. to the class number to distinguish from the line of hinges in bulk.

# Williams' "Agrippa" Turning-Tool Holders Set Screw Pattern

TO provide increased and abundant variety of selection in Williams' "Agrippa" line of Tool Holders, we offer this Set Screw pattern of Turning-tools primarily for those who use Cutters made of steel which has been hammered or rolled with greater variation in size than is common to usual mill practice. But for the majority of users who purchase Cutters of accurate size, we recommend the original "Agrippa" Turning-tool of Cam Pattern as being stronger, more reliable and more generally satisfactory than any other method of Cutter-fastening. Both patterns are illustrated above.

The Screws, made of a fine grade of Alloy Steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong and give the maximum efficiency obtainable from this extra type of Cutter-fastening.

Right and Left Hand Offset and Straight Shanks in stock at same prices as Cam Pattern of corresponding size.

Our Machinists' Tools Booklet will be sent on request.

# Increase Your Sales by Handling the Maple Leaf Line

## THE OPINION OF THE USERS

Walkerton, Ont., February 8, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I was so disgusted with my old range that I decided to try one of your Maple Leaf Composites. I must say I have had wonderful results.

To make a long story short, I cannot say enough for the Composite, for I like it better every day, especially for baking, and as a coal saver it has no equal.

Wishing you every success,
MRS. GEO. F. BRUDER.

Fergus, Ont., Feb. 18th, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I have purchased a Composite and am well pleased. It is a grand heater, a perfect baker, and a good fuel saver.

I would highly recommend it to anyone.

Yours truly,
MRS. A. PETERS,
per W. W. Peters.

Tweed, Ont., Jan. 14th, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—The Composite we bought from Mr. Rath is the best stove we ever owned. It is a treasure to us. It's the best baking stove we ever had. It's worth its weight in gold.

It takes very little fuel to run it. There has been a lot of people in to see it and many of these have bought one.

I bake everything in it and very little heat runs the oven. Yours sincerely,
MRS. W. M. HARDY.

Belleville, Ont., Jan. 22, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—We are pleased with our Composite. It works perfect in all ways. Have had satisfaction in using it. It is admired by all the neighbors.

Yours truly,
MRS. W. R. HALL.

## THE OPINION OF THE DEALERS

Ottawa, May 3rd, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can

Gentlemen,—I have been selling your Composite since last September and have sold over 50 during that time. My customers are well pleased and speak very highly of them being first-class bakers and cookers, also great heaters, taking so little room; also where the water section is attached it gives any amount of hot water.

Now I might say that I am delighted with it as a seller and expect to sell at least 150 of them, and perhaps more during this seoson. My customers recommend them, and I notice the Composite is getting more talked of every day, which does a great deal in helping to sell them. Wish you every success.

I remain, yours truly,
JOHN LIVINGSTON.

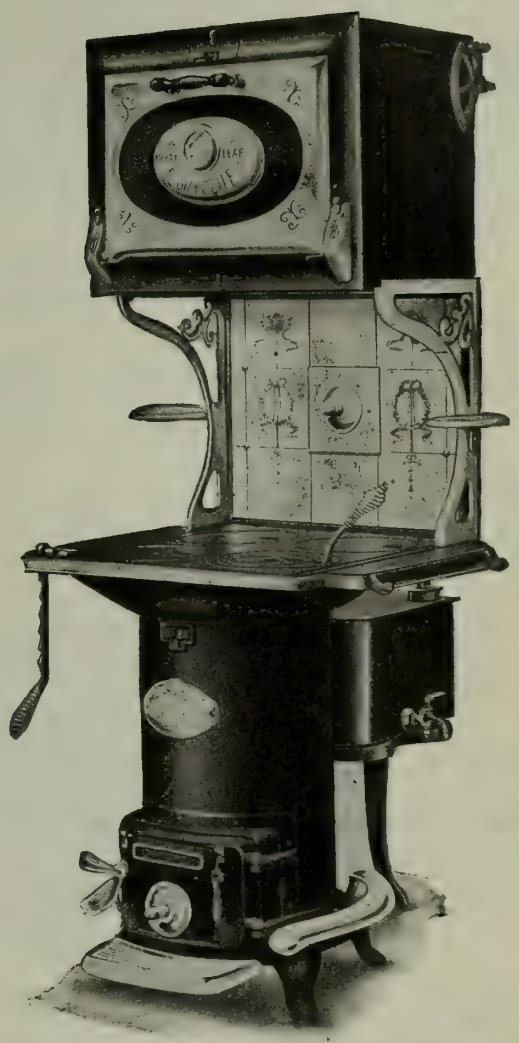
Tweed, Ont., May 1st, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Gentlemen,—We take pleasure in expressing our satisfaction in handling your Composite stove. This stove is something entirely new and in our opinion fills a long-felt want in combining a Heater and Cookstove.

We sold a number of these stoves last fall and each of our customers expressed their satisfaction.

We are looking forward to a much larger sale of these stoves the coming Autumn.

Yours respectfully,
TWEED HARDWARE CO.,
F. S. Roth.



Varna, Ont., Feb. 26, 1919.
The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I am enclosing you cheque in payment for the Composite Stove.

Your salesman told me to try the Composite before settling. When I did not sell it at once, I had it taken into my own house and it has given the very best of satisfaction.

I would not sell it for twice the amount if I could not get another, as my wife uses it altogether. She has discarded our big range.

Yours truly,
L. BEATTY, Dealer.

# To Serve You Better

The Dominion Battery Company's fifty-battery shipping case announced last April has had an enthusiastic welcome among dealers.

They say it enables them to keep fresher stocks and is much more convenient than the barrel formerly in such general use.

This case is particularly desirable for rush orders of fast-selling types or to supplement regular orders or for dealers supplying a limited demand.

Reliable Batteries and Flashlights are as popular with the public as is this case with dealers. When you display this line you cash in on the soundly founded good-will which the public have for this line.

Reliable Batteries are veritable storehouses of quick-as-flash power—guaranteed satisfactory. Reliable Flashlight cases are made in many sizes and shapes—one to suit every customer.

Ask your jobber to supply you with stocks of both to-day. If you want the fifty-battery case a small additional charge, only one cent a battery, will be made.

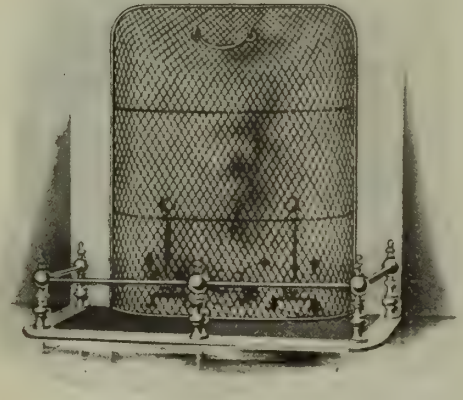
## And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.
If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

**THE "1900" WASHER COMPANY**
**537 Yonge St., Toronto**

# Sell the Full Line

It always pays to have the one right tool for the particular need of your customer. You wouldn't think of offering a monkey wrench to a structural iron worker, or a construction wrench to the garage man. He knows what he wants, and he knows he can find it in the "W & B" line.



You'll find every requirement of machinist, engineer, structural worker, farmer, automobilist and household customer well taken care of in the "W & B" line. For 66 years every "W & B" tool has been made to the standard:—

***"Make it better than anyone else can make it, put your name on it, and stand by it"***

# Satinette

## A Dustproof Furniture Polish

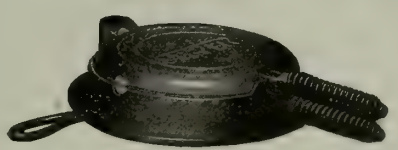
Your customers will be interested in this product. Dust will not adhere to surfaces where Satinette has been used. This well-liked, quick selling polish finishes with a hard, dry lustre that intensifies the color of the wood and enriches the beauty of the grain. Gives astonishing results on old, dingy furniture. Ideal for autos.

**Satinette Wall Paper and Kalsomine Cleaner**

A remarkable preparation for easily and cheaply cleaning wall paper, kalsomine, window shades and plaster.

It leaves a beauful satin-like surface that is a joy to the housewives among your customers.

Packed perfectly in air-tight containers, it never dries out or goes musty. Saves on high decorating and papering costs.



Satinette products are swift sellers and very profitable.

**Satinette Products Manufacturing Co.**
**TORONTO, CANADA**

## You Will Sell More Waffle Irons

**If You Sell the Stover**

Look at this cross-section of Waffle Iron Plates. It shows how uniform the STOVER makes waffles.

You will satisfy your customers and increase the popularity of waffle baking by selling this iron. They are made with wood or wire handles, high or low bases, and round or square shapes. Send for our special waffle iron circular.

Then you need our R-19 catalog. We also make windmills, feedmills and gasoline engines.

## 4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

MEHASCO

HERE is another internationally advertised line of exceptional merit. This firm is one of the original manufacturers in the market putting all their efforts behind one range, one heater, one base burner and one furnace, and we feel that with their many years' experience they should be able to turn out a good article. They do not use scrap iron and for that reason get a material, which while a little higher in price, gives genuine satisfaction, and always brings back the neighbor as a customer as well as the one to whom you have made the sale. We carry a full stock of repairs and that feature recommends it. Since this firm started doing business in Canada many years ago there never has been a time when you could not get their repairs in a hurry. We would be glad to co-operate with you in any local advertising scheme you wish to put on. If you need any advertising matter write us.

# The Sign The World Knows.

Throughout the world the red Gargoyle commands respect.

The people of every civilized country know that it is the mark of genuine expertness, of highest quality, in lubrication.

The red Gargoyle means accuracy and dependability in lubrication. Because, Gargoyle Mobiloils when used as specified by the Charts which represent the professional advice of the manufacturers of Gargoyle Mobiloils, give the user maximum lubrication efficiency.

Dealers who display this red Gargoyle, and sell Gargoyle Mobiloils according to the Chart of Recommendations, have the confidence of every motorist—and this confidence is extended to every department of the dealer's business.

Is the red Gargoyle in front of your shop?

We will gladly send one of these easily-seen, respect-building, permanent metal signs to every dealer who sells *lubrication service*, rather than just oil.

# Keep Your Merchandise Bright

SOILED commodities never appeal to your customers—they want their goods bright and clean. Dusty merchandise looks shop-worn. Keep down dust and your stock will remain as clean as the day you unpacked it.

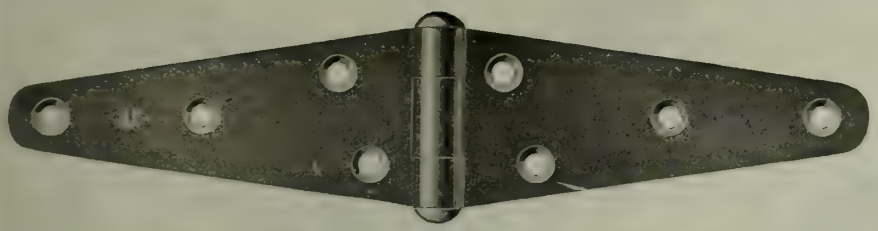
## STANDARD Floor Dressing

prevents dust from rising off the floors and sheiving. Dust cannot rise from floors treated with Imperial Standard Floor Dressing.

In addition, it is a wood-*preserving*, non-evaporating dressing for all wood, linoleum and oil-cloth surfaces, thoroughly cleansing in its action.

One gallon will treat 500 to 700 square feet of floor space — once dressed no further treatment is required for three or four months, save regular cleaning. Use it on your floors to clean them and save the spoiling of valuable merchandise.

Advise those responsible for the cleaning of apartment houses, churches, public buildings, etc., as well as neighboring merchants, of its qualities, and demonstrate its worth by your own store's cleanliness.



Sold in one and four-gallon cans, also half-barrels and barrels.

# Stove Prices May Be Advanced

## Manufacturers State That the Whole Tendency is Toward Higher Prices — Higher Wages Being Demanded by Men and Higher Prices for Raw Materials— Stove Firms Are Swamped With Business at Present Time

STOVE mnufacturers seen by HARDWARE AND METAL during the week almost without exception state that the tendency is towards higher prices for stoves. At the present time they are simply swamped with orders and cannot begin to get the goods out in time to make anything like the delivery that the retailers would like. This is a result, they say, of the retailers holding back their orders until the last minute and then sending them in in a mass as the demand for the stoves has developed. They have plenty of materials on hand at present to take care of deliveries up to the first of the year, but after that the situation is more or less uncertain with some firms owing to the delays that are expected as a result of the steel strike in the United States. The Canadian firms have lots of material on order, but advices from the American firms indicates that they are not prepared to promise anything definite as to when deliveries will be made. Some of the very latest advices state that quotations cannot be given and orders will be accepted only at prices prevailing at the date of delivery.

### The Labor Situation

While the situation as far as obtaining most classes of help is concerned has been greatly relieved, it is expected that the moulders and some of the other unions will demand higher wages about the first of the year.

"Wages for moulders have practically doubled in the last twelve months," said J. G. Fraser, of the Hamilton Stove and Heater Co., to HARDWARE AND METAL. "From information we have now, the moulders and others are likely to ask for further advances about the first of the year. Just what they will be I cannot, of course, state, but it looks as if we may have to increase prices of stoves at least ten per cent. The whole tendency in stove prices is upwards. Take pig iron alone. It is $2 per ton higher now than it was two months ago. We use fifteen tons per day. There is an item of $30 a day alone. Raw materials, of course, are the small item in the cost of stove production. Labor is the big factor to consider. Wages have been going up, up, up and the demand is for still more money.

### Prices Must Increase

"We cannot go on paying higher wages and not increase stove prices. I can at the present time see nothing for it but to advance them. All our operating costs are very greatly increased, and it does not look logical to continue stove prices as they are now. I think that an advance of at least ten per cent. is likely.

"Business has been excellent, fully as good if not better than in pre-war days. I do not think there is any doubt that it will be even better next year. I would not like to venture any predictions beyond 1920, but as far as I can see now next season is going to be a banner year.

### Want Them Quick

"There have been features of the business this fall that I have never known before. For instance, yesterday we had

*An entirely separate section of the store of J. Y. Smiley & Son at Woodstock, Ont., is set aside for stoves and washing machines. Mr. Smiley says a good stock and a good display are essential for getting the best results in business. The stoves and washers are kept looking their best and are arranged so that prospective buyers can investigate thoroughly the various parts and see how they work.*

a request to send furnaces by express to New Brunswick. A couple of days ago we got a similar request from Vancouver. The dealers want the stuff and they want it in a hurry, and they are willing to pay the greatly increased cost of sending it by express in order to get it.

"From coast to coast our business without exception has been good. The farmers are prosperous and are buying stoves in great quantities. They call for the big ranges. They have lots of wood and do not need to worry about the coal shortage, and the call from the country is for a big range. They insist on its being finished, too. During the war we got away to some extent from the nickelling that was so much called for. Now they are demanding I would say more nickelling and more trimmings than ever. The farmers wives want a real stove and they are willing to pay the price for it.

**Business Plentiful**

"The return of so many men from overseas, so many families getting back to housekeeping, the great rush of home-building and the house-building undertaken by the various commissions has created a volume of business that has simply swamped the manufacturers. The building programme from all indications will be greater next year than this, and business should be correspondingly larger. There is no question about the shortage of homes. Every home has to have heating equipment of some kind, and there is going to be a big demand for stoves, furnaces, etc.

"My advice to the retailers is to size up their needs and place their orders as early as possible if they want to get the goods. If they do not let the manufacturers know about what their requirements are going to be, the manufacturers cannot very well estimate their own requirements and arrange for the purchase of materials, etc. This is an important matter, and the men who are selling stoves can save themselves and us a great deal of annoyance and delay by co-operating with us in the matter."

**Big Export Demands**

Mr. Fraser stated that there was a big business offering in exports. Inquiries have been pouring in from all parts of the world asking for goods.

"These demands seem to be steadily increasing," said Mr. Fraser. "We have been sending stuff to South Africa, to China, to Australia, to Italy, France, England and Denmark, and it looks as if there will be a permanent business built up in many lines. Many of these countries are very short of goods and they have heard so much about Canada and Canadian goods that they are writing to this country for prices, and also placing orders."

**Sees Fine Future**

"We are away behind with our orders," said A. E. Hampson of the Burrow, Stewart and Milne Co., Limited, Hamilton, Ont., to HARDWARE AND METAL. "I expect that we will be very busy for at least a year. We simply cannot keep up with the volume of business that has been pouring in. My opinion as far as the retail trade is that business is going to be good, perhaps extraordinarily good. The merchant who gets this idea into his head and plans his course accordingly, is going to come out all right. If a merchant thinks business is going to be good and gets the stock to handle a good business, he is never at any trouble to sell it. Many of the retailers this season held off buying and now they are more than sorry that they did, as it is simply an impossibility to get the goods they need.

**Farmers Big Buyers**

"The farmers are big buyers. From the country districts we are receiving record business. The farmers want a big stove and they want a good stove. They want a nice-looking stove and the man who tries to sell them any other kind is going to have trouble. The farmer has the money to buy what we wants and he is going to get it. In the cities the big demand is for combination stoves that will burn either coal or wood or coal, wood and gas. There is a big demand in the cities, too, and it will continue. In many cases three or four or perhaps more families are living in one house simply because they cannot get any house of their own. A lot of building has been done this year, but it has not commenced to take care of the needs and from present indications 1920 will see a great deal more. All this is going to help the stove business and the man who is ready to handle the trade is the man who is going to get the business."

**Too Much at Home**

Mr. Hampson stated that his firm is not going after any export business because it cannot take care of the needs of the home trade.

"In spite of the fact that the labor situation is good and we are getting plenty of help," he said, "we find we cannot keep up with the orders that are coming in. We have had any number of inquiries from all parts of the world, but we are too busy to do anything in the way of supplying the goods just now."

**Are Very Busy**

"We are very, very busy," said J. Robinson, manager of the D. Moore Co., Ltd., Hamilton, Ont. "We were behind on spring business because the dealers held back buying, but we are more than making it up now. There has been a big rush of business and it seems to be getting heavier all the time. As far as prices are concerned, I do not know what to say. Certainly there is no indication that they are going to come down in any way. Labor costs are going up instead of down. I think the tendency of prices is upward."

**Business Is Brisk**

"Business is very active," said W. R. Gibson of the Gurney Foundry Co., Ltd., Toronto. "As far as the future is concerned I am not looking for any serious disturbance as far as the steel strike is concerned. It will perhaps make deliveries a little slower than they would have been otherwise. As far as prices are concerned it would, I think, be unquestionably illogical to argue that they are likely to come down any. There is a big demand for goods and the prospects are for excellent business."

**Most Satisfactory**

B. C. Beach, of the Beach Foundry Co., interviewed by HARDWARE AND METAL, stated that the stove situation as they experience it at the present time and see it for the future, is: "Quite satisfactory." They have never had so much business in the history of their firm, sales are mounting higher each month and would have swamped them but for their having been able to pile up a good stock early in the year. The travellers have been called in off the road as no more orders needed soliciting.

**Should be Advanced**

Mr. Beach sees no hope for a reduction in price. As a matter of fact, he says, the stoves should be advanced to make their manufacture profitable and many makers can hardly break even at present rates. However, there is a feeling that just now would be a bad time to advance and he hopes to see a gradual readjustment of things generally, a move for more normal conditions which will bring raw materials to a reasonable basis and permit of a profit without advance in prices.

**Is Optimistic**

Mr. Beach is extremely optimistic over Canadian trade situations, but says it requires more real organization, more definite planning and more campaigning by the Government or some centralized board or department. Wages must be high and, of course, that fact keeps up the price of all commodities, and stoves are very closely woven into that fabric.

**Labor Is High**

Labor is bound to be dear and scarce for a very long time in the stovemaking industry. Young men will not take up moulding and other dirty, grimy occupations when they can learn clean and pleasant trades and make practically the same money. He does not anticipate much effect from the big strike in the United States, excepting low deliveries of steel for spring, probably. He thinks that the strikers may probably lose, and this will benefit conditions all around. He sympathizes with the workers, but not with union dictation.

**Trade is Active**

The Thos. Davidson Mfg. Co., Ltd., have been able to take care of deliveries and are experiencing a big trade, particularly in heaters. The better grades of ranges are meeting with favor, too, and these are selling quite freely. While it was not stated that the movement was any heavier than last year, it was thought to be fully as extensive, and this will probably be a more brisk season in point of actual deliveries than 1918 was.

# Spending Millions for Electricity

## Power Plants and Power Lines Are Being Extended All Over the Country — Every New User Means a New Customer for the Hardware Merchant Who is Handling Lighting Fixtures, Supplies and the Many Labor-Saving Utilities

"HOW much does it cost?" and "How much does it cost to operate?" These are the two questions that ninety-five out of every hundred people ask first, according to a hardware merchant who has been building up a big trade in electrical goods.

"I do not answer the first question," he stated to HARDWARE AND METAL, "until I get them thinking in a different frame of mind. If I told some customers that an electric washer would cost $175, they would quit right there. Instead, I ask them to let me show them the way the machine works and what it will do. It is easy to interest them in a machine that is working, and when I get into a sales talk on the subject I answer their second question, as to how much it costs to operate. People are usually very much surprised to find out what a lot of work can be done with a washer, or a vacuum cleaner or an electric iron for a very small amount.

### Can Hardly Believe It

"They can hardly believe it, but when I guarantee that they will get the results and possibly even better results if I happen to know something about the conditions in their home, I can convince them. When I show them what the equipment will do, what it means in the way of saving in time, in saving of real hard work, that it will pay for itself in a few months, and will last for years and pay for itself over and over, they are ready to hear about the price and hear about it without being frightened. I find the great percentage of them very reasonable about the matter if approached in the right way. Once I can convince them that the equipment I am showing them is going to render real service and keep on rendering it for years and years, that it will stay on the job and make their work easier or their home more comfortable they begin to see that the price is not such a big consideration as they might have thought it was. They realize that they will get their money back many times over in years of satisfaction and service. Usually after that, it is a question of which machine or which cleaner or which iron, or whatever it is they will take.

### Take His Advice

"They almost always ask me which to take. If I know all about the party and that everything is all right I let them take the device home and try it. Then if they like another size or style I let them try that. Always, though, I have found that a sale results. Not only that, but they talk about their washer or their cleaner or their iron to their friends, and their friends come in and want to see a machine or whatever it is, 'just like the one you sold to Mrs. Jones.' They tell me that she is more than pleased with it and they want to enjoy the same trouble-eliminating or labor-saving advantages that she has. There is no telling where advertising of this kind is going to stop. It costs absolutely nothing and is the very best kind of publicity I can get."

### Follow Them Up

"I make a point of keeping pretty close track of all our customers. If I happen to be in their vicinity I run in and see how the washer is working, or if the cleaner is on the job, or if the iron is behaving well. I find that this pays and pays well. Very often I get first hand information about other electrical things they need, and also about hardware needs. The people like the service and feel that I am looking after their interests. Sometimes I have found that people were well pleased with a washer that was not doing its best because it needed a little adjustment or a little change here or there. It takes only a few minutes to do this and it makes all the difference in the world in the way the machine works. Sometimes it is only oiling that it needs. It is a funny thing how few people, especially women, ever think that a piece of machinery that is running at a good speed needs oiling regularly. They seem to have no idea what a difference a few drops of oil applied regularly will make. Very often I am able to impress this upon them and

*An ad. like this offers real suggestions to buyers just now who are in need of any number of seasonable lines. There may be in it some valuable points which you can adopt in arranging your own copy. Don't forget to tell the public about your prices.*

in such a manner that they cannot fail to see the results and remember to oil the equipment regularly."

### A Big Field Open

There is a big field wide open in the electrical business to-day. It is getting bigger all the time because of various conditions. One factor is the scarcity of obtaining reliable help in the homes. Women have to depend upon mechanical equipment for washing and cleaning and electricity is filling the bill in a manner that is most satisfactory. It does the work quietly, quickly, thoroughly and economically. It has made good so completely that people see in it the solution of their difficulties and that is one reason why the manufacturers of electrical washers, vacuum cleaners, and other equipment have for a long time past been swamped with orders. The demand is increasing also because the manufacturers are continually improving their output and are to-day setting standards that are higher than ever before. They realize that electricity and its development are to play a real part in the everyday life of millions of people, many of whom are just beginning to realize what a servant is theirs for the asking.

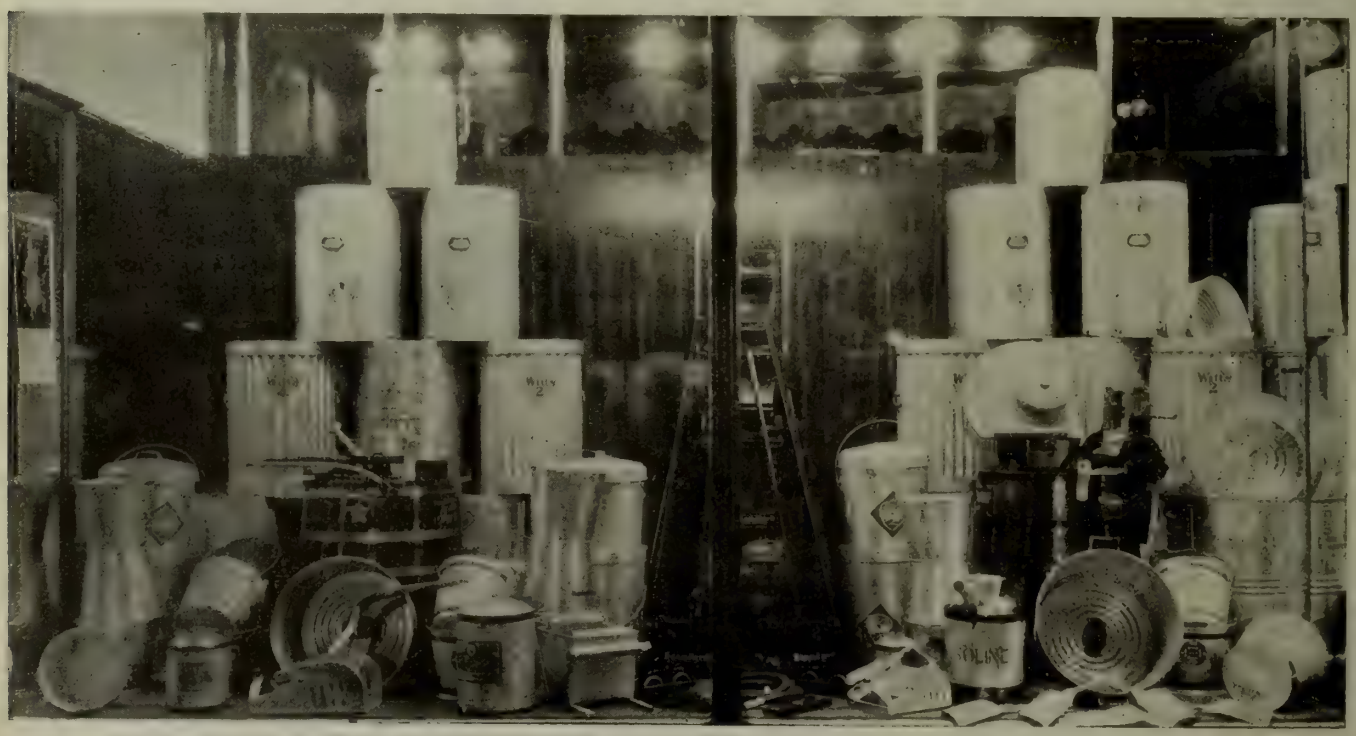
### Will be Greater

"We are merely touching the fringe of the business that is to be developed," said one manufacturer to HARDWARE AND METAL. "It is only a question of time when the great majority of homes will be using electrical equipment in many ways. It does not matter whether they are located in the cities or in the country. If they are away from the power lines, they can get electric plants which will light their houses and run their machinery. If they are farmers miles out in the country they can have the same service from electricity that city people have, and alizing it and they are going to realat a small cost. People are realizing it and they are going to realize it more. Every sale that is made means just one more satisfied customer and one more booster for electricity. When you think of the thousands of new users of electricity each year, and the hundreds of thousands of people who have yet to become users, you can see the possibilities of the future."

### Spending Millions

Reliable figures indicate that millions are now being spent in building extensions to power plants and power lines. Why? There is only one answer. People are wanting to enjoy the same privileges in regard to electrical service that somebody else they know is getting. This means more and more customers for power, and every new customer for power means a new prospect for the hardware man for electric lights, electric fixtures and the long line of electric utilities. Hardware men are going after this trade and they have been getting it. They are getting so strong a hold on it that many of the electrical dealers are not a little annoyed about it. They regard the hardware men as interlopers in their field. But in the meantime the hardware merchants are just going ahead in their own aggressive manner and getting more and more business.

## DE LAVAL CO. SUFFERS FIRE LOSS



Damage estimated at about $75,000 by R. N. Mitchell, manager of the firm, was caused to the premises of the De Laval Company, dairy supplies dealers, at 21 St. Peter street, Montreal, early on Saturday morning last, when the building was gutted and two firemen were slightly injured. The flames had spread through the entire building and the building with its stock was a total loss. Two adjoining premises suffered severely from smoke and water. The cause of the fire is so far unknown. The De Laval Company made arrangements over the week-end to move to-day into new quarters, and business will be resumed at once.

## MERCHANTS TO LOOK AFTER TRAVELLERS

Since the Queen's Hotel, Galt, Ont., was closed some weeks ago, travellers visiting the town have found great difficulty in getting accommodation. Now the merchants are taking the matter in hand and they are going to throw open their homes to travellers. The grocery merchants will accommodate the grocery travellers, while the shoemen will look after the shoe travellers, and the merchant who handles various lines are to look after the travellers who call upon them. They will supply them with meals and if it is found impossible for a traveller to get accommodation for the night at the local hotel, he will be sheltered in the home of the merchant who is his customer.

## JOINS GLIDDEN FORCES

C. S. Sturges, formerly of the Eagle-Picher Lead Co., Chicago, and Sherwin-Williams Co., has been appointed sales promotion manager of the Glidden Company, Cleveland, Ohio.

*With winter coming on, furnaces to clean, and ashes to carry out, every householder will be interested in a window display like this. Washing machines make a nice central plan around which to build the display of galvanized ware.*

# Strike Effects Being Felt Here

## General Opinion Seems to be That the Worst Effects Are to Come—American Firms Advising That Business Will be Accepted Only at Prices Prevailing at Time of Delivery

THE opinion seems to be fairly general in the trade that the worst is yet to come, as far as the effects of the steel strike on Canada are concerned. This week has seen some rapid changes in prices and latest advices being sent out by American firms state that nothing can be promised in the way of deliveries. Some firms are sending out word that the only way in which they will accept business is at prices prevailing at the time of delivery and that deliveries are indefinite.

As far as the strike itself is concerned it does not progress. Neither is it broken. Production seems to be increasing, but the increase is slow and not anything like as large as might be expected from the number of men, whom, it is claimed, are at work. This may be accounted for by the fact that a number of new and inexperienced men are being employed and this would delay the others.

### Claim 367,500 Out

In a summary of the general strike situation sent out to all secretaries, organizers and steel strikers by national headquarters, figures indicate that 367,500 men are on strike. This is an increase of 88,500, compared with the figures given out by headquarters just after the strike started.

The big corporation plants in the Pittsburgh district are all in practically normal condition. The Edgar Thomson Mills are on in full and all but one of the conditioned blast furnaces there will be operating this week, it is announced.

### A Slight Defection

There was a slight defection of foreigners at the south side mills of the Jones & Laughlin Steel Company, and one mill there was closed for a day. Farrell and Newcastle plants are running 100 per cent. in men and in production. Duquesne and Homestead are normal and all of the McKeesport mills are on full time.

Over 1,000 men are working at the Youngstown mills of the Carnegie Steel Company or approximately 25 per cent. of normal, but the work is repairs and preparatory work. No hurry is being shown toward resuming at Youngstown.

### Bad For Business

Trade generally does not like the continuation of the steel strike in United States. So far, nothing is suffering in this country, but it is only a matter of time until something will have to give. While it is true that probably sixty per cent. of the men employed at the steel mills are working—and that figure seems about right—it does not follow that production is sixty per cent. of what it was when the strike was called. There must be mills where men are kept on for the moral effect of keeping them on and there must be cases where production is away below the amount that might reasonably be expected from the number of hands on the premises.

### In the Steel Trade

In a general way, it can be said that the steel trade is not suffering yet. It is a strange situation, but none the less a fact that the warehouses are better off than their customers. Warehouses take on standard sizes in everything, and in this way they can get more from the yards of the mills now than many of their customers who buy direct from the mills because their orders are all special and odd sizes. The factories, especially where much boiler and tank work is done, are in the same position as the man who gets his clothes made to order. Nearly every order they send out has to be made up for them, and now that capacity is away down it is only to be expected that there will be congestion and delay. As far as the warehouses are concerned it must be said that the American mills are making a brave attempt to give them service, as shipments of fair-sized tonnages are still coming over the line.

### Are Hit Hardest

In a general way, sheet and plate are hard hit. This is especially in regard to sheets. There has been a big demand for sheets for some time back, and warehouses are not well supplied.

The tube mills in some cases are still shipping against recent orders and material is arriving this week. This is true of the lap weld, but the cold drawn are down for the most part. There is very seldom any stock at the mills. Tubes are sold nearly altogether through the jobbers, and the former protect the latter in nearly every case. Men generally buy tubes in small lots for repair jobs, etc. This country depends on United States for its supply, and that supply is in danger. Neither is there a good stock in the warehouses at present, while the demand is strong.

## CHAMBRE DE COMMERCE ACTIVE

New officers were on hand in Montreal last week to take up the work of the coming season as applying to the Chambre de Commerce. This important French-Canadian body, corresponding among the French-Canadian business men to the Montreal Board of Trade, has done considerable in the past to foster and promote important trade and commercial matters. It has gone on record as favoring the adoption and application of the Metric System in Canada. Doubtless there will be many matters of importance to command and engage its attention, and under the leadership of its aggressive president, Joseph Quintal, there is reason to anticipate a season of continued progress in matters of vital and immediate interest.

## Fertilizer Bags Should Be Marked

For the protection of manufacturers, dealers and users of fertilizers, the following Act to amend the Fertilizer Act of 1919 has been assented:

1. Every manufacturer or agent, before selling or offering for sale, either himself or by any other person, in Canada, any fertilizer, shall either mark upon each package of fertilizer the following particulars or attach a label to each such package containing such particulars, or when the fertilizer is sold in bulk shall set out such particulars on the invoice, namely:

(i) Brand name and trade mark, if any;

(ii) Registration number;

(iii) Guaranteed analysis, stating separately, in minimum percentages only:

(a) the percentage of nitrogen;

(b) the percentage of available phosphoric acid and the total phosphoric acid;

(c) the percentage of potash soluble in water;

(iv) The name and address of the manufacturer or agent.

In the case of bone meal, tankage or other organic products, and basic slag, the phosphoric acid shall be stated as total phosphoric acid unless it be desired to state available phosphoric acid also. When leather in any form, wool waste, hair, or any inert organic nitrogenous material, forms a part of any fertilizer, the percentage of such ingredient must be mentioned in the guaranteed analysis, unless by processing the nitrogen has been made available in such materials. When potash is derived from sulphate of potash or carbonate of potash, it may be so stated in the guaranteed analysis.

(2) The methods for determining the different ingredients, the amount of each several ingredient in a fertilizer, and whether any such ingredient is available, shall be those which are approved by the Association of Official Agricultural Chemists of North America.

# What Causes Rate of Exchange

## Simplified Explanation of Reason Why Canadian Money at Present Time is Worth Less Than That of United States—Natural Result of Our Immense Imports—Mistaken Ideas on Subject Prevalent.

By C. J. MORRIS

THE present disadvantage under which the Canadian merchant who has payments to make in U. S. is laboring, has brought to light an extraordinary lack of knowledge regarding the most elementary principles of international exchange, not only on the part of the general public, but also on the part of business men and even of newspapers which attempt to instruct their readers as to the causes governing the premium or discount at which one country's currency may stand in relation to that of another country.

It is by no means infrequently that we find in the daily press statements to the effect that the imposition of an exchange rate upon Canadian money by the United States is by no means a friendly proceeding, and advocating retaliation by the imposition of a similar rate of exchange upon all United States money spent in Canada. Such remarks only show how utterly the writers fail to realize the significance of an exchange rate.

To threaten to impose an exchange rate or discount upon United States money spent in Canada at the present time would be a proceeding equivalent to that of a householder, without a pound of coal in his cellar and with coal almost impossible to obtain, going to his coal dealer in mid-winter and informing him that unless he were willing to supply him with coal at a reduction of five per cent. on the ordinary rates he would refuse to purchase any from him.

### U. S. Money Needed in Canada

It is the very fact of our being unable to get sufficient United States money in Canada to pay for all we buy from the States that makes it worth our while to pay a premium for it. It is really we ourselves who, by offering a premium for United States money because we have such urgent need of it, cause our own money to be at a discount in relation to that of the States.

A few days ago a Toronto paper informed a correspondent who enquired the reason for the rate of exchange, that such rate represented the exchange broker's estimate of the holder's chances of payment. Presumably the rate of exchange, in this writer's opinion, was an insurance premium paid to the broker, who in return guaranteed the solvency of Canada and due payment of her obligations. A moment's thought will show that this could not possibly be the meaning of the present exchange rate of 4 per cent. on Canadian money, as that would mean that the chances against Canada going bankrupt were only 25 to 1.

It is doubtful whether one business man in twenty understands what a rate of exchange really is and how it is caused. It is, therefore, the object of the present article to endeavor to make it clear by a simple illustration which can be understood by everyone.

The various nations of the world with their different paper currencies might be compared to the merchants of a community who agreed to trade together, accepting one another's vouchers in payment for their goods. Let us suppose that in such a community B is a baker and P a piano maker. B purchases a piano from P and also sells him bread. Till the piano is paid for B simply hands P back the latter's own vouchers in payment, and no difficulty arises. B does not require another piano, but P still requires bread, so B still accepts P's vouchers. P is still selling pianos to other members of the community, so B uses P's vouchers to pay them for goods he buys from them and the arrangement still works well. Let us suppose, however, that a time arrives when everyone in the community has bought a piano and P's vouchers become a glut in the market, as no one requires them. B, however, knowing that P is selling pianos to a dealer in a distant city, pays this dealer a visit and asks him to buy P's vouchers from him. The dealer says he would be able to use them at some future time and offers to take them if B will allow him a discount on them. B is obliged to agree to this, and disposes of the vouchers for cash, less the discount. He then informs P that if he accepts any more of his vouchers he will have to charge him a percentage on them.

### The Two Cases Parallel

Here we see that P is buying from B more than he is selling to him, with the result that his money (vouchers) is at a discount. It is not in demand and its value consequently falls. In the same way Canada has made immense purchases from the United States and has not made sales to anything like a similar amount, the balance in favor of the States amounts to hundreds of millions of dollars, which we must pay in United States money. United States money is therefore much in demand, and we have to pay a premium to get it. Whether we pay a premium on United States money or sell our own money at a discount is the same thing.

Reverting to the above illustration, it is not B's fault that he has to charge P a discount on the currency with which P pays him. He gains nothing by so doing. On the contrary, he stands to lose, for it is evident that so long as P has to pay extra for his bread he will not buy from B more than he can possibly help. In fact, he may consider the advisability of getting the bread from the city to which he is sending his pianos and where his vouchers are probably not at a discount. B, therefore, far from benefiting from the exchange he is compelled to charge, stands a very good chance of losing a customer.

### Merchant Not Benefited

In the same way the rate of exchange which the Canadian purchaser is compelled to pay to the United States merchant in no way benefits the latter, but has the effect of inducing the Canadian merchant to look elsewhere to fill requirements. At the best he can only hope to get orders for as little as his Canadian customers can possibly get on with, and at the most he may lose his customers altogether.

The premium upon United States money has exactly the same effect upon commerce between the two countries as the imposition of a duty of the same amount upon all imports into Canada from the United States would have.

### Where the Money Goes

The question will naturally arise: If the merchant gets no benefit from the exchange, who does get it? Where does it eventually go? This brings us to the part the broker plays in the matter. It is manifest that the Canadian merchant who has made a purchase of goods across the border has no time to go running around among his fellow merchants looking for somebody who has made a sale in order that the amount he has to send abroad may be offset by an equivalent amount which some merchant on the other side has to send into Canada. In fact, where the imports greatly exceed exports, it would frequently be impossible for him to find such a person. This is where the broker comes in. He undertakes to act as a clearing house for all parties and will either sell or buy United States drafts, and the broker in the United States will either buy or sell Canadian drafts. So long as the volume of transactions each way is fairly level no difficulty arises, and he makes only a small charge, a fraction of one per cent., to recompense himself for service he renders. But as soon as one country's purchases exceed its sales he is faced with the problem of what to do with the suplus of that country's money which begins to accumulate in his hands. He undertakes to absorb the surplus in one way or another. It is clear it would not pay him to hoard it and receive no interest upon it. If therefore, he cannot transfer it to some country which

# What Hardware Men Are Doing

## How Hardware Merchants All Over Canada Are Going After Business—There May be Suggestions in Some of These Ads That You Can Use With Advantage and Profit When Arranging Your Own Copy

THE **Bond Hardware Co., Ltd., Guelph, Ont.,** in an ad. four inches deep and two columns wide, under the heading in display type: "Auto Accessories," lists such items as shock absorbers, spark plugs, valve grinding compound, oil, chamois skins, sponges, auto patches, vulcanizers, body dressing, carbon removers, driving gloves, tire chains, auto wax and auto cleaner. Prices of every item are given in good plain figures and at the bottom of the ad. is the announcement: "We Have What You Want." Phone 1012.

* * *

**The O. B. Henry Co., Drayton, Ont.,** in a double column ad. nine inches deep lists ——, and says of it: "—— is the true friend of the housewife, as it renders the greatest service in small things as well as in large. There is no limit to the many uses for which it is adapted. A few of the many things to which —— will impart beauty are: Bedsteads, bookcases, bureaus, baby carriages, cabinets, chairs, china closets, curtain poles, doors, drawers, lounges, mantels, picture frames, window sills, rattan ware, sewing machines, shelves, sideboards, sofas, tables, wainscotting, wood ceiling, floors."

* * *

**Hick-Sehl Hardware Co., Lethbridge, Alta.,** in a double column ad. shows a cut of a range and in display type says: "If you are in the market for a coal or gas range, it will pay you to call and inspect our stock of —— coal ranges, and —— gas ranges. Our prices are sure to appeal to you. Remember, we guarantee every range we sell. Phone 762."

* * *

**McKelvey & Birch Ltd., Kingston, Ont.,** under the heading in large display type "Winter's Demands," says in a double column ad. six inches deep: "These chilly mornings make us think of Jack Frost's coming. The popular heating stoves for home use are —— with grate. No. 4 is a good size, $20. ——burns either coal or wood, $17. COME IN AND SEE OUR DISPLAY. A splendid chill chaser is —— Oil Stove, japanned finish, $6. Can be carried from room to room. YOUR FURNACE OR COOKING RANGE will need repairing. We can supply promptly the men to give it expert attention. DO IT NOW. TO BUILDERS, we have a good stock of cement at our warehouse, foot of Princess St. Phone 237."

* * *

**James Simmonds Ltd., Dartmouth, Nova Scotia,** feature —— aluminum cooking utensils in a double column ad. seven inches deep. A saucepan and a tea kettle are illustrated and a special is offered in a four-quart saucepan at $1.69 if a coupon printed with the ad. is brought in. The ad. stated that every article of —— will last over ten years.

* * *

**McAvitys, St. John, New Brunswick,** in a double column ad. four inches deep, show a thermometer and under the heading in display "Thermometers" say: "For all purposes including window, outdoor, indoor, bath, dairy, home, candy confectioners, engineers. Window thermometers as per cut made of heavy zinc with Perma color spirits, $1.50. Mailed anywhere in Canada."

* * *

**Peterborough Hardware Co., Limited, Ont.,** in a double column ad. eight inches deep, say in display: "Brighten Up the Home. With the coming of autumn days and nights our thoughts turn more than ever to the home—the outdoor pleasures give way for indoor warmth and cheer. If the home is made attractive, how we all enjoy it. ——, a varnish stain for finishing or refinishing floors, woodwork and furniture, will help you brighten up and make the home attractive, and at such small cost. Makes the old furniture look like new. Covers all marks, stains or scratches, leaving a beautiful finish. —— has no equal for floors or woodwork. You can produce the beautiful grained effect of natural wood. It wears like iron. Easily applied and so inexpensive. BRIGHTEN UP THE HOME."

* * *

**C. B. Philips, Rosetown, Sask.,** features "ELECTRIC WIRING" in a double column ad. six inches deey, and says: "Am in a position to do electric wiring. Estimates given. Prices right. Also have a good stock of ELECTRIC SUPPLIES and LAMPS. Call and get our prices before letting contracts. SERVICE AND SATISFACTION."

* * *

**The Morgan Hardware Co., Norwich, Ont.,** in a three column ad. seven inches deep, says: "To our out of town friends, our advice is to patronize your home town first. We make a specialty of many lines that other stores do not carry. These lines we would be pleased to show you. RANGES AND HEATERS for instance, we make a specialty of —— ranges, —— ranges and —— high oven ranges. A complete line of base burners and heaters. ELECTRIC WASHERS, —— electric washers. Save time on wash day. Let us demonstrate it in your own home. —— ASPHALT SHINGLES in stock at $7.00 per square. SHOT GUN AT A BARGAIN, a double barrel —— shot gun, nearly new, for sale at a bargain. Phone 13."

* * *

**The Lawrence Hardware Company, Limited, Halifax, Nova Scotia,** under the heading in heavy display type: "WE DO THIS FOR CONTRACTORS," says: "When you bring us your specifications or the builder's plans, we make up the schedule of the builder's hardware needed and furnish you with an estimate of the total cost. For this service we make no charge. Whatever you want in builder's hardware, you will find in the celebrated —— line we carry. Vestibule, inside door and store door sets with or without cylinder locks. In antique copper, polished brass. Knobs to match, also in cut glass. Porcelain knobs for inside door sets and handsome nickel door sets for bathrooms. SAVE TIME, SAVE MONEY BY BRINGING YOUR SPECIFICATIONS HERE."

* * *

**Cowan Hardware Co., London, Ont.,** a three column advertisement, 8¼ inches deep is used by this firm to make a drive on tool sales. Under the heading in large display type "ON THE SQUARE," the firm says: "Mr. Mechanic, our stock of quality tools is the largest and best assorted in this part of Ontario. Every tool we sell is fully guaranteed." The advertisement is well illustrated, half a dozen cuts being used. It is attractively laid out and prices are given in large figures. There is considerable building activity in London just now and the lines listed include planes, levels, breast drills, hand drills, saws, rules, steel tapes, trowels, screw drivers and other lines in which mechanics are interested.

* * *

**Ruch Bros., St. Catharines, Ont.,** in a two column ad. 11 inches deep feature stoves. Under the heading STOVES across the top, they say: "Have you secured yours yet? If not, you had better hurry. We have all the needed varieties on display." Below is given a list of stoves, heaters and piping with prices all in large figures. The ad. closes with the announcement: "We deliver to Merritton, Thorold, Port Dalhousie, Welland and Niagara Falls."

## STOVE PRICES MAY BE ADVANCED

Continued from page 42

### Little Effect Yet

Regarding the effects of the steel strike, these were not manifest as yet to a serious extent and delivery of raw material has been maintained quite steadily. It is not possible to say, however, that there will not be interruptions, and much will depend, obviously, on the strike's duration.

### Business Is Good

The Canada Stove and Foundry Co., Ltd., Montreal, report business as excellent and much better than it was a year ago. Not only are heaters now moving well, but the full line of stoves and ranges, Mr. Cote, the manager, states, is in steady demand from the trade and shipments are very heavy.

In the matter of raw materials, Mr. Cote reports that their anticipation of what requirements they would have, has afforded them the necessary materials to take care of the increased outturn from their foundries now. With some surplus in hand, it was not necessary to curtail orders, and these are being filled promptly. Mr. Cote does feel, however, that there will continue to be a certain amount of difficulty in procuring steel plates.

### Never Caught Up

"The mills never have caught up with the demand for this class of goods," he stated. "What makes the shortage of this material is accounted for largely through the extensive demands of the automobile manufacturers."

As far as pig iron and coke are concerned, Mr. Cote states that there is no shortage and that supplies are to be had without any delay of consequence. In fact the stocks of these are reasonably plentiful, it was pointed out.

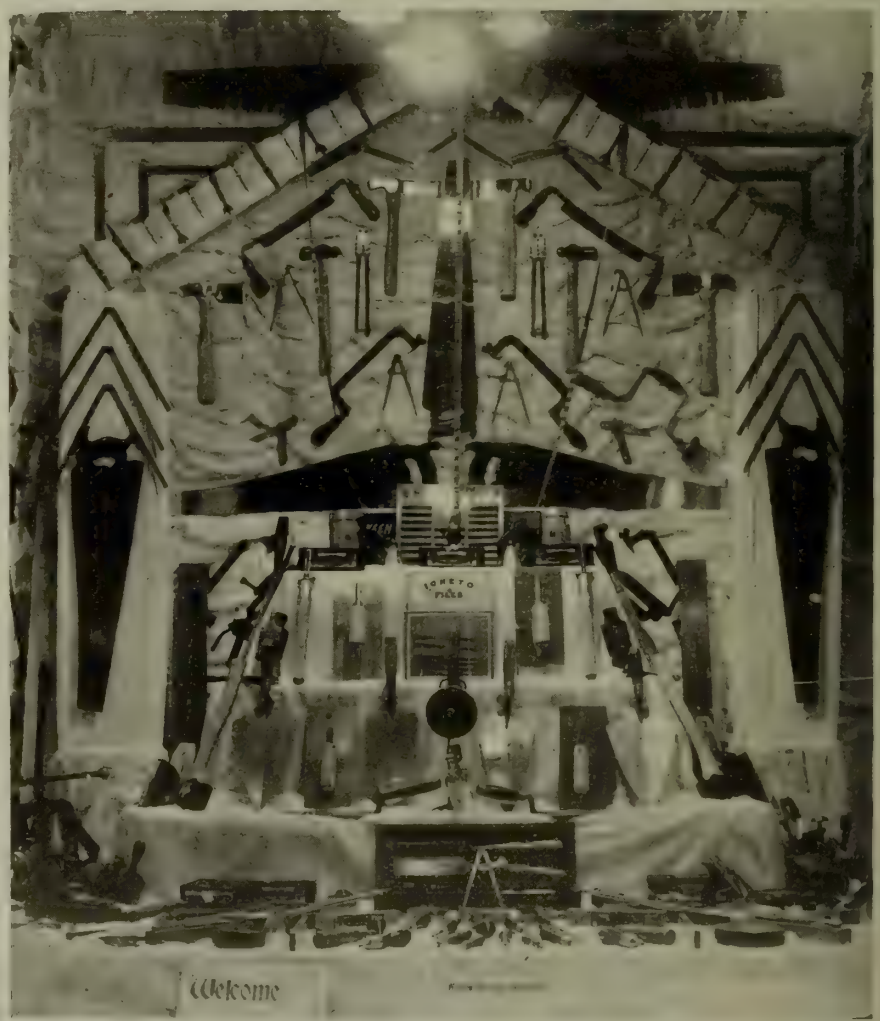
### Not Expecting Trouble

Asked as to whether the present steel strike was having, or would likely have an effect on the manufacture of stoves, Mr. Cote did not emphasize that it would likely cause trouble. And, as before stated, the difficulty of securing plates had existed before the strike began.

As to labor conditions, there is not any immediate difficulty, although the average workman is still somewhat unsettled and does not know just what he wants seemingly. Wages paid are naturally high, and there is no prospect of low prices on either stoves or heaters.

## WHAT CAUSES RATE OF EXCHANGE

Continued from page 46



needs it, he will be compelled to purchase stocks or bonds of the debtor country and either hold them himself or offer them for sale at a price sufficiently attractive to induce purchases. It is to cover the cost of doing this that he charges a rate of exchange which varies as the excess of imports over exports increases or decreases.

### Gold Payments Avoid Rate

One way in which a nation can avoid paying exchange is to pay in gold. Gold is the international medium of payment and has a fixed value in all countries and by sending gold in sufficient quantity to cover its paper money any adverse rate of exchange is at once wiped out. In the same way in the hypothetical case of B and P above. If P can pay B in ordinary money the question of exchange does not arise, but where P and B are issuing their own vouchers instead of money the value of these vouchers depends upon the demand there is for them and that is regulated by the amount of business each is doing. B being a baker, practically everyone could use his vouchers to pay him for the bread they required. If, however, B began spending very heavily and issued vouchers much in excess of the value of the bread he sold, his vouchers, too, would soon become a glut in the market and would be at a discount.

The writer has in the last month or two spoken with several retailers who could not understand why the exchange rate should necessitate their paying more for an article than they previously paid when that same article is selling at the original price in the States. The above explanation will have made this clear. The wholesaler from whom they purchase has paid nominally the same price for the article, but whereas formerly he could purchase the article with the Canadian dollar, he now has to pay with U. S. currency. To obtain this he has to pay practically $1.05 in Canadian money, and he is obliged to pass this extra cost on to the retailer.

In a short article of this nature it is impossible to go into every circumstance affecting the fluctuation of the exchange rate, but enough has probably been said to enable the average business man to understand clearly why it is he is at present working at a disadvantage when dealing with United States merchandise.

*This window display of tools and builders' supplies arranged by the Johnson Hardware Co. of Brandon, Manitoba, was awarded third prize in an entry list of sixty-five in a competition held by the Retail Merchants' Convention. A well arranged display of tools always results in stimulating sales and this window produced excellent business.*

# Controlling Credit is an Important Matter

## Everything Depends on the Attitude of the Merchant—Only Sure and Safe Way is to Sell for Cash — Granting of Credit Indiscriminately is Prolific Cause of Trouble

PROPER control of credits is a matter that is entirely in the hands of the merchant. It depends entirely upon his personality. If he is strong enough to take a firm stand in the matter, and not let his goods go out to every Tom, Dick or Harry who wants to take them on worthless promises to pay, he is going to save himself a lot of time, worry and losses. Many merchants have learned that the only real way and the only safe way to control credits is to sell for cash. There are, of course, exceptions to this. Many hardware men sell to contractors and others who send their men down for merchandise and want it charged for a time. There are other cases also where for some real reason or another some perfectly reliable person may wish to extend payment for a time. But these cases only happen occasionally, and it is not in them that the huge losses sustained by the indiscriminate granting of credit come.

### Cause the Losses

Hardware merchants who have changed from a credit to a cash basis are unanimous in the opinion that they would not go back to the old system.

One hardware merchant stated that his losses in trying to collect numerous small accounts, before he adopted the cash plan, practically ate up the whole business. In addition, he had all the work and worry of keeping track of a multitude of small bills, sending out statements and trying, often times without success, to get his money in. Now he says he gets the money he needs to carry on his business and replenish his stock at a time when he needs it. He can, he says, do better for his customers by buying for cash and selling for cash and he has nothing to worry about in the way of long-standing "carry" accounts.

### Does It Systematically

"There are a few cases in which we will grant credit," said another hardware merchant. "In every case though, we always set a date for payment and then collect promptly as agreed. We have got away from long time sales and from such petty business as opening an account for $1. We would rather that people who want to do business that way worried some other merchant. The whole thing depends on the merchant. If he insists on getting cash he will get it, and if he is easy and lets people bluff him, they will do it and will not thank him."

# Hardware Lines Will be Affected by Coming British Legislation

IMPORTANT legislation which will affect several hardware lines and also the hardware trade between Canada and England will be considered by the British Government when Parliament reassembles in a few weeks.

According to the Board of Trade Journal, legislation will be introduced as follows:

(a) For the protection of goods manufactured in Great Britain and Ireland against dumping by taking power to prevent the sale in this country of similar goods beneath their price in the country of origin;

(b) To enable the Board of Trade to check any flood of imports (for instance, from Germany), that might arise from a collapse of exchange so disproportionate to costs of production in the country of origin as to enable sales to take place in this country at prices altogether below costs of production here;

(c) To deal with unstable 'key' industries in the following way:

"A limited number of unstable 'key' industries will be scheduled, the products of which will be prohibited from importation into England except on license.

"Pending legislation, a general license under the Prohibition of Import Proclamations is being issued by the Board of Trade authorizing the importation into the United Kingdom of all goods with the exception of those in the following list, which will be treated as unstable 'key' industries: Optical glass, including lenses, prisms, and like optical devices; scientific glassware; illuminating glassware; laboratory porcelain; scientific and optical instruments; tungsten powder and ferrotungsten; zinc oxide; lithopone; gas mantle and mantle rings; magnetos; hosiery needles, latch gauges.

"It is not proposed to make any addition to the above list unless and until Parliament so determines, with the possible exception that in the event of the contingency foreshadowed in paragraph (b) above arising it might be necessary to suspend temporarily all or any of the imports from the country affected by the collapse of exchange.

"The Board of Trade announces, in explanation of the above, that, pending legislation, a general license under the Prohibition of Import Proclamations is to be issued to cover all goods with the exception of those set out in the list of key industries. In the case of kerosene and benzine (including white spirit), gas oil, and fuel oil, this general license refers to total quantity of import, and does not affect the agreement entered into by the Government to limit the number of importing firms for the period of the existence of the Pool Board, and nine months thereafter to those firms which co-operated with the Government to form the Pool Board, as a result of which the community received material benefits. The termination of the war organization of the Pool Board as from January 31, 1919, was announced in the press on January 2, 1919. The nine months' period which has to elapse before other firms are allowed to import does not therefore expire until October 31, 1919.

### SHORTAGE OF CANS

According to press reports the shortage of tin plate, caused by the great steel strike in the United States, is causing a great deal of inconvenience among the canners and growers throughout the whole province. A dispatch from St. Catharines, Ont., says: "This district is especially hard hit, a few canneries being compelled to shut down owing to their stock of cans having become exhausted. The plants of the Dominion Canners at Welland and Niagara-on-the-Lake are closed, and the plant at Jordan Station will have to close.

"The Schenck plant, in this city, has a sufficient supply for one day, while the Simcoe plant has by far the best supply, and will be able to keep in operation for a few days to come.

"Relief appears to be in sight, which it is hoped, will care for the large crop of tomatoes in this and other districts. The Dominion Canners were fortunate enough to secure a number of cars of cans in the Eastern States, which are being rushed to St. Catharines and elsewhere for distribution among their many factories."

### SHIPBUILDING SLACKENS

According to a bulletin issued by Bradstreet's, Canada's shipbuilding trade is not expanding in the way it gave promise of doing a few months ago. It is stated that in British Columbia the industry is in great danger of being almost extinguished. The bulletin says: "Unless new orders are obtained the Coughlan shipyards and the Wallace shipyards will likely cease operations except for repair work. The Foundation Company of British Columbia has already completed its contract with the exception of equipping some of its boats for French account. This leaves in British Columbia only the Mullen yards at Prince Rupert and the Victoria Machinery depot. These concerns have two and six contracts respectively. In the East there is not the same swing to the industry that existed a short time ago."

The Robert Lucas Glove Co., has been registered at Montreal by Robert Lucas.

# EDITORIAL COMMENT

THE scarcity of housing accommodation all over the country is becoming increasingly acute. Many a young married couple set out these days to find just the kind of a house that will suit them and end up by being glad to rent any rooms they can get. As long as conditions of this kind prevail more and more building is inevitable.

* * *

THE nearest that many people can get to a reason for the present cost of living is that everything is going up because everything else is.

* * *

THE only kind of advertising that does not pay is that which is not properly done. Good advertising is an investment that returns a profit. It is never an expense.

* * *

TO-DAY in business, the greatest competition is in quality, not in price. It pays to sell the better goods, as people are realizing now as never before that the best is the cheapest in the long run.

* * *

THE kinds of goods that keep moving are the kinds the public like and are the kinds that bring the profits. No merchant ever made any money out of shelf warmers.

* * *

UP TO the time of going to press, housewives had not called a strike for a thirteen-hour day or a minimum allowance of spending money, but most women are demanding more and more time and labor-saving devices to work with and the hardware men are selling ten where they sold one a few years ago.

---

## *CANADA'S STRONG POSITION*

JUST a month from to-day the world will celebrate the first anniversary of the signing of the armistice. The nations have been at peace—or rather what has been called peace—for nearly a year. Looking back now one can hardly help contrasting the predictions of eleven months ago with what has actually transpired. Many retailers at that time confidently predicted falling commodity prices with the cessation of the war demands and acting on that assumption went light on buying, some of them very light. Not only retailers did this, but wholesalers in many cases as well. Yet prices have risen and risen until many of them stand at the highest levels in the memory of living merchants. Food and raw materials, instead of becoming cheaper and more plentiful, have become dearer and more expensive. War debts have grown greater instead of less. The currency of most of the belligerent nations, instead of contracting, has expanded faster than during the war period. Instead of returning to order from disorder, many nations have drifted further into disorder. It has been said in some cases that "War is hell, but Peace is worse." International financial relations inevitably reflect the tendencies of commercial intercourse and the inflation of national currencies. Exchange rates of foreign countries have shown remarkable variations. The rate of exchange against Canada in New York has been high, but not so high as against England. In the New York market recently, it would cost a Britisher $1.18 to buy $1.00 worth of goods. It would cost a Frenchman $11.78, an Italian $1.96, and a German $7.40. Naturally conditions of this kind have an enormous effect on trade. Added to this is the situation brought about by the strike of the steel workers in the United States and of the railway workers in England. The railway strike is settled and the steel strike is likely to wear itself out shortly, but their effects on business remain.

In striking contrast to these troubles of other nations is the strong position of Canada. Business has perhaps never been better in the history of the Dominion. The nation has real cause for thanksgiving this year in rich and abundant harvests, the return of peace and generally satisfactory conditions. There has been plenty of work at good wages and the people generally are prosperous. The great trouble of merchants generally, and of hardware men in particular, has been to get enough goods. Many of those who bought very conservatively, fearing a drop in prices, saw their mistake when it was too late to remedy it. "We could have sold just 25 per cent. more goods if we had only had them," said the buyer of a large wholesale hardware house to HARDWARE AND METAL. "We played it safe. While we have done an excellent business, we could have done a lot more." This condition is general. The business outlook is good. As far as Canada is concerned it looks as if this country is just entering upon the greatest era of prosperity it has ever known. While we have had labor troubles and other troubles, they have been insignificant com-

pared with those which have been rending other nations. On the whole, business conditions in Canada are sound, in the hardware business especially, and the outlook is for them to be even better.

### *THE POWER OF ADVERTISING*

FOR every person who knows what he wants and comes into your store and asks for it, there are scores of what might be called latent purchasers who know what they want only when it is placed clearly before them and suggested to them. This is one of the main reasons why sales forces exist, trained men and women who can show the advantage of a product to prospective buyers. Advertising is one of the greatest sales forces there is if intelligently used and directed. Its power lies in its ability to reach and convince the maximum number of people in the shortest possible time. This is one of the reasons why the greatest merchants in the world are consistent users of advertising space. They not only use space, but they use large space and they fill it with matter that has a real interest to the thousands of men and women all over the country who read it. Many of the ads. suggest to the readers things they need and which they gladly buy when they remember that they require the goods or will require them.

### *A CASE FOR STANDARDIZATION*

THE need for electrical goods with a standard plug is becoming more apparent every day. This has already been done with electric light bulbs and with the steadily increasing popularity of other lines, there is no reason why the householder should be seriously inconvenienced as at present. There is no justification at all for the housekeeper having to keep a dozen different cords hanging around the house, each with a different plug at one end and very frequently at both ends. One is for the toaster, another for the iron, another for the vacuum cleaner, another for the washing machine and so on. This means real annoyance and inconvenience for many women and is entirely unnecesary if the manufacturers would get together and agree on a standard plug. Incidentally, it would help in increasing the sales of merchandise. In St. Thomas, Ont., a citizen recently had his house wired for electricity and planned to instal all the latest conveniences. He has sockets for irons, etc., and when he endeavored to make use of the appliances, he discovered that the sockets were built for the metallic power conveyors to be inserted horizontally, while the new equipment he was putting in had parallel conveyors. He was forced to remove the sockets and instal new ones. This matter, it is stated, is to be taken up with the Ontario Hydro Commission, as it is not the first complaint of the kind that has been reported. The average citizen is "sold" on electricity and the value of convenience of electrical utilities, but it is little things like this that make endless trouble and often cause people who would buy washers, vacuum cleaners and other things to go slow. The men handling electrical goods can do a great deal if they will get togther and put it up to the manufacturers to standardize.

### *HELP ALONG THIS WORK*

IT is the aim of both the Dominion and Provincial Governments as well as of many of the large manufacturing firms to encourage home owning. This year has seen considerable progress along this line, and while there is still an acute shortage of residences, especially in the larger cities, a good deal has been done to alleviate a condition that was becoming almost intolerable. It is still bad enough. The housing question is occupying almost as prominent a place in the news columns these days as labor unrest or any other big problem. Not only is the scarcity of houses driving many people to own their own homes, but also the exorbitant rents being asked by landlords. Brisk as building has been this year, it will apparently be small compared with the programme that will get under way next spring. All movements to encourage home owning are of keen interest to the hardware merchant and offer him splendid opportunities, not only for selling the materials required in erecting the dwellings, but also quantities of household needs for those who are to live in them. The hardware merchant who is in a position not only to advise those who are building about the best materials to use, but to show them a well-selected stock of materials and also of builders' hardware, electrical fixtures, bathroom equipment and fixtures, electrical washing machines, vacuum cleaners, toasters, irons, and other lines are going to get some nice business. Many hardware men have been making the most of these opportunities and with excellent profit to themselves. While business has been splendid this year, they see even more trade of this kind ahead next season and are making their arrangements for getting their share of it. As was stated by a hardware merchant in last week's issue of HARDWARE AND METAL, one of the best ways of securing business and of bringing people back to your store, is to be in the position where you can supply their every need in the hardware line, in other words, carry the stock. This is a sure foundation for any merchant to work upon and those who are conducting their stores on that basis are not worrying about selling the goods. Their trouble very often is to get enough goods to sell. There is every indication that the shortage of goods will not be relieved for some time. Between the American steel strike and conditions prevailing generally, production is not nearly enough to keep up with demands and many manufacturers are having great difficulty in getting raw materials.

# EVENTS IN THE TRADE

## Business Changes

Loyalist, Alberta.—F. Broz has purchased the hardware business of W. R. B. Otkins.

Whitby, Ont.—F. D. Maundell has purchased the hardware business of W. M. Pringle.

## Fire Losses

The De Laval Manufacturing Co., Ltd., Montreal, manufacturers of dairy supplies, sustained a fire loss.

The W. L. Thom Oil Co., 11 Ste. Therese St., Montreal, sustained a fire loss of $10,000.

## Personals

L. C. Stephens, of G. F. Stephens & Co., Winnipeg, is back at his desk after a short absence from the office.

George J. Rogers, of the Rogers Hardware Co., Ltd., Charlottetown, P.E.I., has been in Montreal and New York on a buying trip.

Following the death of W. Cromwell Gurney, president of the Gurney Foundry Co., Limited, Toronto, Mr. E. H. Gurney has been appointed acting president, and W. R. Gibson acting general manager.

L. M. Cochrane, of Cochrane & Stephenson Ltd., Winnipeg, is on a business tour through the United States. He will visit Chicago, eastern points in the U. S., St. John, N.B., Montreal, Toronto, and returning to Winnipeg from Eastern Canada.

## Trade Notes

The A. H. Power Furnace Co. has been registered at Toronto.

Glovers Registered, Montreal, manufacturers of mitts and gloves, has been dissolved.

J. H. Plunkett, of Hamilton, Ont., is selling his hardware stock and will retire from business.

Charest & Lamontagne, tinsmiths and plumbers, have been registered at Coaticook, Que., by Joseph O. Charest and Eugene O. Lamontagne.

The Canadian Aloxite Company, Limited, has been given permission to change its name to the Canadian Carborundum Company, Limited.

The Winnipeg Ceiling and Roofing Co. has been granted a permit for a $15,000 addition to the plant in St. Boniface, Manitoba, for the manufacture of sheet metal products.

The Raymer Company, of which O. L. Raymer is president, has acquired the assets of the North Bay Toy Co., at North Bay, Ont., and plans to manufacture toys, clothes pegs, dust pans and similar lines.

## Montreal News

Morris Wheeler, New York, representing Sargent & Co., Ltd., was in Montreal during the week.

Mr. Bowman, of the Russell & Irwin Co., New Britain, Conn., was in Montreal recently.

George Henderson, president of Brandram-Henderson, Ltd., was in New York during the week.

W. S. McLennan, general sales manager of Brandram-Henderson, Ltd., was in New York this week.

A. G. Gibb, representing Alexander Gibb, wholesale metals, called on the Ottawa trade this week.

J. B. Gaynor, sales representative for the Union Hardware Co., Ltd., Torrington, Conn., was in Montreal recently in his company's interests.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., Montreal, is in Western Canada on a tour of several weeks.

W. G. Harris, Sr., president of The Canada Metal Co., Ltd., Toronto, was a visitor at the Montreal factory on Wednesday.

## Incorporations

The Canadian Safety Fuse Co. has been registered at Montreal.

Steel Burial Vaults, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in metal caskets, etc.

Shi-on, Limited, capital $40,000, head office Stratford, Ont., plans to manufacture and deal in pastes and polishes for cleaning glass and metals.

The Smith Doll and Toy Company, Limited, capital $150,000, head office Dunnville, Ont., plans to manufacture and deal in novelties.

Paxton-Mitchell., Limited, head office Montreal, capital $100,000, plans to carry on a general business in steel and iron goods.

Houlding and Walker, Limited, capital $25,000, head office Brantford, Ont., plans to manufacture and deal in automobiles, auto parts and auto accessories.

Dominion Dehydrator Company, Ltd., capital $150,000, head office Toronto, plans to manufacture and deal in dehydrating equipment.

Synthetic Rubber and Tire Company of Canada, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in rubber goods.

The Abrasive Company of Canada, Limited, head office, Hamilton, Ont., capital $250,000, plans to manufacture and deal in grinding wheels and abrasives.

The Gillette Safety Razor Company of Canada, Limited, Montreal, has been given permission to increase its capital stock from $2,000,000 to $5,000,000.

The Phillips Steel and Wire Company, Limited, is given permission to increase its capital stock from $100,000 to $300,000.

The National Farming Machinery, Limited, capital $4,000,000, head office Montmagny, Quebec, plans to manufacture and deal in implements, machinery, rolling stock and hardware.

Chapman's, Limited, capital $100,000, head office Verdun, Quebec, plans to manufacture and deal in lumber, furniture, builders' and contractors' supplies, hardware and automobile accessories.

### GOES SOUTH

I. M. MacDonald, manager of the export department of the Carpenter Morton Co., Boston, has started for South America, to be gone several months. He will first go down the east coast and later will spend considerable time on the west coast, in Chili and Peru.

### OPENING CANADIAN BRANCH

John Lundholm of Ekelstuna, Sweden, representing the Ekelstuna Separator Company, is in Winnipeg establishing a company for the construction of these machines in the West. They will be handled by C. H. McFadyen & Co., Ltd., and G. Hammerstrand of Winnipeg, operating as the Fortuna Cream Separator Company.

### EXPLANATION

In last week's issue of HARDWARE AND METAL an announcement appeared regarding the removal to Winnipeg of Howard W. McConnell. The underline below the cut, stating that Mr. McConnell is going to Winnipeg as Manitoba and Saskatchewan representative of the A. Ramsay & Son Company, Limited, of Montreal, may be misinterpreted. While it is true that Mr. McConnell will act as the representative of this company for the two provinces, he will do so through his association with H. L. Perry Company, Limited, of Winnipeg, having charge of the commission lines now handled by this firm.

### NO DECISION ARRIVED AT

At a special meeting of the retail merchants of Moose Jaw, Saskatchewan, to discuss the question of continuing early closing on Wednesdays, no decision was arrived at and the matter will be left to the judgment of the individual employers. Several merchants expressed their intention of carrying on the holiday and will close on Wednesdays irrespective of what their competitors do.

### THEY WILL DO THESE THINGS

A few days ago in Hamilton, Ont., while a motor car was being filled with gasoline in front of a hardware store the driver lit a match to see if the tank was full. Fortunately there was no explosion, but a lively blaze was in progress in a second. A clerk in the hardware store was able to put the fire out quickly by using an extinguisher. People will do these foolish tricks in spite of all the fires that happen and the warnings issued. A flashlight would have saved all this trouble and the damage to the car.

### WOULD HELP EXPORT TRADE

Discussing the situation in reference to export trade the manager of a large Eastern firm stated to HARDWARE AND METAL that there has been no move in Canada by forwarding and customs brokers to take care of the shipments to other countries. "The manufacturer does not want to know anything about these," he said, "and he is willing to pay a broker to look after them for him. If there are any firms in this line in Canada they appear to be dead, and that is one reason why all our export business goes via New York. If a greater amount of export business is not done in Canada with the opportunities which are now presented it is attributable to the reason I have mentioned."

### URGES COMMISSION TO INVESTIGATE NAVAL STORES MARKET

Requests have been made to the Federal Trade Commission at Washington to investigate conditions in the turpentine market at Savannah, which it is claimed has been potent in forcing prices up.

The movement for investigation comes from retail dealers, who claim the present prices are unfair.

In answering the request for an investigation the Savannah Weekly Naval Stores Review defends the present prices in an editorial claiming that the present price is being caused by short production, owing to the scarcity of unskilled negro labor and an excessive demand.

### GENERAL STORE ROBBED

George Thompson, Kinnear's Mills, Que., who conducts a general store, as well as town post office, had his store entered recently and money and cheques to the extent of $2,000 taken. Leaving his store as usual on the night of the robbery, Mr. Thompson left the usual amount of cash and securities in the safe. The thieves apparently entered through the cellar, breaking their way in, and opening the safe, made away with a large haul.

The police forces of the district have been notified but so far no trace has been found of the robbers.

# Next Convention of Ontario Retail Hardware Association Will be Held at Hamilton

THE Executive Committee of the Ontario Retail Hardware Association has been advised by George O'Neil, manager of the United Hotels Company, that it has been decided not to operate the Clifton House at Niagara Falls during the winter. The Executive, as stated in a former issue of HARDWARE AND METAL, planned to hold the next annual meeting of the Ontario Association at the Falls. Instead it will now be held in Hamilton.

The business sessions will be held in the Royal Connaught Hotel and the Executive Committee has already completed arrangements for leasing the Odd Fellows' Temple on Gore St., for exhibits. The Temple is located only a short distance away from the hotel and delegates will find it very convenient to reach whenever they wish to see the exhibits.

**An Ideal Place**

The space secured, it is stated by President A. J. Wright, is ideal for exhibition purposes and will provide ample accommodation for fifty exhibitors. Space was secured on the basement and ground floors and there are rooms in which empty crates may be stored, a stage on which addresses may be given or on which moving pictures may be shown, a gallery which will seat 200 people and adjoining rooms in which any special business meetings may be held.

The Executive Committee is planning a program that will be up to the high standards set by former conventions. There is very indication that the next meeting will break all records from an attendance standpoint as the membership has been showing a healthy increase and is still growing.

**All Should Boost**

"Every hardware man in the province should be a member," said Secretary Macpherson of Prescott to HARDWARE AND METAL. "We have a splendid organization and the only way we can make it better is to have every hardware merchant a member. By working together we can get results that will count and that benefit every one in the hardware business. The stronger our membership the quicker this can be done. The membership has been showing a most satisfactory growth and every hardware man can help it along by getting merchants who are not members to join the association."

### CANADIAN MANUFACTURERS TO MEET NEXT THURSDAY

A general meeting of the members of the Canadian Manufacturers' Association in Ontario has been called for Thursday, October 16, at the King Edward Hotel. The circular states that the business to be considered will be the organization of an Ontario division within the association, the election of officers and committees, and such other business as may be brought before the meeting.

By amendment of the association by-laws, passed at the last annual meeting, members located in the province of Ontario were created an Ontario division of the association. This does not affect the branch organizations as at present constituted.

The reasons for the changes are:

(a) Uniformity in district organization. There are now the Maritime, the Quebec, the Ontario, the Prairie Provinces, and the British Columbia Divisions.

(b) Closer co-operation among the members so located.

(c) To enable members within a division, through their duly elected officers and committees, to deal with matters of common interest, such as provincial legislation, industrial conditions within the province, policies of the association as they affect the divisional members, etc.

### OTTAWA MERCHANTS TO CAMPAIGN FOR O. T. A.

A number of the Ottawa business men met this week to discuss the Ontario Temperance Act and to decide what part they should take in connection with the ballot. The opinion was expressed at the meeting that not less than seventy-five per cent. of the Ottawa business men favored the Act. The following committee of business men was appointed to arrange for a public meeting to make known the benefits which had resulted to business from the Act: A. H. Jarvis, W. E. Gowling, A. H. Fitzsimmons, J. A. Larocque, E. C. Chamberlain, F. Jarman, W. G. Keddie, H. C. Shipman, L. N. Poulin, D. Johnson, J. Moffat Ross, W. J. Gerald, E. D. Lowe, B. C. Crabtree, W. A. Oliver.

### WANT WEDNESDAY HOLIDAY THROUGHOUT THE YEAR

At a mass meeting of the retail clerks, held in the Labor Temple, Lethbridge, Alta., recently, a local organization was formed to affiliate with the Trades and Labor Council.

A resolution was passed for a continuation of the Wednesday half holiday throughout the year. In regard to this a committee will be appointed.

## New Records Made In Prices For Furs

This year is seeing a record demand for furs, and at a two-day sale, which closed in New York last week, skins valued at more than $1,200,000 were sold by auction. The public in general apparently has any amount of money to spend on furs, and the business for next season is expected to even surpass this year's high mark. Prices are showing a steady advance and there is every indication that with the return from overseas of so many men that more trappers will be out than ever. At the New York sale marked advances were recorded on dyed foxes, conies and other furs, the increase ranging from 5 to 55 per cent.

Japanese foxes advanced 10 per cent., skins realizing $8 to $20 each; American opossum advanced 10 per cent., the lowest price being 50 cents and the highest $1.56; red foxes advanced 25 per cent., the highest price being $45 per skin and the lowest $1.40; grey foxes brought from $4 to $5 a skin; Jap mink advanced 5 per cent., prices ranging from 20 cents to $1.60; fitch advanced 10 per cent., skins bringing from $1 to $2.50; wolves realized from 25 cents to $12; American opossum remained unchanged, the highest price paid being $2 and the lowest 50 cents; cat lynx brought from $1 to $9 a skin; wild cat advanced 5 per cent., skins realizing $15 each; conies advanced 30 per cent., the highest price paid being $43 per dozen and the lowest price 20 cents per skin; dyed foxes advanced 25 per cent., prices ranging from 50 cents to $3.50; ringtail opossum advanced 5 per cent., prices ranging from the lowest 25 cents; sea lions advanced 10 per cent., skins realizing from $1 to $3.80 each; badgers advanced 15 per cent., the highest price paid being $3 and the lowest 25 cents; sealions advanced 30 per cent., prices ranging from $5 to $35; rabbits advanced 35 per cent., prices ranging from $1.35 to $1.95; broadtail advanced 10 per cent., prices ranging from $1 to $8.50.

### RICHARD MOORE ELECTED PRESIDENT N. P. O. & V. ASSOCIATION

Richard Moore, president Benjamin Moore & Co., Limited, was elected president National Paint, Oil and Varnish Association at the recent convention at White Sulphur Springs, W. Va. The "Paint, Oil and Drug Review," in reviewing the career of Mr. Moore, stated: This is a year for strong practical men, men of force and courage, and Richard Moore, of St. Louis, who has just been chosen chief executive of the National Paint, Oil and Varnish Association, is such a man. He comes of that strong Scotch-Irish stock which has given so many great men to our nation. Born in the year 1860, in the North of Ireland, and the son of a British Army officer, he grew up on his father's property in the expectation that he would stay at home and take care of the estate, but fired by the books of Horace Greeley, on the great West, and the opportunities offered to young men in America in the seventies, he told his father he was going to leave the farm and take his chances in the far West. At the age of twenty he arrived in New York and went to work for F. O. Pierce & Co. This was in 1881.

Three years later "the lure of the West" finally located him at Kansas City in charge of the paint factory of Campbell & Cutler, at that point. He, however, realized the natural and trade advantages of St. Louis as a centre for the manufacturing of paints and some twenty-five years ago associated himself as factory superintendent and assistant manager of the Vane-Calvert Paint Co., in which position he originated and perfected and put upon the market many of the paint specialties which are now as staple as linseed oil in the paint business.

These paint specialties sold rapidly and gained immediate recognition in all parts of the country, which attracted the attention of William E. Becker, who was then a paint salesman in the Southwest. This finally resulted in their organizing the Becker-Moore Paint Co., in 1901.

The record of this firm is well known to the trade. After the sad death of W. E. Becker, who lost his life in the Missouri Athletic Club fire, Mr. Moore succeeded him as president and general manager. Shortly after, his brother, Mr. Benjamin Moore, of Benjamin Moore & Co., being anxious to get into the Southwestern market, made the stockholders a flattering offer for the control of the business, which was accepted, Mr. Richard Moore being elected a director of Benjamin Moore & Co., and general manager of the St. Louis house, which position he holds at this date.

He served successfully during 1915 and 1916 as president of the St. Louis Paint, Oil and Drug Club, and was elected to the vice-presidency of the National Association at Chicago in 1917, serving in that capacity for two years loyally and conscientiously. He is a man of family, having a wife, three daughters and one son and is a member of most of the business, civic and benevolent associations in the city of St. Louis, being deeply interested in this class of work, Mr. Moore is strongly patriotic and says that there is one thing above all others that he is proud of: he was born in the same year, the same month, the same day, and in all probability the same hour as General John J. Pershing.

## Saturday Half-Holiday Instead of Wednesday is Under Consideration at Regina

REGINA, Sask.—A movement is under way among retail merchants here to establish a Saturday half holiday next season in place of that held on Wednesday. The arguments advanced are that a week-end half holiday would benefit both the public and the store employees far more and avoid a bad break on Wednesdays. R. H. Williams, of the Glasgow House, department store, stated to HARDWARE AND METAL that his firm plans trying out the Saturday half holiday next year during June, July and August. Several other merchants have the idea in mind also. The employees seem to favor the move on the ground that it will give them a chance to plan to spend the entire week-end at home or with friends out of the city.

**Doing Good Trade**

The hardware stores have been doing a record business in guns and ammunition as a result of the large number of duck hunters and game hunters. Sales of licenses have been excellent this season.

Prior to his departure from the Glasgow House, where he was manager of the hardware department, M. St. James was presented with a handsome club bag. He intends locating in Winnipeg.

### BAMBOO PRODUCTION 50 PER CENT. LOWER

The prospects are not encouraging for bamboo poles for the season of 1920, the production being estimated at only fifty per cent. of normal, HARDWARE AND METAL IS INFORMED.

One of the reasons contributing to the reduced production is assigned to unfavorable climatic conditions in Japan. Then again, there have been labor troubles in that country and strikes have been marking the industrial history there as elsewhere throughout the world.

It is stated that little information is available as to the prices at which the product will be procurable. In fact many large buyers in the United States are, at the present time, making their specifications in order to protect themselves on stock later. Prices will be announced later, and these, obviously, will be higher.

### SOLVING HOUSING PROBLEM

Butterfield & Co., Inc., of Rock Island, Que., will try to solve the housing problem for their employees by adopting a plan which was adopted most successfully by the parent company, the Union Twist Drill Co., of Athol, Mass.

The plan is for the workman to put up 20 per cent. of the cost of any kind of a house he wishes built. The company then assumes the mortgage at a low rate of interest and allows the workman to pay it off as he likes. It was found that by this plan the workers took a definite interest in their property and that they usually paid up quicker and looked after their work better.

L. H. Laythe Jr., sales manager of Butterfield & Co., of Rock Island, Que., stated that this plan would be tried by the firm.

# Conserve Supplies of Galvanized Sheets is Advice of Manufacturer

THE following announcement regarding the galvanized sheet situation and the outlook for the future is being sent out to the trade by the Dominion Sheet Metal Corporation, Limited, of Hamilton, Ont.:

"Our stock is practically exhausted and we cannot hope to get in any considerable amount of steel from the lone Canadian producer, from whom we secure their limited maximum. The U. S. mills are shipping nothing, notwithstanding reports of partial operation.

"We caution you to observe the greatest conservation in disposing of your stock, as it will be three to four weeks after the strike ends before new supplies are available."

Discussing the matter with HARDWARE AND METAL, Mr. A. T. Enlow, president of the company, said:

"I understand that the Steel Co. of Canada is loaded up for the entire balance of this year, selling only occasional small orders from stock at a good stiff advance. I firmly believe that the main trouble will come after the strike is over and the mills start operation and people will begin to expect goods, whereas nothing will reach Canada of any importance until three or four weeks, at least, after operations have been resumed in general.

"The occasional carload that straggles through is just about like a small chicken bone to a hungry Airedale dog. It only makes him seem hungrier."

---

**National Cash Register Company Employees Hold Monster Field Day**

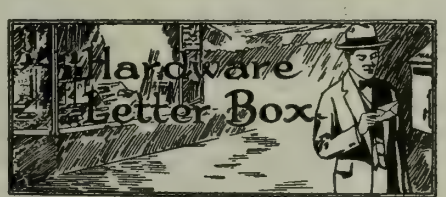
Dayton, Sept. 22.—30,000 Dayton folk turned Hills and Dales Country Club into one large picnic on Saturday. They were the factory employees, and their relatives, of the National Cash Register Company. Every picnic requisite was there—in fact it was more like a fair. Side shows, bands, clowns, races, ball games, dancing, refreshments, fire works, moving pictures—all were in evidence.

Refreshments were served at noon and at night, cafeteria style, from 85 long tables. The 650 waiters at noon served over 20,000 people in 16 minutes. The waiters hadn't time to accept any tips.

The entire picnic was planned and directed by the men in the N.C.R. factory. All the company did was to foot the bills. The men planned the big parade from the factory to the picnic grounds, hired the entertainers, bought the refreshments, did everything. The executives were guests.

**Picnic a Family Affair**

President John H. Patterson of the National Cash Register Co., in speaking of the reasons for the picnic, said:



"We want our people to know each other in a social way, as well as in a business way. We want our foremen and superintendents to meet the men's wives. We want the men to meet the wives of their superiors. We want their children to play with one another. We know that the more everybody in our organization knows of everybody else, the happier they will be in their work, the better they will get along together.

"I felt very happy as I walked through the grounds to-day. It seemed just like a big family reunion. It is a big family reunion. So many people came up and shook hands with me and reminded me of the days when our business was small and when they were part of the little organization which worked so hard for the future."

**LENS MANUFACTURE IN BIRMINGHAM**

Important developments are foreshadowed in the lens-making industry of Birmingham, England. A semi-automatic plant for pressing lenses for bicycle lamps is being erected by local firms. Germany and Austria formerly supplied these goods at prices below those of manufacturers here, but it is believed the production at Birmingham might, with good manufacturing facilities, be accomplished at corresponding figures.

Optical glass has been produced in this city for many years, but a new impetus to this business has now come of the war. Birmingham manufactured large quantities of lenses during the war and made great improvements. One firm was very successful in the production of a special type of lens used in sighting airplane guns, the glass not blurring with the change from high to low altitudes.

**Alfalfa Cutter**

**L. R. Guild, Rockwood, Ont.**—Will you kindly advise where I can purchase an alfalfa grinding mill suitable for shredding alfalfa hay for poultry?

Mills of this kind may be obtained from the Wm. Rennie Seed Co., Ltd., 130 Adelaide Street E., Toronto.—Editor.

**Wood Coat Hangers**

**J. F. Guite Limitee, Maria, Que.**—Will you please give us the names of manufacturers of wood coat hangers and oblige?

These may be obtained from the American Coat Hanger Co., 72 Grande Ave., Montreal; M. Caya & Co., 490 Parc Lafontaine, Montreal; De fosse & Co., 247 Craig Street, Montreal; Dale Wax Figure Co., 109 King Street E., Toronto; D. G. & P. Kittie Goods, 117 Peter Street, Toronto.—Editor.

## CATALOGUES and BOOKLETS

**NEW CATALOG, LANDERS, FRARY AND CLARK**

Landers, Frary and Clarke, New Britain, Conn., represented in Canada by A. MacFarlane and Co., Limited, Montreal, have issued an attractively illustrated 250 page catalog featuring Universal Home needs. In addition to being attractively illustrated the catalogue carries descriptive matter, list prices, shipping weights, and a large amount of other practical information of great value to the hardware buyer. Among the many lines featured in the catalogue are cutlery, hardware, electrical appliances, vacuum specialties. The new catalog is No. 62 and copies will be supplied to readers of HARDWARE AND METAL upon request.

**GOOD CHEER CATALOG NO. 61**

The James Stewart Mfg. Company, Limited, Woodstock, Ont., and Winnipeg, Man., have issued an atractive loose leaf catalog No. 61, featuring "Good Cheer" stoves, furnaces, registers, etc. The catalog, which is splendidly illustrated, has been put up in convenient and comprehensive form and on account of the loose leaf feature new pages may be inserted when sent out by the manufacturer. One of the unusual features of this catalog is a series of practical business talks for the retail salesman. Interspersed throughout the catalog are also business epigrams and selling talks regarding the goods featured in the catalog. A new net price list has also been issued applying to the new catalog. Copies of this catalog will be supplied to HARDWARE AND METAL readers upon request.

**CANADIAN SHOVEL AND TOOL CO. LIMITED.**

The Canadian Shovel and Tool Co., Limited, Hamilton, Ont., has issued a thirty-page catalogue, in which is listed the various lines of shovels manufactured by the firm. The catalogue is printed on glazed paper and is most attractively illustrated. Readers of HARDWARE AND METAL may obtain copies upon request.

# THE CLERKS DEPARTMENT

## Courage to Stick and Take a Chance Meant Triumph for F. A. Seiberling

### Head of the Goodyear Tire & Rubber Co. Has Built Up a Business Which Has Expanded Fifteen Fold in the Last Decade—Believes Every Man Should Depend on His Own Initiative

F. A. SEIBERLING has won out in a business race against what seem tremendous odds. From almost a bankrupt he has created and built up an organization that is one of the largest of its kind in the world to-day. His story is told in "Forbes' Magazine" by H. R. Baker and L. H. Butler as follows:

"With courage to take a chance, even though a desperate one, and when slipping to get a new toe hold and a good one, F. A. Seiberling, president of the Goodyear Tire and Rubber Co., has carved for himself a place among the leaders of American industry. His intimate associates characterize him as a man who can formulate great plans and carry them through in spite of tremendous odds.

"From a man who was almost a bankrupt, he created, built up, doubled in three years, and expanded fifteen-fold in the last decade, the business of which to-day he is head. Neither has he, like so many corporation executives, relinquished either controlling interest or direction of its policies to another leader.

**Hit by Panic**

"The City of Akron, Ohio, which homes this tremendous business, was founded largely upon the prosperity of the implement business in the early days. Then in 1893 the panic which swept over the country left the Akron implement factories without a financial leg to stand on, and F. A. Seiberling, who was interested in the implement business with his father, went down to disaster with the business.

"During the next five years he struggled for an existence that was not always bounteous or encouraging. One day in June, 1898, he awoke to the realization that he was several thousand dollars poorer than nothing. And he had a family to provide for.

"There was a small straw-board factory building in Akron, which after passing through a profitless existence, was finally stripped of its machinery and allowed to stand idle. A man commissioned to dispose of the plant met Mr. Seiberling on that memorable June day and asked him to help in selling it.

**Opens Rubber Factory**

"Like a flash, it occurred to Mr. Seiberling that he was face to face with Opportunity. Instead of agreeing to help to dispose of the plant he surprised the man by offering to buy it. At the eleventh hour he found that rare thing, a friend who had not only confidence, but money which he was willing to lend him.

"What would he do with his factory? What would he manufacture?

"Being of an inventive turn of mind, the thought of a monotonous, single-product business did not appeal to Mr. Seiberling. At last he solved the problem: The rubber business afforded opportunities for invention, for change and improvement in the quality and character of the articles manufactured. To that end he proceeded to make his plans.

"Thus was inaugurated one of the world's biggest businesses by a man who had not a dollar in the world.

**Needed Capital**

"Needing capital to fill his factory with machinery and raw materials, he appealed to the interests of the men who had property close to his factory, and in a few days he had secured $45,000 cash subscriptions for stock in his enterprise. It took $43,800 to equip the plant ready to fire up the boilers and start the machinery. The balance was quickly absorbed before business had been fairly begun. During this time the business was run largely on faith—the faith and confidence of Mr. Seiberling in his ability to see the thing through.

**President is Modest**

"Mr. Seiberling possesses the democratic belief that neither he himself, although he happens to be president and is looked up to as a man who does big things, nor any one person in his organization, is entitled to the credit for the success of the company. He declares that the achievement came by reason of the increasing importance of rubberized products in modern life and by virtue of a combination of all his co-workers, focussing on one point the best that was in the mind of them all, so that all were a vital part of the complete machine. You cannot have success in any organization, he holds, unless there is co-operation all along the line—co-operation, harmony and action. With discord, things jar and tumble. A dissatisfied man cannot be of value either to himself or to the organization with which he is out of harmony.

**Pull Doesn't Count**

"Mr. Seiberling urges all his employees to dismiss from their minds every thought of getting to the front by 'pull.' The man worth while, in his opinion, is the man who determines to win on the score of merit, on his own initiative, on the power that is within himself.

"Inseparably linked with the organization in its growth, Mr. Seiberling's life reads like a romance. With Charlie, his brother, who stood with him as though they were Siamese twins, he traveled a thorny path in the earlier days, undergoing that crushing, grinding, terrible experience of trying to run a business without sufficient capital, without sufficient credit, without cash to pay bills. While F. A. was out desperately raising money to meet the weekly pay roll, to meet drafts and to pay notes falling due, Charlie sat in the office to keep the sheriff from closing up the plant. How he grappled with the situation when things seemed so dark that its directors would not put up another dollar and its friends were sure the business could not last more than another month; how he forced his opponents to their knees, beating them commercially when he did not have the money to fight them in the courts; how he dreamed out a line of action and got into motion quickly and effectively; how only two men in his entire organization left during the critical period—these are pivotal episodes in the life of this man of imagination, keenness of wit, ability to visualize and see a thing ahead of the other fellow, and possessing the initiative and courage to go at it and stick to it through thick and thin.

**A Hard Worker**

"With personality, dominating and keenly alert, an indefatigable worker, with the knack of being able to surround himself with able executives—chiefs responsible for certain definite results and having with their responsibility the requisite authority and freedom of initiative—'F. A.' as he is called, has built his

mammoth business upon a secure foundation.

"Early realizing that one cannot make an inferior article and build a reputation worth having, he lent his dynamic energy to commercial development along high grade lines. But underlying this was something else: he consistently recognized the principle, elemental in its importance in modern business life, that the facts underlying consumer wants must be studied and their maximum satisfaction furnished. He obtained this knowledge from intimate personal contact with the consumer as he is, and not as someone believes he is or theorizes he is, and anticipating his wants in order to be ready to satisfy them ahead of others. This business is not divorced from practical and actual conditions, but wholly dependent upon them.

**Adopts Industrial Democracy**

"A second principle is deserving of equal emphasis though of different application. The hundred million dollar corporation he has built up from a small enterprise employing a handful of men is an industrial giant whose payroll shows thirty thousand names and whose products have spread to the far corners of the earth. He has recognized that it cannot exist for him alone nor for itself alone, but that it has a responsibilty to each and every consumer of its product, to every toiler in its service, to the city and to the nation.

"Mr. Seiberling takes keen personal interest in the welfare of his co-workers. Human interest is fundamental in the make-up of the man. It plays an important part in his daily work. He feels that a man should not be so absorbed in the details and complexities of business that he is blind to the recreational and social needs of his employees.

**For Home Sites**

"A few years ago he opened up a large tract of land adjoining the city, securing a famous landscape architect to lay out the tract for home sites. Today this tract stands as a city in itself, with winding, paved streets, parks, and thousands of homes built by his workers and financed by him. He believes, too, that a worker's efficiency is increased by having a financial interest in the community in which he lives, that the city is made better and more livable. This community development project protects his workers from real estate exploitation and enables them to buy homes at actual cost.

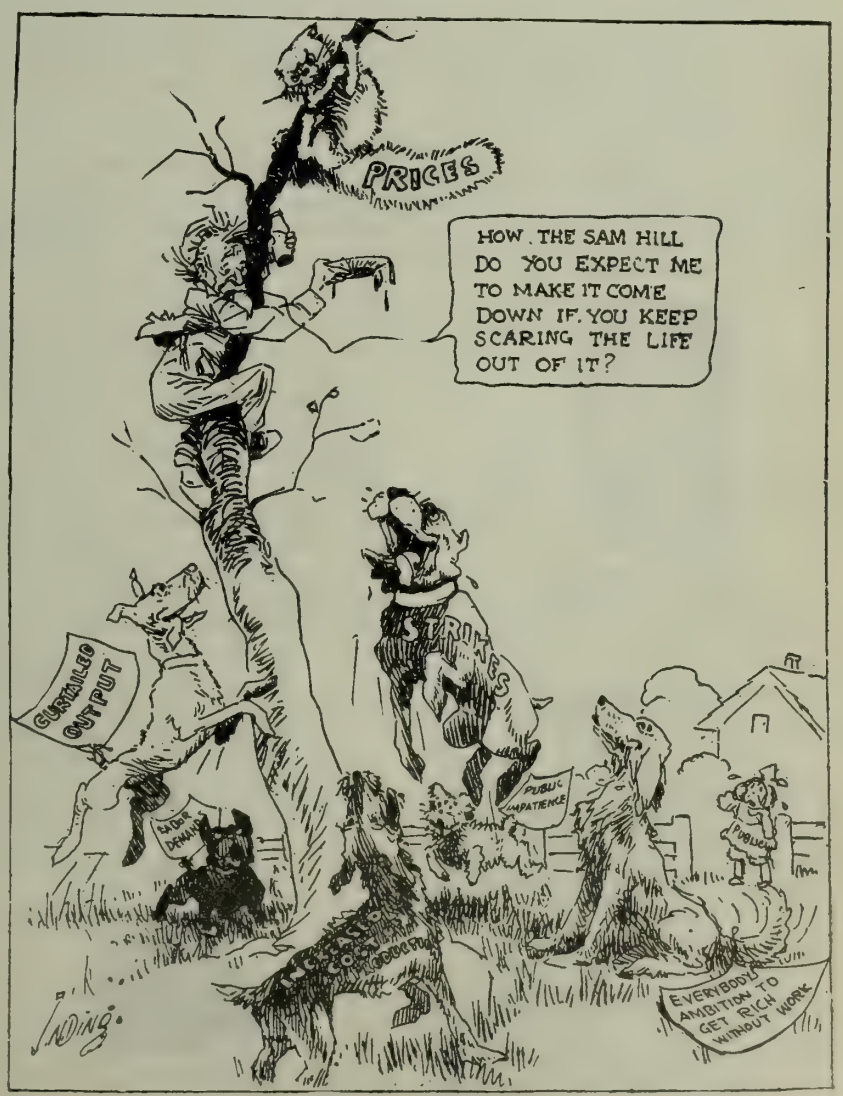
"So inter-related, so inter-dependent, so complex is modern business, so intricate its chain of responsibility, that neither a man nor his business can in the very nature of the case belong to nor be responsible to himself nor itself alone. It is his realization of this incresingly important principle that gave birth to the Council of Industrial Relations lately established to give to his thousands of factory workers a voice in the handling of conditions of employment and in reconstruction to a peace basis, a movement in full accord with the trend of the times in making the world safe for industry.

"The recent announcement of this broad and comprehensive principle of 'industrial democracy' is significant of the character and calibre of the man.

"Were other large employers equally democratic, equally considerate, equally humane in their dealings with workers —he calls them his co-workers—there would be less unrest and more genuine prosperity in America to-day. Industry needs more men of the F. A. Seiberling stamp."

## DEATH OF FRANK D. LYMAN

Frank D. Lyman, vice-president and managing director of Lyman Tube and Supply Co., Ltd., Montreal, died in Montreal on Thursday, October 2. He had been at the club house of the Anglo-American Fish and Game Association, near Metis, Quebec, with a friend from the States, and suffered severe attack of indigestion. This was complicated through an attack of bronchitis.



For some ten years prior to the organizing of the Lyman Tube and Supply Co., Ltd., Mr. Lyman was manager of the Railway Supply Department of John Millen and Son, Ltd. When this business was taken over in 1916, the new firm formed as above was made an incorporated company, and the business has since been managed by the late Frank D. Lyman.

Among the activities with which he was associated were the Anglo-American Fish and Game Association, and of which he was secretary-treasurer; member of the Engineers' Club, Kanawaki Club, Montreal A.A.A., Rotary Club and the Automobile Club of Canada.

Mrs. Lyman (formerly Miss Ethel Wilson of Bridgeport, Conn.), and one little daughter, Kate Wilson Lyman, survive.

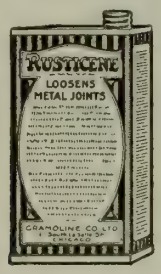
The Wagar Furniture Company, Limited, head office North Bay, capital $40,000, plans to manufacture and deal in furniture, wooden, tin and metal wares.

## Call Off the Dogs

*Philadelphia North American*

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN



### RUSTICENE

"Rusticene," manufactured by the Gramoline Co., Ltd., Lumber Exchange Building, Chicago, is, it is stated, a distillate oil with exceptionally penetrating qualities. The manufacturers claim that it is particularly effective in releasing metal joints that are bound tightly so

*Small Tin of Rusticene*

that they resist all ordinary means of relaxation. It will, it is stated, loosen rubber tires from rims, release bolts, nuts, pins, thumb screws, spring clips, knuckles, shaft bearings, turnbuckles, brakes, radiator roads, battery connections, cylinder pistons, and all joint or action parts. It removes road oil and tar from windshields or car bodies, and is invaluable wherever metal joints or

*Large Can of Rusticene*

bolts are exposed to weather conditions or corroding effects. It is stated that it is indispensable to rebuilders or wreckers of motor cars, ships, aeroplanes, tanks or power machinery. Rusticene is non-inflammable and inoffensive, free from acids and alkali, and will not injure metal, wood, rubber, leather or fabrics. It is also stated that it will dissolve rust, verdigris, carbon, red or white lead, ammonia scale, paint, tar, grease or dirt.

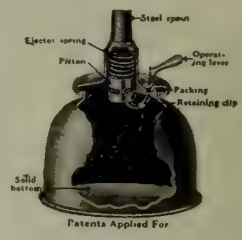
### NEW C. C. M. BICYCLES

The new C. C. M. models for 1920 have just been announced. There is an 18-inch men's model with a drop bar. This will, it is stated, comfortably accommodate an average eight-year-old boy, but by raising the saddle and handle-bars will accommodate itself to his increasing stature for many years. With the exception of the drop bar it is the same, it is stated, in all respects as the regular men's models.

In the regular models the only difference is in the equipment, which is more complete and of a higher quality than previously.

Grade "B" models will, it is stated, carry a frame pump as standard equipment, and will have sewn leather grips and the high-grade M. & S. chains.

Grade "A" models will this year, it is stated, have traction cord tires with special tubes as regular equipment. The bull dog grips will also be supplied with option of plain sewn if preferred. The frames will be striped. The Hercules frame pump will be supplied, also No. 39 saddle, nickel-plated, and there will be a flap on the mudguard.



### FORCE-FEED OILERS

Lidseen positive force-feed oilers, manufactured by Gustave Lidseen, 830 South Central Avenue, Chicago, have, it is stated, welded spouts, and will not get out of order. The claim is made that they save time and oil. The oiler has all of the mechanism in the spout, thereby reserving all of the can proper for oil. The operating lever controls the amount of oil forced out of the can, which gives the operator any amount of oil desired. The spout is held to the can by curved flanges and locking members, which, it is claimed, makes it secure and leak-proof at this connection. It has a large opening for filling. By being a positive force feeder, it is stated that all stoppage of spouts is eliminated

*Force Feed Oiler*

and the operator does not have to depend on the spring bottom. The oiler is made, it is stated, of heavy drawn steel, and is of simple and sturdy construction. The oilers, it is stated, may

*Sectional View*

be used for oiling in vertical position by inverting the can and pulling the operating lever half way down.

### FROST-PROOF RADIATORS

The Guarantee Sheet Metal & Roofing Company of Winnipeg is manufacturing the "Perfecto" guaranteed frost-proof radiator for automobiles. The radiator is made, it is stated, of flat tubes with spring brass fins. If the radiator freezes the flat tubes, it is stated, expand and upon thawing the spring fins, it is claimed, put the tubes back in place. The "Perfecto" radiator is made for Ford as well as other sizes.

### CATALOGUES AND BOOKLETS

#### The British Aluminium Co., Ltd.

"The Use of Aluminium Sheet" is the title of a booklet being sent out by the British Aluminium Co., Ltd., of 265 Adelaide Street W., Toronto. The booklet covers the rapid and continual growth of sheet aluminium in both the old and new industries and goes thoroughly into the question of sizes, temper, applications, annealing, heating, weights of sheets, spinning, stamping and pressing, jointing, polishing, satin finishing, frosting and painting. Readers of HARDWARE AND METAL may obtain copies upon request.

* * * *

#### Atlas Specialty Mfg. Co.

Catalogue No. 24 just issued by the Atlas Specialty Mfg. Co., 18 East 24th Street, Chicago, lists the lines of fabric specialties manufactured by the firm, including radiator covers, joint protectors, cushions, etc., etc. The catalogue contains twenty-four pages and is profusely illustrated. Readers of HARDWARE AND METAL may obtain copies upon request.

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

IMPORTANT changes have gone into effect this week as a result of conditions resulting from the steel strike in the United States. Practically all lines of builders' hardware will advance from five to ten per cent. The increases affect the lines made by the Taylor-Forbes Co., Canada Steel Goods Co., Brainerd, and Stanley Works.

On Tuesday all prices in the United States on strap and tee hinges and butts and all other lines of wrought hardware were advanced ten per cent. Prices from Canadian manufacturers have been withdrawn, pending revision of price lists and all wrought hardware will be immediately advanced. Manufactured and raw materials are very scarce.

An advance of thirty cents over base price is effective in galvanized sheets and in a letter to the trade one manufacturer warns that the greatest conservatism should be observed in disposing of stocks as it will be from three to four weeks after the strike ends before new supplies are available.

Another advance, due to the strike, which will hit most householders is in floor and polishing brushes. The difficulty of obtaining the iron parts necessary in their construction has caused the advance. Scarcity of bristles and higher prices has resulted in a general advance in brushes of all kinds, the new quotations being from nine to twenty per cent. above former figures.

Soldering coppers are higher, an advance of ¾ cent per pound having been made in base prices.

Higher quotations are also effective on American large head roofing nails.

Trouble in getting enough goods to meet the demands of the trade continues to be the great difficulty of many merchants. Stove manufacturers are swamped with business and some of them declare that higher prices are likely after the first of the year, owing to the demands of labor for increased wages and also higher prices for raw materials.

There is great activity in oil heaters and electric heaters.

Turpentine prices are holding unchanged. Linseed oil shows a tendency to be easier and this is expected to develop as supplies of new seed begin to come in.

## MONTREAL MARKETS

MONTREAL, Oct. 9—There are many changes this week in the prices of hardware, these being covered mostly, however, in the new higher quotations of manufacturers of builders' hardware. The increases approximate five to ten per cent. and will affect Taylor-Forbes, Canada Steel Goods Co., Brainerd, and Stanley Works goods. This line is steadily firming and the increases are naturally due, in large measure, to labor costs. O-Cedar oil and oil mops are also advanced, the present discount to the trade being 30 per cent. instead of 33 1-3 per cent. Sheets, black, and tinplates are moved higher and this line is likely to be firm, owing to the strike of steel workers. Lead ingots, tin, copper and spelter are all higher this week. There is a heavy increase in the volume of business and if this continues the jobbing staffs will be required to work overtime to execute the orders promptly. The markets are generally firm, rope in particular being very strong. Stoves and heaters are very active and steel bars and iron are both steadily firm.

### *Various Shelf and Builders' Hardware Up*

**Montreal.**

BUILDERS' HARDWARE. — Advances are being applied this week to various hardware lines, and particularly to builders' hardware. Taylor-Forbes cast and steel hardware are advanced from 5 per cent. to 10 per cent. Stanley Works goods, and special brass hardware made by Brainerd and Co., are advanced approximately 10 per cent. Canada Steel Goods lines are up about 12 per cent. There is a general tendency upward on these lines.

### *Garden Hose Prices; Oil Mops and Oil Up*

**Montreal.**

HOSE, OIL AND MOPS.—Prices being quoted here on garden hose of the three-ply variety are as follows: Half-inch, per 100 feet, $11.50; three-quarter inch, $15.50.

O-Cedar goods are higher, the mops and oil being advanced about 5 per cent. The present discount to the trade is 30 per cent.

### *Big Sales Made of Stoves and Heaters*

**Montreal.**

STOVES AND WARES.—The present movement of heaters is decidedly heavy and the demand is very brisk from all parts of the country. Now that dealers realize the necessity of having stocks in hand for the heavy business of October and November, the foundries will be taxed in filling orders already in hand and others to come. Demand for ranges seems to be for the entire line, HARDWARE AND METAL is informed, and the various manufacturers report deliveries to be satisfactorily maintained. The prices are naturally strong and

well maintained in view of the cost of labor. As yet raw materials are ample to enable the makers to "carry on" uninterruptedly.

The movement of coal hods, stove boards, ash shovels, etc., is a heavy one just at present.

## *Steady Call For Oil; It and Gasoline Hold*

**Montreal.**

COAL OIL, GASOLINE.—The movement of coal oil is seasonably better and there is a steady, but unchanged, market, with the prices ranging from 22 to 25c per gallon. The gasoline sales are also well maintained and price quoted for motor grade still holds at 33c.

## *Manila Hemp is Firm And Tendency Higher*

**Montreal.**

ROPE AND CORDAGE.—While the price basis is unchanged here for both sisal and manila ropes, it would not be surprising to note an increase of price ere long if the outside tendencies which now prevail are continued. In the United States market there has been a heavier demand for manila fibres and this is said to be largely from the manufacturers of the country. In view of the fact that there is a reported light supply there, the tendencies are naturally of a firming nature. Prices here are as follows: Pure manila, per lb., base, 32c; British and Beaver manila, 28c, and sisal, 25c per lb.

## *Higher Prices Here For Various Sheets*

**Montreal.**

SHEETS AND PLATES.—There is a firmer sheet market this week and prices have actually been marked up on black gauges. This follows the tendencies forecast in last week's issue of HARDWARE AND METAL. As the steel strike continues, there is little promise of a lower price basis and it may be that increases still will be manifest. The movement is fairly satisfactory and stocks are ample for most requirements.

In view of the fact that plates are becoming scarcer, the quotable basis for cokes and terne plates is marked higher, $2 and $1 per box, respectively, as will be observed elsewhere.

| | | |
|---|---|---|
| **BLACK—** | | |
| 10 gauge | 5 65 | 6 40 |
| 12 gauge | 5 70 | 6 35 |
| 14 gauge | 5 75 | 6 50 |
| 16 gauge | 5 85 | 6 65 |
| 18-20 gauge | .... | 6 25 |
| 22-24 gauge | .... | 6 40 |
| 26 gauge | 6 45 | 6 50 |
| 28 gauge | 6 75 | 7 00 |
| **GALVANIZED SHEETS—** | | |
| U.S. Standard— | | |
| 10¾ gauge | $8 65 | $9 25 |
| 28 gauge | 8 30 | 8 85 |
| 26 gauge | .... | 8 50 |
| 22 and 24 gauge | 7 70 | 8 35 |
| 20 gauge | 7 50 | 8 35 |
| 18 gauge | 7 50 | 8 35 |
| 16 gauge | 7 30 | 8 00 |
| English Standard— | | |
| 28 gauge | 7 85 | 8 35 |
| 26 gauge | 7 60 | 8 10 |
| 24 gauge | 7 00 | 7 60 |
| 22 gauge | 6 90 | 7 30 |
| 18 and 20 gauge | 6 75 | 7 00 |

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *No Price Changes On Lead Products*

**Montreal.**

LEAD PRODUCTS.—While there has been little change in the market, the tendencies are firmer on pig lead and this naturally will mean that no declines on manufactured products are probable at present. The demand is fairly well maintained for some products, although the movement could be heavier. Solder is unchanged, but with tin ingots promising to advance, there is reason to anticipate a firming of the market, particularly if lead continues to advance.

| | |
|---|---|
| Lead pipe | 0 12½ |
| Lead waste | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | |

| 50-50 | 0 41¼ |
| Zinc sheets, casks | 0 17 |
| Do., broken lots | 0 18 |

## *Strike of Steel Men May Help Mills Here*

**Montreal.**

STEEL AND IRON.—There is a decidedly active movement of steel and iron bars and the trade is experiencing a big volume of business. The mills will probably find a considerable amount of business coming to them as a result of the strike in the States, and it would seem that the trade here will be reasonably well taken care of by the mills. The undertone is steadily firm and unchanged.

| | |
|---|---|
| Iron finish machinery steel | 3 80 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |

| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *No Great Movement Of Old Materials*

**Montreal.**

OLD MATERIAL.—There has been but little change in the market or in the marketing conditions, and prices are quite unchanged. Machinery cast is quoted this week at $21 per ton. Heavy iron scrap is commanding fairly remunerative prices, and there should be an increasing demand for this.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | .... | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |

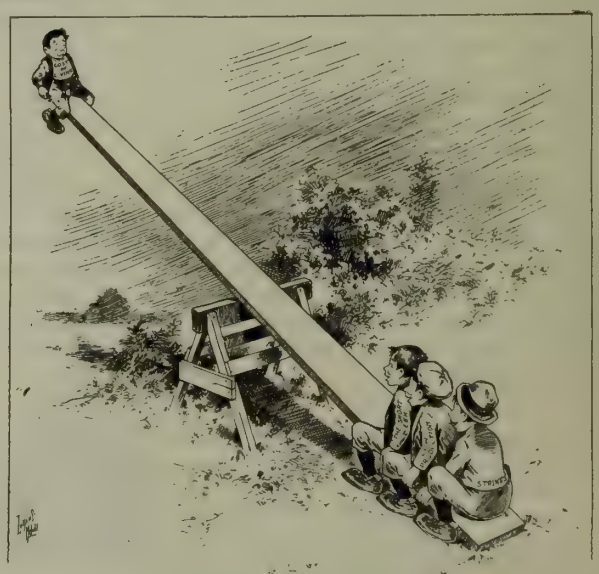
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | .... | 21 00 |



## *Lead, Tin and Copper Are Moving Upward*

**Montreal.**

INGOT METALS.—Advanced prices are in effect for tin and lead ingots, while spelter is also firming. There is a fair amount of business.

COPPER.—While the production is heavy, the demand seems to have taken quite a tonnage. In any event the tendencies are firmer and 25c is quoted locally.

TIN.—The future basis is higher than for immediate delivery, and this naturally means that the undertone on spot stocks is firmer. While the present price is 60c, this is likely to advance.

Keeping Him Up.

LEAD.—A big demand for lead from many sources has served to firm the market and the product is stronger in the United States and English lead is firmer, having advanced about 17c per cwt. Local price is held at 7½c.

SPELTER.—Frequent changes of an advancing nature have been registered, and with stocks rather light the prices here hold at 10c.

ANTIMONY.—A somewhat stronger undertone and local market basis is half a cent higher this week at 10c per lb.

ALUMINUM.—Unchanged and quiet at 34c.

PIG IRON.—Some sales made and basis holds at $50 per ton.

# TORONTO MARKETS

TORONTO, Oct. 9—In the opinion of many of those in the trade the situation in regard to sheets threatens to become the worst result of the strike in the United States. Many stocks are practically exhausted and the latest advices from American firms indicate that United States mills are shipping little or nothing. An advance of thirty cents over the base price has already gone into effect.

Another outcome of the strike is that, becoming effective immediately, all lines of wrought hardware are to be advanced. Prices have been withdrawn and new ones are being prepared. American manufacturers have advanced all of these lines, strap and tee hinges and butts, etc., ten per cent. and it is likely that the new Canadian price will be about that.

All lines of brushes have been advanced, the new figures being from nine to twenty per cent. above old quotations. One cause for this is the scarcity of bristles, the world being practically dependent now upon China for its supply. Floor and polishing brushes are higher because of advances made in iron.

Soldering coppers are up ¾ of a cent a pound.

The Taylor-Forbes Co. has advanced all its seasonable lines ten per cent.

New and higher quotations are effective on American large-headed roofing nails.

Manufacturers of stoves, furnaces and oil and electric heaters are finding difficulty in keeping up with the orders which are pouring in. An advance may take place in stove prices about the first of the year.

## *Immediate Advance in Wrought Hardware*

**Toronto.**

WROUGHT HARDWARE.—Canadian manufacturers have withdrawn all prices on wrought hardware, and an immediate advance is to be made. The lists are now being revised. American firms have made a ten per cent. increase in strap and tee hinges and butts, and all other lines of wrought hardware, and it is likely that the new Canadian prices may follow these figures closely. Both manufactured and raw materials are very scarce.

## *Taylor-Forbes Goods Show Some Changes*

**Toronto**

TAYLOR-FORBES LINES.—All seasonable lines of the Taylor-Forbes Co. are advanced ten per cent. The new quotations are now in effect.

## *Advance is Made in Roofing Nails*

**Toronto.**

LARGE HEAD ROOFING NAILS.—New and higher quotations are in effect on American large head roofing nails, the price now being $9.25 per keg.

## *Galvanized Sheets Are Up Thirty Cents*

**Toronto.**

SHEETS AND PLATES.—A thirty cent advance over base price has gone into effect on galvanized sheets, and a further advance may be made before long. Deliveries up to the present time have been meagre. The general situation in regard to both black and galvanized sheets seems somewhat uncertain. One manufacturer is sending out a notice to the trade in which he gives it as his opinion that the main trouble as far as galvanized sheets is concerned, will come after the strike is over and the mills start operations. People, he points out, will begin to expect goods and few shipments will reach Canada for at least three or four weeks after operations are resumed. No change is shown yet in black sheets. The quotations are as follows:

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | .... | 5 45 |
| 16 gauge | .... | 5 60 |
| 18-20 gauge | .... | 6 15 |
| 22-24 gauge | .... | 6 20 |
| 26 gauge | .... | 6 30 |
| 28 gauge | .... | 6 45 |
| 3-16 inch plate | .... | 6 25 |
| ¼-inch boiler plate | .... | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

| GALVANIZED SHEETS. | | |
|---|---|---|
| 10¾ oz. | $8 50 | $8 85 |
| U.S. 28 | 8 10 | 8 30 |
| U.S. 26 | 7 80 | 7 90 |
| 2 2and 24 | 7 50 | 7 65 |
| 18 and 20 | .... | 7 45 |
| 16 | 7 25 | 7 35 |
| 12 and 14 | 7 05 | 7 20 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Steel and Iron Bars Holding Unchanged*

**Toronto.**

STEEL AND IRON BARS.—The market remains firm and with a good volume of business offering. Latest advices from American sources in regard to future business are to the effect that no orders will be accepted except at quotations prevailing at the time of delivery. So far no one is suffering as a fair amount of stuff is coming through. Prices are holding unchanged, although in many quarters there is a distinct tendency to look for firmer prices. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Boiler Tubes Are None Too Plentiful*

**Toronto.**

BOILER TUBES.—Stocks of tubes continue low and as Canada depends to a great extent for supplies upon the United States, no immediate improvement in the outlook is likely. In fact, in some quarters danger of famine is apprehended in some sizes. A fair volume of business is offering. A tendency toward higher prices is noted, but at the present quotations are holding firm and are as follows:

| | Per 100 feet | |
|---|---|---|
| BOILER TUBES— | Seamless | Lapweld |
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Stove Firms Are Swamped With Orders*

**Toronto.**

STOVES AND WARES.—Stove manufacturers simply do not know how to handle the business that is pouring in from every part of the country. Merchants who held off buying are now trying to get supplies to fill orders, and as a result they have got the manufactur-

ers buried with business. Orders for furnaces and wares are very numerous. In some quarters a rise in prices is looked for towards the end of the year. It is the general opinion that business in these lines will remain active and that next year's trade will even surpass the splendid business done this season.

## *The Scrap Market Continues Quiet*

Toronto.

OLD MATERIALS.—No shipments of scrap are going across the border and it is uncertain when this business will be resumed. The strike is having the effect of lowering prices so far, and the general tendency seems downward. This condition, however, is likely to improve at any time upon receipt of word that the strike has ended. In the meantime quotations are on the following basis:

| Dealers' Buying Prices— | |
|---|---|
| Tea lead | 0 03½ |
| Heavy lead pipe | 0 05¼ |
| Pipe scrap | 8 00 |
| Stove plate, per ton | 12 50 |
| No. 2 busheling | 11 00 |
| Yellow brass | 0 10 |
| Red Brass | 0 16¾ |
| Light brass | 0 07 |
| Scrap zinc | 0 06 |
| Heavy copper | 0 18 |
| Wrought iron, No. 1, per gr. ton | 14 00 |
| No. 1 machinery cast | 18 00 |
| Heavy melting steel | 14 00 |
| Old rubbers, boots and shoes | 0 07 |
| Overseas, lumbermen's rubber boots | 0 05 |
| Bicycle tires | 0 1½ |
| Automobile tires | 0 03 |

## *Advance is Likely in Woodenware*

Toronto.

WOODENWARE. — Markets are strong on woodenware. Raw materials seem very scarce, due no doubt to the small quantity of lumber cut, in comparison with normal times. Manufacturers are unable to state definitely the effect this will have on present prices, but a decided advance seems almost inevitable.

## *Advance Shown in Coke Tin Plate*

Toronto.

COKE TIN PLATE.—The tin market seems on a sound basis. There are no misleading arguments being advanced. Labor unrest and strike conditions have in a large measure to do with the present advance. Some predict that nothing can hold tin down, and they may be right. The entire world is certainly short of material in which tin plays a very important part.

Coke tin plate is quoted as follows, f.o.b., Toronto:

| | Per Box. |
|---|---|
| 1C, 20 x 28 base | $18.50 to $19.50 |
| 1X, 20 x 28 base | 20.50 22.50 |
| 1XX, 20 x 28 base | 24.00 25.50 |
| 1XXX, 20 x 28 base | 26.00 27.50 |

## *Brushes Advance 9 to 20 Per Cent.*

Toronto.

BRUSHES.—A general advance ranging from 9 to 20 per cent. has taken place throughout almost the entire brush line. Bristles, which have lately been very unsettled, finally jumped almost 20 per cent., and there seems no possible chance of a decline in these prices for some time to come. Other materials used in the same manufacture are also unsettled, which helps to keep the market in this commodity very strong.

Floor waxing brushes are also on the move, having advanced 10 per cent., although the advance is not so marked as the bristle product. It is claimed they advanced on account of the conditions of the iron market, parts used in their manufacture being higher in price and hard to obtain.

## *Lead and Zinc Show No Change*

Toronto.

LEAD AND ZINC PRODUCTS.—Prices in these lines are holding steady. A fair volume of business is reported. Quotations are as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | | $0 12½ |
| Lead waste pipe, list, per lb. | | 0 13½ |
| Do., over 6 inches, list, per lb. | | 0 14½ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ⅝c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 36½ | 0 41 |
| Zinc sheets, per lb. | | 0 17 |

## *Ingot Metals Are Holding Quite Firm*

Toronto.

INGOT METALS.—With the exception of lead, which shows a tendency towards weakness, the ingot metals are holding firmly. Copper is steady at 27 cents a pound, and is in fair demand. The other lines show only a fair volume of business, the trade showing the effects of the strike across the line.

COPPER.—The copper market continues steady at 27 cents a pound. Up to the present European buyers have not come into the market as expected. Until they do there is no immediate prospect of change.

LEAD.—Prices of lead show a tendency towards weakening, and this is partly a result of the strike conditions. Prices are around 6¾ cents a pound.

SPELTER.—Business is rather quiet in this line. Prices show no change.

TIN.—Tin is maintaining its position fairly well, but may develop a little easier tendency now that the strike in England has been settled and shipping will be resumed. Stocks are ample to take care of requirements, it is believed. Tin quotations are in the vicinity of 57½ cents a pound.

ANTIMONY.—The demand for this product is not heavy. Quotations show no change from 10 to 11½ cents a pound.

ALUMINUM.—Comparatively little business is in evidence. Prices are on a basis of 35 cents a pound.

# LONDON MARKETS

LONDON, Oct. 9—Business continues excellent. Merchants are all very busy here and expect to be rushed to fullest capacity with the first cold spell. Prices all continue firm with many lines advancing again. Shortage of silver-plated flatware, pocket cutlery, pliers, fine wrenches, alarm clocks, etc., are becoming more serious each week. English pocket cutlery is coming in more freely now, but mostly in small quantities. Collections are good.

## *New and Lower Prices For Shot*

London, Ont.

SHOT.—Quotations on shot have been revised to lower levels. The new figures are: Common shot, $14.75 per 100 lbs.; chilled shot, $16.25, with usual extras for large sizes, f.o.b. London.

## *Potts Irons Are Up 10 Cents a Set*

London, Ont.

POTTS IRONS.—An advance of ten cents per set is shown in the new quotations on Potts Irons. The figures are: No. 50, nickel plated, $2.00 per set; No. 55, plain, $1.90 per set.

## *O-Cedar Mops and Polishes Advance*

London, Ont.

O-CEDAR MOPS AND POLISHES.—These goods show an advance of five per cent. The new price is 30 per cent. off list and net prices are figured at 30 per cent. The figures are as follows:

4-oz. polish, $2.10 per dozen; 12 oz., $4.20 dozen; quarts, $10.50 dozen; half gallon, $16.80 dozen; one gallon, $25.20 dozen.

Mops—No. 1, No. 3, No. 5, No. 14, $12.60 dozen.

Dusters—No. 10, $6.30 per dozen; No. 11, $4.20 per dozen.

## *Advance Shown in Steel Sash Pulleys*

London, Ont.

STEEL SASH PULLEYS.—A new and higher price has been named on steel sash pulleys, the quotation being No. 12, 75 cents a doezn.

## *Redlick Faucets Show an Advance*

London, Ont.

REDLICK WOOD FAUCETS.—New and higher quotations are effective on Redlick wood faucets, the figures being No. 2, $1.55 per dozen; No. 4, $2.20 per dozen; No. 6, $2.80 per dozen.

## *Reduction Made in Steel Thumb Latches*

**London, Ont.**

STEEL THUMB LATCHES.—A reduction is shown in the new quotations on steel thumb latches, the prices being No. 2, $1.80 per dozen; No. 3, $2.40 per dozen.

## *Higher Quotations On Tubular Rivets*

**London, Ont.**

RIVETS.—New and higher prices have been named on tubular assorted rivets, and also on split coppered rivets. Tubular assorted rivets are quoted at $1.10 per dozen packages and the split coppered rivets, No. 9, assorted, at $1.35 per dozen packages.

## *New Base Price on Soldering Coppers*

**London, Ont.**

SOLDERING COPPERS.—Soldering irons are higher, the new base price being 56 cents per pound. Net prices are: 3 lb. to pair, 56c per pound; 2½ lbs. to pair, 57c per pound; 2 lbs. to pair. 58c per pound; 1½ lbs. to pair, 61 cents per pound; 1 lb. to pair, 63c per pound.

## *Taintor Saw Sets Revised Upwards*

**London, Ont.**

TAINTOR HAND SAW SETS.—New and higher quotations have gone into effect on Taintor hand saw sets. The new figure is $16.25 per dozen.

## *Advance is Made in Gasoline Irons*

**London, Ont.**

GASOLINE IRONS.—A new and higher price has been named on gasoline irons. Comfort Irons are being quoted at $5.00 each.

## *Some Lines of Team Bells Higher*

**London, Ont.**

TEAM BELLS.—An advance is shown in some lines of team bells, the new quotations being: Rough, No. 2, $4.00; No. 3, $4.75; No. 4, $6.50; No. 5, $7.50; No. 6, $9.75 dozen.

Swiss. No. 2, $6.00: No. 3, $7.50; No. 4, $9.00; No. 5, $12.75 dozen.

## *Irwin Auger Bits Are Up Ten Per Cent.*

**London, Ont.**

IRWIN AUGER BITS.—An advance of ten per cent. is shown in Irwin auger bits and also in Irwin car bits. The new price on auger bits is net list and the quotation on car bits is ten per cent. off list.

## *Globe, Angle and Check Valves Up*

**London, Ont.**

GLOBE, ANGLE, CHECK VALVES.—New and higher prices have been named on Globe, angle and check valves. Standard valves are now quoted at 9 per cent. off list, and Jenkins' pattern at 7 per cent. off list.

## *Advance is Made in Roofing Nails*

**London, Ont.**

LARGE HEAD ROOFING NAILS.—An advance has been made in American large head roofing nails. The new prices are 100 pound kegs, $9.00 per 100 pounds, 25 pound boxes $9.50 per 100 pounds.

## *Dunn's Lawn Rakes Revised Upwards*

**London, Ont.**

DUNN'S LAWN RAKES.—A new and higher price for Dunn's Lawn Rakes is effective, the quotation being $8.00 per dozen.

## *Brisk Demand Now For Oil Heaters*

**London, Ont.**

OIL HEATERS.—Oil heaters are moving freely. The quotations are: Perfection, No. 525, $7.00; No. 530, $8.25; No 630, $10.25 each, less 25 per cent.

## *Nail Prices Firm; Demand is Active*

**London, Ont.**

NAILS.—There is a splendid demand for nails at present. Prices are unchanged, the quotations being: Wire, $4.70; base and cut, $4.75 base.

## *No Change Shown in White Lead in Oil*

**London, Ont.**

WHITE LEAD IN OIL.—The demand for white lead in oil is somewhat quieter. Prices show no change, the quotations being: Pure, tons, $16.35 per 100 pounds; less tons, $16.70; Elephant, tons, $16.95 per 100 pounds; less tons, $17.30.

## *Putty Sales Brisk; Prices Are Steady*

**London, Ont.**

PUTTY.—The demand for putty has been brisk. Prices are holding unchanged, the quotations being: Standard, 100 lb. drums, $6.80 per cwt.; 25 lb. drums, $7.05; Pure, 100 lbs., $9.30; 25 lbs., $9.55.

## *Glass in Demand; Prices Are Firm*

**London, Ont.**

GLASS.—Glass is in good demand. Prices are holding without change and are as follows: Single Diamond, 30 per cent.; Double Diamond, 30 per cent.; Cut Lights, 10 per cent.

## *No Change Made in Prices of Turpentine*

**London, Ont.**

TURPENTINE.—No change is shown in the quotations on turpentine, the prices being: 1 barrel lots, $2.55, imperial gallon; 2 to 4 barrel lots, $2.54, imperial gallon; 5 gallon lots, $2.65 imperial gallon.

## *Linseed Oil Prices Are a Little Easier*

**London, Ont.**

LINSEED OIL.—There is a good demand for linseed oil. Prices are on the following basis: Raw, 1 to 2 barrels, $3.25, boiled, $3.28; 3 to 5 barrels. $3.24, boiled, $3.27; 6 to 9 barrels. $3.22, boiled, $3.25, less barrels, add 10 cents per gallon.

# WINNIPEG MARKETS

WINNIPEG, Oct. 9—Price changes during the past week are again fairly numerous, including such lines as hinges of all kinds. Hasps, lamp wick, Winchester shotguns and rifles and linseed oil markets in general show a very firm tendency and higher prices on many of the staple and heavy hardware lines will no doubt become effective before the first of the year, due to the strike in the big American steel mills, while it is felt that deliveries will be worse than at any period during the war. Business is still reported to be fairly brisk in all lines with stocks fairly well assorted.

## *Prices of Hinges Revised Upwards*

**Winnipeg.**

HINGES.—Owing to a general revision of prices by the manufacturers, new prices are now effective on hinges of all kinds, some lines showing advances, while others decline. To-day's ruling prices on the various sizes are as given below:

Light Strap Hinges—3 in., $1.00; 4 in., $1.20; 5 in., $1.40; 6 in., $1.70; 8 in., $2.50; 10 in., $3.50 dozen.

Light Tee Hinges—3 in., $1.00; 4 in., $1.10; 5 in., $1.30; 6 in., $1.50; 8 in., $1.80.

Heavy Strap Hinges—4 in., $3.00; 5 in., $3.70; 6 in., $4.00; 8 in., $5.40; 10 in., $9.60; 12 in., $11.90 dozen.

Heavy Tee Hinges—3 in., $2.55; 4 in., $3.20; 5 in., $3.60; 8 in., $4.10; 10 in., $7.30; 12 in., $11.60 dozen.

Strap Hinges, in cartons—4 in., $2.30; 5 in., $3.00; 6 in., $3.80; 8 in., $5.50; 10 in., $8.50.

Tee Hinges, in cartons—4 in., $2.70; 5 in., $3.15; 6 in., $3.85; 8 in., $4.75; 10 in., $7.75.

Table Hinges—810 x 1 in., 56c; 1¼ in., 69c; 1½ in., 82c; 1¾ in., 94c; 2 in., $1.05 dozen.

Back Flaps—814 x 1 in., 70c; 1¼ in., 84c; 1½ in., 98c; 1¾ in., $1.12; 2 in., $1.25 dozen.

Corrugated Strap Hinges—4 in., $1.60; 5 in., $2.20; 6 in., $2.75; 8 in., $4.50; 10 in., $6.75; 12 in., $10.50 dozen.

Corrugated Tee Hinges—4 in., $1.90; 5 in., $2.65; 6 in., $3.25; 8 in., $5.45; 10 in., $8.10; 12 in., $11.80 dozen.

Corr. Strap Hinges, in cartons—4 in., $2.35; 5 in., $2.95; 6 in., $3.95; 8 in., $5.85; 10 in., $8.30; 12 in., $12.95 dozen.

Corr. Tee Hinges, in cartons—4 in., $3.05; 5 in., $4.00; 6 in., $4.90; 8 in., $7.55; 10 in., $10.75.

## *Harvest Tools and Hay Knives Higher*

**Winnipeg.**

HARVEST TOOLS.—Following the recent advance in harvest tools, prices have also been revised on hay knives, which show an advance of approximately 5 per cent., and are quoted to-day as follows: Hay knives, Lightning, $13.25; Hearth's, $13.25 dozen.

## *Hinge Hasps Are Up 5 to 10 Per Cent.*

**Winnipeg.**

HINGE HASPS.—Hinge hasps during the week show a slight advance over previous prices, moving up from 5 to 10 per cent., based on new prices received from the factory, and are now selling as follows: Hinge hasps, No. 912 x 3 in., $1.15; 4½ in., $1.25; 6 in., $1.45; 8 in., $2.25 dozen. Hooks and staples, No. 50, ¼ x 4 in., $6.00; No. 5, $6.35; 5-16 x 6 in., $9.75 gross.

## *Lamp Wick Prices Again Advanced*

**Winnipeg.**

LAMP WICKS.—Lamp wick prices again move to higher levels, based on new factory quotations just to hand, the new increase being approximately 5 per cent., due to increased cost of production, making to-day's selling prices as given herewith:

Flat Lamp Wick, No. 0, 78c; A, 98c; B, $1.43; D $2.30 gross.

Rochester Wicks, No. 1, 43c; No. 2, 60c; No. 3, $2.05 dozen.

Rayo Lamp Wick, $1.13 dozen.

Rayo Lamp Wick, junior, 80c dozen.

Flat Stove Wick, 3 in., 51c; 3½ in., 60c; 4 in., 70c; 4½ in., 80c; 5 in., 90c dozen.

## *Winchester Guns and Rifles Are Higher*

**Winnipeg.**

WINCHESTER GUNS AND RIFLES.—Prices on Winchester guns and rifles have been revised to higher levels during the week, based on new costs issued by the manufacturers, which show increases of approximately 5 per cent. over former quotations. While stocks in many of their lines is depleted and no prospect of getting a further supply this year as stocks at the factories are all sold for the remainder of the year. To-day's ruling prices on the more familiar lines are quoted as follows:

Winchester Shotguns, model 1897, solid frame, 12 Ga., $40.25 each; model 1912, solid frame, $43.70; model 1912, take down, $48.30.

Winchester Rifles—1894, round barrel, solid frame, 25-35, $31.65; 30 W.C.F., $31.65; 32 Win. Spec., $31.65; 32-40, $27.60; 38-55, $27.60.

1894, octagon bbl., 25-35, $33.95; 30 W.C.F., $33.95; 32 W. Spec., $33.95; 32-40, $28.75; 38-55, $28.75.

1894, round barrel, taken down—30 W.C.F., $43.15; 32 W., Spec., $43.15; 38-55, $39.10.

1894, octagon barrel, take down—32 W. Spec., $45.45; 30 W.C.F., $45.45.

1894, solid frame, carbine—30 W.C.F., $29.35; 32 W. Spec., $29.35.

1892, round barrel, solid frame—25-20, $29.35; 44, $29.35.

1892, octagon barrel, solid frame—25-20, $31.05; 44, $31.05.

1892, solid frame, carbine—25-20, $28.75; 44, $28.75.

1895, round barrel—303 Brit., $43.70; 30 Army, $43.70.

1907—351, $50.60.

1910—401, $50.60.

1890—22 Short, $28.15; 22 Long, $28.15; 22 W.R.F., $28.15.

1902, single shot, 22 calibre, $9.35.

1904, single shot, 22 cal., $11.25.

1903, automatic, 22 cal., $40.00.

1906, repeater, 22 cal., $25.65.

Thumb trigger, single shot, 22 cal., $8.45.

## *Linseed Oil Drops 25 Cents a Gallon*

**Winnipeg.**

LINSEED OIL.—Linseed oil prices dropped 25 cents per gallon during the week, due to the weaker flaxseed market, and is selling to-day on the following basis: Raw linseed, $2.75 gallon; boiled linseed oil $2.78 per gallon.

## *Turpentine Prices Holding Unchanged*

**Winnipeg.**

TURPENTINE.—Turpentine prices show no change during the week, holding firm at former quotations, but from present indications lower prices are to be expected. To-day's prices are as follows: Barrel lots, $2.70 gallon; ½ barrels, $2.73 gallon; 5 gallon lots, $2.75; 1 gallon lots, $2.75, plus the usual extras for containers.

# PITTSBURGH MARKETS

PITTSBURGH, Pa., October 9.—The iron and steel strike, now just in its third week, is running true to the form shown in the first four days, when, after increasing for a couple days, the strike began to lose ground slowly in the districts where idleness was in the minority and employment in the ascendency, while districts closed tight showed no disposition toward resumption.

It is a matter of intimidation, which means minority rule if the minority is of any size. Thus in Western Pennsylvania, where the strike did not get a good start, employment has been increasing so that the works that remained in some sort of operation are now running practically full, while of the few plants that closed entirely some have been resuming in the past few days. The Mahoning Valley, including Youngstown, also Cleveland, but not the nearby town, Lorain, remained closed tight during the first two weeks, as well as the Wheeling district, with the exception of a very few plants in that district.

There were predictions that this week some important resumptions would be begun in the Mahoning Valley, but full and authentic information is requisite before it can be accepted as positive that the district really is resuming. Men have been at work in some of the plants, doing odd jobs and being held as nuclei for such a general return of men as would permit of regular manufacturing operations being undertaken.

There is no question that the men have lost the strike, and in fact there was no question after the first three or four days of the strike. Too much capacity was left in operation for the idle districts to swing the active districts. It is a strike of common labor, chiefly ignorant foreign labor, ready for violence whenever and wherever there is an opportunity, and while no doubt the civil authorities are anxious to prevent disorder it is a difficult matter when mobs of hundreds or thousands may form. The common prediction is that general resumption can hardly occur in Ohio without the state militia having previously been called to the scene, but under the law the invoking of state aid cannot occur until there is an actual situation that the local authorities cannot handle, and the local authorities must admit the fact.

### Production and Employment

The best estimate that can be made is that fully 40 per cent. of the workers in the iron and steel industry are idle. This is of the manufacturing industry proper, not including the Connellsville coke region, the lake or boats or the ore mines. The strike did not touch these activities at all and if they were included in the total the percentage of men idle would be a trifle lower.

Of the men idle it may be estimated that one-fourth desired beforehand to strike, that one-half, or double that number, really did go out as strikers when the time came, and that the other half comprise men who are idle because intimidated or because the strike was prevalent enough in the plants that employ them to make operation impossible. While the strike is distinctly a common labor or "hunky" strike it is not universally so. It is a fact that a few skilled and semi-skilled men did strike, and this was notably so in the case of one craft, the cranemen and electricians, who struck in considerable numbers.

### Running or Closed

Geographically, as the strike was largely geographical and became wholly so during the first fortnight, the situation is as follows:

Eastern Pennsylvania is operating with scarcely an exception.

The large Cambria plant at Johnstown, at the western foot of the mountains, is closed entirely, as is the entire Lackawanna Steel Company property at Buffalo, together with part of the other operations there.

Western Pennsylvania is running nearly full, the chief exceptions being

the Page and Pittsburgh steel and wire plants in Monessen, at the head of the Monongahela Valley manufacturing districts, a part of the city works of Jones & Laughlin and a few small plants here and there.

All plants in Cleveland, O., are down, but the Lorain pipe mill of National Tube Company is running very well.

The entire Mahoning Valley, in Ohio, is down, thus contrasting sharply with the other valley, the Shenango, just across the state line in Pennsylvania, which is running nearly full.

The Wheeling district, which has long been strong for strikes, is closed tight, except for two or three relatively minor plants.

In the Calumet district, Chicago and Gary, about one-third or thereabouts of the men are working, results being rather unsatisfactory.

Duluth, Minn., is reported working while the works of the Colorado Fuel & Iron Company at Pueblo are closed. Practically the whole south is working.

**Production Suffers**

While nearly, if not quite 60 per cent. of the men in the iron and steel industry are working, production, in point of tonnage, is not in altogether as high proportion, as there are works with light employment and still lighter production, operation being partly for moral effect. It being an issue upon which the manufacturers cannot possibly yield, the open shop versus domination by radical labor agitators and revolutionists, tonnage is not an item showing how the strike is going, employment being the item that furnishes the information.

The curtailment in output is more or less uniform in the different products, but there are variations. Plate capacity was so in excess of requirements that there is still an adequate or nearly adequate supply. There is nearly an adequate output of structural shapes. Tin plate production is less than half what it was averaging just before the strike, but as the canning season is over the restriction does not count for much. In wire products there is great restriction, but wire products are now largely out of season. In sheets the situation is very serious as sheets were scarce before the strike. The American Sheet and Tin Plate Company has been operating at least 72 per cent. of its sheet mills, seven of its plants being in full operation, but independents are averaging less than 50 per cent., so that sheet production as a whole is not over 60 per cent. of normal. On the whole, sheet plants making specialties, as for metal furniture and automobiles, are affected slightly less than mills making common sheets.

**The Worst Item**

By far the most unfortunate situation, from the standpoint of production and requirements, is that in pipe. While there was no abnormal demand, before the strike, for butt weld merchant pipe, there was a demand far beyond the supply for oil country goods, involving lap weld material, there being in fact an acute scarcity, so much so that many lessees, particularly in the Texas field, were likely to lose their leases through being unable to complete wells within the time limits they had injudiciously agreed to. The situation is, of course, greatly accentuated, for while the Steel Corporation is doing well in pipe, much more than half the independent capacity is down, including Youngstown Sheet and Tube at Youngstown, La Belle at Steubenville, and Wheeling Steel and Iron at Wheeling. Mark at Chicago is producing little, while Spang, Chalfant and Company, Pittsburgh, were closed for a few days, though now operating moderately well. Of all the major independents, Jones & Laughlin alone have done well; National has its Riverside works; Wheeling, down tight, is operating full at Lorain, O., and moderately well at McKeesport, Pa., while one of its two Pittsburgh mills was down for a short time and is now operating only in part, the other city mill being reported in regular operation.

Steel mills report that their customers continue to show the greatest spirit of sympathy and co-operation and exhibit no tendency to bother them for deliveries, even though material may be badly needed.

# Production of Firearms in Belgium is Beginning Slowly

## Much of the Machinery Carried Away by the Germans Has Not Been Restored and Gun Makers Are Working Under Great Difficulties.

THE resumption of the production of firearms in Belgium is beginning slowly. At the Fabrique Nationale d'Armes de Guerre 200 to 300 men are working instead of 5,000 as before the war. Many of the machines carried away by the Germans during the war have not been replaced and raw materials is still lacking.

Belgian firearms production is localized about Liege, especially in Herstal, four miles to the north-east. Previous to the war some 13,000 to 14,000 were engaged in the industry, especially in the production of shotguns de luxe. More than half of the workers were engaged in work at home or in small private plants, specializing in the production of some particular piece or feature. This production of fine, high-grade arms has in many families been an inheritance for generations. The number of home and small-plant workers seems to be increasing slightly because electricity is now being supplied to these small plants, making possible the operation of small machines.

**Employed 5,000 Men**

The most important manufacturing plant, Fabrique Nationale d'Armes de Guerre, Societe Anonyme, located at Herstal, before the war employed 5,000 men, of whom three-fifths made firearms. The remainder were engaged in the production of automobiles, motor cycles and bicycles. This plant, which was founded in 1889, had a capitalization in 1914 of $1,273,800. The daily production was 500 rifles, 100 carbines, 400 hunting guns (hammerless, Lefaucheux, Browning), 800 Browning rifles, and 500,000 cartridges. In addition the plant produced each day seven automobiles, 100 bicycles, 50 motor cycles, 120,000 spark plugs, and 75,000 spokes and nuts.

The raw steel for firearms is partly of Belgian origin (especially from the Cockerill works at Seraing, just south of Liege); steel was also imported from Germany (Krupp works), England, and Austria.

Belgian exports large quantities of firearms, especially of the finer grades, the guns de luxe. The exports of this type of hunting piece were valued in 1912 at $3,601,222, and in 1913 at $3,621,620, sent principally to Germany (17 per cent.), Russia, Italy, and Brazil $121,931 to the United States in 1913). The export of revolvers and pistols amounted in 1912 to $1,231,725, and in 1913 to $936,334, sent chiefly to France (22 per cent.), Germany (20 per cent.), Italy, and Russia; none to the United States in 1913.

The importation of firearms into Belgium is small, the total amounting in 1913 to $726,460, chiefly from Germany and France.

**MAY SELL BRITISH RIGHTS**

A press dispatch from New York says: Prominent English financial interests have offered the American Safety Razor Corporation £100,000 for their rights in the British Isles.

Joseph Kaufman, president of the American Safety Razor Corporation, will leave for England in a few days to discuss the offer, although interests here connected with the company doubt that it will be accepted. The Ever-Ready Co., one of the three safety razor concerns making up the new corporation, already has a factory in England, and has done a large business in the British Isles for years.

It is expected that considerable foreign capital will be interested in the new American company, and that ultimately foreign concerns with this capital paid in will be formed. Mr. Kaufman will not only visit the British Isles but will go on the Continent to further the expansion plans of the American Safety Razor Corporation.

# Big Opportunities in Floor Finishes

## Splendid Chance for Special Fall Sales—Can be Made Stepping-Stone to Sale of More Paint, Also for General Exterior Work Around the House

THE conversation occurred during a little Sunday afternoon motor jaunt through the outskirts of the city and the country.

Various topics had received the haphazard touch-and-go discussion usual under such circumstances.

Said one of the ladies in the party to the paint man, "Why don't you get after people to paint their porch and verandah floors better? Everybody nowadays has a porch or verandah of some sort, but most of them keep the floors in such a wretched condition that they simply take away from the appearance any improvement that the verandah makes."

The paint man thought that this was putting it rather strong, but the comment caused him to make a few close observations while passing along the road.

"By Jove! that woman's right," he said to himself after a half hour's close scrutiny of passing verandah floors and their appearance and condition.

### Floor Paint Week

The paint man, who happened to be salesmanager of a large paint concern, conceived some rather energetic sales ideas during the balance of the journey, amongst them being one to develop a special "floor paint week" in the fall.

If there is a retail paint and varnish dealer who desires to put in a few extra paint sale stunts on for this fall, let one of them be a porch and verandah floor paint week.

Quarts, of course, are the popular size for this class of trade. The grays and drabs are the popular shades.

In order to avoid overstocking and any too great investment of capital, it would be advisable to prepare for such a week with a stock of quarts, only, in say three of the best selling shades. Fix the re-sale price of the quarts at as popular a price as possible, consistent with sound business practice, and make it a leader for a floor finishing drive with other lines.

During that week regular floor paint colors for interior work could be featured at regular prices. Varnish stains for floor use could be put in the limelight. Floor varnishes and waxes will naturally come in for attention.

### Plenty of Arguments

All the splendid arguments that have been advanced for fall painting can be used to advocate protection for the verandah floor. If ever an outside floor needs protection against every conceivable element, it is during the winter and the only logical time to provide that protection is during the fall.

Much the same reason applies to inside floor painting in the fall. People are confined within doors during the greater portion of the winter months. They have more intimate and frequent contact with their floors. This should call for care and attention during the fall in preparation for the winter.

### Change the Habit

It is to be admitted that much of this class of work has became a habit in the spring. But the average man and woman is reasonable and will respond to reasonable, clearly stated advertising that will point out where the advantages of fall painting will be of benefit to them.

The public will not change this habit themselves. It is up to the retailer to change this habit by bringing these facts to the attention of his trade. Window displays, prominent inside display, a special week, your advertising can be readily used to this end. Nor will it in any way detract from the usual spring business, in fact it will be one of the factors to assist in placing the paint department on a better all-year-round basis.

### House Painting Too

A porch and verandah floor paint week would be made the stepping-stone towards encouraging more exterior house painting during the fall. Get a man to paint one portion of his house and it's not very long before another part must be done. A nicely painted verandah floor will suggest that pillars, posts, cornice and lattice work will need paint as well.

While a verandah and porch floor paint week will undoubtedly bring in a considerable amount of business for this particular kind of work, what it leads to and develops in the way of other business is in reality the most important reason for attempting it.

### Develop Ideas

A detective cares nothing for a clue of itself, it is what that clue may lead to that gives it its value. It is the same in developing ideas of this nature, the selection of a good leader is a very important question. The idea of better protection for verandah floors suggested by this lady and the consequent observations of the salesmanager suggested a verandah floor paint week as an idea capable of considerable development.

"Save the surface and you save all" *Paint & Varnish*

A SANITARY
SANI-FLAT
FLAT OIL PAINT

## FOR ALL INTERIOR PAINTING

# Produces the Ideal Soft Velvet Finish

For Walls, Ceilings, Woodwork and other INTERIOR Decorations where a durable, non-fading flat paint is needed, there is none "just as good" as SANI-FLAT.

It is easy to apply, has remarkable covering and hiding qualities, and does not show lap or brush marks. It can be cleaned with soap and water without injury.

White Sani-Flat makes a perfect Undercoating for Enamel.

***Made in White and Twenty Beautiful Shades.***

***Put up in Large and Small Size Packages.***

## SELLS AT A REASONABLE PRICE

We are always glad to furnish details of our Agency Proposition, and it is bound to appeal to you if you are endeavouring to put your Paint Department on a better Profit-Paying basis.

Color Cards and Descriptive Matter on Request.

# Benjamin Moore & Co., Ltd.

**TORONTO - WINNIPEG**

### BIG OPORTUNITIES IN FLOOR FINISHES

(Continued from page 66)

A porch and verandah floor paint-up week will help to develop the fall painting habit. When indoor floors are painted, it prepares the way for indoor painting and decorating and means sales for the paint department during the quiet months.

Painting the floors in the fall means additional and better service to the trade and adds to the comfort of homes that would otherwise go with poorly finished floors throughout the winter and until the usual spring habit comes about.

By encouraging fall painting of floors it will keep the paint department's profits in the limelight all through the year. It is not the only means of keeping the department going all year, but it is one of them and a good one.

### SAVE THE SURFACE CAMPAIGN FOR FIVE YEARS

In the publicity which HARDWARE AND METAL gave in the issue of September 27th, to the continued campaign of the "Save the Surface Campaign" committee, it was stated in one of the leading phrases that "Save the Surface Campaign to Be Continued for at Least Another Year." This might lead some to assume that the campaign efforts would probably not continue after the expiration of another year, although a careful reading of this important announcement would have revealed to the reader that the campaign would be continued for four years more, making the effort a five-year one. HARDWARE AND METAL is in a position to state that arrangements already completed call for the execution of the larger programme, and under which still greater progress is expected to be made.

## Oil Company Plans Western Development

An expenditure which will probably run into between $2,000,000 and $3,000,000, is planned during the next few months in the West by the Imperial Oil Company. The greater part of this amount will be laid out in parts of the West, especially in Alberta.

A tour of inspection of the work now being carried on in the West has just been completed by Vice-President G. W. Mayer. With him on the trip were: T. C. McCobb, secretary-treasurer, and E. D. Gray of the Toronto sales staff; L. J. Cunniff of the H. K. McCann Company, Limited, and J. S. Mayer, son of the vice-president, who only recently returned from overseas. The company now has 40 geologists at work from the Montana boundary to the Mackenzie river. The machinery for the wells to be drilled in the Snake Lake country is now on the ground, but it is too late to start operations this season. Material has also been taken still further north, to the Mackenzie river, where the company will have the most northerly oil well in the world. The crews will remain in the Mackenzie river country throughout the winter in order that they may commence drilling at the earliest possible date next year.

### PLAN TO INCREASE OUTPUT

A good deal of interest centres in the announcement made in Sheffield, England, that Walker and Hall, cutlers and silversmiths, and Barker & Allen, Ltd., nickel silver, metal, and wire manufacturers, of Spring Hill, Birmingham, have acquired financial interest in the old-established firm of William Gallimore and Sons, of Arundel Works, Sheffield. It is understood that the policy of the purchasers will be to extend the output of all departments for the benefit of the present and prospective customers of William Gallimore and Sons.

## Analysts Report on Turpentine as a Paint Material

THE food and drug laboratory of the Department of Trade and Commerce has issued a bulletin on "Turpentine As a Paint Material." The report submitted by V. Kitto, public analyst, is as follows:

"Sir,—I beg to report on a collection of 114 samples of turpentine and 4 samples of turpentine substitute sold in Canada as paint material. Of these 13 were examined at the sub-laboratory at Halifax, 64 at Ottawa, 22 at Winnipeg and 19 at Vancouver.

"Considerable investigatory and other work on turpentine has been done in this laboratory on previous occasions and results have been published in Bulletins 79, 211, 253, and 331 of the Inland Revenue series. A standard for turpentine as a paint material based largely on the earlier part of this work was prepared and inserted in the fourth schedule of the Adulteration Act. The requirements are:

1. It shall be entirely free from mineral oil.
2. Unless sold as good turpentine, it shall absorb not less than 340 times its weight of iodine (Hubl Solution and Method). If sold as wood turpentine it shall absorb not less than 240 times its weight of iodine by same method.
3. The undissolved (unpolymerized) residue on treatment of 10cc with 40cc of a sulphuric acid containing 20 per cent. of the fuming acid, shall not exceed 10 per cent. by volume of the sample.
4. The refractive index of this residue shall be not less than 1.4950 at 20 deg. C.
5. The refractive index of the sample at 20 deg. C. shall lie between 1.4680 and 1.4730.
6. The specific gravity of the sample at 20 deg. C. shall not be less than 0.860.
7. The initial boiling point shall not be lower than 150 deg. C. under ordinary atmospheric pressure.
8. At least 75 per cent. by volume shall distil below 160 deg. C.
9. The residue on evaporation over a steam bath shall not exceed 2 per cent.

**Many Complaints**

"For some years there has been much complaint about the quality of this material as sold in Canada and previous inspections have shown adulteration to be largely prevalent. The usual sophistication has been the admixture of petroleum distillate having a specific gravity and boiling points approximating those of genuine turpentine.

"In the present collection eighty-nine samples may be considered as meeting the requirements of the schedule.

"Sixteen samples, three at Halifax, Nos. 83962, 80250, 77111, and thirteen at Ottawa, Nos. 88305, 88307, 86918, 86931, 86968, 84491, 84492, 80795, 8051, 88131, 88113, 84641, contain large percentages of petroleum oil and one sample at Ottawa No. 86966 contains a smaller percentage. All fail to meet the boiling point requirements; No. 88131 has an initial boiling point much below 150 deg. C., while all the others have less than 75 per cent. volatile below 160 deg. C. This amount is very small in a number of cases, suggesting that low grade turpentine was used for the mixture.

"Seven samples, two at Halifax, Nos. 80245, 77113, and five at Ottawa, Nos. 81382, 88111, 88112, 84637, 86911, do not meet the boiling point requirements, but for the purposes of this collection may be clased as low grade turpentine and be allowed to pass. In these 75 per cent. is volatile below 170 deg. C. instead of below 160 deg. C. No. 86911 is wood turpentine.

"One sample at Ottawa, No. 84886, falls so far below the standard for both gravity and boiling points that it must be called adulterated.

"The findings may be tabulated as follows:

| | Samples | Cent. |
|---|---|---|
| Meeting requirements ... | 89 | 78 |
| Adulterated ..... | 18 | 16 |
| Low grade ..... | 7 | 6 |
| Total ..... | 114 | 100 |

"Of the four samples distinguished as substitutes all from the Vancouver district, three, Nos. 68699, 68718, 68720 are, in large part, mineral oil; the other, No. 68690, appears to be a low grade turpentine.

"The results of analysis and the names and addresses of the vendors and furnishers of the samples specially referred to are obtained in the accompanying tables:

Dear Sir:-

We wish to announce that the Agency for our products has been entrusted to Mr. H. W. McConnell, who has been one of our most successful salesmen for 16 years.

Mr. McConnell will be associated with The H. L. Perry Co., Limited, 214 Princess Street, Winnipeg, and, through efficient representatives, acquaint you more intimately with

"THE RIGHT PAINT TO PAINT RIGHT."

Yours very truly,

A. RAMSAY & SON COMPANY.

To The
Manitoba and Saskatchewan
Hardware and Paint Dealers.

# A Severe Indictment Regarding Export Trade

The "Alberta Farmer and Weekly Herald of Calgary" contains the following: "On more than one occasion the Herald has questioned whether the manufacturers of Canada were going about the development of an export trade with success. It is not the most pleasant thing imaginable to be constantly finding fault, but in this matter our Eastern manufacturing friends are so lax as to be deserving of censure. They are free to criticize and advise Westerners as to how they should manage the farming business of the country; now it is their turn to be criticized.

"Representatives of the Bank of Commerce have just returned from a trip through New Zealand, Australia, China and Japan. While in these countries they paid particular attention to trade prospects for Canada. What they discovered was that in all four countries there was a disposition on the part of the people to trade with Canada, but criticism of the Canadian methods of business were most severe. Here are some of them:

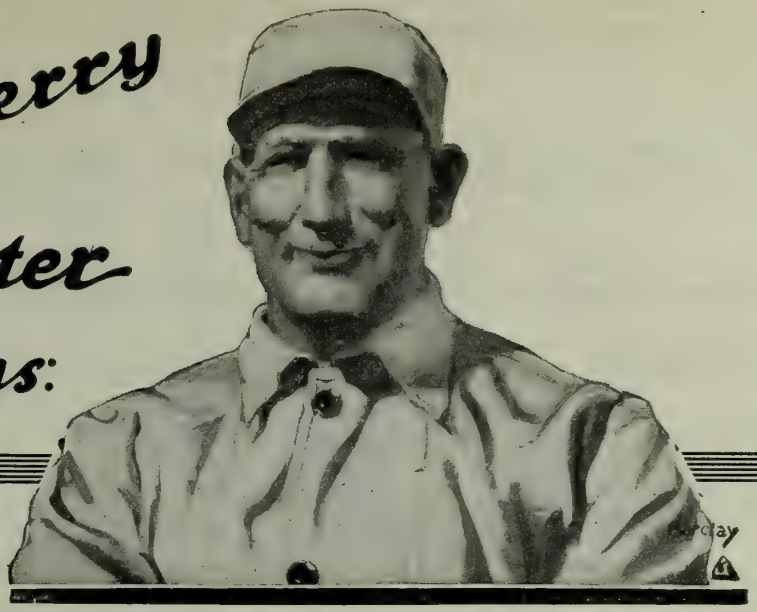
"A shipment of angle iron, ordered of certain length, arrived in the Far East and was found to be of other lengths than those ordered, and, therefore, useless for the purpose intended.

"Another shipment in case had the contents of each case designated on the outside by numbers, but when the cases were opened it was found the goods inside were not those indicated by the numbers at all.

"A hardware shipment, not properly packed, arrived 'short,' many of the articles having been stolen en route.

"A shipment left the exporter's warehouse and no further attention was paid to it by him. It reached the seaboard and lay there for several months, the importer in the Far East being kept waiting until he cabled. Not till then did the exporter discover that the goods had never been shipped.

"An Australian importer, who deals altogether with the United States, says he might just as well take Canadian goods, only Canadians are too careless in the handling of their export business.



"Another large Eastern importer, who deals almost exclusively with United States firms, complains that Canadians do not have enough 'pep' to get his trade, while there were many complaints that Canadian export houses fail to answer letters and even cables.

"It is very evident that until there is marked improvement in the way these Eastern manufacturers do business, our export trade will not flourish as it might and should. The reports the Bank of Commerce representatives bring with them from the East should cause the blush of shame to mantle the cheeks of our captains of industry. The poor service they are giving their country in foreign fields is greatly to their discredit. The least they can do is make an honest effort to redeem themselves in the eyes of the importers of the Far East."

## SHERWIN-WILLIAMS' CONVENTION

The annual convention of the Sherwin-Williams Company of Canada, Ltd., will be in attendance and this will probably be ginning on Monday, October 20. Representatives from all parts of Canada will be in attendance and this will probably be a more representative gathering than that held last fall, when many were prevented from attending through the effects of the epidemic then so prevalent.

# The Luxeberry Painter Says:

"WHEN Dad made me his business partner thirty years ago he had already been using Berry Brothers' Varnishes, Stains and Enamels for more than thirty years. Dad laid down the brush long ago, but I still continue to use Berry Finishes. They are one of the real foundation stones of my success."

It is the earned confidence in Berry Brothers' products that maintains and increases the demand for them. The smallest buyers have learned that the label of Berry Brothers is a guaranty of quality and a sure protection against inferior finishes.

*Any dealer can make his varnish trade grow by featuring Berry Brothers' brands.*

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, October 9.—Flaxseed prices stiffened materially early this week, and while the near future should record a drop in the price of linseed oil, spot prices are well maintained. Stocks are decidedly limited, and this means that orders are being filled on the basis of single barrel lots. Some are offering oil in five gallon quantities only. There is a fair demand, seasonably speaking.

Turpentine is quite unchanged and the movement is limited and supplies are not excessive, in fact stocks are light. The markets of the South are lower.

There has been a manifest increase in the bookings for next year's delivery and evidences indicate that there will be a big season ahead for prepared paints and specialties. Putty is selling more actively as cold weather approaches. A slight change has been made in the quotations on glass.

### *Tendencies Easier; Spot Oil is Scarce*

**Montreal.**

LINSEED OIL.—Flax markets have been reacting the past few days and a decided jump was made on Tuesday of nearly 3 points. Little seed is being received by the crushers as yet, and while delivery will doubtless improve within a short time, the cost of spot oil is little less than it was a week ago. Some are offering in five gallon quantities only, and it is necessary, in such cases, to pay for packages. The movement of seed to the crushers is said to be light as they are not buying to any extent on the present cost basis.

| Raw— | Imp. Gal. | |
|---|---|---|
| Single barrels | $2 90 | $3 02 |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |
| **Boiled—** | **Imp. Gal.** | |
| Single barrels | $2 92½ | $3 04½ |
| 5 to 9 barrels | .... | .... |
| 10 to 25 barrels | .... | .... |

NOTE.—Owing to fluctuating seed markets jobbers generally, are not quoting. The basis is decidedly nominal.

### *At Two-forty-five Turpentine is Steady*

**Montreal.**

TURPENTINE.—The jobbing price is held here at $2.45 per gallon for single barrel lots, and the demand is rather limited, buyers securing only what they require for immediate trading. Jobbers' stocks are reported limited in consequence of the high price basis and the rather restricted buying. The Savannah market is down several points this week and prices may decline here if this is maintained.

| Turpentine— | Imp. Gal. | |
|---|---|---|
| Single barrels | $2 45 | $2 65 |
| Small lots | .... | 2 65 |

(Packages extra.)

### *Good Sales Reported For Various Putties*

**Montreal.**

PUTTY.—While the demand for putty has not, as yet, assumed the active proportions of the late fall season, the sales are seasonably active and will improve. The basis is held without change, and, as previously reported, the basis is likely to hold until the 15th of December.

| | 5 ton | 1 ton | Less Quanty |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases. | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *White Lead in Oil to Remain Unchanged*

**Montreal.**

WHITE LEAD IN OIL.—The season is quite far advanced for active selling of this commodity and still there is a considerable movement to the trade of quantities wanted for immediate use. The basis remains at $15.50 per cwt. for 5-ton lots; $16 for ton lots, and for smaller quantities, $16.35. It will be recalled that these prices would likely continue to rule until December 15th.

### *Now Come Bookings For Prepared Paints*

**Montreal.**

PREPARED PAINTS.—While there is still much movement of prepared paints and of specialties, the interest is beginning to centre in future bookings. These are reported to be excellent already, and there is promise of the movement for 1920 to attain record proportions. All lines are steady and quite firm.

### *Glass List Changed On Sixteen-ounce*

**Montreal.**

GLASS.—A slight change has been made in the first three breaks of star or 16-ounce glass. Up to 25 inches the quotation now made is $18.75 per 100 feet; 25 to 34 in., $19.60, and 35 to 40 in., $20.50.

## TORONTO

TORONTO, October 9.—While there is little spot linseed oil to be had, and some firms have withdrawn quotations temporarily altogether owing to shortage of supplies, prices are easier as it is expected that from now on supplies of seed will be coming in better. Quotations are around $3.15 per gallon for raw and $3.18 for boiled. All indications point to a rising market in turpentine. There is little improvement in deliveries from the South, and supplies generally are none too plentiful. Quotations at present are on the basis of $2.45 per imperial gallon. Paint manufacturers report that business is coming in most satisfactorily.

### *Linseed Oil Scarce But Market Easier*

**Toronto.**

LINSEED OIL.—Owing to difficulties in obtaining supplies, some firms have temporarily withdrawn all quotations on linseed oil. There is a distinctly easier tone, however, to the market, and from now on prices are expected to be a little lower and deliveries better. This situation hinges on the deliveries of flaxseed. For some time past crushers have had much difficulty in obtaining anything like the seed they required. At present the Western farmers are reported busy with threshing and about to start on flax. In some sections rains have hindered operations. It is generally expected, however, that deliveries will show an improvement. American buyers continue to place orders for large quantities of Canadian seed. Quotations on linseed oil are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | $3 15 | $3 25 |
| 3 to 5 barrels, gal. | 3 14 | 3 24 |
| 10 barrels and over | 3 12 | 3 22 |
| | **Boiled** | |
| 1 to 2 barrels, gal. | $3 18 | $3 28 |
| 3 to 5 barrels, gal. | 3 17 | 3 27 |
| 10 barrels and over | 3 15 | 3 25 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

### *Firmer Prices For Turpentine Likely*

**Toronto.**

TURPENTINE. — While turpentine prices at present are holding unchanged at $2.45 per imperial gallon, all indications point to a rising market. Some

THE strong feature of the B-H proposition is the way the product **backs up** all that we say about it in our advertising. We can afford to be enthusiastic—and so can you—about a paint that we know to have superior spreading qualities and to give particularly fine finish—the paint, moreover, of greatest durability.

For almost 200 years Brandram's Genuine B.B. White Lead has been the world's standard lead. One of the reasons why B-H "English" Paint is the best on the market is that this exceptional White Lead is used in making it.

While it's the quality of our product that makes the B-H Agency so desirable and so profitable, nevertheless it would be idle to expect Quality to win out against more aggressive advertising of competing brands. The B-H Agency is one outstanding example of "Good Products" and "Good Advertising" going hand in hand. The B-H line is so fine a line that we have felt justified in extensively advertising to tell the public of its merit. And the result has proved that we were right—a huge business has thus been built up.

Now, in further extending our business and in adding more Agents, we are able to approach merchants with a proposition that far overshadows all others in the Paint Business.

***Write us for full particulars of our Agency proposition***

"Save the surface and you save all" *Paint & Varnish*

# BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

importers declare that prices will advance steadily until they reach or even pass the record high prices prevailing a short time ago. They base their opinion on the fact that according to reports from the South, 65 per cent. of this year's crop is already in, and it is more than 100,000 barrels short of last year's figures. With Germany and other European countries wanting large supplies and a big domestic demand to look after, they claim that there is little prospect of any more cheap turpentine. The rate of exchange, which has been rising again, is also a factor in making Canadian prices high. Deliveries lately have been very uncertain. Supplies at the present time are not large, but no one is suffering. Business has been very good. Quotations are as follows:

| Turpentine— | Imp. gal. |
|---|---|
| 1 barrel (barrel included) ..... .... | $2 45 |
| 2 to 5 barrels (barrel inclued) .... | 2 44 |
| 5 gallon lots ..... .... | 2 55 |

## *White Lead in Oil Remains Unchanged*

**Toronto.**

WHITE LEAD IN OIL.—A fair volume of business is being handled in this commodity. Prices are steady, and it is stated that there is no immediate prospect of change. Quotations are as follows: Five-ton lots, $15.85 per hundred pounds; 1-ton lots, $16.35, and in smaller quantities, $16.70.

## *Mixed Paint Trade Continues Active*

**Toronto.**

MIXED PAINTS.—Paint manufacturers report that orders continue to come in steadily. They are well satisfied with the volume of business that is offering. There is nothing to indicate that prices are to be any cheaper, they state.

## *Glass is Scarce; Putty Unchanged*

**Toronto.**

PLATE AND WINDOW GLASS.—These lines are very scarce and the market holds very firm. A large volume of glass has been handled. Manufacturers and jobbers have been filling all orders possible, although it is stated stocks are almost exhausted. Building, especially in the large centres, has had a boom this year. Many of these buildings are completed or nearing completion and are rushing merchants for delivery. Pittsburgh at present seems to be the most available market, and it is stated Pittsburgh is rushed with orders. Jobbers are shy on quoting futures. It is impossible to say how the Belgian market will affect futures. It is the belief of some manufacturers that it has cost the Belgian manufacturers about four times as much as formerly to manufacture glass, and it remains to be seen whether their present cost will reduce or increase. Quotations on putty follow:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels ..... | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron ... | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron .... | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons.. | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels ... | 7 10 | 7 35 | 7 70 |

# Saskatchewan R.M.A. Petition for Protection in Dry Areas

## Appeal to Provincial Legislature to Guarantee Farmers' Notes —Asks Also for Uniformity in Half-Holiday—and Other Amendments

THE executive of the Saskatchewan Retail Merchants' Association recently went before the Government of the province petitioning them to amend the legislation at the forthcoming session of the assembly.

One of the proposals advanced was that the Government should afford some measure of protection to merchants in drouth areas by guaranteeing notes made by farmers to the merchants for goods purchased in areas where credit is difficult to secure. It was made clear, however, that this was a request which the Government would not be able to grant.

### Want Uniform Half Holiday

The deputation asked for legislation making a uniform half holiday during the summer months. At the present time it is optional with the municipalities to pass a by-law declaring a half holiday for the closing of stores. It is suggested that the optional feature be retained but that when a bylaw is passed in any municipality, Wednesday be made the half holiday.

### Ask Business Assessment on Standard Basis

The Government was also requested to adopt, for villages, a business assessment similar to that in vogue in the cities and towns, in other words, they wish to have assessment in villages made on a floor space basis instead of on stocks of merchandise.

### Ask Licensing of Commission Houses

A system of licensing for produce and commission houses was also requested. It is not proposed to impose a heavy license fee, but the request is made to ensure the bona fides of any firm undertaking this class of business.

---

### PAINT COMPANY TO HOLD CONVENTION

This year's convention of the Canada Paint Co., Ltd., will convene in Montreal on October 20. It is expected that the salesmen and sales managers from the various Canadian territories throughout the Dominion will be present to discuss the usual questions and plan anew for 1920.

### PLENTY OF PAINT CONTAINERS

Asked as to whether there was any difficulty in securing containers, in view of the strike tie-up in the United States, a prominent paint maker stated to HARDWARE AND METAL that they had plenty of supplies. It was a matter of having anticipated one's requirements, this informant indicated, and where there had been an apparent shortage of cans it was suggested that this must be where the arrangements had been made for but limited or temporary stocks of containers. With paints and such products moving very briskly still, it is encouraging to note that there is no lack of packages, as yet.

### BRUSH SITUATION DESPERATE

One of the largest distributors of painters' supplies in the West, located in Chicago, states the "American Paint Journal,' of St. Louis, called attention to the situation in the brush business which the speaker called "desperate." Letters were shown from five leading makers of brushes, of whom there are none larger in the country, and each stated that they had no stock of brushes of any kind. One writes: "Every order we receive has to be made before the order is filled, and you can appreciate how delayed our deliveries must be under such conditions." Another wrote that they were unable to get handles, and under the present conditions were unwilling to promise anything in the way of deliveries except that they would do the best they could. The Chicago distributor said that they were getting orders from Eastern States away out of its regular territory, showing that the situation was general and not local. "When we get an order for brushes we fill it as near as we can and write the party that if the goods cannot be used to send them back—but they never do."

### GLIDDEN COMPANY BUYS AMERICAN PAINT WORKS

Adrian Joyce, president of the Glidden Co., has confirmed the purchase of the American Paint Works, New Orleans, by his company. It is said that the purchase price was approximately $300,000.

### BERRY BROTHERS WORKING NIGHT SHIFTS

For the first time in the history of Berry Brothers, the varnish yard at their Detroit factory is working two full shifts. The color plant has been working night shifts for about three months. The company reports that its September shipments exceed all its former records for any one month.

# DOUGALL
# Blanchite

## *The Really Different Wall Coating That Will Not Rub Off*

ONE coat of Dougall Blanchite Wall Coating gives a handsome finish to a dirty plastered, brick or wooden wall.

A surface covered with Blanchite Wall Coating presents a pleasing clean white surface that retains its spotless color indefinitely. It may be washed without injury.

Furthermore **Dougall Blanchite does not settle in the barrel or can.**

Blanchite Wall Coating is put up in gallon cans, either glossy or flat, with an attractive black and white label as pictured, here.

You can do a large business in Blanchite with contractors and builders. You will find this trade very profitable. Large consumers insist on Blanchite once they have used it.

"Save the surface and you save all" *Paint & Varnish*

## The Dougall Varnish Co., Ltd.
MONTREAL

***Associated with Murphy Varnish Co., U.S.A.***

# CURRENT MARKET QUOTATIONS

*These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.*

# These Barrett Roofings Will Satisfy Your Customers

Barrett Everlastic Roofings have proved themselves under every condition. They are mighty good products to sell. Their good service makes for satisfied customers and reflects favorably on you.

Everlastic Roofings are moderate in cost, easy to lay, long wearing and good looking. They sell easily because they appeal to building owners at once as quality roofings at a moderate price.

They are made by an organization, with many years' successful roofing experience.

## Everlastic "Rubber" Roofing

The more-than-a-million-rolls-a-year sale of this roofing throughout the world proves its merit. Tough, elastic, pliable, and very durable. It sells at a moderate price and is a roofing you can heartily recommend for it **always makes good.**

Of high-grade waterproofing materials, it comes in 1, 2, and 3-ply weight. Each roll will cover 100 square feet. With nails and cement for laps, the approximate weight is: Light (1 ply) 35 lbs.; Medium (2 ply) 45 lbs.; Heavy (3 ply) 55 lbs. per roll.

## Everlastic Slate-Surfaced Roofing

One of the most durable and beautiful roll roofings made. Surfaced with real crushed slate, in soft shades of red or green slate. The genuine crushed slate surface makes this roofing highly weather resisting.

The fire-resisting qualities and freedom from painting will make a strong appeal to your customers. Roll 32 inches wide; weight about 80 lbs., nails and cement included.

Write nearest office for prices and further details.

Extra net per 100 lbs.—Oiled wire 10c; spring wire, $2.50; bright, soft drawn, 15c; charcoal (extra quality), $1.25; packed in casks or cases, 15c; bagging and paperings.

JUST say the word and we'll jump right in behind your flashlight sales with Daylo's high-voltage national advertising—an irresistible magnet that draws buyers right into your store.

You will double your flashlight business once you hook up with us on the Eveready Team Work Plan.

It's a simple co-operative arrangement, with the work and expense on our side and the big cash sales on yours.

***Just Clip the Coupon Below—Sign and Send It To Us—No Obligation***

When you join the Team Workers you get a steady stream of sure-fire sales-helps, powerful window and counter displays and ready-to-cash sales plans—a real link-up with our tremendous Daylo advertising.

The plan is described in detail in the Eveready Team Work Portfolio. It's a plan every "flashlight" dealer should know about—whether he handles Daylo or not.

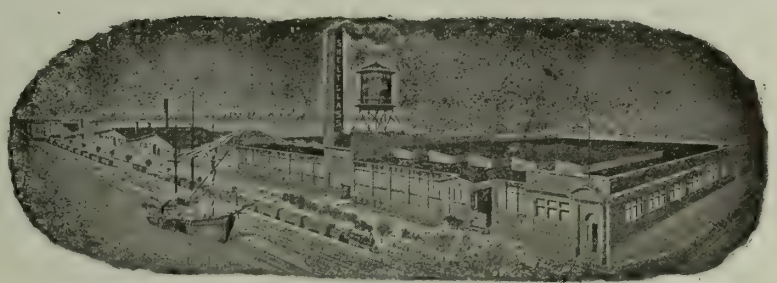
TRADE
SIMMS
SET IN RUBBER
MARK

## Clinches the Painter's Trade



You can get—and keep—the custom of every painter within miles of your store, when you let them know that you stock Simms' Better Brushes—set-in-rubber by our own exclusive patented process.

Simms' Set-in-Rubber Paint and Varnish Brushes are guaranteed to hold their bristles firmly in the setting, no matter what usage they are subjected to. The harshest paint-remover, boiling water, crude oil—everything that usually destroys the ordinary brush—have no effect whatever on Simms' Paint and Varnish Brushes. Their setting is perfection. The bristles **never** come out.

Get a good supply in now. There is a good profit on every brush you sell. We will send price-list by return of mail.

# One Fact Sells Silkstone— Economy!

## Tell Customers the Facts

Silkstone Flat Wall Colours are cheaper than wall paper, more sanitary and lasting; Silkstone can be washed often and never rubs off; it gives a beautiful, soft, silky finish that will outwear any other wall covering. The economy of this splendid finish, that costs so little to apply and serves so satisfactorily, is an appeal to every customer.

While economy is a forceful appeal to housewives and furnishes a motive for an enormous purchase of Silkstone, it is a profitable article for the dealer. We suggest that you write us and so give opportunity for us to prove two things—that Silkstone sells, and that it is profitable to you. Better yet—write us about the benefit to you in an agency.

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

The Eden

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

The Eden IS THE MACHINE FOR THE LIVE DEALER

# Big Things for November

YOU'LL find them in MACLEAN'S—page after page of reading material that will grip the attention of hard-to-please readers throughout Canada. You who know authors and their works just examine this list of contents for November MACLEAN'S —then you'll realize its big selling value.

Order a liberal supply. Tell your customers about these articles in November MACLEAN'S. There are at least seven outstanding features:

## "We Must Start Afresh"

**By Ralph Connor**

An article on the need for Canadians to acquire a new viewpoint on things political, social and religious as a result of the war. The first of a series of three articles by this great Canadian author.

**"MY MEMORIES AND MISERIES AS A SCHOOLMASTER"**
**By Stephen Leacock**

A very readable and humorous sketch of a reminiscent nature by Canada's greatest humorist.

**"TWO MEN—AND AN IDEA THAT GREW AND GREW AND GREW."**
**By Charles Christopher Jenkins**

An article on two mysterious Western millionaires who own and operate twenty-four business corporations, but about whom practically nothing has been known—J. L. Davidson and John R. Smith. It tells how they built up their remarkable chain of industries.

**"A WOMAN ON THE BENCH"**
**By Mrs. Arthur Murphy (Janey Canuck)**

An article on Mrs. Murphy's experiences since she made the experiment of accepting the post of magistrate in the Woman's Court at Edmonton—the first woman in Canada to sit on the bench. It is a forceful, and, in places, a humorous article.

**"WHY I REMAIN A CANADIAN"**
**By Basil King**

A short article by this great Canadian author, whose new novel, "The Thread of Flame," starts in December MacLean's. He tells why he remains true to Canadian ideals, despite the necessity of residing and working abroad, and something of his conception of the destiny of this country.

**"ARMING FOR THE FRAY"**
**By J. K. Munro**

The usual monthly review of Dominion politics by this shrewd satirist.

**"WOMAN'S ACTIVE PART"**
**By Gertrude Arnold**

An extremely readable article on the life in hospitals in the war area by a Canadian nursing sister. It gives information along certain new lines, such as the methods followed to trace missing men through the various hospitals.

### FIVE ENTERTAINING STORIES

**"MEN AND MONEY"**
**By Nellie L. McClung.**
**Illustrated by E. J. Dinsmore.**

A story with a mission, one that will be discussed, we believe, very generally throughout the country.

**"THE TEST"**
**By Harry Douglas.**
**Illustrated by Arthur Heming.**

A live story laid on the great Western Prairies.

**"THE RAINBOW DEATH"**
**By Madge Macbeth.**
**Illustrated by D. G. Summers.**

A mystery of intense interest.

**"SPANISH DOUBLOONS"**
**By Camilla Kenyon.**
**Illustrated by Louis Rogers.**

The second instalment of this bright and exciting serial story based on a treasure hunt in the Spanish Main in the present.

**"HIS MAJESTY'S WELL-BELOVED"**
**By Baroness Orczy.**
**Illustrated by C. F. Peters.**

The fifth instalment of this richly entertaining historical novel.

Then there will be the regular departments that are of great interest to Canadians.

Make your reservation NOW—and make sure of a generous supply.

# FULLER & JOHNSON

## MODEL "K" THROTTLING GOVERNOR

# KEROSENE OIL ENGINES

**All sizes, 3 to 25 H. P., Stationary and Portable**

## DEPENDABLE—QUALITY CONSTRUCTION—GUARANTEED

Fuller and Johnson Model "K" Throttling Governor Kerosene Engines embody all the latest improvements and developments in internal combustion engines. They are of the horizontal, hopper cooled, throttling governor type, regularly equipped with low tension, built-in magneto, and operate on the reliable 4-cycle principle.

**NEVER MISSES AN EXPLOSION**

RUNS SMOOTHLY and EVENLY under light load, full load or varying loads, with the fuel always used in proportion to the load.

MORE POWER, GALLON FOR GALLON, than you get in other engines from high-priced gasoline.

***A PLEASURE TO HEAR IT RUN***

# PENBERTHY

# Automatic Cellar Drainer

**All Working Parts Above Water**

## Look Out for the Fall Floods!

## KEEP YOUR CELLAR DRY

### ADVANTAGES OVER OTHER MAKES:

1. All parts, except strainer, are brass, and except the float, are above water, no slime or corrosion.

2. A foot valve in the strainer seals the suction pipe when the drainer stops working, holding the water in all the pipes, so that it is always primed ready to start instantly. It also prevents flooding of cellar if for any reason the water pressure is insufficient to operate the ejector.

3. It takes up not over half the space.

4. The operating valves open and close instantly by action of the water pressure.

5. No leather washers used, leather dries and causes leaks.

6. It costs less than many other drainers not as efficient.

### WHAT IT IS FOR AND HOW IT IS OPERATED

A device for transferring liquids from one level to another with water under pressure or steam as power. The name Cellar Drainer is derived from its commonest use, that of pumping water from cellars, but its utility is not necessarily restricted to this usage. The construction of the Penberthy Automatic Cellar Drainer is admirably simple, being a highly efficient ejector or syphon jet to which is attached a quick-opening, float-controlled valve. Nor is there anything complicated about its operation. The Drainer is placed in the sump or place where the water or seepage collects, a line from the city water supply attached at one side and a line leading to your discharge point (sewer, gutter or wherever it may be) to the other side. Then turn on the water and forget it, for as the water rises in the pit the float is raised and when the right height is reached the valve is opened instantly, allowing the city water to flow through the ejector, cause a suction, and carry the sump water with it to the discharge. As the water goes down the float follows and when the low point is reached the valve closes to remain closed until enough water collects to again raise the float, when the whole operation is repeated.

# CANADA'S PROSPERITY RESTS WITH *YOU*

## Continued Business Activity and Good Wages Depend on Canada's New Victory Loan

DURING the past four years Canada's prosperity has been due largely to orders from Great Britain and our Allies.

Canada was able to obtain these orders because she advanced credit to these countries.

Canada was able to give this credit only because you bought Victory Bonds.

Great Britain, with France, Belgium and other Allies, are now prepared to place large orders with us for the products of our factories, farms, forests and fisheries—provided Canada again gives them credit.

Credit must be given if we are to have any guarantee of good times and good wages. But our workers on these orders must be paid their wages in cash; so, much of the money that you invest in Victory Bonds will go out in wages to Canadians.

You will be absolutely protected—you will get a good rate of interest and all of your money will be paid back at the time stated in the Bond.

Every cent will be spent in Canada, and ultimately circulate to the benefit of all.

Canada can give this credit only if you again buy Victory Bonds.

If Canada is not able to give this credit, other countries will.

Therefore Canada's continued prosperity rests with you.

# Victory Loan 1919

*"Every Dollar Spent in Canada"*

Issued by Canada's Victory Loan Committee, in co-operation with the Minister of Finance of the Dominion of Canada.

# IS THIS THE SOLUTION?

Another scheme to rectify the distressing prices now prevalent, by other than sound economic measures, was outlined before the Union of Canadian Municipalities which recently convened at Kingston.

## THIS RESOLUTION HITS YOU WHERE YOU LIVE

"We submit the principal root of the evil is the present wasteful, inefficient and antiquated method, or rather lack of method, of distributing the goods from the producer and manufacturer to the consumer—wasteful of time, labor, health, happiness and even human life—inefficient and antiquated in this age and to such an extent that even the huge economies effected by the greatest array of labor-saving machinery the world has ever seen are in a large measure rendered null and void. An ever-increasing army of unregulated distributors and relatively an ever-decreasing army of producers with the leaders of all these practising profiteering and price-manipulation as their fancy may dictate or opportunity may permit.

"Among the minor causes are the various classes of idlers and usurers, who in devious ways levy toll on labor and industry. Waste of time in high schools and colleges teaching dead languages and other unpractical subjects to the partial or total exclusion of vocational training, economics and useful branches of learning which would be of greater value for purposes of mind development and discipline and thereafter more useful to the individual and the country."

## SAYS THE FINANCIAL POST IN REPLY:

"It is, of course, possible that there might be a dissenting voice, heard above this chorus of condemnation. A voice that might suggest, for instance, that the fact that the producer is getting $24.50 per hundred for hogs, where he formerly got $6, might, perhaps, have as much to do with the matter of increased cost as the inefficient handling that gives to the packer 5-16 of a cent per pound on bacon, or to the retailer a bare 5 cents a pound. Or the fact that the farmer is now guaranteed a price of $2.15 a bushel for wheat that formerly he sold with satisfaction for 90 cents, may be as much responsible as the half cent a loaf profit of the baker, or the cent profit of the retailer.

"It is a question, too, whether all the blame for the trying conditions of the present time should be laid at the door of established trade, any more than at any other door. There seems no good evidence for believing that the business morals of the merchant class are worse than any other, and there might be those who might reply to the stricture that our schools and colleges are not devoting their attention strongly enough to the bread and butter needs that "man does not live by bread alone."

The frank object of this resolution was "to attain a substantial reduction in the cost of living generally, but without increase of hours of labor or reduction of wages." It is the possibility of this which THE FINANCIAL POST doubts.

You want to read such discussions as this. They appear weekly in THE FINANCIAL POST.

# Accepted Without Question

Everybody knows that S-W-P is dependable—customers know that they do not need to ask, "Do you guarantee this?" When a customer asks for paint and you show him S-W-P, it is accepted without question.

S-W-P is well known because it is well advertised, and it is well liked because it is well made.

People naturally assume when they see S-W-P in a store that the rest of the goods carried are selected with the same discrimination.

# *The Value of the Business Press to Business Men*

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

*"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.*

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

*"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."*

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission. in "The Awakening of Business."

# Proud Purchasers Are Big Assets

When you sell a range that gives perfect satisfaction at all times you immediately increase the number of your prospects for range sales. People proud of their purchases are the best boosters—and boosters soon increase your business.

The Ranges to sell—the ones which give absolute satisfaction at all times are—

### British Crown Steel Plate Ranges

These ranges are exceptionally well made and beautifully finished. The large roomy cast iron fire box has the linings corrugated to add life to the firebox and heating surface to the oven. These ranges bake and cook perfectly and are fitted with duplex grates so they can be changed quickly from coal to wood.

Now that you realize that British Crown Steel Plate Ranges are the ranges you should sell—write us for information on prices, etc., and learn how to increase your profits this year.

# WHY
## Do You Import Bar Iron?

Our goods have a reputation in the Canadian market, thoroughly established for the last eighteen years.

And compare in quality with most imported brands, yet are considerably lower in price and close to hand.

**You can get quicker delivery from us.**

Copy of tests made by Strength of Materials Laboratory (University of Toronto), March 27th, 1918, prove our claims as to quality.

| | 9-16 Sq. | ⅞ Rd. | 1 Sq. | 1⅜ x ½ |
|---|---|---|---|---|
| Elastic Limit, per sq. in. . . | 39.000 | 33.300 | 33.000 | 35.300 |
| Ultimate Strength ..... | 54.600 | 54.300 | 52.000 | 50.000 |
| Elongation in 8 in. ..... | 25% | 27% | 29% | 26% |
| Reduction ..... | 47% | 49% | 50% | 50% |

All wholesale hardware men can supply **London Bar Iron**

Manufactured in Canada by

## London Rolling Mills Co.
LIMITED
LONDON, CANADA

# FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

**Awnings Tents Flags Tarpaulins**

We were optimistic for good business this year but trade has exceeded our expectations. Our many customers are participating in this good business by carrying our lines for immediate delivery. The season is on. Sort up your stock to be ready. Catalogue on request.

WINDSOR, ONT.

# To cut down the cost per cut

## 250% More Work

In power hack sawing, compound acts more as a coolant than as a lubricant. Cutting heats the blade, and the purpose of the compound is to prevent the temper of the blade being drawn.

A few drops of oil or a scanty flow of compound simply tends to hold the chips in the cut and is frequently responsible for broken blades. Whatever you are using for a coolant, compound, or water, see to it that the work is flooded except when cutting iron castings. If you use compound, keep it thin and well agitated. Actual tests have proven that the use of compound will increase the amount of work accomplished by 250 per cent.

Get a copy of the Starrett Hack Saw Chart 'MA,' pick the right blade, put on the weight, see to it your S. P. M. are right—and watch your cutting cost decrease.

# The new VICTOR No 1 GIANT

## A giant in jaw-height, holding power and durability

*Wide-spreading jaws* that catch away up on the animal's leg.

* * *

*Patented Humped Cross* — no chance for freezing or accumulations of mud, dirt, etc.

* * *

*Direct Pan Fastening*—does not tighten when rusty.

* * *

*Wide, strong Dog*—easily engaged with notch in Pan Shank.

* * *

*Patent Extension on Jaw Lug.* Jaw can't spring out when setting Trap.

* * *

*Lively, high-rising Spring* — made of finest steel, scientifically tempered and tested.

* * *

*New type, smooth-acting Swivel.*

### A NEW AND DIFFERENT VICTOR TRAP

—a *Giant* in name, size and strength. A modern trap that catches and holds far up on the animal's leg. Especially adapted to trapping skunks, muskrats and mink.

The Giant jaws have great holding power—the lightning-action spring rising high on the jaws. Right here is where *Giant* size counts, as the spring and other parts of the trap are built proportionately larger to take care of the additional height of jaws.

**SPECIFICATIONS**

*Spread of jaws 4⅞ inches.* *Weight per Doz. 8½ pounds.*

| *Packed.* | *Dozen.* | *Shipping Weight* |

# YOUR BENEFIT

ALL retail merchants are sold through our wholesale distributors. This enables merchants everywhere in Canada to purchase O-Cedar at the same Wholesale Prices.

We made this our policy because the wholesale distributors not only lower distribution costs, but they call on you more often — you can buy O-Cedar Products more easily and frequently and with a small investment.

**O-Cedar Polish**

You benefit because you can purchase O-Cedar Products along with other merchandise. You receive the same dating as you receive on other goods. You can buy in small quantities, but more frequently, which assures you of a rapid turnover and a **real net profit.**

After the goods are attractively displayed on your shelves, they will only benefit you in proportion as the consumers come in and buy them; so we insert advertisements in the newspapers to help you sell O-Cedar Products.

O-Cedar Products give value, service and satisfaction as they contain the best of workmanship, best quality of materials and they sell at popular price.

Any effort given to O-Cedar Products is repaid because O-Cedar Sales **Repeat.**

# For Roofs—old and new

## Scores of buildings need roofing
## Scores of roofs need repairing

***Showing Brantford Asphalt Slates in use***

## BRANTFORD Asphalt Slates

Made of the same material as Brantford Crystal Roofing, but in individual size shingles. Crystal Roofing has a crushed slate surface of red or green, 80 lbs. per square. Brantford Asphalt Slates are in great demand.

## ASBESTOS FIBRE (*Liquid*) CEMENT

—a rubberlike adhesive and tough preparation made from finest asbestos fibre, creosote and durable oils. Makes any roof, no matter in what condition, absolutely proof against climatic conditions. Easily applied over any kind of roof, metal, gravel, paper or composition.

## Asbestos Sheathing

With fire prevention uppermost in the minds of everybody from the school-boy up there is no doubt a growing tendency to fireproof buildings. Asbestos Sheathing is a recognized fire-prevention material. Recommend it to builders.

## Jewel Roofing

Comes in 1, 2 and 3-ply guaranteed respectively for 3, 5 and 8 years. We think it is the best value on the market for this quality of roofing.

## Excelo Roofing

—a better grade roofing with a longer guarantee. Comes in 1, 2 and 3 ply, guaranteed for 5, 10 and 15 years respectively. Place your orders early.

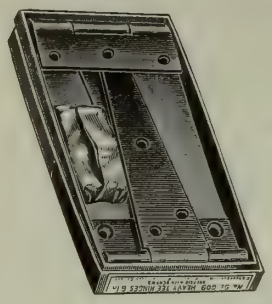
# The "Unusual National Way"

## Reversible Hinge
## No. 840



The Reversible "T" Hinge is made especially for garage doors. A loose pin is fitted so that it can be used as a full surface hinge, or the "T" part mortised into the jamb on brick construction. The pin may be slightly rivetted after placing.

Packed one pair in a box with screws.
The following finishes are carried regularly in stock: Bright Steel, Japan, Dead Black Japan, Sherardized with Steel Pin, Sherardized and Dead Black Japan with Steel Pin.
Furnished in two sizes only: 8-inch and 10-inch.

Weight, per dozen pairs, 8-inch, 10-inch, 53 lbs.

## National Manufacturing Company
## Sterling — Illinois

No. SC. 609

# Everybody Likes Strap and Tee Hinges

***Packed One Pair in a Box with Screws***

No. SC. 209

Before placing your next order for hinges consider the time wasted loosening bundles, selecting and counting out the screws and wrapping in paper.
Consider the additional customers you can wait on when hinges are already packaged, neatly labelled, ready to hand out.
Consider the advantages of having a clean, attractive stock that can be handled without soiling the hands.
Naturally this time and labor-saving method appeals to the trade and consumer as is shown from the ever-increasing demand.
In ordering, prefix the letters SC. to the class number to distinguish from the line of hinges in bulk.

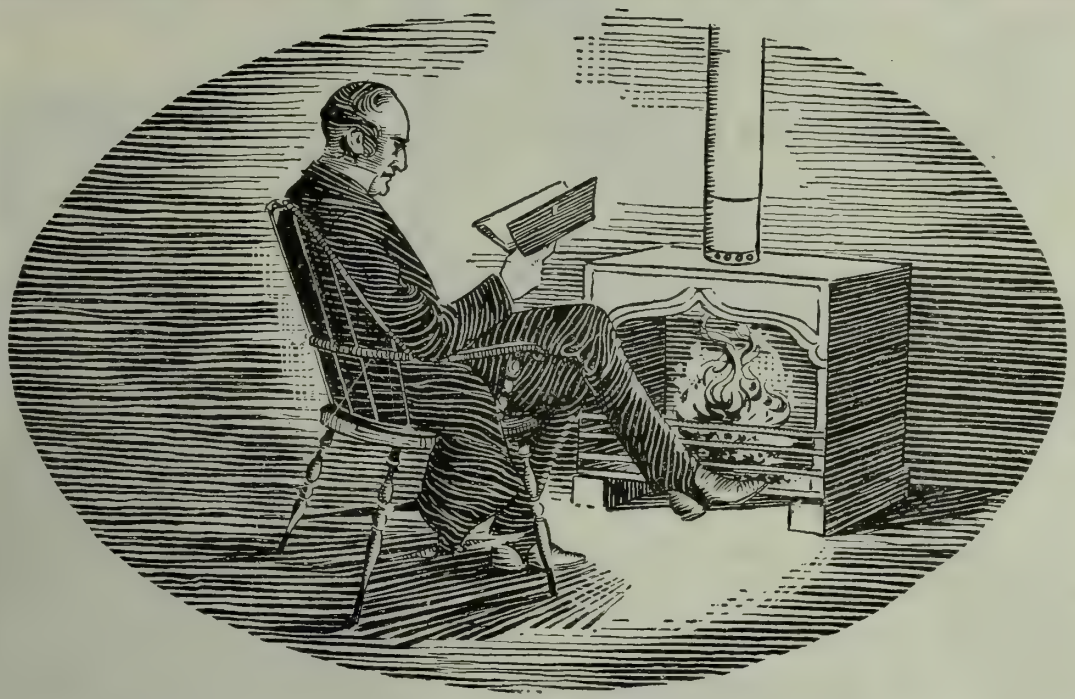
Rotary Ash Sifter

*Enclosed, Clean and Dustless*

*Show Your Customers How This*



# "Canada" Rotary Ash Sifter

*Saves Them Money and Trouble*

Coal will probably never be as plentiful again as it once was. The war has made thrift more general than heretofore. The "Canada" Sifter saves money, time and clothing—beside fuel. It separates the ashes from cinders quickly and thoroughly. The enclosed working parts make it clean and dustless to use. An easily operated sifter that, being galvanized, is rustproof and neat in appearance.

TORONTO MONTREAL WINNIPEG

# WHEN ANTHRACITE COAL WAS FIRST USED IN AMERICA

IN 1808 Judge Jesse Fell of Wilkesbarre, Pa., succeeded in burning anthracite coal with some measure of success, but it was not until around the year 1824, the year of the founding of the Plymouth Cordage Company, that any general use of this fuel for domestic or factory purposes began.

The early coal miners found that in both mining and breaking the coal, large quantities of good rope were needed, and from the beginning of the industry in America, Plymouth Rope, the rope you can trust, has played an important part in the vast mining operations.

The rugged, durable qualities built into every foot of Plymouth Rope through pure material and expert workmanship are as valuable to every rope user as to the producers of coal.

# *The machinist says:*

"Sure I'm using them, the same as most of the men in the shop are doing. Some of the Starrett Tools in my kit, I bought when I was an apprentice.

"Y'see, it's like this. We got the habit when we were kids. We saw the older men, the ones that were doing the finer work, preferred Starrett Tools because they knew they were accurate, and we copied after 'em—just like our kids are doing today.

"How's that? No, I wouldn't go so far as to say that Starrett Tools by themselves will make a good machinist, but I'll say this—Starrett Tools will make it a lot easier for any machinist to do good work.

"Yes, I've got one of their 'Starrett Data Books for Machinists,' and believe me, it saves a lot of time and mistakes. If I want to know a decimal equivalent, a taper dimension, the speed of a milling cutter, or something about materials, I don't have to guess or ask — I just look in the book and find out. It set me back seventy-five cents at the hardware store, but it saved me a blame sight more than that in the first week."

# What Your Fellow Merchant Thinks of Neōlin Soles

TRURO SHOE REPAIRING FACTORY

T. Torraville, Proprietor.

Truro, N.S., February 28th, 1919.

Goodyear Tire & Rubber Co., of Canada,
Toronto, Ont.

Dear Sirs:—

The writer has been watching with interest your advertising campaign on Neolin Soles, also the great demand for same. I have been engaged in custom shoe making and repair trade for some years, and naturally I regarded leather as the ideal sole for boots and shoes. About three years ago I began using Neolin, style 146. As my customers found the soles to be satisfactory, and when I was fully convinced that in recommending Neolin I was offering a sole with more points of merits than any other sole on the market, I then began to give these soles real attention. Style 196 was added to our stock, and it has given splendid satisfaction.

When a customer comes in I have been showing both style 146 and style 196, explaining that the heavier sole only costs 25c more and that there was practically 25% more wear in same. Customers quite readily accept style 196. I find that men who do much walking, and those who are employed in work of a heavy nature, readily accept the heavy sole. I also noticed that the demand for these soles was practically good for Fall and Winter wear.

I find Neolin to be a most satisfactory sole to work with. I enjoy stitching same on stitcher and the boys like to finish same on the finisher. I never hesitate to recommend Neolin Soles.

I have also been a larger user of Wingfoot Rubber Heels and prefer to use them as I know that in doing so the customer is getting the best value.

As modern shoe machinery has superseded the old shoe repairing method so I believe will Neolin displace leather, and both the consumer and the repair man will be the gainers.

If my experience, and the information contained in this letter, can be used by you to advantage, you will be at liberty to use same as you may wish.

Wishing you continued success in the marketing of your most excellent products, I remain,

Yours very truly,
(Signed) T. TORRAVILLE.

## Neōlin—*The Longest-Wearing Sole Material Made*

Long wear in shoes means economy for the purchaser—and the big majority of people *have to be* economical. Because of this, and because Neōlin shoes *do wear*. Neōlin Soles *create repeat business* —for both the shoe retailer and the shoe manufacturer.

# TESTING HACK SAWS

Hack Saws all look very much alike but there is all the difference in the world in the way they cut, and stand up under the work which they are required to do.

You cannot find out how a Blade will work in a power machine by trying it in a hand frame. Neither can you determine how it will cut machine steel by trying it on high speed steel, nor which brand of blade will do your work best by simply trying one or a dozen of them.

The only sure test to determine the adaptability of a blade for your particular work is to give it the test of continuous use, for a reasonable length of time, in your own shops under normal conditions.

Goodell-Pratt Hack Saw Blades are made to meet such tests as these, because they are improved in design, and made in accordance with the latest and best shop practice.

# Clark Indestructible

No. 7-D

# Steel Heaters

***For Open or Closed Automobiles, Sleighs, etc.***

The 7-D Clark Heater is very popular and widely used. It is suitable for any conveyance; 14 inches long, perfectly insulated with heavy asbestos felt and covered with excellent dark-green Brussels carpet. Has side and end heat controls and weighs but 6 lbs. A great heat giver. There are several other models—all good sellers.

Clark Heaters find a place in the hearts of car owners who drive in winter, either through necessity or pleasure. They make open cars cosy and comfortable, and closed cars luxurious.

There is a heavy winter demand for Clark Heaters and every heater owner is a Clark Carbon customer.

**Your jobber can supply you. Order now.**

**CLARK CARBON**

Clark Carbon gives the greatest heat in the least volume. Heated for 2 or 3 minutes in any flame or fire it gives off its maximum heat at once, and continues to give comfortable, satisfying heat all day.

## Chicago Flexible Shaft Company

**Roosevelt Road and Central Ave.** **Chicago, Ill.**

W&B
TRADE MARK

# The Perfect Grip

An ordinary hammer will slice the head off a nail because it gets its grip on the head and not on the nail. With the head off, it's all off unless you have a "W & B" Hammer.

A perfect balanced "W & B" Hammer will take a perfect grip on the body of a nail and pull it, head and all, clear through a plank.

All nails are trailers to "W & B" Hammers, and they have got to follow when you take the perfect grip.

Heads on or heads off, for drive or pull, "W & B" Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and good all through, being made in Canada under a quality policy that has given fame to every tool that carries the "W & B" trade mark:

*"Make it better than anyone else can make it, put your name on it and stand by it."*

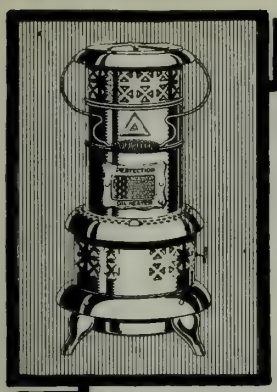
# Insure Your Reputation for Spotless Cleanliness

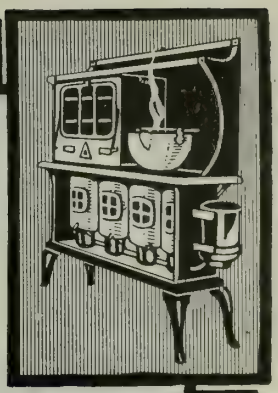
Any store draws trade when it has a reputation for fresh, bright stock and clean floors. Customers are attracted by clean stock as much as by any other feature of store service.

## STANDARD Floor Dressing



the non-evaporating, sanitary wood-***preservative*** thoroughly cleans the surface of wood, linoleum and oil-cloth. It also ***effectively prevents dust from rising.***

Imperial Standard Floor Dressing holds the dust so that it can be collected and removed from the store.



One gallon is sufficient to cover 500 to 700 square feet of floor space and lasts for several months. It is easily and quickly applied with an ordinary sprayer. Get a supply and apply it to your floors and shelves—ask the Imperial Oil man when he calls or ask our nearest branch.

## IMPERIAL OIL LIMITED

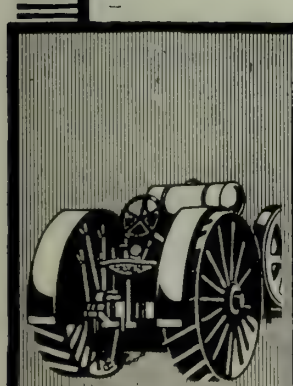
BRANCHES IN ALL CITIES

# -BEST IN QUALITY
# -COSTS YOU LESS
# -SELLS FOR LESS

*"for Oil Heaters"*

*"for Oil Cookstoves"*

IMPERIAL Royalite Coal Oil should easily lead the field for regular demand and greatest profits. Viewed from every selling standpoint, Royalite surpasses any brand of coal oil marketed in Canada. Consider this: Imperial Royalite is highest-grade coal oil, refined to meet every known test to which oil can be subjected. You can buy it cheaper, not because its quality is poorer, but because the vast producing and selling facilities of Canada's greatest oil company make a lower price possible.



Because you buy it for less you can sell it for less. There's actually no reason why you shouldn't ask as much for Royalite as any oil you handle. The quality is there, and the people know it. They will readily pay for Royalite what they do for other brands, if necessary.

You can get Royalite immediately when your supply runs short—it is always available.

You are dealing with a company known throughout Canada—whose business policies are the best—whose co-operation is real—a large advertising campaign is now running on Royalite in leading publications.

Recommend Royalite to all of your customers for power, heat and light. You will profit by it.

# The Open Door of the STACK HEATER Always Convinces

When your customers see how the water passes into the numerous small pipes exposed to the hot gas flame they understand. It requires no technical knowledge to see that the water will heat faster in the numerous small pipes than in one large coil.

The fact that the Stack heats water in one minute makes sales for you.

**Send for a Stack Heater display card.**

# Is the Alien a Menace?

IN the October issue of MACLEAN'S MAGAZINE a strong presentation is made of the reason why the people of the West are against further foreign immigration.

"The Menace of the Alien" depicts the foreign problem in the Canadian West as it exists to-day, and shows every one of us why we must Canadianize our Ruthenians, Austrians, Slovaks, and our fifty-seven other varieties before we allow any further "unrestricted" immigration.

This article is written by a member of MACLEAN'S MAGAZINE staff who has just returned from a careful, personal investigation of the situation. Shall we have a "White West?" Many Westerners are demanding it. Are the aliens to swing labor into the bosom of the O.B.U.? It is being done—and what must we do to stop it?

The "inside" story of the routing of the Drumheller miner aliens by returned Canadian war veterans is here told by MACLEAN'S for the first time. What leadership must be substituted for the O.B.U. leadership of these foreigners?

*The October issue of MACLEAN'S is a Western number in the sense that it contains many articles and stories of distinctly Western interest. For instance:*

### X "Those Pesky Farmers Out West"

*By Hopkins Moorhouse, Author of "Deep Furrows"*

They have completely upset the old order of things. No longer will politics consist of the comfortable fight between the Ins and Outs with the old party lines maintained. The grain growers on the Prairies have upset the calculations of the professional politicians and completely changed the face of Dominion politics.

### X "Fifty Years in the West"

*By Professor W. T. Allison*

A breezy and readable sketch of the business career of Winnipeg's veteran business man, James H. Ashdown.

### "Further Discoveries of New Land"

*By Vilhjalmur Stefansson*

The final and most interesting instalment of Mr. Stefansson's story of his wonderful trip of five years' duration in the Canadian north in which he tells for the first time of finding new continents in the Arctic and hoisting there the Canadian flag.

### X "The Banshee Bell"

*By Edith G. Bayne*

A bright love story laid in the mountains of British Columbia.

## *Other Splendid Features of October MacLean's*

### X "The Turmoil at Ottawa"

*By J. K. Munro*

A comprehensive survey of Dominion politics, written with complete impartiality and absolute candor. It is bright and breezy, with a knock in every line for the politicial opportunists. It plucks many tail feathers from our party leaders.

### "Spanish Doubloons"

*By Camilla Kenyon*

The start of a bright and fascinating serial story by a brilliant young writer. It is the Spanish Main brought up-to-date, treasure hunting with a background of fun and romance.

### "The Airy Prince"

*By Arthur Beverley Baxter*

A complete novelette in which is presented a bird's-eye view of England in time of war. It is one of the most brilliant stories that has been written of recent years.

### "His Majesty's Well-Beloved"

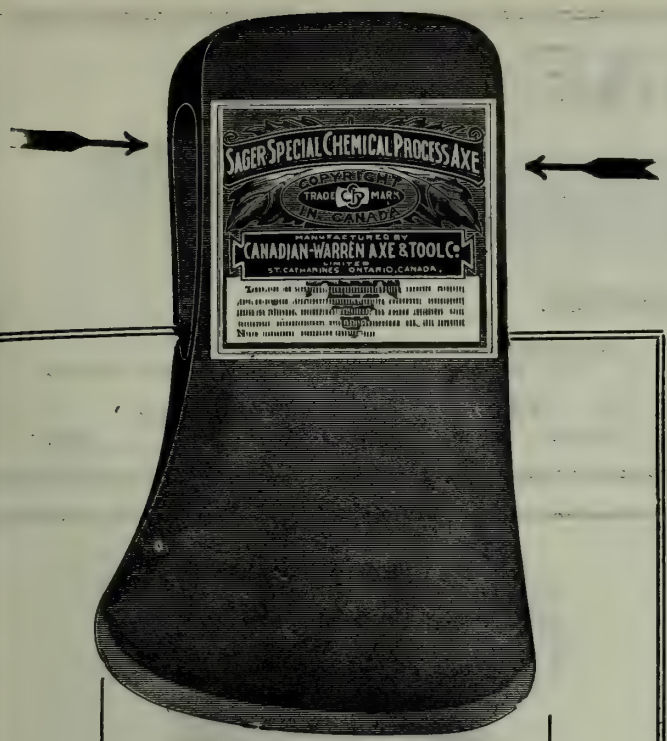
*By Baroness Orczy*

The latest novel by this popular authoress appearing exclusively in MACLEAN'S.

### "Ebb and Flow"

*By C. W. Stephens*

A strong business story laid in the province of Quebec.



*Over 70,000 Canadian Families Buy*

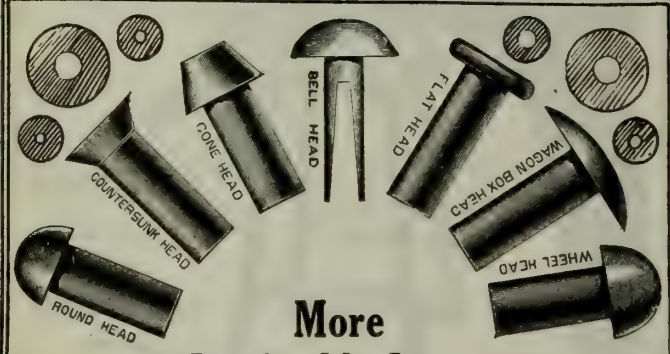
## 4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:



BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actua. tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

## More Profitable Lines for the Hardware Dealer

Our products earn maximum profits for the dealer. A trial order will convince you of their great sales-producing qualities.

We manufacture—

Iron, Copper and Brass Rivets,
Small Washers and Burrs
Wire Nails

HARDWARE AND METAL is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

# Round Oak Goods

HERE is another internationally advertised line of exceptional merit. This firm is one of the original manufacturers in the market putting all their efforts behind one range, one heater, one base burner and one furnace, and we feel that with their many years' experience they should be able to turn out a good article. They do not use scrap iron and for that reason get a material, which while a little higher in price, gives genuine satisfaction, and always brings back the neighbor as a customer as well as the one to whom you have made the sale. We carry a full stock of repairs and that feature recommends it. Since this firm started doing business in Canada many years ago there never has been a time when you could not get their repairs in a hurry. We would be glad to co-operate with you in any local advertising scheme you wish to put on. If you need any advertising matter write us.

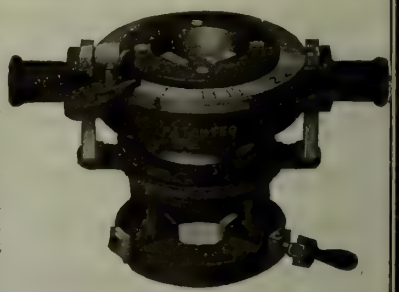
# Constant Sales Increase



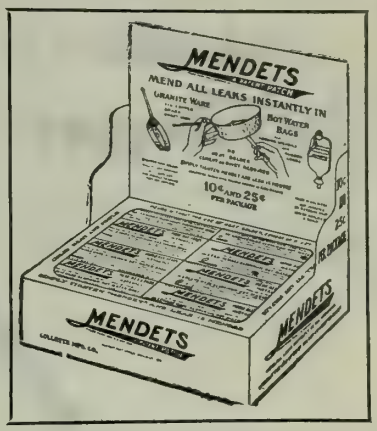
6 Beaverette to ¾ inch.

This efficient little die stock has been about 10 years on the market with constantly increasing sales.

The only tool that threads ¼, ⅜, ½ and ¾ without changing dies or bushings. Two sets of dies are operated by one handle.

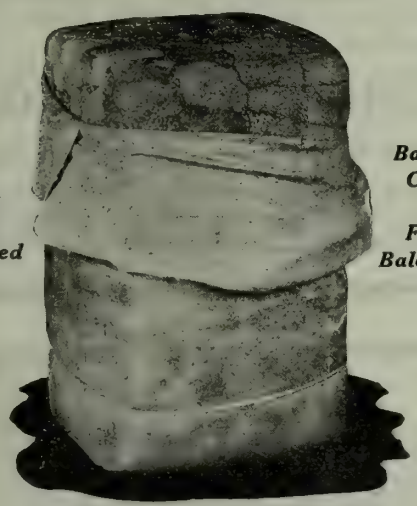
Beaver 25 and 26 1 to 2" are alike except that 26 has ratchet attachment. They operate on the Beaver receding die principle—the further you thread the easier the labor. A man of ordinary strength can cut a 2-inch thread with one hand. Together these tools cut ¼ to 2-inch pipe without change of dies or bushings.

No. 25 Plain 1 to 2 inch.



**Borden-Canadian Co.**
110 Church Street - Toronto

# MENDETS
A PATENT PATCH



Mendets are selling wonderfully. Orders pour in as fast as we can fill them. Millions of boxes have been sold. Placed in sight in your window or on your counter, this display case sells them on sight. Mendets occupy little space.

The effective results given by Mendets have created an enormous natural demand. An extensive advertising investment has maintained and stimulated this demand everywhere. The easiest sales you ever made. Write your jobber.

# The Biggest Gillette Season Yet

From now until the middle of January the aggressive Gillette dealer will make his Gillette Safety Razor sales mount up beyond all records.

While the need for economy will not be quite so urgent this year and Christmas shopping will reach a new high mark, the trend will be towards useful gifts. The Gillette dealer could ask for no better combination of circumstances.

The Gillette Safety Razor Company will help you to make the most of the opportunity.

## Are You Receiving the Dealer Helps?

Write, if you are not receiving the window and counter business-bringers. NOW is the time to prepare so that not one of the many avenues through which live dealers interest possible buyers in their community will be neglected. The Christmas advertising for the Gillette Safety Razor will shortly commence. Newspapers, magazines, and billboards will carry an urgent message to the people all over Canada. Then it is up to the dealers themselves to say who shall profit most by the demand created.

It is going to be the biggest GILLETTE season yet. Have you made a definite plan to get your share of the business?

# Helping You Sell MORE

Your sales of Stanley Storm Sash Hardware will be increased by our advertising this fall in the leading national magazines and farm papers.

If, when you show customers the storm sash hardware you carry, you are able to say it is Stanley's, they will remember having read about it somewhere. They will accept it with the feeling that you are giving them the best of its kind. No matter what it is you sell a customer the important thing is that they leave your store with this feeling about the goods you carry.

This is why our advertising will not only help you sell more Stanley Storm Sash Hardware, but it will also help your sales in other lines, and this is the reason why you should stock up at once in anticipation of this advertising.

# Form Selling Plan---Then Develop It

## Creating Confidence a First Necessity—Then Customer Will Take Merchant's Advice —The Plans of L. J. St. Pere, of Montreal, Have Borne Success

Based on an interview by A. H. ILLSEY, of HARDWARE AND METAL, with L. J. ST. PERE, of Montreal.

"IF you haven't the goods you cannot sell them."

In that small sentence a very strong argument in favor of carrying a comprehensive stock was summed up by L. J. St. Pere, hardware merchant of 2117 Ontario Street East, Montreal, when discussing merchandising with HARDWARE AND METAL. And to sustain this contention the writer was supplied with evidence on every hand of the practical manner in which this merchant carries out his own convictions; there was the stock to support his argument.

Mr. St. Pere has been in business for nine years at the above location. His story is one of progress, each year adding its proportionate increase of turnover. Each year, too, new methods have been decided upon and new plans developed, so that the owner has the present satisfaction of directing a well-balanced and well-planned enterprise. Ever on the alert for new methods; ever on hand to supervise the carrying out of his plans, the owner looks forward with confidence and his confidence is sustained.

### Dividing Clerk's Duties

Realizing the importance of the multitudinous duties required in keeping a stock in orderly neatness, Mr. St. Pere has assigned various work to his 4 salesmen. For instance, one will be required, in addition to his attentions paid customers, to keep the dust from goods on display in the windows. Another will have the care of the shelving containing sampled drawers (and of which there are 600), and so on, with other departments. Incidentally, HARDWARE AND METAL queried Mr. St. Pere as to how

*Note the decided neatness of boxes, carefully sampled, and the splendid showing of paints, varnishes and stains. Features brought out in the illustration are :—(1) the unique "rack" for sampling various electric bulbs and which readily sell themselves the smal chain attached to each socket revealing to customer the power secured from each lamp; (2) the general inviting appearance of the whole store; (3) convenient location for cash register to save salesmen's steps; (4) conveniently located seats for patrons.*

these boxes and the samples used on them were kept in so attractive a manner, so free from dust. It was, he replied, this constant care in going over stock, and which is exercised daily. The appearance of all the shelving, the counters and other display sections of the store commend this plan as a very satisfactory one. To all customers it must be pleasing and refreshing to enter a store where goods that are examined are free from dust and ready for purchase.

Another clerk will be assigned to wash the windows of the store. These are washed frequently, hose being attached to the small hydrant placed conveniently for quick service. As Mr. St. Pere pointed out, "customers will come to look into a window that is clean while they will not if it is dirty and not attractive."

**Bought 115 Electric Irons**

The St. Pere stock is governed by the probable demand of the neighborhood which it serves, in part. But its energetic owner also sees an opportunity for cultivating the taste of his patrons for goods other than those which they would purchase of their own volition. To this end he has bought heavily sometimes, of electrical goods.

"The last time I bought electric irons my order was for 115. The firm I bought these from laughed and thought I was making a mistake. Here are the few I have left." And thus describing this purchase, Mr. St. Pere pointed to a little pile of irons in the original boxes —most of them, and less than a round dozen of them left. That purchase was made this spring—it has taken much less than six months to sell the 100 already disposed of.

**Have Sold Well**

Flashlights, too, have sold well and are in popular demand. Of these, the pocket sizes are the bigger sellers. They are displayed well to the front—right at the entrance to the store.

One of the remarkably frequent sellers is that of electric vacuum cleaners. "When we sold these at $50 each they were sold well. Now the price is $70 and still we are selling them. We have sold three or four of these at the higher price. You cannot sell the goods if you haven't got them, and you can't sell cheap goods as well as the better."

Fifteen cases of electric bulbs were purchased and sold this year, and the better grade are stocked and sell without trouble.

**Paints and Brushes**

The paint sales have been larger this year than for a long while. This department is a really excellent one. The store depth is seventy feet. Nearly half of this space—on the hardware side of the store, is occupied by the paint stock. It is so well arranged in the specially-proportioned shelving as to demand the attention of every customer. With the incessant care taken by the salesman, and already referred to in a preceding paragraph, all cans are in orderly and neat position. The depth of the shelves is such as to accommodate the half-pint, pint, pint and quart tins so that there is little spare space. This makes for a conservation of valuable room as well as for the enhancement of appearance in the general scheme of display. Altogether, the stains, mixed paints and specialties occupying this department, are of great variety and make up a decidedly comprehensive stock.

**Getting the Business**

"Our invoices were for $840 worth of brushes this year, all kinds," said Mr. St. Pere. Here, again, is vividly borne out the main contention set forth at the beginning—"if you haven't the goods you cannot sell them."

The brush stock is carried in cases near the front. These cases have glass sliding doors and the original boxes hold the stock until it is sold out. No dust can get in to destroy, in any way, the value of the hundreds of brushes carried. Kalsomine brushes are carried to the retail value of $13, and these are usually purchased by the painters, many of whom are numbered in the store's customer list.

*FEATURES OF THE ST. PERE STORE*

1—*Aims to educate customer for high-grade goods.*

2—*Assigns special duties to each clerk.*

3—*Windows cleaned and shelving and boxes dusted daily.*

4—*Believes in best store and office equipment.*

5—*Cultivates trade of bigger institutions.*

6—*Unique storage for wallpaper.*

7—*Goes after electrical goods trade strong.*

8—*Will instal adding machine and auto delivery truck.*

9—*Sells odd-size glass by pound.*

**Caters to 42 Institutions**

The incident regarding the large sale of electric irons prompted HARDWARE AND METAL to ask, "Where do you sell so many goods?"

"We have 42 schools, convents and other institutions that we sell to, and these people buy all their hardware needs from us," was the reply of Mr. St. Pere.

This wide connection was secured through careful attention to orders. The proprietor also believed in using his own personality and in enlarging upon his acquaintances. In other words, one of the best advertisements a merchant can use is that of getting out among the people of his own district; it is a great opportunity that should be improved.

**Follows It Up**

In addition to many other considerations, Mr. St. Pere has always been able to look after a sale and follow it up with satisfaction to the buyer. For instance, a large trade is done in gas stoves. Twenty-two of the larger style were sold during the past season and 38 smaller ones. These have to be connected up. Two men look after work of this nature, and the average charge made is about $2.50. This is slightly less than the charge of those who are called in to do this work in the regular way. Customers appreciate the little difference of fifty cents.

**Electrical Wiring Done**

An interesting development has been made in the matter of electric lamp and fixture selling. Four men are employed during part of the season. This is in the late summer and fall, just when there will be ample work to keep these men busy. They are paid good wages and the firm plans to charge a moderate advance, per hour, over and above the prices paid these electricians. A great deal of wiring was done during the past season—about $2,000 worth. When the season slackens and the activity lessens, these men are dispensed with. The shop is always available, so that if these men are again needed, or other men, they can always be accommodated with tools, and a place in which to prepare their work.

**Plumbing Business**

Some attention is paid plumbing, too. At present two men are employed. This is profitable. Not only so, it affords another close connecting link with the customer. How many there are who would be glad to leave an order with the hardware man for a little plumbing work. Mr. St. Pere can attend to this on short notice. He charges for the work by the hour—a moderate advance over what is paid the men. There are many little jobs throughout the season, and the idea is to not seek too much work, but just what two or three men can handle profitably.

**Wallpaper and Glass Sales**

The sales of wallpaper dovetail well with those of paints and varnishes. Mr. St. Pere carries a stock of 100 patterns. His arrangement is simple and effective, panels being carried in a movable rack which is placed on the floor of the store. These are of the swinging kind and the buyer can readily see the effect to be had with a certain paper and border. Racks are used for the papers on the side of store opposite the hardware shelving and are easy of access.

In carrying surplus stock one of the best arrangements yet seen by HARDWARE AND METAL is employed.

**In the Basement**

A space is set aside in the centre of the capacious basement, which has a

splendid cement floor, and accommodating height. This space is about 12 feet long and between five and six wide. It is enclosed with beaver board right to the ceiling, and two sections of shelving, one on either side, are provided and these sectioned off to carry the various papers and the accompanying border. In this way, the small space contains 100 different lots of excess stock paper—50 patterns on either side. The advantages to be derived are those of eliminating completely, all dust and dirt; excluding the light; keeping the excess stock in the best of order and neatness, and affording prompt access.

An electric light is used, a single bulb being suspended from the ceiling. In order to prevent the consumption of light when the clerk has left the room, a small panel of common glass has been inserted in the side wall nearest the stairway. It the switch had not been turned off the light would readily be observed and waste prevented.

### Glass by the Pound

In every hardware store there is bound to be breakage of window glass. This comes from handling, and it may also happen that an odd case opens up in bad order. This broken glass is cut down, without delay—preventing accumulation of odd, jagged sizes in the racks—to a width of six inches. It does not matter what the lengths are, for this glass is now disposed of to farmers who are glad to get it for repairs around the barns, sheds, chicken coops, etc. A charge of four cents per pound is made for this odd-size glass, and at this rate there is no delay in figuring out prices. In addition to this, Mr. St. Pere states that the returns from sales at htis price yield a little profit. It is one of the ways that have been successful here, of preventing waste and plugging a leak that has become a big one in many stores.

### Rack is Compact

The glass rack is compact, takes up but little space, and in its location at the extreme back of the store, is easily reached when a sheet of glass is wanted. A marble slab is used for laying the glass on preparatory to cutting, and an electric lamp is suspended immediately above to impart a flood of light on the whole surface. Fully one hundred sizes of glass can be accommodated in the rack.

In addition to other appointments that save time and muss, a receiving room has been arranged at the rear of the store, and here goods are unpacked. It prevents accumulation of packing and packing material from time to time.

Hot water is used is the heating medium and this ensures a comfortable store in all severe weathers. Four clerks are employed and one delivery rig is ample at present. Later, and perhaps within the next few months, it is proposed to instal a delivery truck.

### Office Arrangements

Mr. St. Pere is not only an advocate of careful reading of trade papers, and other literature bearing on his business, but he engages in extensive reading of this kind himself. He has found it pays. The merchant who remarks: "I am too busy—have no time for reading," is standing in his own light. Far better to be the "managing director" of one's business, so to speak, engaging moderate cost help to perform the work the proprietor would often do himself and spend the time in research through close reading of a good trade paper. That's the policy of many successful "big" men, and "big" men had to begin in a small way, once. Mr. St. Pere also buys and reads various books bearing on business methods, etc.

### Office Is Complete

The office arrangements are complete. and would do credit to a much larger business. The space assigned for the lady bookkeeper is not extensive, but every foot is used to the best purpose. A neat, small typewriter desk, a safe of ample size, the proprietor's desk and enough space to accommodate an adding machine (which Mr. St. Pere expects to instal within the next six months), besides the required room for supplies is here afforded. For dark days an electric light may be used to brighten up the desks.

In the store, and near the centre of the floor, the large cash register used has proven a very useful help in accommodating the handling of all money. And while some credit trade is done, Mr. St. Pere stated that he carried only about $1,200 on his books.

*WHY NOT USE THE STORE'S BEST ASSET?*

*There is no direct outlay for one's windows and they ought, therefore, to afford all merchants a great opportunity in pulling trade. This display of L. J. St. Pere, 2117 Ontario St. East, Montreal, conveys a splendid impression of the effectiveness of well-arranged windows. Make them attractive and seasonable, keep them clean and the glass shining, and they will have admirers as Mr. St. Pere says. In this instance it would appear that the traffic was temporarily held back while the photographer secured his picture, for there is an air of "come-in-ness" about this store, and the police, while serving a good purpose in many ways, are not engaged in preventing customers entering this store. The latch-string's always out.*

## BRIGHT OUTLOOK IN BRITISH COLUMBIA

F. R. Murray, president and manager of the F. R. Murray Company, Limited, Vancouver, Canada, was a visitor at HARDWARE AND METAL'S Toronto office during the week. Mr. Murray is on a visit to New York and other Eastern points calling upon manufacturers. Referring to his own company, Mr. Murray stated that it is their intention to greatly expand their business in the near future with the addition of many lines of household hardware specialties. Mr. Murray states that business is splendid in British Columbia at the present time and that the future outlook is exceedingly optimistic. A large amount of building is going on in British Columbia at the present time, particularly small homes and bungalows.

## TO BOOST SALE OF CANADIAN PRODUCTS

The International Corporation of Canada, with head offices at 112 St. Francois Xavier street, Montreal, and incorporated with a $2,000,000 capitalization, plan to exploit foreign markets, aims to make "Canadian-Made" manufactured products one of their big lines. It will be the policy of this corporation, it is pointed out, to co-operate with manufacturers in expanding Canada's trade abroad. At the moment the names of the directors are not available. The name of Henry B. Thomson, late Canadian Food Controller, and at present associated with the Canadian Trade Mission in London, is associated with the above Corporation and it may be that he will be assigned an executive appointment.

# N.B. Merchants Convene at Moncton

## Interesting Sessions in Which the Board of Commerce Comes in for Much Unfavorable Attention—Dominion President Urges "Get-Together" Spirit.

MONCTON, N.B.—The fifth annual convention of the New Brunswick Retail Merchants' Association, held this week in Moncton with a closing banquet in St. John, was regarded as being the most successful gathering of its kind yet conducted by the members. Included among those at the meetings were: J. A. Banfield, Winnipeg, Dominion president; E. M. Trowern, Ottawa, Dominion secretary, and W. M. Banfield, Toronto. Speeches of different members indicated much dissatisfaction with the work of the Dominion Board of Commerce which they said "would not be improved until competent commercial men were given representation in its dealings." A resolution was passed to this effect.

The delegates were welcomed by the retiring president, A. O. Skinner, of St. John, N.B.; his Worship, Mayor Price, of Moncton; H. S. Bell, president of the Moncton Board of Trade, and R. P. Dickson for the Moncton Branch of the R. M. A. Mr. Skinner referred to the high cost of living and to profiteering, and said that the Retail Merchants' Association should condemn this practice through the press.

### Condemns Methods of Board of Commerce

J. A. Banfield gave a forceful address in which he complimented the New Brunswick branch upon its work. He emphasized the need of honest dealings. "Service is satisfaction," he said, "and if followed up will mean success. Don't knock. Don't try to cover up knowledge. The R.M.A. has no need to do that. It stands for honest weights and measure, no misrepresentation of goods bought and sold, no false advertising, and to help others." With its estimated one thousand members the association, working in the right channels, could do a vast amount of good for Canada. Mr. Banfield criticized the work of the Dominion Board of Commerce, stating that those probing the cost of living should be men with practical business experience. Business men as well as labor should be represented on Government commissions. He thought that Mr. O'Connor had no right to go on a "rambling commission," taking the position that at least two members of the board should sit at every hearing.

Mr.Trowern was heard to advantage in an address dealing with similar matters. Later, at the banquet in St. John, he said that the convention had been a distinct success and that the R. M. A. was merely on the threshold of its work. All retailers should join it as it had proved of such a benefit to those who belonged. "Get to know one another better," he said, "and help educate the people in the proper channels. The association needs support and must get it from all its members."

He and the secretary of the provincial organization, Miss Frances P. Alward, of St. John, who was re-elected, were warmly complimented upon their good work in the interests of the R. M. A.

A committee was appointed to inquire into the matter of a fire insurance department similar to that of the Saskatchewan branch.

A resolution was passed favoring Thanksgiving Day as a permanent day for the celebration of peace, and that it and Armistice Day be observed on Monday.

### Ask Dominion Board Literature

The question of educating the public to the importance of the retail merchant in any community was urged in a resolution asking the Dominion Board to supply to the branches literature in the nature of bulletins to be placed in the parcels of customers, explaining this matter.

### Parcel Post Methods Condemned

A condemnation of the parcels post system was voiced in another resolution passed, and also of the manner in which the Dominion Board of Commerce was conducting its enquiry into the cost of living. This resolution said the enquiry was not producing the results intended, and advocated that the board be placed under the direction of competent business men. A special committee was appointed to consider the matter of adding certain features to the credit reporting department with an idea of improving this end.

### The Banquet

Prior to the banquet in St. John the executive held a brief meeting at which, among other matters discussed, were the early closing act and its application to rural communities. This was left to the incoming legislation committee to deal with. The banquet proved a splendid success, being enjoyable, entertaining, and educative. F. W. Daniel presided, and made a neat address in which he said that never in Canadian history was there a time in which the R. M. A. was meeting such conditions as existed today. There had been a great inspiration to all who had attended the convention because of the spirit prevailing and the manner in which the sessions in Moncton had been conducted. He wished the newly elected president all success, and said he had been glad that the association had been able to come to St. John to close its meeting.

His Worship Mayor Hayes addressed the gathering, expressing his pleasure at being present, and extending a hearty welcome. R. B. Emerson, president of the Board of Trade, was also heard in an address of welcome, and promised the association any aid which the body he represented could give to its work.

### 57 Questions to Present to Legislature

In reply to the toast of the visitors, J. A. Banfield was heard in an able speech. He said that the R. M. A. was a body which would care for the trials and tribulations of retail merchants and lay them before the powers at Ottawa. There were fifty-seven subjects for settlement affecting the R. M. A. to be taken up at Ottawa. The question seemed to be whether the retailer was to be allowed to run his business or to be told by outsiders what he must do to run it. "Never mind your prices—we'll regulate them"—this was the cry being given to retailers in Canada, and their response should be: "Here are my keys; you run my business, but I'll hold you responsible."

### The Question of Sugar

Referring to the question of sugar, Mr. Banfield read a letter which he and Mr. Trowern had sent in protest, saying that the retail merchants thought they were not receiving proper consideration. The refiner was allowed 40 cents, the wholesaler five per cent., but the retailer was given one cent. Then came the Kavanaugh case, where a respectable retail dealer was prosecuted. "Someone had to be made the goat, and I suppose this firm was elected," said Mr. Banfield. Touching on the milk situation he said that despite the action

# Seasonable Window Suggestions

*Weddings are unusually numerous this fall and a window display like the above offers splendid suggestions for those who are looking for suitable and serviceable gifts. Some dealers in arranging their displays combine cut glass and silverware and the combination is a very attractive one and a good business producer.*

*Thousands of men will be off to the woods in the next few weeks and window displays picturing camps and showing the guns and supplies needed will bring in business. Displays of this kind are not hard to arrange and carry a real "pull" to the hunters.*

# Prosperous Towns Mean a Prosperous Canada

By E. M. Trowern, Secretary, Dominion Executive Council, The Retail Merchants' Association of Canada, Ottawa

THERE are very few people in Canada who have not heard the argument used, that in order to pay our national debt we must produce more goods, whether they are from the forest, the mine, the field or the sea, The object is to exchange these goods for other goods that we require, but which we cannot produce. The more goods, therefore, that Canada can produce the richer she becomes, and the richer that she becomes the better business place it is for those who live here. If the above argument is sound for Canada as a whole it should also be sound for any part of Canada.

### Makes for Progress

Competition among nations is the strongest incentive toward progress. The Canadian people are proud of Canada becuse of the ideals she has set up, and she is, therefore, proud of her flag and proud of her race. This is the incentive for higher development. To build up Canada we must do as all sane men would do in their own private business; they must build up their treasury, and so we must build up the Canadian Treasury. Hundreds of millions of dollars in the treasury of any foreign country are of no use to the Canadian Treasury unless we can get some of it by exchanging our products for it.

### Would Become Dormant

If the world was one great commonwealth and there was only one treasury, we would become dormant through want of competition, and we would beome lost through enormity. Competition is the mainspring that forces us on toward higher ideals. This is true in every position in life. The citizens of every city, if they are happy and contented, take a pride in their surroundings. They want their city to be the best in Canada, and they strive toward that end. This produces a healthy rivalry, and so it is with the towns and villages of Canada.

### Variety and Style

Follow the argument a little further, and competition among the citizens for better homes produces a variety and style that lends a charm to life, and which could not be found where every house was built after the same plan and of the same style of architecture. If legitimate competition, therefore, is an advantageous incentive among ntionsa, cities, towns, villages and individuals, it must be encouraged and not destroyed, providing it receives no special privileges and does not undertake to take advantage of its position.

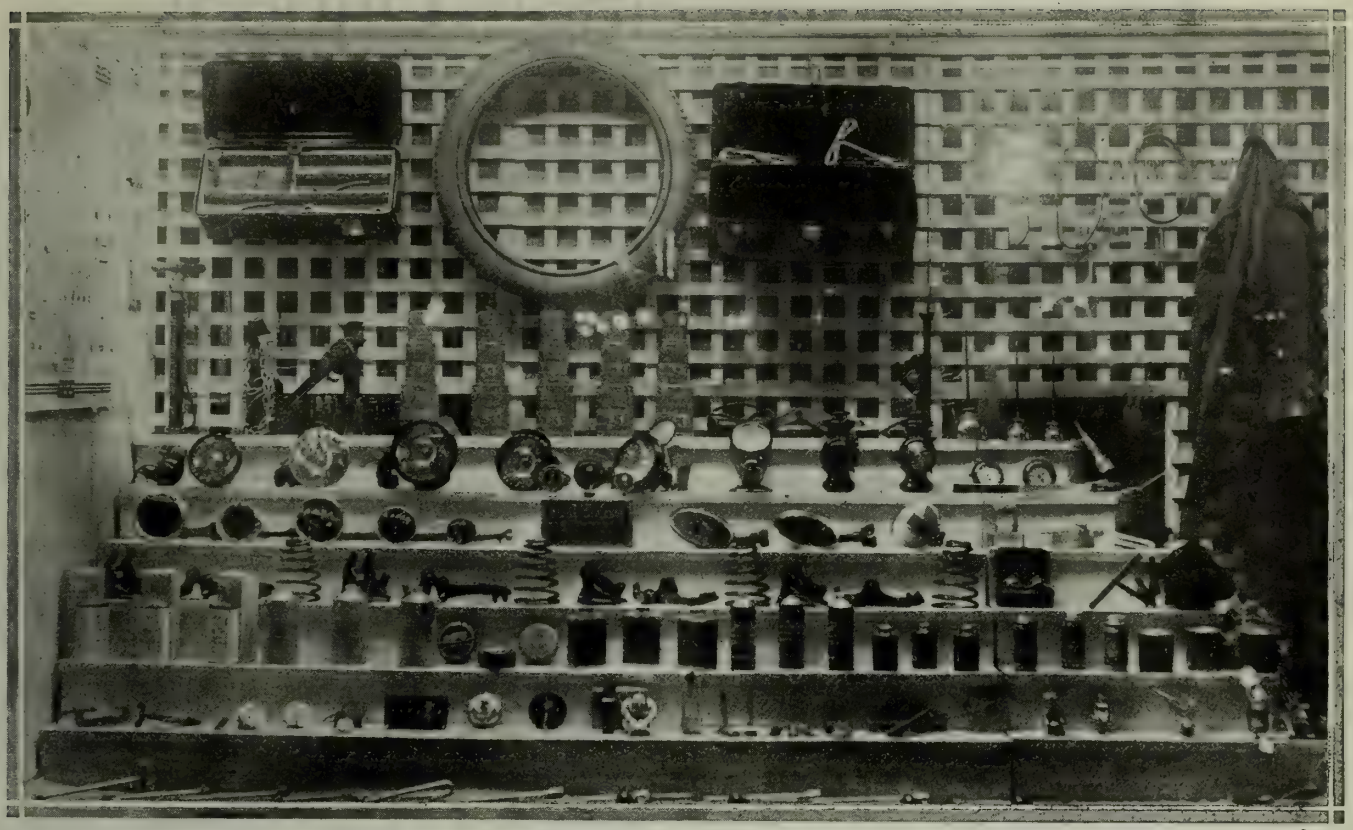
### Goes Hand in Hand

Wherever there is prosperity there is usually progress. Prosperity is not always represented in dollars and cents. If it were so and all the dollars and cents in Canada got into the hands of two people, no one could say that Canada's prosperity was impaired if the amount this year remained the same as last year, or was somewhat greater, but if this condition was produced we would begin to see evidences of lack of prosperity all around us.

### How About This?

In making a survey of all the towns and villages throughout Canada, can anyone say that they see great evidences of prosperity? Can they see more stores being built or new additions to old ones? Is there more paint used than formerly on the store fronts? Are the stocks doubling up or keeping pace with the population? Is there a general appearance of prosperity all around? Are there more and better pavements, better fire-fighting appliances,, more contented civic employees, better paid public school teachers, etc.? If not, why not? Could it be because of the lack of pride in the town or village? Is the money that is paid to the farmers or producers passing through the town or village and circulating so that all engaged therein can have an opportunity of being rewarded for their services, or is the money going direct to one or two large mail order houses hundreds of miles away, and starving the trade of the town?

### Reduce Its Power



Take the actual trade and business out of a town and you reduce its power to pay taxes. Taxes can only be paid by those who have money to pay them. Mendicants and beggars never pay taxes. Every retail merchant who has a store in a town should make it a rigid rule to buy all the things he requires from his fellow retail merchants in the town. If the goods you want are not in stock, leave your order and encourage your fellow retail merchant to stock them. If retail merchants themselves patronize and encourage mail order catalogue houses, how can they complain if others do the same thing?

### Keep It At Home

If you want your town to thrive you must keep your money in local circulation. You must constitute yourself a town booster. Canada's continued prosperity depends upon her live, up-to-date towns. It is far better to have eight million happy and contented people in Canada, all having enough work to keep them busy and sufficient salaries to enable them to lay something away for a rainy day, than it is to have thousands out of employment, thousands receiving starvation wages, thousands in the poor houses, and a few living in luxury and abundance. The more active, energetic towns that we have the more equitable will be the distribution of wealth.

### Vital To Our Future

Canada's future depends upon the prosperity of her towns and villages. If the towns and villages of Canada decline, Canada will also decline. If you want your town to die, take your money out of circulation and send it away to a mail order house. If you want a thriving, up-to-date place where the people love to congregate, be a town booster; take an interest in the stores in your town; encourage those who keep clean, comfortable hotels, where commercial travellers can stay with comfort and obtain good meals. If you have a local paper, weekly or daily, subscribe to it, and if you are a merchant or a manufacturer advertise in it and see that the proprietor keeps everlastingly boosting your town. If it is worth living in it is worth boosting; if it is not worth living in we would advise you to move out as quickly as possible and give place to better men.

*The shelf or step plan of displaying goods often enables a merchant to show a big variety of small articles to advantage. Note how the background helps the above display. Don't forget price cards in arranging your window displays.*

# Farmer's First Buy is an Automobile

## That is Why Auto Manufacturers Are Unable to Keep Up With the Demands—Auto Accessory Business is Increasing in Proportion to the Output of Cars and May Break All Records This Season

A BANKER in discussing with HARDWARE & METAL the very rapid increase in automobile traffic in his district, made a statement of considerable interest to hardware merchants.

"I have noticed almost without exception," he said, "that just as soon as a farmer begins to get money in the bank, his first thought is to purchase an automobile. His second idea is to improve his home by putting in labor-saving equipment, bathroom equipment and painting things up generally."

Both of these tendencies on the part of the farmers of Canada mean opportunities of the finest kind for hardware merchants.

### Over 1,000,000 Short

The first statement is amply borne out by the statements of the automobile manufacturers who are more than a million cars behind. They simply cannot keep up with the business and the big percentage of this enormous trade is coming from the farmers.

The prices that farmers have been getting for everything they can bring to market or ship, have put thousands of them on Easy Street. As the banker said, the first thing they buy is an auto, and every new auto that is bought means the sale of auto accessories and supplies. While no figures are available at the present time, there is no doubt that the sales of auto accessories this year will show an enormous jump, and it is very satisfying to know that hardware merchants all over the Dominion are among the leading distributors of these lines. They report sales are expanding steadily and that their auto accessory departments are one of the best paying and nicest to handle in the whole store.

### What of the Future?

As far as automobile manufacturers are concerned, they see an enormous future for their business. The figures in regard to the sales of autos are rather interesting as showing the possibilities. There are something over 6,000,000 cars and trucks in the world. Of these, nearly 5,000,000 are in the United States. Canada's quota of automobiles has been increasing faster than any other country in proportion to population, the number of cars having doubled every two years. This year's figures are expected to show an even greater increase in spite of the fact that manufacturers have been greatly handicapped by not being able to produce anything like enough cars to meet the orders that keep pouring in.

Another significant feature of the business is the tremendous growth in what may be termed the better class cars. People are demanding each year something better and more finished. This opens up unlimited possibilities for the merchant who can supply them with the great number of devices that make cars better.

# The Transportation Outlook

## Warning Issued to Business Men by the Canadian Railway War Board Owing to the Acute Shortage of Cars—Three Tons Have Fallen from the Average Load of Canadian Cars.

THE Canadian Railway War Board has just issued the following bulletin to merchants and manufacturers all over Canada, outlining the position that has resulted from car shortage and showing how the situation can be relieved:

Three tons have fallen from the average load of the Canadian freight car. Instead of carrying 27.4 tons, as in 1918, the average car is now carrying only 24.4 tons. This does not mean a decrease in the total volume of freight moving, but an increase in the number of cars required to handle a given tonnage; an increase in the amount of tare-weight (weight of cars less freight) to be handled in each train; an increase in the number of engines required, the crews on duty, the coal consumption and the track-room occupied. The reserve margin of cars and engines is thus diminished and an unfavorable situation created alike for the railways and the shippers. To the latter, it may therefore be of interest to consider the following review of the transportation situation and the prospect for the approaching winter.

### Had a Big Task

The cessation of hostilities in Europe with its profound effect upon industry on the North American continent, as elsewhere, has had corresponding influence upon the traffic movements and railway problems. The task of moving munitions of war eastward was quickly replaced by the task of moving returning soldiers westward. Following a lull in all domestic freight movement, new currents of traffic set in tending to approximate, in some degree, the old movements prior to the war. On the whole, however, up to the first of July last, the transportation situation became easy. Cars were plentiful. The necessity for loading them to full capacity became less apparent, and, in spite of warnings from this Board, the average load dwindled seriously, as noted at the beginning of this article.

### Not So Satisfactory

Conditions now, however, are not so satisfactory. In March and April, the usual movement of box-cars to the wheat-growing areas commenced in both the United States and Canada.

In the United States, where strikes in car repair departments were added to the natural disadvantages of the "car pooling" arrangement, and where cars are, on the average, older than in Canada, the superior condition of Canadian box-cars for carrying grain, led many of these cars into the American West where the wheat movement begins in July, two months before the Canadian movement is under way. The balance of cars owing by the United States to Canada was thus increased materially, so that to-day there are approximately 43,000 Canadian box-cars in the United States as against 19,000 American box-cars in Canada; a net balance of 24,000 cars due Canada and unlikely for some time to be available to this country. This figure, it should be observed, is equal to over 16 per cent. of the total Canadian box-car supply.

### Serious Additions

While this loss of cars to the United States has been checked and will ultimately be rectified by the return of the Canadian cars, serious additions to the volume of traffic to be handled by the Canadian roads are imminent. The shipment of coal from the Western Canadian mines since the beginning of the fuel year, on April 1st is, to date, only one-third of the amount forwarded in the same period last year. Movement by rail is correspondingly delayed and cars will be detained in the West accordingly. More serious still is the prospect that American ports will be closed this winter to Canadian exports. Sixty per cent. of Canada's export grain usually passes out by American ports. This will remain to be handled across Canada to Montreal, St. John and Halifax in Canadian box-car—adding one hundred and fifty per cent. to the volume of export grain now taken care of through the ports of the Dominion, and adding much more than 150 per cent in terms of car-mileage.

**YOU CAN HELP IN PROTECTING YOUR FUTURE DELIVERIES BY**

**1**

**Prompt unloading of cars and notice thereof to the carrier.**

**2**

**Ordering goods in quantities representing the full safe carrying capacity of cars and disregarding trade units.**

**3**

**Ordering from the nearest available source.**

**4**

**Pooling orders so as to secure full carload.**

### Not One Third

The seven thousand new freight cars built since last year are not one-third of the number now detained in the United States. The additional requirements for coal carrying and for the wheat trade—if the proposed American action is taken—will be extremely serious. At this time of year, too, comes a heavy movement of perishable farm produce, moving before the cold weather will necessitate using special cars. Yet, in the face of these factors—the average load per car in Canada has fallen three tons!

### What It Means

The very serious attention of all Canadian shippers is called to this fact. It means that where eight cars were formerly required, nine are now necessary! Where 160 tons of tare-weight were thrown upon an engine for every 216 tons of freight, there are now 180 tons! Labor scarcity, once the excuse for the light loading, is no longer a fact. It is important in the interests of the country, that the heavier loading practices be restored. Railway efficiency is part of your factory, mine, mill or warehouse efficiency!

## HERE'S A CHANCE FOR BUSINESS

Unprecedented demands for furs continue to feature the New York fur markets and this situation means a bigger market than ever during the coming winter for trappers' supplies of all kinds. The report of this week's market at New York says:

"Br'er Rabbit vied with silver fox for first honors at the fur auction here yesterday. While the latter was easily the winner when it came to the prices paid, Br'er Rabbit turned the tables in regard to the advances shown over the corresponding prices obtained at the spring sale here. Due to the large extent to which furriers are using this fur this season as a substitute for Hudson seal—dyed muskrat—which is not only very scarce, but very high these days, rabbit of this type went up 80 per cent. The kinds of rabbits used by the hatters also moved up sharply, the average advance in this case being 40 per cent. Silver fox, the best of which brought $585, advanced 25 per cent. over April. The amount realized for the day was $750,000, and the grand total now stands at $4,350,000.

## GOVERNMENT DEALS DIRECT

VANCOUVER.—A number of retail hardware merchants from various parts of the Lower Mainland and Vancouver Island held a meeting to discuss matters of importance to their trade. Among other matters discussed was the Government's refusal to deal with the retailer in securing supplies for soldier housing buildings. The Government insists upon diect dealing with the manufacturer, a proceeding which many of the retail merchants regard as discrimination.

# Sheets and Bars at a Premium as Result of Strike

## Uncertainty Regarding Deliveries is Big Factor in the Situation —More Tubes Coming Through—American Mills May Bar All Alien Labor

WHILE there have been no important developments in the steel strike as far as the company and the men who are out are concerned the effects on the market continue to be very noticeable. Many lines, especially sheets and bars, are at a premium, and the tendency is towards a constantly ascending price. No one has any great stocks on hand, and there are any number of buyers who want the goods.

### The Matter of Delivery

Delivery, as in war days, is coming once more to be one of the great considerations in the trade. Many firms are now talking about not getting in very much material before December and January.

Black sheets, galvanized sheets, etc., are almost off as far as delivery is concerned. Were this condition to last for any length of time it would hurt stove concerns and kindred lines. Stocks in the country at the present time appear to be low—abnormally so in many cases, so there is very little in the way of reserve from which to draw.

### May be Improvement

There may have been some shipments of tubes through during the week, but if so they were small and not frequent. It is believed now, though, that shipments will be better. Some shipments of skelp for Canadian pipe mills have come across the border in the last few days, and this is looked upon as a hopeful and significant development.

### Had Many Queries

One warehouse got word a day or so ago that a car of sheets had come over the border to its address, and the firm has been deluged with queries for a part of this stock. It happens to be special automobile stock and much in demand. Prices remain firm. There seems to be no tendency to take advantage of the strike situation to boost the selling prices here, although there are always some cases coming up where a fair premium has been paid for some much-wanted stock.

### Plan Big Development

The American steel companies are beginning to map out their construction programmes for the next twelve months. The United States Steel Corporation may appropriate something like $75,000,000 to $100,000,000 for new construction and acquisitions next year, and the independents will also make liberal appropriations.

While no official statements have been given out as to the districts where this money will be spent, it is safe to assume that there will be a shift to the districts that have been loyal to the steel companies. Districts entirely tied up by the strike will be avoided. It is not unlikely that considerable work will be done at Windsor, Ont.

### Nearly All Back

At the Carnegie Steel Company's works at Youngstown 98 per cent. of the American workmen are reported for work and announced having presented a petition to the authorities of Youngstown, demanding protection in going to and from work and while in their homes.

A large number of the steel companies with forces now fully reorganized have issued notices to all men still out that if they apply for work in the future it will be as new men only. The vast bulk of these absent ones are foreign workmen.

### Want No Aliens

In the Allegheny Valley, and notably in the extensive works of the Allegheny Steel Company, alien labor will no longer be employed. This has been fully announced through posters, and only citizens of the United States or men who have taken out their first papers will be given employment in the future. This action is now being seriously considered by other districts that have suffered from the recent onslaughts of alien radicals who are mainly of the Russian and Russo-Slav races.

## ALIENS MUST HAVE PERMIT TO CARRY FIREARMS

Of interest to hardware merchants is an amendment to the Criminal Code, providing that no alien shall have in his possession any firearms or offensive weapon without having a permit.

S. W. Jacobs strongly opposed the bill. Why, he asked, should aliens be thus discriminated against? Was not a pistol as dangerous in the hands of a British subject as of an alien? There should be one law applicable to British and aliens alike. J. A. Maharg and Mr. Pedlow also opposed the amendment.

Hon. C. J. Doherty replied that the bill was designed to make aliens show their good faith by being willing to apply for a permit if they desired to carry firearms. The criminal records of the country would, he thought, show that a large majority of crimes of violence had been committed by newly-arrived aliens.

An amendment, moved by Mr. Jacobs, the effect of which was to place all citizens on the same plane with the alien as far as carrying weapons was concerned, was lost on division by a vote of 34 for; against, 65.

The bill was reported and carried.

## Credit Men Fight Discount Violators

The National Association of Credit Men has appealed to its 29,000 members in the United States for the enforcement on buyers of a strict observance of cash discount terms.

In a bulletin the association directs attention to the fact that no negligible part of the high prices to-day is directly traceable to the unnecessary burden of distribution expense, which the failure of a general observance of the discount terms has forced.

Failure to enforce the discount terms, it is argued, has fostered an aggressively independent attitude on the part of many buyers, who then carry their demands on the manufacturer to the point of special allowances which are not only unfair to him, but unfair to those merchants who do live up to the discount terms. In the last analysis the loss to the manufacturer must be made up through his aggregate receipts, and in his fixing of prices the innocent as well as guilty have to bear this burden.

"We say fearlessly to the seller and the buyer," the association announces, "that they are helping to maintain high prices, are imposing unnecessary burdens on business, are encouraging laxity and a lower level of character in business whenever a cash premium is demanded and allowed after the expiration of the time in which it properly should have been taken.

"No one, no matter how big or how prominent he may be, can escape the charge of an unwise and immoral transaction, whenever in the buying and selling of commodities he demands or permits the taking of a premium in the payment of an account when the premium has not been earned."

## SEES BIG MARKET FOR CANADIAN ZINC

Cables from London, England, state that important developments are foreshadowed in the Consolidated Mining & Smelting Company at Trail, B.C., in the statement made by its president, J. J. Warren, who is negotiating the sale of the company's zinc output here. Mr. Warren says the market possibilities for the company's product in Europe, South Africa and India are unlimited as regards the disposal of zinc and allied metals. He adds that his doubts regarding the possibility of expanding the industry have been entirely transformed to optimism since his arrival in England two weeks ago. Canada can supply 10 per cent. of the world's demand, equal to 780,000 tons of zinc, and is only producing 25,000 tons. The impression he has gained is that the condition of the market warrants expansion to supply these 780,000 tons. Mr. Warren foresees no difficulty in arranging for increasing smelting facilities.

# EDITORIAL COMMENT

## *EDITORIAL BRIEFS*

THOUSANDS of people these days are so busy that they have no literature but the press. Among these people are many who do the buying for the home. Is your advertising message reaching them?

---

THE latest question in the labor world seems to be: "When is a strike not a strike, but a vacation?"

---

YOU can't sell goods to a man who is broke. The fact that merchants cannot get enough goods to meet demands shows how prosperous Canada is.

---

DON'T forget to get out and vote next Monday. It doesn't matter how you vote, as long as you exercise your franchise. Election returns for some time past have been showing that too many people are staying at home and neglecting the interest they have in the community.

---

JUDGE GARY asserts and John Fitzpatrick admits that the steel workers are among the very highest paid laborers in the world.

---

THRIFT is the foundation of success in business, of contentment in the home and of standing in society.

---

## *BOLSHEVISM MUST DIE*

WHEN Bolshevism was at its height in Russia one of the leaders of the movement made the statement that "Bolshevism must advance or it must die." There is little doubt about the fact that Bolshevism is dying. It is dying because there are fortunately enough right-thinking people in the world to see the menace that the "Red" movement is to real progress and civilization. A year ago it might be said that Bolshevism was advancing. It was spreading around the world at a speed that was little short of marvellous. Developments in that time have opened the eyes of millions of people and none were quicker to perceive the demoralization that would follow than the business men in every community. They fought it with all the energy at their disposal and they have temporarily, te least, won out. Bolshevism is not dead yet, not even in Canada, but its powers to work harm are constantly growing weaker and the Russian leader probably spoke with far greater truth than he ever realized at the time when he said it would die if it did not advance.

## *CANADA REQUIRES WORKING CAPITAL*

CANADA is to-day in much the same position as a big business house with a rapidly growing trade.

She is making money, but the continued success of her business depends entirely upon her ability to procure working capital so that she may be able to fill her orders and provide for expansion. If she does not procure it she will lose her trade.

And Canadians are all partners in this business. Upon the success of the firm depends their individual success. Canada must have money for her industrial and financial development. Her commerce and her industries need more capital in order to expand. If the necessary capital is forthcoming all classes of Canadian people will benefit—the farmer, the manufacturer, the artisan, the lumberman, the miner, the fisherman and the merchant.

Canada will only be able to expand and develop if the Victory Loan 1919 is a success. Upon its success depends the continued prosperity of the whole country.

---

## *EXERCISE YOUR FRANCHISE*

A BIG issue will be decided by the people of Ontario on Monday. It is one in which the business men not only of Ontario but of the whole Dominion are keenly interested. They are watching with a little more than particular interest to see what is going to happen and what Ontario does may have a vital effect on what other provinces do later. This is not written with the intention of telling any man how he shall vote. That is his own business, but the main thing is for him to vote. Because those who have the franchise do not exercise it, the municipal affairs of more than one Canadian city and town are in the hands of men who could get into office in no other way than through the indifference of the voters. They were, in most cases, too lazy to go to the polls. It is no use howling after the damage is done. There are those who claim that a man who has a vote and does not use it should be disfranchised, and the things that happen through people not voting indicate that there may be some truth in the view.

### *THE BIG, BUSY HARDWARE*

AT least twenty hardware firms in Canada at the present time are ending their regular advertiseing matter with the phrase, "The Big, Busy Hardware." It is good business at that. People like to be doing their buying at a store that is big and busy. There is something about the idea of shopping in a store that is big and busy that involuntarily suggests service and a large and fresh stock to select from. It also calls to mind a more or less remote but at the same time effective way of fair dealing. The prospective buyer gets it into the back of his head that the store would not have grown big and busy if it did not use people right. A reputation of this kind is one of the very best advertisements that any firm can have. The merchant who uses it, however, should not forget for one moment that it entails responsibility upon him. It means that people expect a lot from his store and that many of them are going to come miles, perhaps, in order to see and very likely buy the things they have read about at "The Big, Busy Hardware Store." If they find the service is not what they expected, or the stock is not what was represented, they will not be slow to tell their friends about it. On the other hand, if they find that the store is a store in the real sense of the word they will never tire of telling their friends about the things to be obtained and the good service they get at "The Big, Busy Hardware."

### *STILL GOING STRONG*

ON another page of this issue of HARDWARE AND METAL will be found the statement of a banker who, in discussing the rapid growth of the automobile business in his district, said that the very first thing a farmer thinks about when he begins to find his money accumulating is the purchase of an auto. The second thing he does with his money, according to this man, is to make his home better by installing labor-saving devices, better sanitary equipment, and by painting it. There is a good deal of truth in this man's observations, and each phase of the process along which the farmer's spending develops is of especial interest to the hardware merchant. There is no gainsaying the fact that it is the farmers who to-day are making it impossible for the automobile manufacturers to turn out cars fast enough. Some firms are as much as eleven months behind with deliveries, and still the orders pour in. When the hardware man stops to consider for a moment that every man who buys a car is going to buy accessories and supplies it may readily be seen what an enormous business is being built up in accessories. The hardwaremen of Canada have been quick to see the opportunities that offered and to-day many of them are making handsome profits out of their motor accessory departments and find the business steadily growing. There is every indication that the business will expand indefinitely because the auto has proved its value and sooner or later every person of at least a reasonable income will possess one. In the farming districts some farmers have two, and even three, cars and trucks. Each season finds many of them buying new cars and this also means more money to be laid out in accessories and supplies. Added to this business is the tractor accessory business. This is now merely in its infancy, but it is a lusty infant and eventually will equal if it does not surpass the accessory trade. One can be handled with the other. The tractor accessory trade is well worth watching and the merchant who gets in on it at the start will have considerable advantage over the man who waits until every farmer in his territory owns a tractor.

### *DEMANDING BETTER GOODS*

PROSPERITY loosens the purse strings. For some time past merchants not only in Canada but in many other countries have been finding that it was not a question of selling goods but of getting goods to sell. Business was so good and production conditions were so altered that they could not get supplies. No class of merchants have found it harder to obtain the goods they needed than the hardware merchants. The condition exists to-day and the situation in many lines is just as acute as it was during the war period when all kinds of restrictions were imposed with a view of getting people to curtail their buying. To-day people have more money to spend than ever before and they are spending it. They have learned something though in the past five years, and that is that cheap articles are dear at any price. The fact that people have realized this is making for better business. Hardware merchants state that it is easier now than ever before to sell really high class products. It is not a question of price with most customers, but of getting something that is good and that is going to be worth the price they pay. Many merchants believe that the lesson people have learned will, to a very large extent, become permanent, and that from now on the great buying public will continue to demand better goods.

# EVENTS IN THE TRADE

## Business Changes

Paisley, Ont.—Clarence and Sterling Fraser have purchased the hardware business of A. A. Sinclair.

Toronto. — The Monarch Hardware Co. is succeeded by the Burns Hardware Co., Ltd.

Uxbridge, Ont.—The Uxbridge Hardware Co. has purchased the business of the Jones Hardware Co., Ltd.

## New Firms

Frenette & Germain, plumbers, have been registered at Three Rivers, Que., by A. Frenette and Donat Germain.

The Canadian Mitt and Glove Co. has been registered at Montreal by Lionel and Mare Aurel.

The Maydwell Mfg. Co., of Toronto, manufacturers of springs and mouldings, has been dissolved.

G. N. Decarie, hardware, has been registered at Montreal.

Harold Osborne, formerly employed in the Buchanan and Tait hardware at Galt, Ont., has started in the hardware business for himself in the Osborne block.

## Obituary

The death occurred at Hamilton, Ont., of James Thompson, president of the Gartshore, Thompson Pipe and Foundry Co., Ltd.

J. A. Steacy, hardware merchant at Seeley's Bay, Ont., and reeve of the Township of Leeds and Lansdowne, died very suddenly at his home on Tuesday evening following an illness of only a week. He was married only four weeks ago. Besides his bride he is survived by three children by a previous marriage.

The death occurred very suddenly from an attack of heart failure of Reeve W. H. Manning of Coldwater, Ont. While his health had not been good all summer his death came as a great shock as he was at his hardware store as usual the day before. Mr. Manning had planned to leave for the South shortly and spend the winter there. He was one of Coldwater's first citizens, full of enterprise and always having the interest of the community at heart. Largely through his instrumentality the waterworks system was installed, and he also put through the project of municipal telephones. He was about sixty years of age and had been in business in Coldwater since he was a young man. He leaves his wife, two daughters and two sons, one of whom has just returned from overseas.

## Personals

Z. A. Hall, of the Hall, Zryd Foundry Co., Ltd., Hespeler, Ont., was selected by the Conservatives of South Waterloo as their candidate in the coming election.

## Trade Notes

F. P. Turner succeeds A. D. Cross in the hardware of that name at Port Colborne, Ont.

Jodoin & Paquette, Montreal, manufacturers of patent sewer pipe traps, have dissolved partnership.

The Domestic Specialty Co., Hamilton, Ont., manufacturers of polishes, etc., has changed its name to Canadian Polishes, Limited.

The Hamilton Lamp Co., capitalized at $300,000, has been formed at Hamilton, Ont., and plans to manufacture Tungsten lamps. George F. Webb is president.

The Percival Plow and Stove Company, of Merrickville, has secured land on which it plans to erect an addition to its plant.

Beatty Bros., Ltd, of Fergus, Ont., are negotiating with the council at Regina, Sask., in reference to establishing a branch warehouse there.

Reports from Halifax state that Pilkington Bros., Limited, glass manufacturers, whose Canadian headquarters is at Thorold, Ont., plan to erect a distributing station at Halifax.

The John Palmer Company, Limited, of Fredericton, N.B., manufacturers of cream separators, plans to start work shortly on an addition to its plant to cost $35,000.

"1900" Washer Sales Co has opened a Winnipeg branch in the Board of Trade Building with Mr. Mitchell in charge. For the present, this office is dealing only with the company's business for the city of Winnipeg.

The Acme Roofing Company of Walkerville, Ont., has sold its factory and it is the firm's intention to erect a large new plant and instal the latest equipment. The location of the new plant has not yet been made public.

## Montreal News

J. W. Richardson and J. R. Terrill, of the Caverhill-Learmont staff, are visitors this week to the Atlantic City National Hardware Association convention.

W. G. Helliar, representative of Brandram-Henderson, Ltd., at Halifax, was in Montreal this week.

Colonel Robert Starke, of Starke-Seybold, Ltd., Montreal, and Herb. P. Seybold, are this week in attendance at the U. S. Hardware Convention, at Atlantic City.

S. W. Smith, of Toronto, manager for Brandram-Henderson, Ltd., is this week attending a conference at the head office in Montreal.

## News From the West

F. B. Stott, A. T. Redmond, F. J. O'Neil and R. G. Consterdine of Wood, Vallance, Ltd., sales staff, were in Winnipeg over the Thanksgiving holiday.

Wood Vallance, Limited, Winnipeg, have been appointed distributors in Western Canada for Maltese Cross Tires and tubes. Representatives are booking orders for spring delivery.

D. A. (Don) Ferguson, manager of the Auto Accessory Department of Wood, Vallance, Limited, Winnipeg, is away on his annual shooting expedition.

R. E. Jamieson, director of the Canadian Consolidated Rubber Company, was in Winnipeg recently conferring with Winnipeg representatives. Mr. Jamieson gave it as his opinion that business conditions are better in Canada than in any other country in the world. He stated that in all parts of Canada merchants were taking their cash discounts and doing business in a better way.

Messrs. Lynch, Parker and Plews, recently connected with the wholesale hardware trade in Winnipeg, have formed a company with head office in Regina, Sask., to engage in the wholesale hardware business. Prior to his recent connection with Merrick-Anderson Co. J. M. Lynch was engaged with Miller Morse Hardware Co. of Winnipeg, and also with Lewis Bros. of Montreal. J. Par-O'Neill and R. G. Consterdine of Wood, Hardware, retail, of Regina. R. Plews was formerly engaged in office work in the Winnipeg wholesale trade.

### SECRETARY O.R.H. SENDS OUT NEW LISTS

Secretary MacPherson, of the Ontario Retail Hardware Association, has sent out to members of the association new net cost sheets on malleable pipe fittings. Lists from the Exchange and Sale Bureau have also been sent out to members.

### IN CONFERENCE THIS WEEK

Brandram-Henderson, Ltd., Montreal, held a conference this week of the Ontario and Central division, and representatives were in attendance from outside points.

## Incorporations

Lalley Farm Lighting Co., Limited, head office Winnipeg, capital $25,000, plans to manufacture and deal in lighting plants.

Lighting Devices, Limited, head office Winnipeg, capital $20,000, plans to manufacture and deal in oil, gasoline and coal oil heating, lighting and burning devices.

Foote's, Limited, capital $40,000, head office Winnipeg, plans to carry on a general hardware business and also deal in paints, sporting goods and glassware.

The Adelaide Oil Company, Limited, capital $40,000, head office Kerwood, Ont., plans to deal in petroleum and its products.

The Pierce Fuse Corporation of Canada, Limited, head office Bridgeburg, Ont., capital $250,000, plans to manufacture and deal in electrical equipment and supplies.

St. Thomas Cabinets, Limited, capital $100,000, head office St. Thomas, Ont., plans to manufacture and deal in cabinets, woodenware, ironware and furniture.

"No Knocks Gas Savers," Limited, capital $50,000, head office Toronto, plans to manufacture and deal in automobile accessories and to purchase as a going concern the No Knocks Carbon Destroyer Company.

The Automobile Exchange of Canada, Limited, capital $100,000, head office Montreal, plans to deal in autos, auto accessories, oils, gasoline, etc.

Pacific Metals Transportation Company, capital $100,000, head office Montreal, plans to carry on a general business in metals, machinery and power equipment.

The Rideau Iron and Metal Co., Limited, head office Ottawa, capital $25.000, plans to manufacture and deal in iron and metal goods.

General Iron and Metal Company, Limited, capital $19,000, head office Montreal, plans to manufacture, refine and smelt babbitt, solder, brass, lead, zinc, etc.

Dominion Oil Cloth and Linoleum Company, Limited, head office Montreal, capital $5.000,000, plans to manufacture and deal in oil cloths and linoleums.

Canada Brass Products, Limited, head office Montreal, capital $50,000, plans to manufacture and deal in electric light fixtures and brass goods generally.

Canadian Consolidated Corporation, Limited, head office Toronto, capital $110.000, plans to manufacture and deal in electric lamps and iron, steel, brass and metal goods.

Gravity Stoker Furnace Company, Limited, head office Winnipeg, capital $250,000, plans to carry on a general business as iron and brass founders and manufacture heating equipment and plumbing supplies.

Associated British Industries (of Canada) Limited, head office Montreal, capital $100,000, plans to import, manufacture and deal in pedal cycles, motors, sporting goods, cutlery, ropes and twines, paints and varnishes, saddlery and leather goods and general hardware goods.

The Salem Oil and Grease Company of Canada, Limited, head office Farnham, Quebec, capital $45,000, plans to manufacture and deal in oils, grease and lubricants generally.

Canadian Steel Tire and Wheel Company, Limited, head office Montreal, capital $100,000, plans to manufacture and deal in steel tires and springs.

---

### VANCOUVER RETAILERS HOLD FIRST ANNUAL MEETING

R. M. Millar was elected president of the Vancouver branch of the Retail Merchants' Association of Canada at the first annual meeting and banquet of the body held in Spencer's restaurant last evening. Other election results were: First vice-president, J. Harkness; second vice-president, C. Clarke; secretary, J. T. Crowder; treasurer, W. Gilchrist. The names were read off by a member of the nomination committee and accepted as they stood, the officers being declared elected by acclamation.

An interesting insight into the business methods of retailers in Australia was given local retail men by W. A. Blake of Melbourne. Mr. Blake, after having spent some months in travelling in various parts of the British Empire, has had various connections with the retail trade in its various lines during the past twenty years. With a large stock of experience to draw from, he was able to talk of many interesting phases of retail merchandising in Australia, and the audience received a number of good ideas from his address.

#### Need of Unity Between Wholesaler and Retailers

N. G. Neill of the Employers' Association, spoke on the subject of practical unity. He said that closer unity was needed if the Retailers' Association was to be a success and congratulated the members present in having taken such steps as they had toward organization. Among a number of suggestions for the benefit of the retail trade made by Mr. Neill, was that of the formation of a board consisting of wholesalers and retailers. This board, taking one commodity at a time, should endeavor to reduce the price of it to the consumer by following it from production to sale and cutting out all unnecessary expenses.

#### Needs of the Association

G. S. Hougham, provincial organizer of the Retail Merchants' Association, spoke briefly on the needs of the local branch. Vancouver had been one of the hardest cities in the province to organize and it was not yet near what it should be, he said. At present there were 178 members in the association, but 500 were needed if it was to "carry on" successfully. To support a staff adequately, he said, would cost about $325 a day. With 178 members in the association, he "left it to the members to judge what their responsibilities would be if they did not get to work and enlist new members." He declared that the association was essential and that its possibilities were unbounded.

T. J. Corley spoke briefly on the organization of the association throughout Canada. A vote of thanks to the retiring executive for its efforts in organizing the association was passed and a resolution promising the new officers the support of each member was passed with applause. A solo by Mr. Morris, "Asleep in the Deep," was greatly appreciated. Mr. Geo. H. McRobbie, the retiring president, presided.

---

# Swiss Trade Mission Impressed With Prospects for Business

THE members of the Swiss Trade Mission which visited Montreal on Tuesday and Wednesday of this week, were apparently pleased with what they saw and learned on this tour of information-gathering which they have engaged in. In fact the chairman of the Mission, Dr. Wegman, expresed regret at having to sail so soon, realizing that there was much to interest him and his party here.

#### Groups Were Divided

As originally made up, the Mission was comprised of 220 members, and this was divided into various groups to enable the members to make a study of various trade possibilities and to concentrate on different classes of trade in the United States and Canada. The section which visited Montreal was a large and really the most important of the groups and visits were made to various manufacturing plants, business houses, stores, banks, etc.

Among other things, the party was much impressed with the possibilities of Canadian institutions. Particularly were they impressed with the great natural resources of Canada, and it was stated that all the reading matter bearing on Canada and her place as a big nation, her natural resources, etc., did not begin to adequately convey the importance of this country.

#### To Use Canadian Products

While there are many products which can be sold to the Swiss people, it was pointed out that certain raw materials produced in Canada would find a market in the little country in the mountains, and certain types of machinery will also be in demand. It is felt that a visit of such men as were here will help materially to develop a better understanding and a more active trading condition in the future.

# New Express Packing Rules Will Affect Shipments From the States

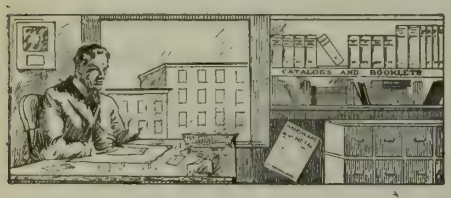
## Aim is to Safeguard Merchandise in Transit and Also to Facilitate the Handling of Shipments

ACCORDING to official notification being sent out by the American Railway Express new packing rules will be put into effect on December 10. This will, of course, affect all parcels and other goods sent into Canada for hardware merchants and others. As far as the Canadian rules are concerned there will, it is stated at express offices, be no change as the new American ruling is an adaptation of the system put into effect in Canada some months ago. The American Railway Express in its statement says:

This is regarded by express traffic officials as one of the most effective steps taken to safeguard merchandise in transit by express since the unification of the various lines into the American Railway Express Company, which is agent of the Government in handling the express business of the entire country.

The new rules were put into effect to induce shippers to turn their business over to the carrier so that it can, with reasonable care on the part of the express company, be handled properly. The rules will not permit the use of paper wrapping for packages over 25 pounds, nor of ordinary paper boxes, wrapped or unwrapped, when the weight of the contents is over that limit. For shipments over 25 pounds, wooden containers, or fibreboard, pulpwood or corrugated strawboard containers of specified test strengths are required.

This standardization of express rules will place the express service on the same basis as freight, so far as the character of the cartons used is concerned.



### BROOM CORN

Lewis W. Simms, president of T. S. Simms & Co., has returned from his annual buying trip to Oklahoma. Discussing the situation in regard to broom corn he pointed out that though broom corn is selling at $350 a ton, which is about $150 less than last year, it is a higher price than has been paid in any other year in the history of the industry.

Higher prices are being paid for cotton, also, which is a good crop this year. The labor question is easier this year and there are plenty to do the work, though, as everywhere else, high wages are being paid.

"Strikes, especially the present steel strike, are not in favor with the native American at the present time," said Mr. Simms.

"The men from the steel works who incite the strike were mostly of foreign birth, and the real Americans, where they did join the ranks of strikers, did so with reluctance. The general feeling among the thinking people to the south of us is that now is the time to build up the country and prepare for expansion, not to tear down the splendid structure that has already been reared."

### The Glidden Company

The Glidden Company of Cleveland, Ohio, Canadian branch, Toronto, has issued an eighteen page booklet, entitled: "Newspaper Electros and Movie Slides for the Dealer." It contains numerous illustrations of the matter furnished Glidden dealers. Readers of HARDWARE AND METAL who desire copies may obtain them on request.

### Gurney Foundry Co., Limited

"The Gurney Link," formerly "The Bulletin," the house organ of the Gurney Foundry Co., Limited, Toronto, is now being published every two weeks. The last issue contains eight pages 8½ x 11 inches, and is very attractively printed. Readers of HARDWARE AND METAL may obtain copies upon request.

### Belleville Hardware & Lock Mfg. Company Catalogue

The Belleville Hardware and Lock Co., Limited, Belleville, Canada, have issued catalogue No. 4, an attractively illustrated, 330 page catalogue featuring locks and builders' hardware. A wide range of locks and general builders' hardware is featured in this catalogue.

### Taylor-Forbes Company, Limited, Catalogue No. 865

Taylor-Forbes Company, Limited, Guelph, Canada, have issued an attractive catalogue, No. 865, featuring lawn mowers and spring gods. Illustrations of various lawn mowers are shown in colors and the accompanying descriptive matter will prove of real practical value to the hardware merchant. The catalogue also features lawn trimmers, sprinklers, rollers, motor-driven mowers, horse-drawn mowers, screen door hinges and sets, tree pruners, posthole augers, sap spouts, etc. List of parts for the Taylor-Forbes lawn mowers with list prices are also an important feature of the catalogue. Copies will be mailed to readers of HARDWARE AND METAL upon request.

**J. M. Adam, St. Marys, Ont.**—Kindly advise us the address of the Rumsey Co., pump manufacturers?

The address of the Rumsey Co. is Seneca, New York, U.S.A.—Editor.

Query.—Would you kindly advise us regarding the manufacturer of Kewanee valves?

These are made by the Kewanee Boiler Co., Kewanee, Illinois, and the firm's Canadian representative is the Dominion Radiator Co., Toronto.—Editor.

### Smead, Dowd Repairs

**Sam J. Rendle, Paris, Ont.**—Will you please advise me as to headquarters of the Smead, Dowd Heating and Ventilating Co., formerly of Toronto, as I have two large furnaces to repair?

The American Foundry Company of Bloomington, Illinois, can supply repair parts, etc., for this line.—Editor.

### Hay Balers

J. Clark and Son, Limited, Sussex, N.B.—Can you give us name and address of Canadian firms manufacturing hay balers to work with lever or horse power?

Hay baler of this kind may be procured from International Harvester Company of Canada, Limited, Sherman Ave. N. and Burlington St., Hamilton, Ont.—Editor.

### FELLOW EMPLOYEES MAKE PRESENTATION TO FLOOR MANAGER

On the occasion of his silver wedding anniversary, the fellow-employees of James Walker, floor manager for the James Walker Hardware Co., Ltd., Montreal, presented him with a very fine silver centerpiece vase. Mr. Walker was not privileged to make reply in person as the "boys" delivered the silver to his home and thus, in a quiet manner, gave evidence of the esteem in which they held the floor manager.

Mr. Walker has been with the Walker Company for nearly nine years, having come direct to Montreal from England, and engaged with the firm shortly after his arrival here.

### APPOINTED QUEBEC REPRESENTATIVE

Alexander Gibb, 3 St. Nicholas Street, Montreal, has been appointed Quebec representative for Canada Tack and Nail Company, Limited.

### BINDER TWINE FROM FLAX

REGINA.—Fine samples of binder-twine and felt made from the fibre of Saskatchewan-grown flax have been received by the Provincial Department of Agriculture, from F. W. VanAllen, who has been conducting experiments begun in Regina and completed in Ottawa for the Federal Government.

# Gillette Co. Makes Important Changes

## M. J. Maguire Goes to Australia From Canadian Plant — Has Been General Revision of Forward Policy—Managing Director A. A. Bittues Sees Big Opportunities for Export Trade

IN conformity with the forward plans that characterize their sales policy, the Gillette Safety Razor Company of Canada, Ltd., Montreal, have recently sent into foreign fields already covered by them through specially-appointed representatives, salesmen who have been carefully and extensively trained to inaugurate a forward and aggressive policy in the various countries whither they have gone.

### Greater Efforts

It was not enough, said Mr. A. A. Bittues, managing director for Canada, to HARDWARE AND METAL, to have this former representation in foreign

*M. J. MAGUIRE*

*of the Gillette Safety Razor Company of Canada, Limited, who is going to Australia.*

fields. It had become essential, of late, to intensify the effort and to not only take the business that was offered and which came in a regular way; it was essential to so man these fields that the same would receive the careful attention of expert sales representatives who would be able, on the spot, to act quickly and effectively. And, continued Mr. Bittues, while this policy called for a big outlay the prospects were such as to justify the programme.

### Goes to Australia

M. J. Maguire, well known to the hardware trade in Canada—and particularly in Western Canada, where he represented the Gillette Company for nearly ten years, and who came in to the Montreal office toward the end of 1917 as sales manager, has been promoted to the Australian field, with headquarters at Sydney. There, Mr. Maguire will have, as his asisstant, George Southgate, who was connected with the English Gillette Company from 1905 to 1912.

### Training Course

A unique feature that attaches importance to the appointment of these foreign salesmen is that of the factory training course which is arranged and given the men at the parent plant in Boston. In taking this course the plan requires that they not only follow the razor throughout its varied and extensive process of manufacture, but that they perform the actual operations of safety razor making. This is the course taken by Mr. Maguire before entering on his long journey to the far southern Commonwealth.

### Goes to Montreal

D. P. Cotter succeeds Mr. Maguire at Montreal, and here he will not only supervise Canadian sales, but will also have charge of export sales, which branch of the Gillette business is showing great growth, Mr. Bittues pointed out. As a matter of fact much of the export business is now taken care of by the Canadian plant, and particularly that of orders received from the various colonies and other British possessions.

### Sees a Big Future

Asked as to the prospects for expansion suggested by the recent application for permission to increase the capital stock of the company, Mr. Bittues stated that part of this would be employed to acquire new rights and patterns. The foreign field expansion was also requiring a great expenditure, and all around the future held big growth which would call for and require the expenditure of much money.

Particularizing as to the fields covered now, Mr. Bittues referred to the British West Indies, Bahama Islands, Nicaragua, Brazil, Costa Rica, Dutch East Indies, Chile, Cuba, Venezuela, Java, India, Burmah, Colombia, China, Peru, West Africa and many other countries. And one of the interesting points emphasized was that of the desire which British possessions, in particular, manifested for British made goods, and by this expression Mr. Bittues said that it meant Canadian made as well.

### A World Market

"Our market is the world," was Mr. Bittues' way of referring to the opportunities of the Canadian manufacturer in the matter of export. That is the way the Gillette Safety Razor Co., Ltd., look upon outside opportunities, and in seeking this business it is gone after with a real, pre-determined purpose to know the field in advance as far as is possible. For instance, the plans followed call for the securing and tabulating of quite exhaustive information as to the population of a given country, its character, its people and their habits, customs, tendencies, etc., together with much additional information which makes a fund of information for the manager and sales director that proves to be invaluable. Who, for instance, would expect the inhabitants of West Africa to be particular regarding the fine art of shaving, or Burmah or Borneo? Well, experiments have actually revealed to the Gillette Company that there's "bacon" over there for the going after, and they are expanding, Mr. Bittues asserts, not

*D. P. COTTER*

*Who will supervise Canadian sales of the Company.*

with a view to big returns being reaped to-morrow, or the next day, but perhaps two or three years hence. "It is a matter of aggressiveness," continued Mr. Bittues. "There's big things ahead.

"And if you don't go after business you cannot get it. It must be cultivated the same as the home territory. We know what the needs are here in America and Canada—we must find out what they are abroad."

Now, when there is a manifest demand for Canadian goods, is the best and logical time, Mr. Bittues asserts, for intensive sales plans to be laid.

Among the recent appointments made for foreign territories are the following: Australia: M. J. Maguire, with Geo. Southgate as assistant; Milan, Italy: G. G. D'Orio, associate manager, Milan; China: F. T. Williams, Shanghai; West Coast of South America: A. W. Riveros, Valparaiso.

# THE CLERKS DEPARTMENT

## Solving Biggest Problem of His Life-Work At the Age of Sixty-Nine

### Head of the Federation of Labor Has Made His Way Against What Seemed Hopeless Conditions and Insurmountable Obstacles and is Now Tackling His Greatest Task

FEW men in America have been so prominently before the great mass of the people continually for so many years as Samuel Gompers. Now, at the age of sixty-nine, Gompers has just begun to solve the biggest problem of his whole life work. It may not be generally known that the president of the American Federation of Labor is an Englishman, his birthplace being London, England.

The story of his career as told by Peter Gray in "Success" is as follows:

**His Biggest Problem**

How would you like to tackle the greatest problem of your life at the age of sixty-nine? That is precisely what Samuel Gompers, president of the American Federation of Labor, is doing at this moment. It is a big man's task—as anyone can see by a glance at the daily newspapers. "The world needs to be made safe for Labor as well as for democracy," says Gompers. "And the world cannot be safe for Labor until it is safe for democracy." And it is to this end that this grand old man of the working element is bending his every effort in the full maturity of his years.

**Is Well Fitted**

There is probably no living man better fitted for this great work than Samuel Gompers, for he has been the champion of American labor for thirty-seven years. Like Napoleon, Gompers comes from the ranks of the army he leads. And, like the Little Corporal of France, his men follow him because they believe in him and love him. They know that he knows their problems—their aims and ambitions, and that he knows how to attain them. His guiding genius has resulted in many betterments for the workingman.

**Knows the Trials**

He early knew the trials and tribulations of men who earn a livelihood with their hands. He knows from bitter experience the stone walls that confront them, and he has taught American labor how to climb those walls. Unlike Napoleon, Gompers has no dream of self-aggrandizement or power. He is a mild, kindly little man, who believes in his cause and believes in himself. His clear vision sees the things which Labor cannot and must not hope to attain—and he also sees the opportunity for greater strides of progress—for a world-wide condition of content and harmony between capital and labor. It is for this that he is now working in company with presidents and kings and the heads of workingmen's organizations throughout the globe.

**Must Be Safe**

"Labor must be safe in all lands or it cannot be safe in any," he recently declared. "Even American labor cannot be wholly secure until labor everywhere is raised in hours, in conditions and in wages, to a just and universal standard. Underpaid, overworked, starved labor will always be seeking the land of better conditions. The only sure protection for labor anywhere is justice to labor everywhere."

**Parents Were Poor**

Gompers was born in London, on January 27, 1850. Probably little did his parents, Samuel and Sarah Gompers, who were so poor they seldom had enough to eat, dream that many years after, that tiny bit of humanity would one day stir the great House of Commons, standing so majestically near the place where Gompers first saw the light. Yet he did just that on April 26, 1918, when he addressed the British lawmakers on the subject of "Labor and the War"—and that speech will go down in history.

In this day of gigantic world figures, there is perhaps no more conspicuous example of success than that presented by Gompers. There was a day when labor was presented by the cartoonist as a stalwart youth with muscular arms, or in overalls and wearing a square paper cap. To-day the personification of labor is Samuel Gompers. His portrait is as familiar to the reading public as is that of Wilson, Foch, or Pershing. Gompers has attained this success because he had an idea and an ideal, and he has been true to them both. He evolved the thought that the laborer is worthy of his hire. It was not an original conception—for the Bible makes this declaration. But it was Gompers who consecrated his life to seeing that the laborer actually got the hire of which he is worthy.

**His First Work**

At the early age of ten years Samuel Gompers was put to work in a shoe factory, and it was while pegging boots that he evolved the dream he was one day to make come true. It did so on the day when Gompers, as the representative of the Labor party in the United States, sat in solemn conference in Amsterdam, Holland, with delegates from seventeen countries, representing 18,000,000 organized workers from every corner of the world.

But the young Gompers soon tired of shoe-making, and was shortly apprenticed to a cigar maker. It is rather picturesque that he should have taken up this vocation. There was another youth who came to America about the same time Gompers did, who also earned his bread at the same trade. That was Oscar Hammerstein, who was to become a great impressario and direct the world's sweetest voices on the operatic stage. But while Hammerstein's blending of human harmonies made him rich and famous, the harmonies of Gompers were played on a different instrument. His task was to take the roughest exponent of manual labor and the most skilled member of the profession of toil, tune them to themselves and blend them with their ancient enemy and potential ally—capital.

The symphony which Gompers has created with these ingredients is a world symphony—and its melody will one day stir the hearts of men throughout the globe.

**Saw Great Opportunity**

In the days when Gompers rolled cigars, wages were low and conditions bad. He knows what it is to suffer—what it is to need. He knows the almost hopeless struggle against seemingly unsurmountable obstacles, the pinch of poverty, and the hopeless discouragement that comes to underpaid, underfed and poorly clothed labor. And, seeing a greater opportunity in America, he came to New York, in 1863, when the country was in the throes of the Civil War. At fifteen years of age he was an ardent worker for the betterment of labor conditions, and early became a member of the International Cigar Makers' Union. He was its delegate at the convention of the Federation of Organized Trade and Labor Unions of the United States and Canada, which later became known as the American Federation of Labor. Through the years of its early history, we see the young Gompers manfully working out the great idea he fostered. We see him guiding the course of this great organization with wise counsel and ardent efforts. And, in 1882, he was elected its president. That office has been continually his with the exception of one year—1895. It was then that the Socialist Labor party obtained his defeat when endeavoring to incorporate the Federation into itself. But Labor was lost without its leader and, the following year, Gompers was again chosen president of the Federation.

**A Practical Condition**

At the same time he became editor of the association's official organ, "The American Federationist." Gompers' writings are virile. They hold meat for all who read. His analysis of the open-shop problem, of child labor, and of the effect of Chinese coolie labor on the youth and manhood of America rings out with a truth which has forced itself upon men's minds, and which has commanded the thoughtful attention of the world. His opinions of Bolshevism would make the most radical exponent of that theory get his hair cut and take a bath. Gompers doesn't imagine an "almost perfect state." He plans a thoroughly practical one, although he realizes that he may never live to see it.

"This cannot come in a day," says Mr. Gompers. "It cannot come in a year or a decade, but it is possible to turn the world of nations in this direction, and to keep the world moving until this great end is won."

**Is on the Wane**

Gompers says frankly that Bolshevism is on the wane. He will not concede that clear, clean-minded, American workingmen will be deceived by such theories, and he believes in thoroughly eradicating them from Europe by bettering the conditions which fostered this serpent. He advocates an international charter for the rights of labor as a cure for present ills. "It begins among the nations the sublime task of raising the level of the conditions of labor the world over," Gompers asserts. "Every workman in the world, wherever he may

be, whose hours are long, whose pay is inadequate, whose working conditions are dangerous, whose standard of life is low, is put in peril. Every child at work at too early an age, makes it more difficult to maintain the age standards for the labor of childhood. This should be sixteen years. Children working at a younger age makes it harder to improve and keep the present child standard. So with women. Every woman toiling twelve and fourteen hours a day renders it harder for every woman working eight hours a day. Their working day should be six hours."

### Wants "Square Deal"

When the world war broke out there was no youth who responded to the nation's call with more haste and enthusiasm than did Samuel Gompers. Invited by President Wilson to become a member of the Council of National Defence, his residence at once changed from New York to Washington. There, side by side with the shrewdest financiers, the most experienced manufacturers, and the wisest theorists of the country, Samuel Gompers—who knew American labor better than labor knew itself—planned the shortest and surest way to help topple William Hohenzollern from his throne.

### Did Not Hesitate

In due time the Kaiser demanded the presence of a number of eminent men at Versailles in order to decide what should be done about him and his kultur. There were ugly heads raised in Russia, and there was a general feeling of unrest throughout the world. Just when one big task was finished, Gompers found himself confronted with another and a greater one. But he did not flinch—hesitation is not in his make-up. He went to it with the same intelligent enthusiasm that has marked his whole remarkable career.

With the fundamentals of his plan laid down abroad, Gompers returned to America to preach in the halls of Congress, in the public press, and through the medium of his own writings, his doctrine of a "Square Deal" for labor in this country. And just at this time came the accident which, it was feared, might end his half-completed work—a taxicab collision, which for a time put his life in jeopardy, just as a would-be assassin's bullet had put in danger the life of Gompers' colleague in readjusting the world—Premier Clemenceau. But despite his advanced years, Gompers rallied quickly, and now, with coat and vest removed, he is in the thick of the fray.

### Made World Understand

Gompers has attained his great ambition. He has seen the day when the "man with the hoe" sits at the council table with the man with the sword. He sees the work of making the world a better place to live in, well on its way to success. But his task is not ended. What labor is going to do and what the rest of the world is going to do about labor, is the question of the hour. Gompers isn't going to finish his task alone. He is going to have a great deal of help and a great deal of sympathy from the wisest heads and hearts in the world. For he has made the world understand that "laborers are people."

### A Busy Man

To-day, with strikes and rumors of more strikes current, Gompers is a mighty busy man. One day he is listening to a disgruntled delegation from some local union. The next, he is in conference at the White House, or discussing ways and means with a delegate from Poland. And, one and all, they look to Gompers for the solution of their problems. They know that he is of them—that he understands them—that he will secure for them all they are entitled to receive. He knows the whims of his children as a mother knows her own offspring. He knows that labor is sometimes selfish and unreasonable, he knows that it must sometimes be chastened, because chastisement is good for us all. But slowly, yet surely, Gompers is forging ahead and completing the great work he began nearly half a century ago.

### League of Nations

Politics has played its part in his life. It has worked with him and against him. Temptations have come his way, but he has spurned them. He early established confidence in himself—and through that—for his cause. He has always believed in a guiding star. He has followed it, not blindly, but with the keen energy of the student astronomer. His enemies have been put to flight, largely because he has made them his friends and his co-workers. He is one of the most powerful figures in the world to-day, yet he is the same mild, quiet Sam Gompers of fifty years ago.

### A Titanic Figure

Gompers is a titanic figure on the world-screen, in a day when men must measure up to heroic proportions to be even mentioned in the news despatches. And what morning newspaper does not contain some telegraphic report of his sayings and doings?

At the first international labor conference, called by President Wilson on October 29, 1919, Gompers was the leading element. With the officials of the Government Department of Labor, and the delegates representing workingmen in the four corners of the earth, Gompers is to-day blending labor with the League of Nations, and establishing labor's part and share in the fruits of peace.

### Bigness of His Task

And this is Samuel Gompers at the age of sixty-nine. It is the age when most men are through with work, when they may sit idly by in retrospect and enjoy the fruits of their toil. But there will be no rest for Gompers while he breathes. The man's personality and ambition are too big—his self-appointed task is too tremendous and many-sided. He admits that he may not live to see its utter fulfillment; but he means, at least, to leave no stone unturned in the attainment of his end.

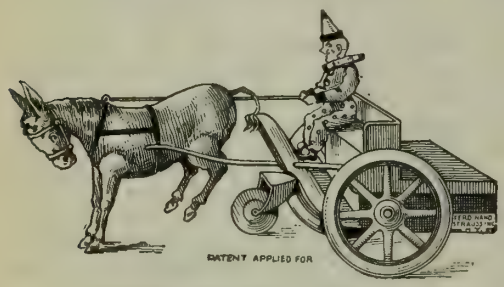
### Example of Success

Gompers, the man, is clean cut, lovable—an example of the success he personifies. He proves that no accomplishment is too great for the man who believes in his cause, and who devotes every energy to it. There is no magic about Gompers—he is all man, all ambition, all work. And those who know him best say that his future accomplishments will pale into insignificance what he has done in the past. So, here is a living example, that it's never too late in life to add something to the happiness of the world.

## TAKES OVER HARDWARE BUSINESS AT WELLAND

A hardware company has been formed to acquire the business of Blake L. Booth, at Welland, Ont. The new company, Ingram and McMaster, Limited, will look after the retail trade. Mr. Ingram has been for twelve years with Rice Lewis & Son, Ltd., Toronto, and is a son of Mr. A. B. Ingram, chairman of the Ontario Municipal and Railway Board. Mr. McMaster has been in charge of the hardware business formerly conducted by Ingram and McMaster in Toronto. Mr. Booth is retaining an interest in the business.

"News," Dallas, Texas.



*A personal experience that most of us have had lately.*

# NEW HARDWARE GOODS

## OFFERED TO CANADIAN HARDWAREMEN

### MECHANICAL TOYS

"Tip-Top, the Mechanical Porter," and "Jenny, the Balking Mule," are among the mechanical toys brought out this season by Ferdinand Strauss, Inc., 7 West 22nd Street, New York. Both, it is stated, are very attractive and amusing in appearance.

*Jenny the Balking Mule*

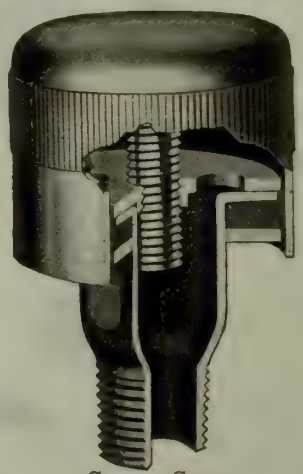
"Jenny" and her cart is 8¾ in. long, and she is said to be a constant source of mechanical surprises to the kiddies. The entire toy is made of standard metal and brightly decorated.

"Tip-Top, the Mechanical Porter," is 7 in. long and 5½ in. high. This little man walks and acts like a real porter, and, like the "Balking Mule," is made of metal and brightly colored. A specially constructed spring regulates his actions and makes him appear very realistic.

*The Mechanical Porter*

### DOUBLE WORM JACK

The Iron City Products Company, 7501-7511 Thomas Boulevard, Pittsburgh Pa., is putting out a new jack in which it is stated a new application of the worm drive principle is made. The new jacks, it is stated, are worked on the "double worm" principle, in which both a right and left-hand worm are cut on the worm shaft, which meshes with right and left-hand worm gears. These gears carry heavy pinions between which the lifting bar, having a double set of teeth on either side, is raised or lowered by the double action of the component sets of gearing without loss of friction on the worm shaft or lifting bar.



*Double Worm Jack*

There are only four working parts in the lifting mechanism and no small parts to get out of order.

A number of different sizes of various capacities, for various uses, are made.

### GREASE CUP

The "Bridgeport" centre thread grease cup is manufactured by the Garrison Company, 346 George Street, Bridgeport, Connecticut. The manufacturers make the following claims for it: It will not rattle off, it eliminates any danger of crossing and jamming threads, is easy to fill and refill, prevents any grease leakage, has a positive feed and is practically indestructible. It screws into a standard thread. The grease cup is considered economical and practical from every standpoint.

*Grease Cup*

### BANTAM BOOSTER

The F. F. Bantam Booster, manufactured by the France Manufacturing Co., West 104th Street, and Berea Road, Cleveland, Ohio, is intended primarily, it is stated, to meet the requirements of home battery charging.

It is made in one voltage and output only, known as TYPE 6 and operates from lamp socket on 100 to 130 volt 60 cycle alternating current with a charging rate of 8 amperes.

The manufacturers say it will fully charge a 6 volt battery of any ampere-hour capacity and can be used on a 12 volt battery by charging one-half of it or 3 cells at a time.

A special uni-directional current ammeter is standard equipment and shows plainly how charger is working and just what current is flowing into the battery.

Equipment also includes long extension cord and plug, heavy charging wires with red positive wire and battery clips. Full instructions show how to operate and care for battery.

Finish is black enamel making a very neat appearance.

*Bantam Booster*

# WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

## THE MARKETS AT A GLANCE

NUMEROUS advances in price are again shown in the hardware markets this week. Higher quotations have gone into effect on saddlery hardware, collar pads, knife handle wrenches, carpenters' clamps, some lines of builders' hardware, lumbering tools, one line of saws and hammers, plumbers' oakum and black and galvanized sheets.

As a result of conditions brought about by the American steel strike, sheets are at a premium and dealers who have the stock have no trouble in disposing of it.

There is an upward tendency in pig lead and spelter.

As a result of keen competition rather than to any decline in prices of raw materials, manila rope is down one cent a pound and sisal is reduced one and a half cents a pound.

All along the line the shortage of goods continues and in some lines it is simply an impossibility to get anything like adequate supplies.

There is an improvement noted in the tube situation and while supplies are not plentiful, the jobbers are able to handle a fair amount of business and hope for further improvement.

While linseed oil is so scarce that even jobbers can buy in small lots only there is a tendency towards easier prices. An advance, which it is stated may be a sharp one, is expected in turpentine.

# MONTREAL MARKETS

MONTREAL, Oct. 16—Advanced prices are in effect this week for collar pads, the increase being 35c per doz. A new list is issued on knife handle wrenches. Carpenters' clamps are advanced. An increase is applied to saddlery hardware and some lines of bright coil chain. Corbin builders' hardware is marked higher. Plumbers' oakum advanced 50¼c per cwt. American roof nails are also marked higher. Pink's lumbering tools and handles are revised upward, tools 5 per cent. and handles 10 per cent.. One line of saws and another of hammers are marked up. Black and galvanized sheets are again revised upward and this is in definite accord with the indications pointed out in HARDWARE AND METAL last week. Pig lead is marked higher and so is spelter. Old materials, while substantially unchanged, are ruling with a better undertone.

A decline of one cent per pound is made for manila rope and one and one-half cents for sisal. This is due to keen competition, rather than to raw material declines, for the tendencies have been higher for raw materials of late. Business is very excellent all around.

## *Higher Prices Here For Collar Pads*

**Montreal.**

COLLAR PADS.—Higher prices are being quoted for collar pads, the 10 in. "Ventiplex" now selling at $6.60 per dozen. The previous price was $6.25.

## *New List on Wrenches; Carpenters' Clamps Up*

**Montreal.**

WRENCHES, CLAMPS.—A new list is issued on knife handle wrenches. The following prices now prevail: Six inch, per dozen, $15; 8 in., $18; 10 in., $22; 12 in., $28; 15 in., $38; 18 in., $48, and 21 in., $58. The discount is 25 per cent. Carpenters' and carriage makers' clamps are advanced in price, "Common" being quoted as follows: 3 in., per dozen, $7; 4 in., $9.60; 5 in., $12.20, and 6 in., $15.75. The corresponding prices for "Star" quality are: $8, $11, $14, and $18 per dozen.

## *Saddlery Hardware; Chain; Hardware Up*

**Montreal.**

VARIOUS HARDWARE. — Advances are being effected for saddlery hardware and the increases are very different so that it is impossible to give an average percentage to cover this. Coil and harness chain are also advanced. Various lines of Corbin builders' hardware are advanced in price, the approximate increase being 10 per cent.

## *Plumbers' Oakum Up; Roof Nails; Lumber Tools*

**Montreal.**

OAKUM, NAILS, TOOLS.—Advanced prices are in effect for plumbers' oakum. The increase of 50c per cwt. makes the present price $10.25. American bright felt roofing nails are higher in price, the quotation on full kegs being $9 per 100 pounds, and on broken lots $9.50. Pink's lumbering tools are marked higher. The tools are advanced approximately 5 per cent., and handles 10 per cent.

## *Hammers and Saws Are Marked Higher*

**Montreal.**

HAMMERS, SAWS.—Increased prices are effective for Stanley rail hammers and the increase will approximate 15 to 20 per cent. Various saws of S. & D. manufacture are revised in price, the hand patterns being on a readjusted basis as well as smaller saws. As the discounts vary greatly no definite prices are available.

## *Is Big Domestic and Export Ware Trade*

**Montreal.**

WARES AND STOVES.—Manufacturers are working to capacity on domestic and export orders for various wares. The tendencies are decidedly firm, but with the provision of makers they have been able to take care of customers' demands quite promptly. Prices will depend, materially, upon the ability of the manufacturers to obtain raw ma-

terials in such uninterrupted supply as to enable them to take care of demand with reasonable dispatch. The stove trade still continues to be brisk. Tendencies are firm, and any change made would be of an advancing nature rather than a decline.

## *Gasoline is a Seller; It and Coal Oil Held*

**Montreal.**

GASOLINE, COAL OIL.—While there has been no change in the price for coal oil, the tendencies are steady and prices hold still at 22 to 25 cents per gallon. For gasoline there is a brisk demand still, price for motor grade still holding at 33 cents.

## *Decline is Registered In Manila and Sisal*

**Montreal.**

ROPE.—The tendency of the hard fibre market has been upward, and the condition was so reported in last week's HARDWARE AND METAL. While this was according to facts, the introduction of various grades of cordage into the Canadian market has made a class of competition that is responsible for a decline of 1 cent per pound on manila, and of 1½ cent per pound on sisal. The new prices are as follows: Pure manila, per pound, base, 31c; British and beaver manila, per pound, 27c, and sisal, 23½c. Lath yarn, single, tarred and untarred, are also quoted at 23½c per pound. Trading is fair, it is reported.

## *Sheets Marked Higher; Are Harder to Obtain*

**Montreal.**

SHEETS AND PLATES.—Difficulty of maintaining stocks in the full run of gauges has forced prices up. Scarcity has been responsible for a general firming of the market and prices are higher all around. It may be that higher prices still will prevail, and this will depend, in large measure, upon the labor situation.

| 18 and 20 gauge | 7 00 | 7 15 |

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

## *Prices For Lead Lines Will Depend on Ingots*

**Montreal.**

LEAD PRODUCTS.—A fair amount of business continues to be done in manufactured products, but trade could improve to the satisfaction of the trade, generally. Prices are steadily maintained, and if lead holds its position and the firming takes place in the tin market there is little promise of lower prices for solder.

| | |
|---|---|
| Lead pipe | 0 12½ |
| Lead waste | 0 13½ |
| Note.—Lead pipe is subject to a discount of 10%. | |

| Zinc sheets, casks | 0 17 |
| Do., broken lots | 0 18 |

## *Iron Bars and Steel Maintain Steady Basis*

**Montreal.**

IRON AND STEEL.—There is no complaint of the volume of business, and jobbers are in receipt of a steady stream of orders from day to day, particularly from outside points. The outlook suggests that there will be no declines and the undertone is, as a matter of fact, quite firm.

| | |
|---|---|
| Iron finish machinery steel | 3 80 |
| Norway iron | 12 00 |
| Single reeled machinery steel | 5 50 |
| Spring steel | 5 50 |
| Sleigh shoe steel | 3 75 |

| Black Diamond too steel, per lb. | 0 22 |
| Black Diamond cast steel, lb. | 0 22 |
| Common bar iron, per 100 lbs. | 3 75 |
| Refined iron, per 100 lbs. | 4 75 |
| Mild steel | 3 75 |

## *Metal Undertone is Healthier; Copper Up*

**Montreal.**

OLD MATERIALS.—Little new feature presents itself this week, but the tendency is steady, and for old scrap metals the tone is better. Manufacturers have not, as yet, come into the market for round lots of old scrap, and this would indicate that they have had ample supplies in hand to take care of their requirements. Light copper is ¼c per pound higher, and old auto tires are a shade weaker.

| Dealers' Buying Prices— | | |
|---|---|---|
| Old rubbers, boots and shoes | 0 07 | 0 08 |
| Overshoes, lumbermen's rubber boots | | 0 05 |
| Overshoes, etc. (trimmed) | 0 05 | 0 06 |
| Bicycle tires | | 0 00½ |

| Light brass | 0 07½ | 0 08¼ |
| Scrap zinc | 0 05½ | 0 06 |
| Light copper | 0 15 | 0 15¼ |
| Heavy copper | 0 17 | 0 18 |
| Wrought iron, No. 1, per gr. ton | | 15 00 |
| Malleable scrap (ton) | | 15 00 |
| Pipe scrap, ton | | 8 00 |
| Stove plate, ton | 14 00 | 15 00 |
| No. 2 busheling | 7 00 | 8 00 |
| Machinery, cast (ton) | | 21 00 |

## *Lead Price Higher; Spelter Also Firming*

**Montreal.**

INGOT METALS.—The week's features are those of a firming of a price for ingot lead and for spelter. Tin is unsettled, but advances are expected to come eventually. Copper is quiet.

COPPER.—Trading is somewhat light, and there is no change of price, this remaining at 25c.

TIN.—It was anticipated last week that an advance was due for this, but nothing has transpired as yet. Price this week is 59c, but a reaction upward may come at any time.

LEAD.—Heavy demand seems to have been responsible for a firming of prices and the quotations this week are advanced to 7⅝c per pound.

SPELTER.—While the price of 10c per pound obtaining last week is unchanged, the tendency is upward in sympathy with pig lead.

ANTIMONY.—Continues firm, but selling at the unchanged price of 10c per pound.

ALUMINUM.—The small demand for this continues, and price is held at 34c.

PIG IRON.—$50 per ton is being quoted on this for usual quantities.

# TORONTO MARKETS

TORONTO, Oct. 16—Price changes are fairly numerous this week with the general tendency toward higher levels. In one instance only has there been a decline, that is in rope. Manila quotations show a reduction of a cent a pound and sisal is down a cent and a half a pound.

Higher quotations are effective on builders' hardware lines as noted in a previous issue, although all the new figures have not yet been worked out. Sheets and bars are at a premium as a result of conditions brought about by the strike. Tube shipments have been coming through and as a result there has been considerable improvement in the shortage.

Ingot metals are showing a decidedly firmer tendency. Copper has advanced half a cent and lead half a cent.

Linseed oil is very scarce, but notwithstanding the price is weaker as a result of expected deliveries of seed from now on. A sharp advance in turpentine is not unlikely as prices at primary points have been rising.

## *Cotton Advance Has Not Affected Rope*

**Toronto**

COTTON ROPE AND TWINE.—These lines are very firm, but no advance has yet been reported. The cotton crop is not shaping well this year and is about the fifth crop below the ten-year average. Europe, it is claimed, is just about ready to start mills again and will need considerable. As may have been noted, cotton has gradually been advancing since February and has gained about 6 cents in five weeks. This has a tendency to keep prices very firm.

## *Manilla and Sisal Rope Shows Decline*

**Toronto.**

MANILA AND SISAL ROPE.—These products and also lath yarn show a decline of from one to one and one half cents per pound. Best manila is now quoted at 31 cents base. Other manila 27 cents, while sisal is quoted at 23½ cents base, which price also takes care of lath yarn single, and 24 cents for lath yarn double.

The reason for the lowering in price is given that fibre is slightly easier and no future or spring orders are being booked. The volume of business being handled is very fair for this season of the year. No further reductions are looked for at present and the prices above are for immediate delivery.

## *Some Brush Prices Temporarily Withdrawn*

**Toronto.**

BRUSHES composed of bristle 4 inches and longer are very scarce. One manufacturer received a wire advising price withdrawal, as bristles of the above length are practically off the market. He states it is temporarily impossible to secure these bristles, although every effort is being made to procure them as soon as possible. This may be caused, it is stated, by the labor conditions in China. Formerly these people picked the bristles on a very poor wage basis. Newer industries have offered larger wages.

## *Scrap Materials Are Still Quiet*

**Toronto.**

THE SCRAP MARKET has been very quiet on account of the American steel strike, and very little is going into the United States where the big demand is greatest. It is expected that prices may stiffen shortly as the situation gradually gets more settled. Quotations are as follows:

| Dealers' Buying Prices— | | |
|---|---|---|
| Tea lead | .... | 0 03½ |
| Heavy lead pipe | .... | 0 05¼ |
| Pipe scrap | .... | 8 00 |
| Stove plate, per ton | .... | 12 50 |
| No. 2 busheling | .... | 11 00 |
| Yellow brass | .... | 0 10 |
| Red Brass | .... | 0 16¾ |
| Light brass | .... | 0 07 |
| Scrap zinc | .... | 0 06 |
| Heavy copper | .... | 0 18 |
| Wrought iron, No. 1, per gr. ton | .... | 14 00 |
| No. 1 machinery cast | .... | 18 00 |
| Heavy melting steel | .... | 14 00 |
| Old rubbers, boots and shoes | .... | 0 07 |
| Overseas, lumbermen's rubber boots | .... | 0 05 |
| Bicycle tires | .... | 0 1½ |
| Automobile tires | .... | 0 03 |

## *Boiler Tubes Firm; Still Very Scarce*

**Toronto.**

BOILER TUBES.—A good volume of business is offering for boiler tubes, but stocks are very low and no immediate improvement is expected. It is believed by some that shipments from the States to any extent will not reach Canada before December. A tendency to higher prices is noted, but present quotations show no change and are as follows:

| | Per 100 feet | |
|---|---|---|
| BOILER TUBES— | Seamless | Lapweld |
| 1 inch | $27 00 | ..... |
| 1¼ inch | 29 00 | ..... |
| 1½ inch | 29 50 | ..... |
| 1¾ inch | 32 00 | $27 00 |
| 2 inch | 31 00 | 26 00 |
| 2¼ inch | 35 00 | 28 00 |
| 2½ inch | 43 00 | 32 00 |
| 3 inch | 48 00 | 40 00 |
| 3¼ inch | ..... | 47 00 |
| 3½ inch | 60 00 | 44 00 |
| 4 inch | 75 00 | 56 00 |

## *Steel and Iron Bars Are Holding Firm*

**Toronto.**

STEEL AND IRON BARS.—The market remains firm with a good volume of business being reported. It is believed that manufacturers generally are not accepting future orders at a booked price, and accept future orders at the price quotations prevailing at the time of delivery. Almost all jobbers claim a scarcity and their warehouse stocks are low, but they are able to supply their customers' orders fairly well. In some quarters there is a distinct tendency to look for firmer prices, but it is not generally expected that any immediate change will take place at present. Quotations are as follows:

| | | |
|---|---|---|
| Common bar steel | .... | $4 25 |
| Common bar iron | .... | 4 25 |
| Angle base | .... | 4 50 |
| Horseshoe iron | .... | 4 75 |
| Tire steel | .... | 4 70 |
| Mild steel | .... | 4 50 |
| Norway iron | 11 50 | 15 00 |
| Toe caulk iron | .... | 5 45 |
| Sleigh shoe steel | 4 25 | 4 50 |
| Band steel | 4 25 | 4 50 |
| Spring steel | 9 50 | 11 50 |
| Mining drill steel | 21 00 | 30 00 |
| Sheet cast steel | 0 42 | 0 45 |

## *Taylor-Forbes Products Unsettled*

**Toronto.**

TAYLOR-FORBES PRODUCTS showed an advance in last week's markets. Brass and bronze products should not have been included in this list and have been revised to the previous prices. Markets are firm on this line, especially malleable hardware. And it is hard to say how long they will stay at present quotations.

## *Firm Market For Galvanized Sheets*

**Toronto.**

GALVANIZED SHEETS.—The general situation in regard to both black and galvanized sheets is uncertain and very unsettled. Some jobbers saw the strike in the United States coming and stocked heavily, while others say their stocks are exhausted. Naturally, with the general scarcity throughout the country prices are active and show a wide range. It is said the variations are from 34 to 70 cents over base prices on galvanized sheets. This is accounted for, it is stated, by the jobber running out of supplies in this line, and having to purchase on a higher market. The demand is very heavy, especially the lighter gauges.

Many jobbers seem to think that no American iron will be procurable to any large extent till December. Although some claim they are able to procure several cars per week, which they very quickly disposed of. The quotations are as follows:

| BLACK SHEETS— | | |
|---|---|---|
| 14 gauge | $5 40 to $5 45 | |
| 16 gauge | 5 50 | 5 60 |
| 18-20 gauge | 6 05 | 6 15 |
| 22-24 gauge | 6 10 | 6 20 |
| 26 gauge | 6 15 | 6 30 |
| 28 gauge | 6 25 | 6 45 |
| 3-16 inch plate | 4 90 | 6 25 |
| ¼-inch boiler plate | 4 40 | 5 80 |

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

| | Premier | Apollo |
|---|---|---|
| 10¾ oz. | $8 05 | $8 00 |
| U.S. 28 | 7 75 | 7 60 |
| U.S. 26 | 7 45 | 7 30 |
| 22 and 24 | 7 30 | 7 15 |
| 18 and 20 | 7 15 | 7 00 |
| 16 | 7 00 | 6 85 |
| 12 and 14 | 6 90 | 6 70 |

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

## *Wrought Hardware Still Being Revised*

**Toronto.**

WROUGHT HARDWARE.—Prices which were withdrawn lately from the Canadian markets have not as yet been given out on the new basis. American firms were advised of approximately ten per cent. advance, and it was expected the Canadian price would advance along the same rate of increase. However, it is expected that prices on this line will assume a more steady tendency, after the adjustments have been arranged. The steel strike is gradually wearing itself out and mills are resuming operations in greater numbers every day, numerous working men and laborers declaring they did not wish to strike from the beginning, and are therefore pleased to get back to work again. It is expected this will all have a tendency to steady prices on nearly all goods where this product is essential.

## *Oil and Gasoline Remain Unchanged*

**Toronto.**

OIL AND GASOLINE are in great demand, and a large volume of business being handled. Oil companies report that shipments are being delayed considerably on account of merchants neglecting to return steel drums or barrels within a reasonable time, and claim that the limited number available at

present is causing delayed shipments. Prices seem firm and no immediate change is looked for.

## *Lead and Zinc Lines Are Fairly Active*

**Toronto.**

LEAD AND ZINC PRODUCTS.—Business is to some extent affected by the scarcity which is being caused in other lines by the strike and other conditions. On the whole, however, trade is fairly active. Prices are holding steady, the quotations being as follows:

| | | |
|---|---|---|
| Lead pipe, list, per lb. | .... | $0 12½ |
| Lead waste pipe, list, per lb. | .... | 0 13½ |
| Do., over 6 inches, list, per lb. | .... | 0 14¼ |
| Above subject to discount of 10%. | | |
| Lead traps and bends | .... | 15% |
| Lead wool, lb. | 0 11 | 0 12½ |
| Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb. | 0 12 | 0 13 |
| Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra. | | |
| Solder, guaranteed, lb. | $0 35½ | $0 38 |
| Solder, strictly, lb. | 0 34½ | 0 37 |
| Solder, commercial, lb. | 0 32½ | 0 35 |
| Solder, wiping, lb. | 0 31½ | 0 34 |
| Solder, wire, lb. | 0 35½ | 0 41 |
| Zinc sheets, per lb. | .... | 0 17 |

## *Firmer Market For Ingot Metals*

**Toronto.**

INGOT METALS.—A firmer undertone seems to be developing to the market for ingot metals. This is perhaps more noticeable in copper, lead and spelter than in other products. No marked changes have as yet developed in the situation and prices show little fluctuation although lead and tin are slightly higher.

COPPER.—Copper continues in fair demand. There are various rumors as to what may happen prices shortly, the general opinion seeming to favor an advance. In the meantime the quotations are on the basis of 27 cents a pound and a fair volume of trade is being handled.

LEAD.—Owing to conditions brought about by shortage of materials the demand for lead has not been as brisk as usual, but there is some improvement noted and a little firmer market is expected. Prices are in the neighborhood of 7¼ cents a pound.

SPELTER.—Business is showing a slight improvement. Prices are unchanged.

TIN.—Stocks are ample to meet all present demands. Prices show little variation, but if anything, promise to be higher. Quotations at present are at 60 cents a pound.

ANTIMONY.—There is only a nominal demand for antimony. Quotations range from 10 to 11½ cents a pound.

ALUMINUM.—Business is inclined to be quiet. Prices are holding unchanged at the former quotation of 35 cents.

# LONDON MARKETS

LONDON, Oct. 16—The hardware merchants of London and district continue to enjoy good business. All seasonable lines are in good demand. Prices are very firm on most lines, although linseed oil and turpentine are down ten cents per gallon. Collections are splendid.

## *Reduction Made in Manila and Sisal*

**London, Ont.**

MANILA, SISAL.—Rope prices have been revised downward. Pure and British manila show a reduction of 1c a pound and sisal is down 1½c a pound. The new quotations are: Pure manila, 31c per pound base; British manila, 27c; New Zealand hemp, 27c; sisal, 23½c.

## *No Changes Shown in Prices of Nails*

**London, Ont.**

NAILS.—A brisk demand for nails continues as a result of the activity in all building lines. Prices are holding without change, the quotations being: Wire, $4.70; Base and Cut, $4.75 base.

## *Small Stocks of British Razors Coming*

**London, Ont.**

ENGLISH RAZORS—Small stocks of I X L razors are arriving from England. Quotations are as follows: No. 5,000, Canuck, $20 per dozen; No. 1,000, Conqueror, $25 per dozen.

## *Potts Iron Handles a Little Cheaper*

**London, Ont.**

MRS. POTTS IRON HANDLES.—This line has been reduced twenty-five cents a dozen, and the new quotation is on the basis of $1.40 per dozen.

## *Ten Per Cent. Rise in 1847 Flatware*

**London, Ont.**

1847 FLATWARE.—An advance of ten per cent. which has been made, includes all patterns and plain designs of knives and forks. The higher prices are due, it is stated, to the greatly increased cost of silver and labor.

## *Canadian Beauty Appliances Lower*

**London, Ont.**

CANADIAN BEAUTY APPLIANCES.—A slight reduction is made in the prices of these lines, the discount now being 27½ per cent. in place of the former figure of 25 per cent. Net prices prevail on some lines. Quotations include irons at $4.35 each; toasters, No. 210, $4.35 each; grills, No. 402, $7.25 each.

## *Cast Sinks Are Advanced Slightly*

**London, Ont.**

CAST METAL SINKS.—A slight advance has been made in this line. Quotations are as follows:

| | 16x24 | 18x30 | 18x36 |
|---|---|---|---|
| 3 in. shipment, each | $5.30 | $6.05 | $10.45 |
| 2 in. shipment, each | 5.36 | 6.11 | 10.57 |
| 1 in. shipment, each | 5.42 | 6.17 | 10.69 |

## *Weather Strip is Selling Well*

**London, Ont.**

WEATHER STRIP.—There is an active demand for weather strip. Prices are as follows: Wood and felt No. 60, 5c per foot; No. 61, 5c; No. 61½, 7c; No. 64, 10c, less 55 and 5 per cent. Frost King, $4.40 per dozen packages; Swan hardwood, 75c set.

## *Ash Sifters Now Starting to Move*

**London, Ont.**

ASH SIFTERS.—There is a fair demand noted for ash sifters. Prices are as follows: Common wood side, $3.00 per dozen; Banner, $3.20 each; Rocker No. 1, $4.75 each.

## *Ice Skates Show Very Fair Bookings*

**London, Ont.**

ICE SKATES.—Orders are now being filled for ice skates and the bookings are very fair. Starr make is quoted at 30 per cent. off list.

## *Active Demand For Ammunition*

**London, Ont.**

SHELLS, CARTRIDGES.—Ammunition sales have been very satisfactory. Quotations are as follows:

Black Shells, Crown, add 10% to list.
Smokeless Shells,—Sovereign, Regal, Canuck, Imperial, net list.
Cartridges—22S, 22L, BB Caps, 20% off list.
Other rim fire, 10%.
Centre fire pistol sizes, add 35% to list.
Centre fire, sporting sizes, add 60% to list.

## *Rifles, Shot Guns Being Called For*

**London, Ont.**

RIFLES, SHOT GUNS.—There is a good demand for rifles and shot guns. Prices are as follows:

Single Barrel Shotgun — Plain, $11.00 each; ejector, $11.50 each.
Double Barrel Shotgun—Plain, $19.00 each.
Winchester Shotguns and Rifles, add 27½% to list.
Stevens' Single Shot Rifles—Little Scout, No. 14½ x 22 calibre, $5.75 each; Crack Shot, No. 26 x 22 calibre, $6.75 each; 32 calibre, $6.75 each. Marksman, No. 12 x 22 calibre, $8.50 each; 32 calibre, $8.50 each. Favorite, No. 17 x 22, 17 x 25, 17 x 32, $10.50 each.

## *Cattle Chains and Stall Fixtures*

**London, Ont.**

CATTLE CHAINS, STALL FIXTURES.—Cattle chains are now selling and the discount is 20 per cent. off list. Hollow stall fixtures are quoted at $1.40 per dozen.

## *Demand Increases For Stove Boards*

**London, Ont.**

STOVE BOARDS.—There is a seasonable demand for stove boards and sales are reported brisk. Quotations are as follows:

Wood lined, 30/5% off list.
Paper lined, 40/5% off list.
Net prices are as follows:

| Inches— | Paper lined. | Wood lined. |
|---|---|---|
| 24 square | $7.41 | $12.30 |
| 26 | 8.55 | 13.97 |
| 28 | 9.41 | 15.63 |
| 30 | 10.83 | 16.96 |
| 32 | 12.25 | 21.28 |
| 36 | .... | 24.60 |
| 18 x 28 | 8.27 | 12.64 |
| 24 x 32 | 10.26 | 16.62 |
| 26 x 34 | 11.97 | 17.67 |
| 26 x 38 | 14.25 | 18.95 |
| 28 x 44 | 17.10 | 26.60 |

## *Oil Heaters Are Selling Very Well*

**London, Ont.**

OIL HEATERS.—There is a brisk demand for oil heaters and stocks are turning over nicely. Quotations are as follows:

Perfection—No. 525, $7; No. 530, $8.25, less 25%.
Wicks for above, $3.45 dozen. No. 500 on carrier.

## *White Lead in Oil Remains Unchanged*

**London, Ont.**

WHITE LEAD IN OIL.—There is a good demand for white lead in oil. Prices are holding without change and are as follows: Pure, in ton lots, $16.35 per 100 pounds; less tons, $16.70; Elephant, $16.95; less tons, $17.30.

## *Glass and Putty Are Holding Steady*

**London, Ont.**

GLASS, PUTTY.—There is a good sale for glass at present. Prices show no change, the quotation being: Single diamond, 30 per cent. off list; double diamond, 30 per cent.; cut lights, 10 per cent. Putty is also selling well. The quotations are unchanged: Standard, 100 lb. drums, $6.80 per 100 lbs.; 25 lb., $7.05; pure, 100 lb. drums, $9.30; 25 lb., $9.55.

## *Turpentine is Down 10 Cents a Gallon*

**London, Ont.**

TURPENTINE.—There is a good demand for turpentine. Prices are as follows: 1 bbl. lots, $2.45 per Imp. gal.; 2 to 4 bbl. lots, $2.44; 5 gal. lots, $2.55.

## *Linseed Oil Shows Easier Tendencies*

**London, Ont.**

LINSEED OIL—Linseed oil quotations show a tendency to be easier and this is expected to develop as supplies of seed come in more plentifully. Quotations are on the following basis, ten cents lower than former figures:

| | Raw. | Boiled. |
|---|---|---|
| 1 to 2 barrels, gal. | $3.15 | $3.18 |
| 3 to 5 barrels, gal. | 3.14 | 3.17 |
| 6 to 9 barrels, gal. | 3.12 | 3.15 |

Less bbls. add 10c gallon.

# WINNIPEG MARKETS

WINNIPEG, Oct. 16—Price changes during the past week embrace many lines of importance to the hardware dealer, the most important among these being a strong advance in bolt prices, while lace leather, Irwin auger bits, Heller's hammers, and nuts also show a general increase of from 5 to 10 per cent.

The only line to be reduced this week is rope, which dropped 1½c per pound on sisal and lathyarn, and 1c per pound on pure manila, British manila and African hemp.

Outside of these changes all prices in general are holding very firm and no lower prices are looked for in any lines on which the principal production costs are labor.

Business continues fairly brisk in general lines, such as pipe, elbows, stove boards, coal hods and all such seasonable lines.

## *Heavy Advance Made in Lace Leather*

**Winnipeg.**

LACE LEATHER. — Lace leather prices show the heaviest advance during the week of any of the hardware commodities, the increase being approximately 25 per cent. above former quotations, and is due to the recent high prices as well as the shortage of hides. However, the present high prices are not expected to hold for next year's business. To-day's ruling prices are given as follows: Lace leather, tanned sides, $2.50 per lb.; rawhide sides, $2.50; tanned laces, $2.65; rawhide laces, $2.65.

## *Reduction is Made in Prices of Rope*

**Winnipeg.**

ROPE.—Rope prices show a further reduction during the week, due to the heavy stocks of raw material available, prices on sisal declining 1½c per lb., while pure manila, British manila, and African hemp show a decline of 1c per lb., and from present indications these new prices will stand for some time. To-day's market prices f.o.b. Winnipeg are as follows: Sisal rope, 24½c base; pure manila rope, 33c; British manila rope, 28¼c; African hemp rope, 28¼c; lath yarn, 24½c base.

## *O-Cedar Oil and Mops Up 5 Per Cent.*

**Winnipeg.**

O-CEDAR OIL, MOPS. — Prices on O-Cedar oil and mops, which are set by manufacturers, have just been revised and show an increase of a straight 5 per cent. over former quotations. To-day's selling prices being as follows:

O-Cedar Polish—4 oz., $2.10; 12 oz., $4.20; 1 quart, $10.50; ½ gal., $16.80; 1 gal., $25.20 doz.
O-Cedar Mops—No. 1, $12.60; No. 3, $12.60 doz.
O-Cedar Dust Mops—No. 5, $12.60; No. 14, $12.60 dozen.
O-Cedar Dusters—No. 10, $6.30 dozen.

## *Blacksmiths' Hammers Up 5 to 10 Per Cent.*

**Winnipeg.**

BLACKSMITHS' SUPPLIES.—A general revision in prices of Heller Bros.' products has just gone into effect, based on new factory quotations, and shows an increase of from 5 to 10 per cent. To-day's market prices are given herewith:

Rounding Hammers—No. 61 x 2 in., $36.00; 2½ in., $36.00; 3 in., $36.00 dozen.
Fitting Hammers—No. 62 x 2¼, $30.00; 2½ in., $30.00; 3 in., $30.00 dozen.
Farriers' Hammers—No. 64 x 14 oz., $17.40; 16 oz., $17.40 dozen.
Hellers' Farriers Nippers—24A x 12 in., $30.00 dozen; 24 x 14 in., $36.00.
Hellers' Hoof Parers—23A x 12 in., $30.00 dozen; 23 x 14 in., $36.00.

## *Ten Per Cent. Jump Made in Auger Bits*

**Winnipeg.**

AUGER BITS.—Following recent advances by the Irwin Auger Bit Co., new prices have been issued by Winnipeg jobbers, and show a general advance of approximately 10 per cent. over former quotations, due to increased costs of production, while it is very hard to get delivery even at advanced prices. To-day's market prices are as follows:

Irwin Auger Bits—3-16, $6.00; 4-16, $6.00; 5-16, $6.00; 6-16, $6.00; 7-16, $6.00; 8-16, $5.00; 9-16, $6.00; 10-16, $6.00; 11-16, $7.00; 12-16, $7.00; 13-16, $8.25; 14-16, $8.25; 15-16, $9.50; 16-16, $9.50 dozen.

## *Bolts and Nuts Revised Upwards*

**Winnipeg.**

BOLTS.—Among the most important advances is the new prices issued during the week on bolts, caused by the increased wages as well as other causes, and affects particularly the smaller sizes which advance from 10 to 15 per cent., while the larger sizes move up from 5 to 7½ per cent., and should the present steel strike continue for a lengthy period even higher prices may be expected. To-day's discounts are given below.

Carriage Bolts—⅜ and smaller, up to 6 in. long, 22½%; over 6 in. long, 5%. 7-16 and larger, all lengths, 5%.
Machine Bolts—¾ and smaller, up to 4 in. long, 25%; over 4 in. long, 15%. 7-16 and larger, all lengths, 15%.

Tire bolts, 40%; plow bolts, 10%; shaft bolts, 7½%; coach screws, 35%.

Following the advance in bolts, new prices have been named on nuts of all kinds, which advance from 50c to $1.00 per 100 lbs. Net prices now ruling are given below:

| Square tapped nuts— | Cases. | Less. |
|---|---|---|
| ¼ inch | $18.25 | $19.25 |
| 5/16 inch | 16.25 | 17.25 |
| ⅜ inch | 14.35 | 15.35 |
| 7/16 inch | 13.35 | 14.35 |
| ½ inch | 12.65 | 13.65 |
| 9/16 inch | 12.45 | 13.45 |
| ⅝ inch | 12.55 | 13.55 |
| ¾ inch | 12.25 | 13.25 |

| | | |
|---|---|---|
| ⅞ inch | 12.15 | 13.15 |
| 1 inch | 12.15 | 13.15 |
| Hexagon tapped nuts— | | |
| ¼ inch | 26.00 | 27.00 |
| 5/16 inch | 21.50 | 22.50 |
| ⅜ inch | 18.10 | 19.10 |
| 7/16 | 16.20 | 17.20 |
| ½ inch | 15.00 | 16.00 |
| 9/16 inch | 14.80 | 15.80 |
| ⅝ inch | 14.30 | 15.30 |
| ¾ inch | 14.10 | 15.10 |

## *Turpentine Firm at Former Quotations*

TURPENTINE. — Turpentine prices continue at former quotations with only a limited demand at this season of the year. To-day's prices are as follows: Barrel lots, $2.70 per gal.; ½ bbls., $2.73; 5 gal. lots, $2.75; 1 gal. lots, $2.75, plus the usual extras for containers.

## *Linseed Oil Prices Holding Unchanged*

LINSEED OIL.—Linseed oil prices show no change during the week, following a drop last week of 25c per gal., and is quoted to-day at the following figures: Linseed oil, raw, in bbls., $2.75 per gal.; boiled in barrels, $2.78 per gal.

# PITTSBURGH MARKETS

PITTSBURGH, Pa., October 16.—The geographic distribution of the iron and steel strike is the same as a week ago, when this report gave a complete representation, except that there have been slight increases in employment, so that the strike is a trifle less strong than a week ago. It has been losing ground since about the end of the third day, three weeks ago, but it loses ground very slowly. The strike was obviously lost for the men after the experience of the first three days, showing that a large part of the iron and steel industry, more than one-half, as a matter of fact, could operate. Why the strike continues, in such circumstances, is not altogether clearly apparent. One reason, no doubt, is that almost all the real strikers are ignorant foreigners and do not know that the strike is hopeless from the standpoint of winning any concessions, while undoubtedly another reason is that the American Federation of Labor officials are indisposed to make an effort to stop the strike as long as the labor conference at Washington is in session. The calling of the strike just before this labor conference did not help the union cause by any means, but with the strike once started it is better to keep it up than to acknowledge its failure. As to the radicals, who really produced the strike, chiefly Fitzpatrick and Foster, they have no interest in calling off the strike if they see it is lost, as they have nothing to save out of the wreck. The case is different from that of an ordinary strike of a union, when, if the strike is lost, it is to the advantage of the leaders to get the men back to work so that they can be reorganized for further attempts in future. An incidental reason why the strike wanes so slowly is that the manufacturers are not making anything like strenuous efforts to resume. They think haste would result in clashes, probably serious, by men desiring to return to work and those who wish to prolong the strike, and they prefer to let the men get thoroughly tired of striking.

### Gains in Employment

There have been further gains in employment in the past week in some regions, but in hardly more than half the entire territory affected more or less by the strike. Thus there has been no gain in the Wheeling district, and indeed the 24-mill tin plate plant at Yorkville, O., went down last Thursday, together with the Southern Ohio plant at Portsmouth, comprising seven open-hearth steel furnaces, two jobbing mills and ten sheet mills. The closing of these two plants represents the only spread of the strike since the first few days, and is, of course, more than balanced by the gains in employment made elsewhere. In Cleveland there has been no gain whatever in employment, Cleveland being down tight, as was the case at the beginning of the strike. In Buffalo there may be a slight amount of employment in plants previously closed tight, but if so the gain amounts to practically nothing. The curious situation remains of the Seneca Iron & Steel Company, a sheet interest, operating comfortably, while the entire Lackawanna Steel Company outfit, immediately adjoining, is closed tightly.

In the Monongahela Valley there have been gains in employment, both as to the Homestead and Edgar Thomson plants of the Carnegie Steel Company and the McKeesport plant of the National Tube Company, which averaged about 75 per cent. operation at the low point, but are now nearer 90 per cent., and also as to plants at the head of the Valley, at Monessen, formerly closed tight and now showing a little operation. In the Shenango Valley there is a slight improvement, whereby that valley is running very nearly full. In the Mahoning Valley, formerly closed tight, there have been slight gains, as the Trumbull Steel Company at the head of the Valley district, resumed practically in full this week. The men had been brought out the second day of the strike, largely by intimidation. Also, the small nuclei of men that were at work in some large Youngstown steel plants the first week, and were kept at odd jobs, there being no production, have increased very considerably, so that in the past week or so a little production has been quietly attempted.

The gains in employment and production, however, only change by a few per cent. the condition of the industry as a whole, from the situation obtaining at the end of the first week, the strike being now in its fourth week. Production is probably still well under 60 per cent. of normal, probably about 55 per cent., while employment is but little if any about 60 per cent.

### Pig Iron

On the whole the production of merchant pig iron has not been affected as much as the production of pig iron by steel interests, or the production of steel. All the merchant furnaces in Cleveland are down, and most of those in the Buffalo district, but the scattered furnaces are scarcely affected, and the Shenango Valley is running nearly full. The Mahoning Valley is closed practically tight, but it now contains only one blast furnace that is purely a merchant stack. In the Shenango Valley there are nine merchant furnaces, there being six at Sharpsville, two at West Middlesex and one at Sharon. Five of these have been running for ten days or more, one is out for relining, and three have either just resumed or are about to do so.

The demand for sheets before the strike was particularly good and thus it is fortunate that the production of sheets is less affected than that of several other finished products. Last week the American Sheet & Tin Plate Company operated an average of fully 82 per cent. of its sheet mills and is expecting to average better this week, while the independents operated 60 per cent. of the number operated in the week before the strike, though this meant only about 43 per cent. of the number in existence. Future operation will depend not so much upon conditions at the sheet mills as upon the supply of sheet bars, as it does not seem that enough tonnage of sheet bars is being made to carry the sheet mills that are in operation. The sheet mills had some stocks of sheet bars when the strike started.

Hardly any new business is being done in steel products, though some mills are entering occasional orders from regular customers, for delivery at mill convenience. The occasional or chance buyer, who has no regular mill connection, could hardly place any orders with mills, and some of these buyers are looking around for material in stock, on which, of course, they must pay a retail price. The mills are not going to advance prices against any shortage occasioned by the strike. Export inquiry is fairly good, but hardly any of the business offered is being accepted.

The Steel Corporation's unfilled obligations amounted to 6,284,638 tons at the end of September, showing an increase of 175,435 tons during the month, thus comparing with an average increase of 609,000 tons a month in the three months preceding. The increase

was equivalent to about 13 per cent. of the month's capacity, while shipments may be estimated at 70 per cent. of capacity, against 81 per cent. in August, and thus the September bookings would seem to be 70 per cent., the shipments, plus 13 per cent., the increase in unfilled tonnage, or 83 per cent. of the month's capacity. Thus, while the Steel Corporation was very reserved throughout September in the matter of selling it did enter a large tonnage.

## ANNOUNCES MINIMUM WAGE FOR CLERKS

### Saskatchewan Minimum Wage Board Sets Standard Wage

The Minimum Wage Board for Saskatchewan Wage Board announced recently that it had decided the minimum wage for retail stores for a 48-hour week. Beginners will receive $9.50 a week, with an increase of a dollar at the end of three and six months' service, and an increase of two dollars at the end of nine months, and at the end of one year they shall be deemed experienced and receive a minimum of $15. Other classifications will be decided in a week, and the new schedules will all become effective 30 days after the first publication in the Saskatchewan Gazette.

When filing lead, or other soft metals, it is well to rub a piece of chalk over the file before commencing work. The chalk prevents particles of metal from filling the file teeth. To clean the file, tap it against the workbench, and the filings will fall out.

## N. B. MERCHANTS CONVENE AT MONCTON

(Continued from page 56)

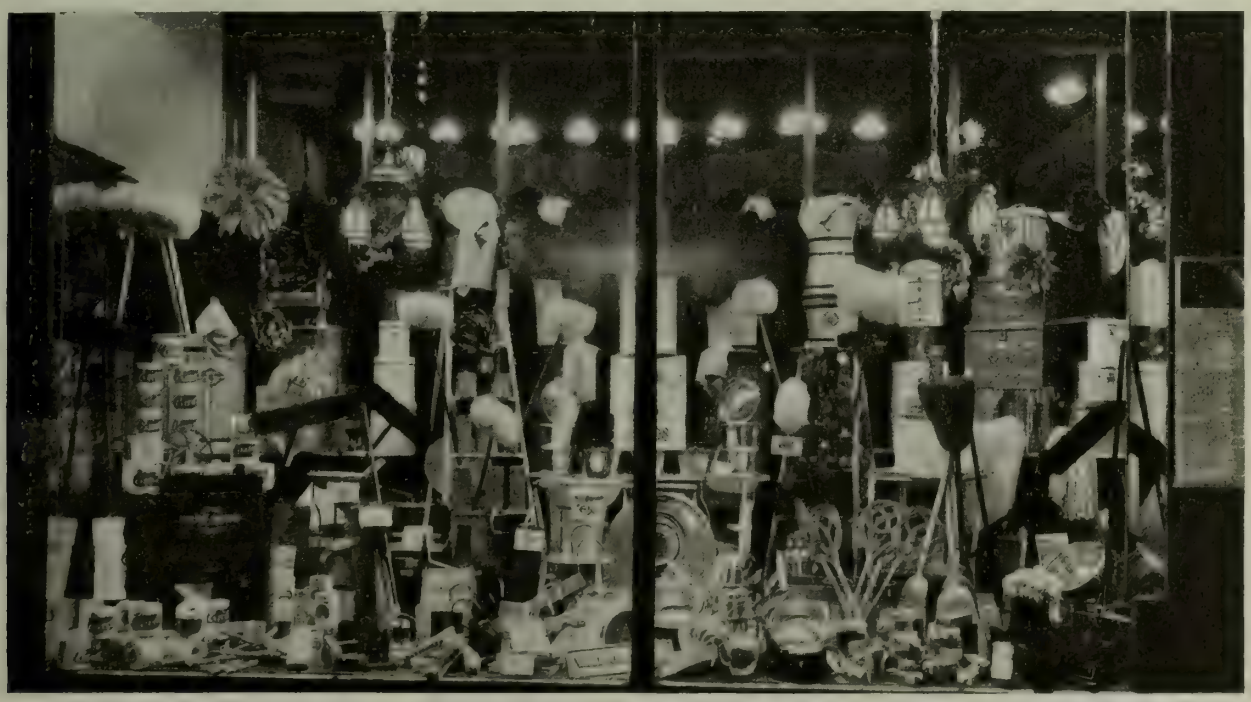
of the Board of Commerce it was still being sold at 15 cents.

The retail merchant danced to the tune played by the manufacturer, the speaker said; the latter to raw material, and all danced to labor. This was an unhealthy condition of affairs. The people were the hardest task-masters to meet, but they were the ones the merchant had to deal with. Thanks to the fact that the R. M. A. had been organized, he said the small dealer had been protected at the recent Industrial Conference in Ottawa, as their organization helped materially to stop the adoption of the eight-hour day. Mr. Banfield concluded with references to Canada's financial standing, saying that the last estimate showed the Dominion to possess $2,375 in natural wealth for every man, woman and child, the richest country in the world in regard to per capita wealth. He recited from Chapman's poem: "Where Does the West Begin?" in closing what was a fine address and which made a telling impression upon the gathering.

A pleasing programme of entertainment numbers was given, in which W. H. Banfield of Toronto, was heard in several humorous and instructive selections, and other contributors were given by Mr. Guy, Mr. Cochrane, Mr. Smith and Mr. Carson. They were given a vote of thanks at the close of the dinner, which afforded much pleasure to a gathering of about one hundred members.

## ARMSTRONG BILL IS DISCUSSED AT WINNIPEG

At a recent meeting of the Winnipeg Board of Trade, James H. Ashdown, of the Ashdown Hardware Co., Ltd., asked that the Armstrong Bill, details of which appeared in a previous issue of HARDWARE AND METAL, and which is aimed to bring lake and coastwise shipping under the control of the railway commission, be considered entirely from an unprejudiced viewpoint.



The Bill in question, which has been introduced into Parliament during two successive sessions, has been strongly opposed by shippers up to the present time. Mr. Armstrong, its sponsor and member of Parliament for Lambton, was invited to Winnipeg to place his views in support of the measure before the Winnipeg Board of Trade. He accepted the invitation and addresed the forum, strongly advocating the control of water transportation.

## TRADE NOTES

C. C. Craig of C. C. Craig & Co., Winnipeg, has recently returned from a business trip through the prairies and reports that general business conditions in the hardware trade are very good and that trading is very active.

Chemical Products Corporation, capital $3,000,000, head office Toronto, Ont., plans to manufacture and deal in chemicals, fertilizers, etc.

The Colonial Glass Company, Limited, capital $50,000, head office Lakefield, Ont., plans to manufacture and deal in glass and glass goods.

*A window display of household goods is easy to arrange and has a sales compelling force that will attract a splendid volume of business. A free use of price cards should be made.*

# Sledge Hammer Advertising

## One Means of Rousing Indifferent Property Owners to the Losses They Are Sustaining by Neglecting to Apply Paint—Figures Showing Losses From Deterioration Would Startle Most People

A FIRE two or three blocks down the street may cause little concern to some property owners, but when one occurs next door or under their own roofs they waste no time in turning in an alarm and getting busy with the water bucket and fire extinguisher.

Some men, and women too, have got to be scared stiff before they will buy fire or life insurance, lightning rods, or even a mild dose of physic. Some have got to see another man's car skid to collapse before they put chains on their wheels.

Insurance companies, fire extinguisher concerns, anti-skid tire and chain people have realized this and framed their advertising accordingly. They have injected a note of "frightfulness" in their copy in order to startle people into the buying impulse.

### Might Help Some

Perhaps a little of this method adapted to paint advertising would produce quicker results with some indifferent property owners where an appeal to their economic sense would otherwise fall flat. Some men have to be hit between the eyes before they are fully awakened to a realization of the necessity of protecting themselves, their families or their property.

Fortunately, paint and varnish advertising does not by any means have to rely on this sort of appeal to arouse the buying incentive. But it is an angle from which advertising might be directed in certain instances and which would have a response.

### Means Big Loss

The slow burning away of property by deterioration through lack of paint cannot be visualized except by analogy. The destruction that takes place in a few moments' time by means of fire is just as surely going on through lack of paint, though it covers a longer period of time. This could be depicted graphically by analogous illustrations, or illustrated in print by means of figures. A fire unhindered, is 100 per cent. destructive in a few hours' time. Property deteriorates at least 2 per cent. per annum without paint. Fifty times two means almost complete uselessness in fifty years' time, and is as sure in its effect as fire.

Two per cent. discount on an invoice oftentimes is the making or breaking of a business. 2 per cent. discount annually on property that remains unpainted year after year will surely bring it to a condition where it can no longer be considered an asset.

Whatever may be the earning capacity of property neglected through lack of paint, the owner must subtract that 2 per cent. for negligence in order to obtain the true net earning capacity. If it is earning 8 per cent. on actual investment, the 2 per cent. must be deducted to arrive at a proper net result.

### Do Not Realize

Property owners do not realize this. That is why it is sometimes necessary to scare him into a realization of his financial position brought about by negligence of paint. The same man investing money in bonds returning at 6 per cent. will let up a most unearthly howl if the Government takes 2 per cent. of it for war or any other purpose. The difference between 6 per cent. and 4 per cent. turns into momentous consequences when the Government takes hold of it. But very often the same man will stand serenely by and let 2 per cent. on his property vanish into thin air, all because paint prices are high. or painters ask too much, or just because he's too darned lazy to trot out his own ladders and brushes.

That's the kind of man that grenade advertising ought to be tossed at. Something that will give him a jolt into activity and painting.

### Soon Gets Busy

In farming communities it doesn't take long for the lightning rod agent to get busy in a community where a barn has been struck and burned by lightning. Somebody who has neglected such protection has to suffer before others are awakened to the necessity of providing protection against lightning. The insurance and rod agents then begin to reap their harvest.

Barns and frame buildings unprotected by paint are being continually struck with infinitesimal shocks from the conditions of the weather which sooner or later destroy just as surely as the single bolt from the sky. It takes pretty strong "scare" paint advertising to bring this home vividly to the farm owner. Appeals as to appearance, up-keep, better farm conditions, etc., may pass over his head, but if a good scare can be thrown into his economic mind, it is more than likely to bring about the desired results.

### A Mere Suggestion

This is purely a hypothetical suggestion:—If a paint dealer could go around the farm community for a day and rip off two or three boards from the side of several barns, he would certainly raise a storm of protest from

**Quebec Representative—M. A. Morison, 142 Union Ave., Montreal, Que.**

**Benjamin Moore & Company Limited**

**TORONTO WINNIPEG**

the owners. In so doing, he could explain, that he was following exactly the example of the farmer who neglected to paint. The depreciation that was taking place annually would amount to as much as the value of the lumber removed.

These instances are being given as suggestions to paint dealers who desire bases for advertising or talking points in their contact with their customers. Space will not permit working out advertisements in detail. Dealers can adapt them to their own use. Extreme illustrations have been drawn to show to the man who should purchase and use paint, why he should do so. Depreciation and actual loss have perhaps not been brought home to owners with the intensity that might be done in the usual run of appeals.

**Can Figure Closely**

Automobile owners can figure to a fraction of a cent the depreciation on the cars in the course of a year. Fire extinguishers are carried as a precaution against fire contingency. High insurance rates are paid against accident, theft and fire. All these contingencies are provided against. A large amount of this protection is taken on mainly because the motorist has seen, or heard, or perhaps felt a loss through these various contingencies. He has a clear, concrete picture of what happens, or is likely to happen to his motor and he protects it accordingly.

To convey a definite, concrete idea of the actual loss through lack of paint has been one of the difficulties in increasing paint sales. If the paint dealer would place a 3′ x 6″ x 2″ pine board on his paint counter, and every time he endeavors to show a customer the effects of deterioration, would take a jack-plane and run over it, he could illustrate to some extent the slow wearing process of an unprotected board under weather conditions. Every time he passed the plane over the surface he would take off a shaving and eventually wear down the board until it had no value whatever.

Whether your advertising or personal talks take the form of coaxing, cajoling or frightening a man into buying paint, the more concrete and tangible you can make your illustrations, the quicker and surer they will strike home.

Sometimes it pays a man to be hit over the head. If paint facts of this nature can be used as a club, they will benefit himself, his property and the paint and varnish dealer who is willing to use clubbed facts as a means of promoting sales.

# The Brush Department

## Window Displays of Brushes Increase Turnovers Most Satisfactorily

### Some Firms Use a Combination Display of Brushes and Paints With Excellent Results—Other Merchants Believe in Showing Brushes Only

GOOD window displays are the best advertisement a merchant has. There is no better way of increasing sales of brushes than to show them to the prospective buyers. A well-arranged window display of brushes, with the prices shown clearly, invariably pulls business. If it is backed by a punchy advertisement the results will be just that much better.

Many hardware merchants have found that a combination display of brushes and paints or brushes and wall finishes makes a window that has a real value in dollars and cents.

**Started to Move**

"We no sooner have our windows arranged than we notice the effects," said a Western Ontario dealer to HARDWARE AND METAL. "People see the brushes and the paints and start to buy them. There is no question at all about the results. We keep everything clean and bright and try to have an attractive arrangement and neat price cards. One thing we have found is that it is best to change our windows every week. They will pull, and pull well for about that time, and then we put in something else. People take the keenest interest in window displays and we try to make ours always worthy of their attention and to keep something before them that is seasonable and worth while."

Some hardware men think they get the best results if they put in an entire window of brushes. This always means a big jump in the sales, they say. These merchants state that they plan to put in three or four window displays of brushes a year. In addition they keep the brushes constantly displayed in their store where everyone coming in and out can see them.

*Here is an attractive plan for linking up a brush display with a paint window. The way to sell more brushes and more paint is to let the people know you have them. Good window displays of this kind will invariably boost business.*

# Actual Tests Prove Boeckh's Brushes

The biggest boosters of Boeckh's Brushes are the people who have used them and found by experience that they are all that good brushes should be—service persistently given creates the demand for

## BOECKH'S RUBBER-SET PAINT BRUSHES

Boeckh's Steel Grip Rubber-Set Paint Brushes are used whenever and wherever a good brush is required. They are quick sellers. Sales can be made readily by simply displaying these brushes and letting people know you sell them.

Don't demur! Stock Boeckh's Household Brushes and Boeckh's Steel Grip Rubber-Set Paint Brushes and supply the demand which has already been created.

## THE BOECKH COMPANY, LTD.

TORONTO, ONTARIO

GIVES the finish you want on walls—dries flat—no gloss—soft, velvety effect—easy and pleasing to the eye.

CAN be washed with soap and water without fading or injury to the surface. Hygienic and sanitary.

Prudential sets like cement—becomes an integral part of plaster wall—smooth or rough. Applies equally well on Wood or Metal—plain or ornamental surface.

Prudential comes in a full range of pleasing shades and colors—non-fading even under extremes of sun—dampness or constant washing.

# Adulterated Oil Offered to Canadian Trade

## Cleveland Firm Circularizing Canadian Trade, Offering What is Termed "Linseed Oil Adulterated"—Also Offers National Spirits Substitute Turpentine

WITH an envelope marked: "Important Quotations Inside," Canadian hardware firms this week received a letter with letter head bearing the name, National Linseed Company, linseed oil and naval stores, Cleveland, Ohio, reading as follows:

Oct. 10, 1919.

"Gentlemen:—

"Flaxseed is practically out of sight at the present time. That is the reason why linseed oil is so high and scarce at the present time. From all indications linseed oil will be selling as high as $2.50 per gallon within 90 days. For that reason we advise all users of linseed oil to buy their entire supply for 1919 and 1920.

We offer you linseed oil adulterated, which should be used for all purposes with but one exception, not for food or medicinal purposes.

"We quote the following:

"Raw linseed oil, adulterated, $1.46 per gallon.

"Boiled linseed oil, adulterated, $1.47 per gallon.

"This price is in Canadian exchange, money order, draft or cheque, F.O.B. Cleveland.

"Oil is shipped in steel barrel with faucet attached, no charge for steel barrel. Each steel barrel holds 60 gallons.

"If you will mail your check with order, we will allow you 3 per cent. cash discount, otherwise we will give you regular terms, 1 per cent. ten days, 30 days net.

"Prompt shipment guaranteed.

"Let us have your order.

"Yours very truly,

"National Linseed Company

"P.S.—We will not accept orders at the above prices if received in our office later than November 20th. It is not a question of buying oil; it is a question whether you can get the material as the shortage all over the world is tremendous. The demand is twice as great as the supply.

"As turpentine is also at a prohibitive price, we offer our 'National Spirits Substitute Turpentine' at 74 cents per gallon, F.O.B. Cleveland, Canadian exchange. Our National Spirits Substitute Turpentine is ideal for all painting purposes.

"Our National Spirits in 60 gallon steel drum with faucet. No changes for same."

There is nothing in the letter to indicate to what extent the linseed oil is adulterated, or the nature of the adulterant. The adulterant may compose 98 per cent. or more of the product, or only a small percentage. There is nothing in the letter to indicate the quantity of adulterant. If the adulterant consists of some of the cheap liquids which are sometimes used, the product at the prices named may be very costly indeed. Linseed oil adulterated may mean almost anything. Further, there is nothing in the letter to indicate whether or not the price is for a wine or Imperial gallon. There is one significant statement in the postscript on the letter, which states in part as follows: "It is not a question of buying oil; it is a question whether you can get the material as the shortage all over the world is tremendous."

### PRESIDENT CORNISH REVIEWS LEAD SITUATION

Misjudgment on the part of buyers who held off buying during the first quarter of the year in hopes of lower prices, has had much to do with the present demand and scarcity of lead, says E. J. Cornish, president of the National Lead Company, in reviewing the situation. Mr. Cornish continues:

"I attribute the wonderful demand for lead this summer to the fact that there had been little buying from January to April. Consumers were looking for lower prices and held back orders as long as they could. There has been a greater demand than it was able to anticipate, and the result is that stocks have been wiped out, and producers are behind with their orders. There has been a determined effort made to increase production, but this cannot be accomplished in a moment. It takes four months for a producer of leads to increase his output. However, we are producing 500 tons a week more than we were a year ago. In spite of the high price of leads at the present time the National Lead Company was never making such a narrow margin of profit as it is to-day. If conditions were normal, leads would be selling at two cents a pound less than to-day's prices, but the margin of profit was larger before the war when prices were down. No one has any lead to offer now, but by November there may be more than enough. I believe that in the end high prices must reduce consumption.

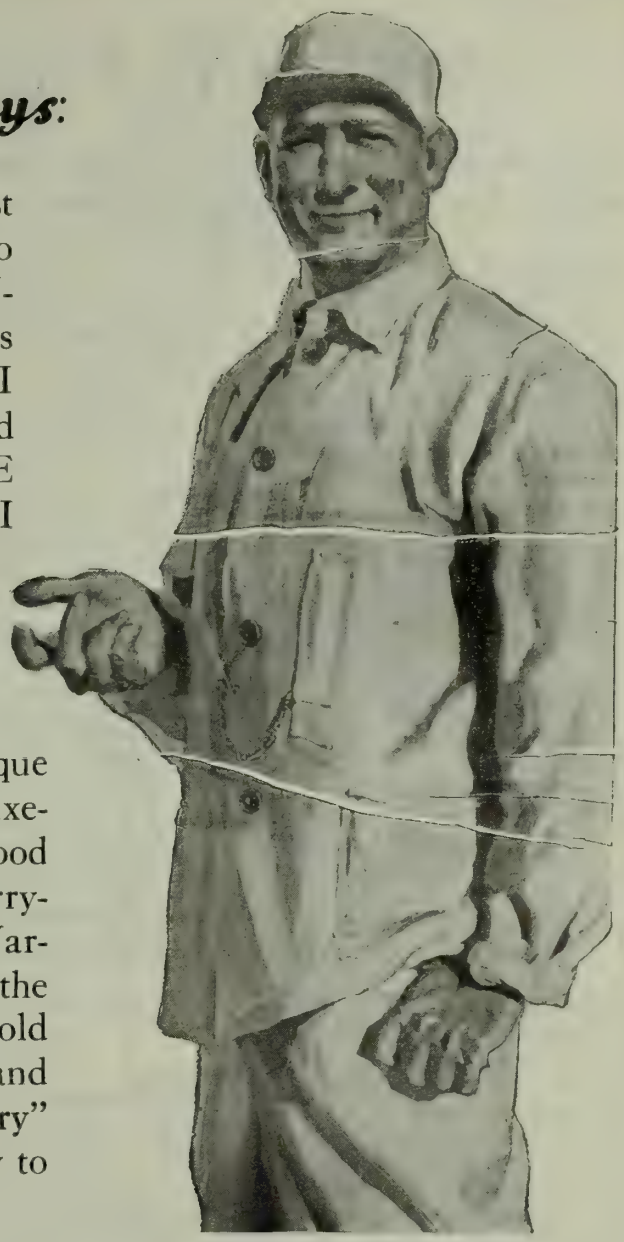
"The demand has been phenomenal recently because there has been a long period of inactivity. Lead is scarce because it was not possible for producers to anticipate the demand. It has looked as though the price did not count, but it does count. A few pounds added to the weight a horse has to carry will stop it at the end of the race, and the only thing that will mean continued heavy consumption is, in my opinion, a return to more nearly normal prices.

"It has been shown that the recent large consumption has been largely the demand created from the building of or repainting of workingmen's homes. The workingman has been making money and he has been spending it. The percentage of pigments used on large industrial plants this season has been small. It has been the little business that in the aggregate has made a surprising total. As conditions are to-day any change in the price of leads would have to be an advance; but what producers would like to see is a change in conditions which would permit a return to a normal price level that would not be a check upon consumption."

# Federal Regulation of Glass and Lumber

FEDERAL regulation of the lumber and glass output of the nation may be necessary to prevent costs of household furniture soaring. G. G. Whitworth, of Grand Rapids, Mich., president, warned the convention of the National Alliance of Case Goods Manufacturers at its annual meeting at Atlantic City this week. The association represents manufacturers controlling sixty per cent. of bedroom and dining-room furniture. There is no prospect of an immediate reduction in selling prices, it was said. Charts were produced in the convention showing that woods entering into the making of household goods and grades of glass similarly used have doubled and more than doubled in price during the last sixty days. Delegates emphatically declared profiteering could not be saddled on the manufacturers, as the cost of finished goods was based on the cost plan employed by the Government during the war.

It was asserted by the manufacturers here that much of the furniture now on the market could not be reproduced wholesale at the present retail market prices. To add to its troubles, the furniture industry is facing a virtual famine in glass, if it does not already prevail, and the big producers are now being forced to bid against one another for materials.



The tremendous demand for motor vehicles, according to manufacturers here, is one of the contributing causes to the glass shortage. Rush demands for heavy glass for auto windshields threatens almost a complete exhaustion of the supply of glass for mirrors.

With the trade clamoring for goods, which the manufacturers are able to promise only in limited quantities, the furniture industry is in a condition that was declared to be "up in the air," with absolutely no certainty as to prices or supplies. The amount of spring stock on hand in small and manufacturers do not feel justified in planning more than two months ahead because of the chaotic labor and supply conditions. No contracts for foreign houses are accepted.

Keer File and Tool Company, head office Toronto, capital $40.000, plans to manufacture and deal in files, tools and general hardware lines.

# The Luxeberry Painter Says:

"I guess the Simpson folks must have brought in all the neighbors to see the floors I LIQUID GRANITED for them. I've had more calls to finish floors 'like Simpson's' than I can take care of. Some don't wait and are buying the LIQUID GRANITE and doing the work themselves. I always use LIQUID GRANITE. Every such floor is a lasting testimonial for me."

Liquid Granite is one of the unique group of finishes that includes Luxeberry White Enamel, Luxeberry Wood Finish, Luxeberry Wall Finish, Berrycraft Stain Finish, Luxeberry Spar Varnish, etc. These finishes have made the name of Berry Brothers a household word among architects, painters and home builders. This is why all "Berry" products are so easy and satisfactory to sell.

# WEEKLY PAINT MARKETS

## MONTREAL

MONTREAL, Oct. 16.—While it was expected that there would be relief ere this in the linseed oil market, little change has developed. The difficulty of securing seed from the West still exists, and it appears that there has been more or less congestion as a result of the wheat movement from West to East. However, improvement is anticipated within the next few weeks and by the middle of November oil will be available for much less money and in quantity. In the meantime, spot oil holds unchanged.

Turpentine is now to be had in fair quantities and there may be an easier price basis ere long, but no change has been made this week.

Paints and sundries are selling freely. White lead in oil is steady, and as pig lead has firmed recently, there is likely to be no decline. Business is excellent.

### *Little Spot Supply of Linseed Oil; Firm*

**Montreal.**

LINSEED OIL.—Still strong is the spot oil market and there is no promise of relief here in the immediate future. Delivery of seed has been held back and this is the immediate cause of prices on oil for immediate delivery being held at practically unchanged prices. On the present seed quotations oil should be lower, but it is a case of no seed—no oil. The receipt of English oil has helped to relieve the situation considerably. For November shipment prices are much lower—around $2.00 per gallon being quoted for those who want delivery then. The future should bring relief in the matter of supplies and also of price.

| Raw— | Imp. Gal. |
|---|---|
| Single barrels | $2 90 $3 02 |
| 5 to 9 barrels | .... .... |
| 10 to 25 barrels | .... .... |
| **Boiled—** | **Imp. Gal.** |
| Single barrels | $2 92½ $3 04½ |
| 5 to 9 barrels | .... .... |
| 10 to 25 barrels | .... .... |

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

### *More Turpentine is Available; Unchanged*

**Montreal.**

TURPENTINE.—The market is somewhat improved and deliveries are freer Prices should soon respond to this and decline somewhat, although the revision will, perhaps, be of a gradual nature. In the meantime single barrels are quoted at $2.45.

| Turpentine— | Imp. Gal. |
|---|---|
| Single barrels | $2 45 $2 65 |
| Small lots | .... 2 65 |

(Packages extra.)

### *Bigger Putty Sales Are in Prospect*

**Montreal.**

PUTTY.—It will be possible to take care of a much larger putty trade, and this will develop soon, as weather conditions suggest the approach of winter. The undertone is steadily held without change, the following differentials showing:

| | 5 ton | 1 ton | Less Quanty. |
|---|---|---|---|
| Bulk, in barrels | $5 00 | $5 25 | $5 60 |
| Do., ½ barrels | 5 15 | 5 40 | 5 75 |
| Do., 100 lbs. | 5 85 | 6 10 | 6 45 |
| Do., 25 lbs. | 6 10 | 6 35 | 6 70 |
| Do., 12½ lbs. | 6 35 | 6 60 | 6 95 |
| 3 and 5 lb. tins | 8 10 | 8 35 | 8 70 |
| 1 and 3 lb. tins | 8 60 | 8 85 | 9 20 |
| Do., in 100 lb. cases. | 7 15 | 7 40 | 7 75 |

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

### *White Lead in Oil Has Held Firmly*

**Montreal.**

WHITE LEAD IN OIL.—There has been no change of consequence in the market and still the movement of lead has been brisk, considering the domestic and export demand. The latter has been well maintained all through the season and reports indicate that much is still being shipped. Prices are as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16, and smaller quantities, $16.35.

There has been a tendency upward on pig lead, of late, and this is attributed to a heavy consumptive demand all around.

### *Good Weather Favors Brisk Paint Demand*

**Montreal.**

PAINTS AND SPECIALTIES.—This excellent weather has favored the movement of paints and if it continues for any length of time the trade will still be heavy and help to make one of the biggest selling seasons on record. Prices are steady and without change, the tendencies being rather firm, owing to various conditions, such as a firming of tin plate prices, a firming for pig lead, etc. Specialties are also moving well.

## TORONTO

TORONTO, October 16.—Linseed oil is so scarce that many jobbers are buying from one another, and the best they can obtain is five to ten barrels. In spite of this prices show a much easier tendency and range from $2.95 to $3.15 for raw and $2.97½ to $3.17 for boiled. Turpentine prices for the present are holding unchanged, but there are rumors that an advance that may be a sharp one is likely as a result of advances made at primary points. The ruling price now is $2.45 per Imperial gallon. A seasonable demand for glass continues and supplies are reported as not too plentiful.

### *Linseed Oil Shows Easier Tendencies*

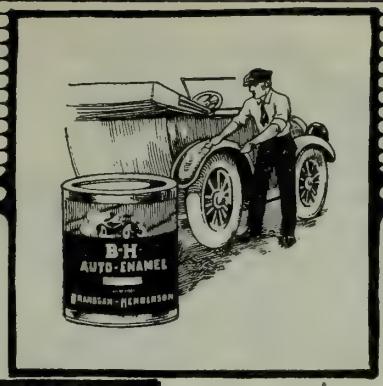
**Toronto.**

LINSEED OIL.—Supplies of oil are very scarce, and jobbers report that the best they can obtain is five to ten barrels at a time. Seed is not coming in in anything like the quantities the crushers require to meet the demands of a brisk trade. An improvement however is expected. The market tendency is towards easier prices for oil. Because of the losses they sustain in handling oil the men in the trade have made a claim for 15 cents per gallon for wastage, and this is being allowed. Quotations on oil are as follows:

| Linseed Oil— | Raw | |
|---|---|---|
| 1 to 2 barrels, gal. | $2 95 | $3 16 |
| 3 to 5 barrels, gal. | 2 94 | 3 14 |
| 10 barrels and over | 2 92 | 3 12 |
| | **Boiled** | |
| 1 to 2 barrels, gal. | 2 97½ | 3 18 |
| 3 to 5 barrels, gal. | 2 96½ | 3 17 |
| 10 barrels and over | 2 94½ | 3 15 |

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

### *White Lead in Oil Holding Unchanged*



**Toronto.**

WHITE LEAD IN OIL.—A fairly active demand continues for white lead in oil. Prices are holding without change, the quotations being: Five-ton lots, $15.85 per hundred pounds; 1-ton lots, $16.35, and in smaller quantities, $16.70.

### *Advance Expected in Price of Turpentine*

**Toronto.**

TURPENTINE.—As a result of advancing prices in the Southern markets higher quotations on turpentine are expected. For the present, however, the former quotation of $2.45 per Imperial

Brandram-Henderson Agents can supply a paint for every purpose. No matter what paint requirement your customer has, there's a high quality B-H product to suit.

The B-H line is a complete line, a superior quality line and a line well worth investigating.

Save the surface and you save all" *Paint & Varnish*

# BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

gallon is holding. An advance to $2.50 during the next few days would occasion no surprise. Deliveries are fair. A good volume of business is offering. Quotations are as follows:

| Turpentine— | | Imp. gal. |
|---|---|---|
| 1 barrel (barrel included) | .... | $2 45 |
| 2 to 5 barrels (barrel inclued) | .... | 2 44 |
| 5 gallon lots | .... | 2 55 |

## *Orders Still Coming In For Mixed Paints*

**Toronto.**

MIXED PAINTS.—Paint manufacturers state that they are well satisfied with the volume of business offering. Prices are holding without change.

## *Glass Still Scarce; No Change in Price*

**Toronto.**

WINDOW GLASS AND PLATE GLASS, especially the latter, are still very scarce. The demand is good and a fair volume of business is being handled. Jobbers find it difficult to supply some sizes. Manufacturers, it is said, are still exporting some in order to keep their foreign markets open. It is not generally known what the Belgian manufacturers will do. They are shipping some glass to this country, and it is thought their Government allows them to ship specified quantities in order to keep in touch with their former buyers. Some think it will be some time before they will be able to ship anything like their previous export. A change in price is not expected immediately. Manufacturers and jobbers are not taking advantage of the shortage and good demand to raise their prices. Toronto and London quote 30 per cent. on window glass, and 5 to 10 per cent. for sheets, less 2 per cent. cash. Montreal quote 20 per cent. on window glass and 5 per cent. for sheets, less 2 per cent. cash.

Quotations on putty are:

| Standard Putty— | 5 ton | 1 ton | Less |
|---|---|---|---|
| Bulk, in barrels | $5 35 | $5 60 | $5 95 |
| Do., 100 lb. iron | 6 20 | 6 45 | 6 80 |
| Do., 25 lb. iron | 6 45 | 6 70 | 7 05 |
| Do., 12½ lb. irons | 6 70 | 6 95 | 7 30 |
| Bladder, in barrels | 7 10 | 7 35 | 7 70 |

### PRICE MAINTENANCE QUESTION STILL IN COURT

When Colgate & Company won its decision from the Supreme Court of the United States and established the legality of what has since come to be known as the "Colgate Plan" for meeting price cutting, it was thought by many interested manufacturers that the matter had been settled and that the means were at hand for preventing the cut-rate dealer from pursuing his course without resort to special legislation to meet the trade evil.

Even this decision left a loop-hole, since the "Colgate Plan" merely provided that the manufacturer should refuse to sell to dealers who did not maintain the manufacturer's list price. It did not meet the possibility that a dealer who, though in his own retail trade maintaining the manufacturer's price, might sell to another who would resort to price cutting.

In its sales policy the Beech-Nut Packing Company has made this extension of the "Colgate Plan" and is now haled into court because of it. What is perhaps more important to all manufacturers is that the entire principle of the "Colgate Plan" is challenged, despite the fact that it has been sustained by the Supreme Court. The present action lies against the Beech-Nut Packing Company for violation of a law other than that on which Colgate & Company won their decision. It is now the Federal Trade Commission that declares that the Federal Trade Commission Act, rather than the Sherman Law, is violated and it has issued an order requiring the Beech-Nut Packing Company to desist from its practice of refusing to sell to the price cutters.

From this order the Beech-Nut Company has appealed, and the case will be argued before the United States Circuit Court of Appeals sitting in New York in October, Hon. Charles Evans Hughes appearing for the packing company as he did previously for Colgate & Company.

### STEEL COMPANY ENTERTAINS SAILORS

The Steel Company of Canada, Montreal, entertained the sailors in port at Montreal, one evening recently. This function was staged at the Catholic Sailors' Club, and the attendance was one of the largest and the entertainment one of the most successful of the season. It is stated that the attendance was greater on this occasion than that of any previous evening when similar entertainments were staged.

Mr. H. T. Diplock of the Steel Company occupied the chair, and his remarks were appropriate in that he paid tribute to the debt owed the seamen in the work they performed as trade carriers.

The programme was unusual and unique in many respects, and one of the appropriate numbers was that of the recitation by H. E. Skeates of an original poem written for the occasion and entitled: "The Steel Company of Canada to the Mercantile Mariners." Under the direction of Mr. Skeates and Mr. Geo. R. James, a varied programme was presented by the following: Miss Myrtle Noakes, Mr. R. Diplock, the Misses Watson, Miss Crossan, Miss Kathleen F. James, Mr. Edwin Brewer and Miss Brotman (songs), Mr. H. E. Skeates, violin selections; an exhibition of modern dances by Miss Irene Cassidy and Mr. Clarence Kindon, and of national dances by Miss Violet Arnott and Master Robert Baxter; a recital of Drummond's habitant poems by Miss Gladys Noakes; step-dancing by Miss Mary Critchley; and a piano solo by Miss Carrie Fredericks completed the citizen talent, that from the ships being by Messrs. Bullock (reciter), S.S. Tunisian; Briars, step-dancing; and Harrison, song, S.S. New Texas. Miss Mary Collins and Miss Fredericks accompanied. A vote of thanks on behalf of the club directors to the Steel Company of Canada for their interest in the sailormen was proposed by Mr. M. A. Phelan, K.C., honorary secretary.

## *Bicycle Prices For Next Season Higher*

The Canada Cycle and Motor Company, of Weston, Ont., has issued a statement that bicycle prices, both wholesale and retail, for next season are somewhat higher. Manufacturing costs have been steadily advancing, while prices have remained at the same level for some time. The C.C.M. management, the statement says, was loath to make any advance until they were absolutely forced to do so, and it was hoped that costs had at last reached the crest and might take a downward turn. Any such hope is now recognized to be futile. It is hoped, however, to avoid any further advance during the coming season.

**The Statement Says**

"A comparison of bicycle prices with those of almost any other commodity makes it very clear that bicycles are comparatively lower even yet than almost any other goods. Take hardware specialties for example, which are very closely akin in many respects to bicycles. Most of these goods have advanced from 100 to 150 per cent. since 1914, while bicycles have advanced only about 50 per cent. during that period. Food, clothing, office equipment, machinery and practically all other goods have also shown much greater advances in price than bicycles. It is therefore evident that considering also the higher wages now generally prevailing, bicycles are really within the reach of more people than formerly and are comparatively cheap at present prices.

"In addition, both the grade "A" and grade "B" models are now better equipped than ever before, and are therefore better value than ever for 1920. With such a line and at such reasonable prices the volume of sales for the coming season depends entirely upon the efforts made by the retail bicycle dealers of Canada."

### TO CONSIDER LEATHER PRICES

Of considerable interest to Canadian firms handling leather products was the annual convention of the Tanners' Council, held in Chicago on October 16 and 17.

The high prices of leather and leather raw stock were among the subjects discussed at the convention.

Another feature of the convention was the presence of a delegation of British manufacturers. These manufacturers are now touring the principal centres of the United States and are being welcomed by committees of tanners in each city visited by them.

## More Than a Mere Skate

Automobile Skates perform a greater service and give greater assurance of efficient skating than you can reasonably expect from an ordinary skate. That is why

**Automobile SKATES**
"The Skate with Aluminum Tops"

have become so popular with the best class of buyers, and are a splendid line for dealers to handle.

Our guarantee, which is enclosed with every pair of high-grade skates, means exactly what it says, so that neither dealer nor purchaser takes any chances whatever.

For prices, illustrated folder, terms, etc., write nearest office or head branch.

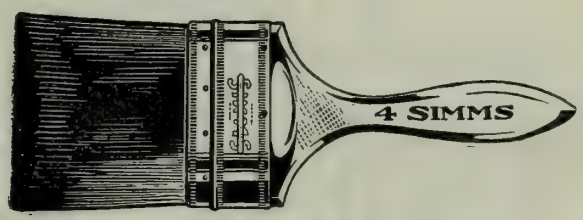
# Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

TRADE SIMMS SET IN RUBBER MARK



This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever — they are absolutely guaranteed **never** to come out.

Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.

Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

**T. S. SIMMS & CO., Limited**

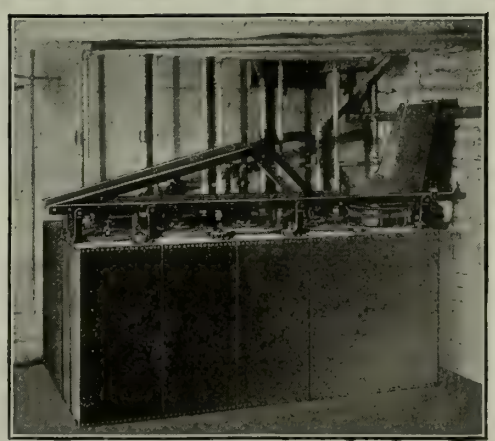
**Branches: Montreal, Toronto, London**



# System In Selling Paint Oils

No System—Lots of Waste and a Very Dangerous Fire Trap.

Haphazard methods in selling paint oils are dangerous and usually a losing proposition for the dealer.

There is one thing absolutely necessary to systematic and profitable handling of paint oils. That is modern storage equipment.

The Bowser Way—Pumps are on floor above. Systematic, Clean, Safe, and Saving.

## Bowser Paint Oil Storage Systems

are to the paint business what bookkeeping machines are to accounting—an economic necessity. They store the oils without loss from leakage or evaporation; give accurate measure, keep the oil room clean, make the labor of handling a small item.

If you are not using Bowser Storage Systems you are missing an opportunity to profit in your paint oil business.

# "61" FLOOR VARNISH

*Made in Eight Colors*

*"61" COLORS*
*Light Oak*
*Dark Oak*
*Mahogany*
*Walnut*
*Forest Green*
*Cherry*
*Natural*
*Dull Finish*
*Ground Color*

BOTH painters and home-owners know and use "61." They have full confidence in this durable, universally popular varnish which for thirty years has proven its superiority over ordinary varnishes.

Through a series of big, distinctive, human-interest magazine advertisements this fall, millions of householders, already familiar with the marproof, heelproof, waterproof qualities of "61" Floor Varnish, will be impressed with the beauty and economy of "61" Floor Varnish in eight beautiful, semi-transparent colors.

*Are you ready to get your share of this business?*

You'll get it if you tie your store up with this popular demand which means quick turn-overs for you. This line, backed by a seventy-year reputation for quality, is *worth knowing about!* Send a postal NOW for particulars!

Lowe Brothers LIMITED

# Why the Proposition is "Different"

Because the High Standard Agency has a service no one else has. A service that searches out the prospects in your locality, interests them and brings them to you in a receptive state of mind; a service that includes the consumer in interesting ways that hold him; a service that brings you trade—an *"individual" service.*

Lowe Brothers' proposition offers this "Different" Service and a backing of Aggressive Advertising that means quick turnover, continued sales and permanent, profitable business for you.

# Steady Sales
## *And Good Profits*

They have been steady for a long time; from the good-will begun the first day *Stephens'* Paints were manufactured. This good-will means much to you—to all of us concerned with *Stephens'* Paint. This good-will and prestige means sales volume—not only now but all the time.

Year after year *Stephens'* sales increase wonderfully, good will and prestige grow and of course the dealer's sales and profits keep pace with this.

If your paint and varnish business is established on a foundation such as this your competitor can only follow where you lead.

Write us about the *Stephens'* proposition. What it is doing for other dealers is good for you.

*Stephens*

# Clothes Washing

Practically every woman in every home, once a week, has to face the wash-day problem. And if you have something to offer her that will really free her from the dreariest and weariest of household tasks, it is bound to appeal.

**The Eden**

fills every requirement of wash-day labor-saving. It saves work, clothes and money and is the one machine that once sold, stays sold.

Simplicity of operation is an Eden characteristic. It has been designed from the woman's point of view and with this in mind it has been so constructed that all moving parts are enclosed and nothing to confuse or annoy the woman in her work.

DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

*The Trade Mark Behind Canada's*
*Largest Wholesale Hardware House*

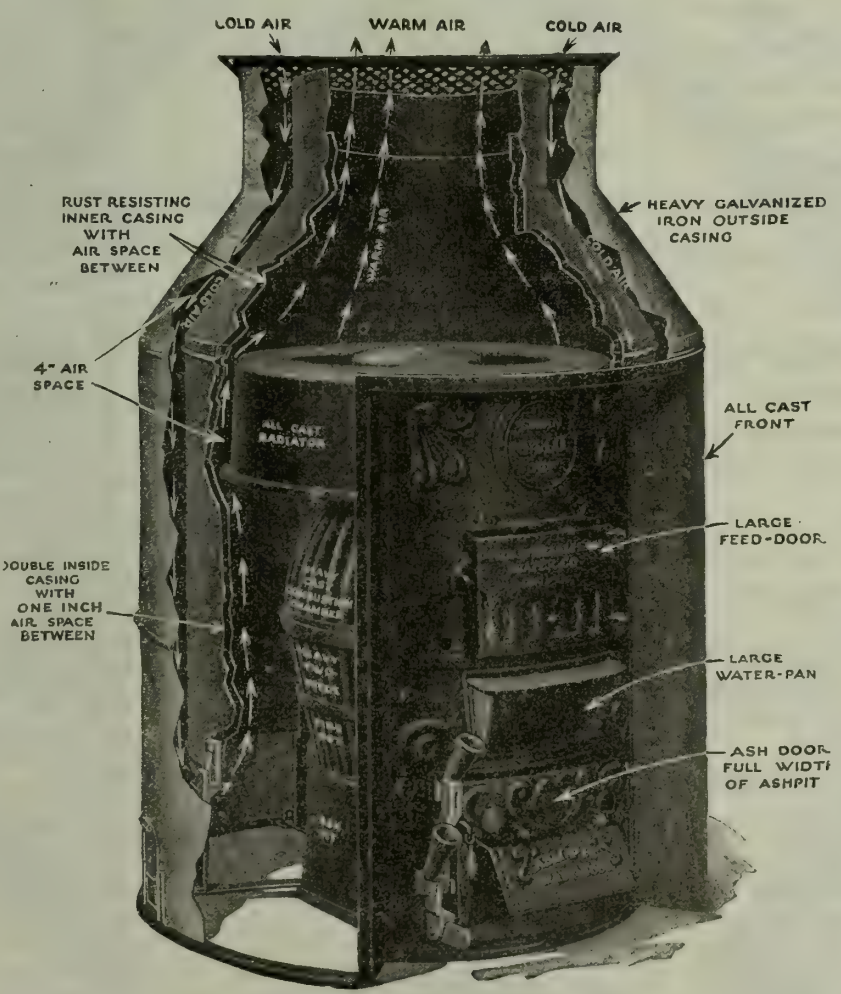
HERE is a popular high-grade all-cast type furnace in which you will be able to interest your customers without difficulty. You can assure them that a Williamson Pipeless Furnace will give all we say it does and eliminate the inconveniences so much to be feared by the careful purchaser.

# The Williamson Pipeless Furnace

## Gives

Clean, even, adequate heat. Healthful, properly humidified air.

Efficiency and economy.



The fire in the cellar and warm air in the rooms above.

A cellar that is just right in space and temperature.

A clean, roomy house. A safe heating plant, all heated parts surrounded by a jacket of cold air.

A guaranteed product, a sound investment.

has been devised to meet the demand that the popularity of this type of furnace has created and developed throughout the country.

**Write to-day for complete information and prices.**
**Every Williamson Pipeless Furnace sold means a satisfied customer.**

## Eliminates

The kind of heat that on a cold day freezes one side of the house and roasts the other.

High Temperature, dry air — the best conductor of sickness.

Big fuel bills and cold homes.

The fire in the house and the heat out the chimney.

A cellar crowded with pipes and a cellar either freezing or too hot.

Space - taking stoves and grates with soot, ashes and coal dust all over.

The constant menace to a home and children from fire.

The worry and chance of a losing proposition.

"Save the surface and you save all" Paint & Varnish

"Save the surface and you save all" Paint & Varnish

YOUR customer can save on those big jobs by using the Jamieson line of Prepared Paints and Varnishes.

And on the small jobs, too. Jamieson's are pure and uniform in quality and color — most for the money.

**The *value* of the Sharples dealer's contract is greater today than ever before—mainly because both the Sharples Suction-feed Separator and Sharples service to dealer or user are far ahead of anything offered by manufacturers of the old style, fixed-feed machines. That is why Sharples dealers are selected with care.**

*There are no Substitutes for Dairy Foods*

*Help to Make Dairying North America's Greatest Industry*

# SHARPLES SUCTION-FEED CREAM SEPARATOR

***Skims Clean at Any Speed***

No other separator manufacturer could put into five words or *fifty* words, as convincing an argument as "Skims clean at any speed." They tell the farmer about the durability of their separator, that it is well known, that it costs less and everything else *but* the *one* big reason for purchasing a separator—to get *all* the butterfat out of the milk. Sharples *also* has the exclusive advantage of no discs in the bowl; knee-low tank; once a month oiling system; durable construction and, besides, it is the pioneer North American Separator.

It is profitable, indeed, to handle the separator backed by provable sales points, such as outlined above. These points are constantly being placed before Dairymen through extensive Sharples Advertising.

THE SHARPLES SEPARATOR CO. TORONTO, ONT. REGINA, SASK.

The Lounsbury Co., Newcastle, N.B. J. Clark & Son, Fredericton, N.B.

*Distributors through all their branches.*

*Over 2,425,000 Sharples Separators in Dairy Use.*

# The Old Time Painter Knows Fall Painting Pays

M L QUALITY

It is the season of the year when the wood is in the best shape for painting; the wood has dried out for months in the summer sun. In the clear, cool autumn days the paint dries and sets under perfect conditions.

It pays the dealer, too. People are painting—inside and out—in the many homes going up everywhere. The Maple Leaf line means quick sales, good profit and satisfied customers for repeat sales.

M L FINISHES THAT ENDURE QUALITY

THE IMPERIAL VARNISH & COLOR CO. LIMITED

# CANADA PAINT

## "The Paint of Merit"

Now is the time to consider what your paint department has accomplished during the past season.

Dealers who have put in the Canada Paint line, which comprises a Perfect Finish for Every Surface, have at once noticed a steady increase in sales.

***Let us send you full particulars***

## The Canada Paint Co., Limited

HALIFAX MONTREAL TORONTO
WINNIPEG CALGARY

*Makers of the Famous "Elephant Brand" White Lead*

# *ONE dealer to a town and that one SUPPORTED*

Years ago we believed that by placing the Kyanize line with *one live dealer* in each locality—getting behind him and pushing, protecting him always—we would build up a profitable Kyanize business for him and ourselves. Our belief was well founded—it has been tested and proved absolutely correct. Ask *any* Kyanize dealer *anywhere*.

**Kyanize** KY-AN-IZE **Products**

## The Business-Building Varnishes and Enamels

are the highest quality varnishes and enamels it is possible to produce. Satisfaction to the consumer is unqualifiedly guaranteed or "money back for the empty can."

Backed by the strongest advertising campaign in the industry *for exclusive agents*, the Kyanize proposition gives to *one dealer in each locality* real sales-plans that bring *new customers* and a national magazine advertising campaign that covers the whole country in a dominant way.

You can't afford to overlook Kyanize—write us to-day for our *exclusive agency proposition* if there is no dealer in your town.

CHICAGO
Warehouse and Office: 59 Roosevelt Road.

# Just a few words about Hardware and Metal

HARDWARE AND METAL is Canada's national hardware weekly and has been published every Saturday since 1888 by the MacLean Publishing Co., Toronto, who publish fifteen papers.

HARDWARE AND METAL'S circulation is national, and has been audited by the Audit Bureau of Circulations.

HARDWARE AND METAL is edited by a staff of editors who have had practical hardware experience.

HARDWARE AND METAL'S weekly market service is one of its strongest features. Our reports are used as a basis for Canadian Government's annual report on wholesale prices.

Write to any 100 retail hardware dealers in Canada, asking them "Do you subscribe to HARDWARE AND METAL?"

If you will do this, you will use HARDWARE AND METAL too, for it is better than any other medium in Canada, gets your proposals home to the men of value to you as sellers of your goods.

***HARDWARE AND METAL*---Montreal, Toronto, Winnipeg**

## TRADE MARBLE'S MARK RIFLE SIGHTS

are in big demand because they met every shooter's need. The sights listed here are but a very small part of the wide variety we make.

### Marble's Flexible Rear Sight
A universal favorite with both professional and amateur sportsmen. Stem is not rigid, but is held by a strong spring in base. Does not break when struck. Spring permits sight to give and instantly brings it back to correct shooting position. Two discs furnished. **List price, $3.30.**

### Marble's V-M Front Sight

Has gold face and gold-lined aperture. Can be used only with a peep rear sight—preferably Marble's Flexible Rear Sight. Enables shooter to look directly at the object. **List price, $1.65.**

### Marble's Reversible Front Sight
Ivory or gold bead—1/16, 3/32 or 1/8 inch. Can be instantly reversed. **List price, $1.65.**

### Marble's Improved Front Sight

Gives shooter a long look ahead. Ideal for snap shooting. Ivory or gold bead. **List price, $1.10.**

### Sheard "Gold" Front Sight
Gold bead. Shows up well in dark timber will not blur. Shows same color on all objects. List price, $1.65.

**Above Prices Are List. Liberal Discounts to Dealers. Write for Special Sight Circular.**
